Hillsborough Community College reserves the right to make changes in the regulations, offerings, requirements and any provision announced in this catalog at any time as circumstances require.

President

Dr. Ken Atwater

Board of Trustees 2024-2025

Hillsborough Community College is governed by a Board of Trustees appointed by the Governor.

Mr. Gregory Celestan – Chair
Mr. Brian Lametto – Vice Chair
Mr. Arthur "Chip" Diehl III
Mr. Aakash M. Patel
Ms. Nancy Watkins
Ms. Lauren Gay – Student

Vision

To promote a thriving community in which students achieve their full potential by providing access to an affordable, innovative, high quality, and lifelong education.

Mission

To transform lives by providing open access to an exceptional teaching and learning environment that inspires students to contribute to the local community and global society.

Values

As one college, we dedicate ourselves to:

Student Success

Helping our students achieve their full potential by providing exceptional teaching and support services.

Service

Supporting the economy and cultural vitality of Tampa Bay through dynamic programming and partnerships.

Inclusion

Building a diverse environment where all backgrounds, beliefs and experiences are welcomed.

Sustainability

Embracing our role as a responsible steward of the social, environmental and economic resources that have been entrusted to us.

Integrity

Operating with transparency, accountability and the highest level of professionalism.

Innovation

Fostering a culture that welcomes the exploration of new ideas and creative endeavors.

Equal Access/Equal Opportunity and Educational Equity

Hillsborough Community College is an equal access/equal opportunity employer that makes employment and education-related decisions without regard to race, color, gender, religion, national origin, age, disability, sexual orientation, marital status or any other bias that is or may be prohibited by law. In addition, the college does not discriminate in employment practices or in the admission and treatment of students. HCC is committed to equitable treatment of all students and employees and to a learning and working environment free of discrimination and harassment for current as well as future students and employees. The college provides equal educational opportunities to qualified individuals with disabilities and complies with, as well as, supports the Americans with Disabilities Act.

HCC's equity officer ensures compliance with federal and state laws prohibiting discrimination and sexual harassment.

Employees and students who believe they have been a victim of discrimination or sexual harassment should contact:

Annazette Houston, Chief Diversity Officer
DGWS District Administration Center
4115 N. Lois Avenue
Tampa, FL 33614
Telephone: 253-7043
Email: ahouston14@hccfl.edu

Accreditation

Hillsborough Community College is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate and baccalaureate degrees. Hillsborough Community College also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Hillsborough Community College may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website www.sacscoc.org

Hillsborough Community College also meets the requirements of the following:

The Florida Department of Education

The Joint Review Committee on Education in conjunction with the Committee on Allied Health Education and Accreditation (CAHEA) of the American Medical Association

Commission on Community College Accreditation, National Association of Schools of Music (NASM).

The State of Florida approves HCC for veteran's training.

The State of Florida recognizes HCC as a training center for Emergency Medical Services.

- The Florida Department of Law Enforcement certifies HCC as a regional training center for law enforcement, corrections, and correctional probation officers.

Admissions and Registration

Steps for Admission

1. Application
2. Financing your education
3. Transcripts / Academic Evaluation
4. Orientation and Registration

For more information and to apply online, go to https://www.hccfl.edu/admissions

International Students (F-1 Student Visa Status)

Students planning to attend the College on an F-1 student visa must submit an International Student Application. For more information and to apply online, students should refer to the section below or go to the Center for International Education (CIE) website at www.hccfl.edu/international.

Admissions Policies

HCC maintains an "open-door" policy. Students may be admitted if they meet one of the following criteria:

Graduated with a standard diploma from a secondary school

- Earned a high school equivalency certificate or diploma through any state Department of Education or through the military
- Earned a Certificate of Completion, Eligible for College Placement Test (W8A) (graduating class of 2003 forward)
- Completed a home education program pursuant to the requirements of F.S. 1002.41
- Applied as a transfer student
- Applied as a transient student

The graduation requirements of the catalog year in which a student initially enrolls will be valid for six years. Students who graduate after six years from the time of their initial enrollment will graduate under the requirements of the catalog in effect during the academic year in which they wish to graduate.

Exceptions:

- Programs deleted from the College inventory have a two-year teach-out time period, and students must complete a deleted program within the two-year teach-out period;
- State Framework changes or other changes coming from the state supersede the six-year time period.

