Interests

I enjoy writing and am currently seeking publication for a novel I've recently completed. Music is a mainstay for me and I play in a rock band as well as focus on home recording projects. I am fascinated with outmoded electronic instruments and also like to experiment with basic electronics projects. Traveling is always invigorating and, in particular, canoeing and camping in Florida's wilderness is a favorite activity. Lastly, my personal scholarship of late has focused on Futures Studies and I'm contemplating pursuing another graduate degree in this field.
