Economic Impact Highlights

- HCC gets 49% of its funding from the state government, and only 1% from county government. The remaining 50% comes from tuition and fees.
- 75% of HCC graduates remain in Hillsborough County.
- Education increases lifetime income. The average income at the career midpoint of someone with an associate's degree in Hillsborough County is \$46,300, 36% more than a student with a high school diploma.
- For every dollar students invest in HCC, they receive a cumulative \$5.10 in higher future income over the course of their working careers.
- Florida benefits from improved health and reduced welfare, unemployment, and reduced crime by HCC graduates, saving the public about \$7.6 million per year.
- From the taxpayer perspective (i.e. only benefits that directly increase tax collections and/or reduce government expenditures), HCC returns \$3 for every \$1 of state or county tax money invested.
- Former HCC students generate a cumulative \$786.5 million in added county income each year due to the higher earnings of former students and increased output of businesses.
- Hillsborough County receives approximately \$79.6 million in net added income each year due to HCC operations and the spending of out-of-county students.
- Altogether, HCC and its former students contribute about \$866.1 million in added income a year. This is approximately 1.5% of the total Hillsborough County economy.

Sustainability Initiatives at HCC

HCC's commitment to creating educational programs promoting sustainability and environmental sciences dates back to the

founding of the college itself—and continues to move forward as a priority today. As a signatory of the American College & University Presidents' Climate Commitment, HCC has created its own Climate Action Plan, which includes both educational and community outreach components.