In order to maintain the college ideals of scholarship and deportment, the right is reserved to deny admission to applicants for any reason, deemed to be in the best interest of the college.

Admissions Requirements

Associate Degree, College Credit Certificate Programs, and Applied Technology Diploma

To be eligible for admission to an associate degree program, college credit certificate, or applied technology diploma (F.S. 1007.263), applicants must have one of the following:

- Associate or higher degree or a standard high school diploma.
- Florida public high school graduates must have met Florida graduation requirements (F.S. 1003.43).
- A high school equivalency diploma, or
- Completion of a home education program pursuant to the requirements of F.S. 1002.41.
- Some PSAV programs are excluded from this requirement.

NOTE: If the applicant received a special high school diploma such as the Certificate of Completion (W08) or an other special high school diploma and wishes to apply for admission as a regular student, a high school equivalency diploma must be earned by successfully completing the GED exam offered through the Florida Board of Education.

There may be additional requirements for limited access programs. Check the webpage at httpss://www.hccfl.edu/academics or in the associate degrees/technical programs section of this catalog.

IMPORTANT: Students who hold education certificates from countries other than the United States should refer to the International Students section in this catalog.

Distance Learning Students

Declaration of Current Location

Every student is required to report a current location address at the time of application. Any change of current address should be reported to the Office of the Registrar immediately after the effective date. To comply with federal and state regulations and reciprocity agreements, currently enrolled students are required to confirm their address every 120 days. The physical location of the student during an educational activity may impact HCC's authorization to offer on-line education to the student.

SARA for State Authorization Distance Education Compliance

Hillsborough Community College has been approved to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA which is a voluntary, regional approach to state oversight of postsecondary distance education. NC-SARA allows students located outside of the State of Florida to enroll in HCC's distance learning courses. Reciprocity agreements allow for the

open delivery of distance learning courses and other aca demic pursuits including field experiences such as intern ships or practicums, within participating states.

Non-SARA Participating States/Territories:

The Commonwealth of Mariana Islands (CNMI) is cur rently not a member of SARA. Due to authorization re quirements specific to each state, residents of the CNMI are not allowed to participate in distance learning classes at HCC at this time. To learn more about SARA, please visit https://www.fldoe.org/sara

Students Located Outside of Florida and Professional Li-censure-NC-SARA

Hillsborough Community College offers various pro grams and certificates designed to prepare students to sit for licensure in Florida. Licensure requirements in other states may vary. If you are currently pursuing a program or certificate that leads to professional licensure, your pro gram administrator will provide another communication with information on your particular state. If you have not yet declared a program of study, please contact the aca demic program of interest. You will then be provided with information specific to the program and your state of loca tion.

Former Student Returning

Students maintain an active application status by at tending HCC at least one term in an academic year. A new HCC application must be competed once a student has broken enrollment or has not attended classes for three consecutive terms. Former students do not have to pay additional application fees. A former student return ing to the college and pursuing a degree or certificate must meet the graduation requirements of the catalog in effect at the time the student returns to continuous enroll ment at HCC.

NOTE: Since the college strives to provide the community with up-to-date, postsecondary educational opportunities, HCC's curriculums are constantly reviewed and are often revised. HCC does not guarantee that the college will con tinue to offer previously required courses or their prereq uisites made unnecessary by changes in programs.

Transfer Students

If students have attended other postsecondary institu tions, they may be admitted as a transfer student. Students must provide their high school and or previous college transcripts prior to attendance.

Transient Students

Students attending other colleges or universities who wish to take courses at HCC in order to fulfill degree re quirements at their home institutions may be admitted as transient students. Prior to registration, if students wish to apply as transient, they must submit, at least 30 days prior to the applicable registration deadline, a transient applica tion and documentation from the home institution that:

Certifies they are in good academic standing.

Indicates the HCC courses in which students may en roll.

- Affirms that they may use the courses completed and credits earned at HCC to meet the program require-ments at the home institution.
- NOTE: All lecture and lab co-requisites MUST be taken together regardless of home institution ap-proval. A transcript showing successful completion of the lecture or lab must be shown to be exempt from the co-requisite requirement.

Students attending a Florida postsecondary institution must submit this information via the transient application at www.floridashines.org.

