**Subject:** RE: IEC Apprenticeship course numbers

Beth:

In reviewing and seeking help from SCNS, below are the recommendations for renumbering/adding the Apprenticeship programs:

Commercial/Industrial Electrical – do not change numbering (only course titles and descriptions)

Residential Electrical – change course numbers to BCV 0880 through BCV 0884

Co-ops to go with both programs need to remain BCV 0950 through BCV 0957 (titles can be changed at the section level if needed)

Voice Data Video Program use EEV subject. Once I have the course descriptions, I can better estimate a numbering system (possibly a 0580 series). If it's all new, SCNS has an unused series, we might get assigned. It would be at the SCNS' coordinators discretion.

Hope this helps! When you have more information, I might be able to do a better comparison.

Debbie