Transient students are not required to provide official transcripts of their previous college coursework. How

In addition to completing the HCC application, stu dents must submit an Honors Program application, along with supporting documents. Students should visit the Honors website (www.hccfl.edu/honors) for the most up to date admissions process information.

Applicants must meet at least one of the following cri teria to qualify for the Honors Program:

- A high school GPA of 3.5 (unweighted) or higher and college level in verbal of SAT/ACT or
- An SAT combined score of 1230 (old SAT 1160) or higher in Critical Reading and Math
- An ACT composite score of 26 or higher or
- Top 10% of graduating class with SAT combined score of 1130 (old SAT 1050) or ACT composite score of 25 or higher,
- Completion of 12 credit hours of dual enrollment courses with a 3.5 GPA or
  A cumulative GPA of 3.5 or higher with a minimum of six semester hours of college-level courses (for univer sity or college students).

To graduate from the Honors Program, students must complete a minimum of 24 credit hours of Honors courses (including IDH 2931H) with a minimum overall GPA of 3.0.

For more information about the HCC Honors Program, call 813-253-7974 or 813-253-7986 or email **honors@hccfl.edu**

International Students

HCC welcomes students from all over the world. International students include students with non-immigrant visa classifications, such as A, F, H, J, or M.

The Center for International Education (CIE) provides services to all international students attending HCC on F 1, F-2, and M-1 student visas. Students in other visa categories should contact the office of admissions, registration, and records at the campus they plan to attend for assistance in enrolling at HCC, unless they are planning to change their status to F-1.

The admission procedures specified below are for international students intending to study at HCC on an F-1 student visa. To be considered for admission, an F-1 student must (1) demonstrate competency in the English language; (2) document sufficient funds to cover educational and living costs; (3) provide proof of graduation from a secondary school; and (4) submit an International Student Application by the given application deadline.

Specifically, the student must meet the following admissions criteria:

- Completed International Student Application (initial or transfer student) at www.hccfl.edu/international.
- $50 international student application fee (non-refundable). This may be paid online, by international wire transfer through www.flywire.com, or in person at the Campus Bursar Office.
- Statement of financial responsibility, which documents sufficient funds to cover the cost of tuition, room and board, books, personal expenses, health insurance and travel for at least one academic year (two semesters). Financial documentation (Affidavit of Financial Support and bank letter) must be issued within six months of the term the student plans to enroll. Please visit the CIE website at www.hccfl.edu/international for more detailed financial documentation requirements.
- Proof of English language or proficiency by meeting one of the following conditions: A score of 61 or higher on the internet-based TOEFL (Test of English as a Foreign Language); an overall band score of 5.5 on the IELTS (International English Language Testing System); a score of 4.0 or higher on the iTEP (International Test of English Proficiency); a score of 95 or higher on the Duolingo English Test; successful completion of Kaplan High-Intermediate Level; successful completion of Level 6 at Tampa Language Center; successful completion of the Advanced Level 2 at OHLA Open Hearts Language Academy Schools; successful completion of Level 4 at INTO USF or Level 109/Advanced Levels at an English Language Center (ESL); graduation from a U.S. high school with a standard high school diploma after having attended that school for at least two years (not including ESOL classes) and attaining a grade of "C" or higher in English; or an official transcript proving successful completion of ENC 1101 at a regionally accredited post-secondary institution. For additional ways to prove English language proficiency, go to www.hccfl.edu/international
- Documentation of high school graduation or an equivalent level of education. Students who have completed high school and/or post-secondary coursework outside of the United States should refer to the section below regarding translation and evaluation of foreign credentials.
- Copy of passport photo page.

F-1 students transferring from a U.S. institution must submit additional documentation:

- Copy of current Form I-20, copy of F-1 visa; transfer clearance form completed by current school's International Student Advisor.

After being admitted as an F-1 international student at HCC, students must submit proof of health insurance, attend a New International Student Orientation and, if applicable, take a placement test before registering for classes.

Proof of health insurance. HCC requires all F-1 visa students to maintain adequate health insurance throughout their studies at the College. Proof of insurance is mandatory for each year of enrollment. Visit www.insuranceforstudents.com for more information and to enroll in the HCC-endorsed health insurance plan.

Important information for students who have completed high school and/or postsecondary work outside the United States:

Transcript(s) in English (original document in the original language and a certified English translation) from high school and from all previously attended colleges and universities must be evaluated by an agency accredited by NACES (National Association of Credential Evaluation Services at www.naces.org). A document-by-document evaluation is required for high school transcripts. Certain countries are exempt from the high school transcript evaluation requirement. Refer to the admission requirements on the CIE website at www.hccfl.edu/international for a list of exempt countries. A course-by-course evaluation is required for all foreign college and university transcripts. Foreign transcripts in original English do not need to be translated. Students can obtain the names and addresses of approved evaluation service providers at www.naces.org.

NOTE: Students are responsible for all costs associated with obtaining translations and evaluations of their transcript(s).

Articulated Acceleration for High School Students

High school students may earn college credits through articulated acceleration, (Florida Statute 1007.271). These acceleration options are dual enrollment and early admissions. Students who satisfy the following requirements may qualify for admission as a student in one of these categories:

Dual Enrolled High School Students

(Florida Statute 1007.271

Students who enroll as a dual enrolled student can earn college credit by attending college-level courses taught by HCC instructors at an HCC campus before, dur ing, or after high school and during the summer, or at an identified high school during the regular class day. Cred its for the courses satisfactorily completed will apply to ward both the high school diploma and toward an associate or baccalaureate degree. Dual enrollment courses will not count as excess hours in the 60-hour requirement of an associate in arts or an associate in science degree.

Application fees and tuition are waived and textbooks are provided for Hillsborough County public school stu dents accepted through the dual enrollment program.

Students attending college classes must be mindful that they will be in a learning environment that explores a diverse and open range of ideas that requires a mature un derstanding of multiple perspectives. All students, in cluding dual enrolled students, must be able to engage in discussions in a mature and responsible manner.

To be eligible for consideration for admission as a du ally enrolled high school student, one must meet the fol lowing requirements:

- Be in high school.
- Provide a high school transcript showing an un-weighted cumulative grade point average of 3.0.
- Provide written authorization from the high school principal or his/her designee.
- Achieve appropriate placement scores on the SAT, ACT, or the written or computerized version of the PERT (Postsecondary Education Readiness Test).
- Submit a Special Category Student form (Home Education Students).
- Submit an HCC Dual Enrollment application for admission.

No student will be permitted to participate in dual en rollment classes without having met eligibility and appli cation requirements. Per state statute, Dual enrollment students are allowed only one attempt per course. They may petition for a retake of only one class during their time as a Dual Enrollment student.

To remain eligible as a dually enrolled high school stu dent, one must maintain a 3.0 high school GPA and a 2.0 HCC GPA.

Early Admission

Early admission is a form of dual enrollment. Students are admitted through the early admission option of dual enrollment when they register at HCC as a full-time stu dent (12 or more credits) during their senior year of high school.

Credits for the courses completed satisfactorily at HCC will apply toward the high school diploma and toward an associate or baccalaureate degree. Application fees are waived for students accepted through the early admission program. Tuition is waived for early admissions students for all courses taken through this program while they are still in high school.

NOTE: To be eligible for consideration for admission through the early admission program a student must meet the following requirements:

- Be a high school senior.
- Provide written authorization from the high school principal or designee.
- Provide a high school transcript showing an un-weighted cumulative grade point average of 3.5.
- Achieve appropriate placement scores on the SAT, ACT, or the written or computerized version of the PERT (Postsecondary Education Readiness Test).
- Submit a Special Category Student Form (Home Education Students).
- Submit an HCC application for admission.
- If approved for early admission, meet with an HCC counselor to complete the registration process.

For additional eligibility requirements visit our website https://www.hccfl.edu/admissions/dual-enrollment and-early-admissions

cation and the courses they intend to take at HCC as a du ally enrolled student.

NOTE: Private schools must meet requirements for F.S. 1002.42 and 1003.43 and have an articulation agreement on file with HCC in order for their students to participate in dual enrollment and early admissions programs.

NOTE: Public and private high school students interested in participating in the dual enrollment program must con tact their high school counselor for information and to de termine eligibility. Students enrolled in home education programs may contact the HCC Office of Accelerated Learning which oversees Dual Enrollment for information.

Concurrent Admissions Program (ConAP)

HCC participates in the United States Army Concur rent Admissions Program (ConAP). As a ConAP member, HCC will admit eligible new soldiers upon their enlist ment. Moreover, the college guarantees full admission during the soldier's entire enlistment and for two years af ter the applicant completes active military service.

Soldiers enlisting in the Army Reserve are also eligible for consideration under the ConAP program. However, the admission guarantee for qualified Reservists is de ferred until the Reservists complete their initial period of active duty training (about six months).

Admissions Procedures

Application

NOTE: HCC reserves the right to guide the enrollment of its students on the basis of placement tests, pre-registra tion interviews and past academic performance.

Applications for admission can be obtained and sub mitted on-line at https://www.hccfl.edu/admissions/ap ply-hcc. Applicants must attend within one year of admission. Otherwise, a new application and possibly transcripts will be required.

International Students (F-1 Student Visa Status)

Students planning to attend the College on an F-1 stu dent visa must submit an International Student Applica tion. For more information and to apply online, students should refer to the section above or go to the Center for In ternational Education (CIE) website at https://www.hccfl.edu/international

Transcripts

Students whose transcripts do not arrive prior to the start of the semester, will not be eligible for financial assis tance or veterans, or other benefits.

Applicants are responsible for ensuring that official copies of high school transcripts, GED scores, or copy of degree earned and official transcript(s) from all postsec ondary schools attended are submitted to the college.

Applicants who completed a home education program must provide a signed affidavit affirming completion.

NOTE: A final, official high school transcript is one that includes the official graduation date.

NOTE: For transcripts outside the United States refer to the International Students section of this catalog (Im portant information for students who have completed high school and or postsecondary work outside the United States).

Fraudulent Credentials

If a student knowingly:

- Makes a false statement,
- Conceals material information,
- Provides inaccurate information on any document submitted to the college,
- Alters a transcript or other academic credential

He or she may be denied admission, suspended or dis missed.

Enrollment Restrictions

Under normal conditions, all students who meet the college's entrance requirements will be admitted. At times, state enrollment and funding limitations may pre clude enrollment of out-of-state and international stu dents. At those times, students will be admitted according to the following priorities:

- Returning students/Veterans
- New students who are Florida residents
  a. First-time-in-college students
  b. Transfer students
- New out-of-state students
  a. First-time-in-college students
  b. Transfer students
- International students

NOTE: HCC participates in priority registration. De pending on your status, HCC will determine your regis tration dates. These dates are advertised on the Web and the college calendar.

The college reserves the right to deny admission to ap plicants whose past actions were disruptive to or inter fered with the orderly processes, functions, or programs of another postsecondary institution. In addition, HCC may deny admission to students who are ineligible, for any rea son, to resume their studies at another postsecondary in stitution.

Orientation and Testing

Students attending HCC for the first time must attend orientation and, if applicable, take a college placement test. Once the student has been admitted, the appropriate testing, admissions and registration, or advising office will provide information about orientation and testing. The college will provide reasonable accommodations to disa bled students taking the placement test.

Degree-seeking students must provide assess-ment/placement test scores from PERT, ACT, or SAT prior to registering for classes. Test scores may be no more than two years old. If the scores are older than two years or if the student has not previously taken one of the afore mentioned placement tests, the student may take the test at the appropriate HCC testing office.

The following test scores are required for college-level courses:

	ACT Enhanced	PERT	SAT I
Reading	19	106	24 (Verbal)
English	17	103	n/a
Mathematics	19	114	24

NOTE: The minimum required scores on the PERT (Post secondary Educational Readiness Test) are subject to change. Students testing into college preparatory course work are subject to certain regulations regarding registra tion.

Students who have earned a four-year degree or com pleted college-level English and mathematics courses will be exempt from the testing requirement. The college strongly recommends that students who have completed postsecondary work at other institutions bring unofficial transcripts or grade slips with them for advising and reg istration purposes.

Residency Requirements

For the purpose of assessing registration fees in public community colleges and universities, students are classi

fied as Florida residents or non-Florida residents per Florida Statute **1009.21** and State Board of Education Rule **6A 10.044**

According to Florida statute, in order to pay in-state tuition, students must complete a declaration of residency (included in the application for admission) prior to the drop and add period of the term for which Florida Residency is sought. To qualify for in-state tuition, a student must be a U.S. citizen, permanent resident alien or legal alien.

For other eligible non-citizen categories or for a list of exemptions from the residency process, refer to the **Guidelines on Florida Residency for Tuition Purposes**. Exempt students are required to provide documentation of exemption eligibility.

For current and detailed information about Florida residency for tuition purposes visit Florida Shines at https://www.floridashines.org/, click on Apply, click on Residency Guidelines or visit HCC's student services web site at https://www.hccfl.edu/admissions/proof-residency-tuition-purposes. When applying through the Florida Shines website, documentation to support an application for in-state tuition on the basis of legal residence for statutory exemption is required.

Residency Criteria

The HCC application includes a Florida residency affidavit which must be completed. An applicant who does not complete the residency affidavit or provide incomplete documentation on or in conjunction with the residency affidavit will not be classified as a resident for tuition purposes and will be required to supply information prior to the end of drop and add.

If a student indicates his or her status as non-resident, they are not required to prove such status or to submit supporting documentation. The student is automatically considered out-of-state for tuition purposes.

Independent Student

An applicant who provides evidence of any one of the following criteria shall be classified as an independent student for the determination of residency for tuition purposes.

- The student is 24 years of age or older by the first day of classes of the term for which residency status is sought as a Florida institution; or
- The student is married; or
- The student has children who receive more than one-half of their support from the student; or
- The student has other dependents who live with and receive more than one-half of their support from the student; or
- Both of the student's parents are deceased or the student is or was until age 18 one of the following: a ward/dependent of the court or in foster care; or
- The student is determined an unaccompanied homeless by a school district homeless liaison, emergency shelter or transitional housing program; or
- The student is working on a master's or doctoral degree during the term for which residency status is sought at a Florida institution; or
- The student is employed and provides a tax transcript of income equal or exceeding 50% of full-time annual cost of attendance stipulated by financial aid. Cost attendance can be found on our website at https://www.hccfl.edu/paying-college/cost-attendance

Dependent Student

All students who do not meet the definition of an independent student shall be classified as dependent students for the determination of residency for tuition purposes.

Dependent students will be granted in-state residency for tuition purposes if the residency affidavit on the college application indicates that **all of the following criteria are met**. Further documentation will not be required for these students.

- The student is eligible to be claimed by his or her parent or legal guardian as a dependent under the federal income tax code;
- The student's nation of citizenship is the United States;
- The student is under 24 years of age;
- The student's mother, father or legal guardian is the person claiming Florida residence;
- The student's mother, father or legal guardian claiming Florida residence has a Florida permanent legal address; and

  The student's mother, father or legal guardian claiming Florida residence provides written or electronic verification that he or she has been issued two or more of the acceptable documents in the following Acceptable Documents for in-State Tuition Application section. Such documentation must demonstrate that the applicant has maintained legal residence in Florida for at least 12 consecutive months prior to his or her initial enrollment in a university or college.

Acceptable Documents for In-State Tuition Application

Applicants will have to submit documentation that they or a parent or legal guardian have been a Florida resident for at least 12 months prior to the first day of the classes for which they are enrolling. At least two of the following documents must be submitted with dates that evidence the 12-month qualifying period.

Documentation submitted after the drop/add period will not become effective until the following semester. There must be no information contradicting the applicant's claim of residency.

At least one of the two documents submitted must be from the following:

- Florida driver's license;
- State of Florida identification card;
- Florida voter registration card;
- Florida vehicle registration;

- Proof of a permanent home in Florida occupied as the primary residence of the student or by the student's parent if the student is a dependent child;
- Proof of homestead exemption in Florida;
- Transcripts from a Florida high school for multiple years if Florida high school diploma or GED was earned within last 12 months;
- Proof of permanent full-time employment in Florida (one or more jobs for at least 30- hours per week for a 12-month period).

The following documents may be used in conjunction with one of the documents listed above:

- A declaration of domicile in Florida;
- A Florida professional or occupational license;
- Florida incorporation;
- Documents evidencing family ties in Florida;
- Proof of membership in Florida-based charitable or professional organizations;
- Any other documentation that supports the student's request for resident status including but not limited to utility bills and proof of 12 consecutive months of payments, a lease agreement and proof of 12 con secutive months of payments, or official state, federal or court documents evidencing legal ties to Florida.

Unacceptable Documents for Proof of Residency

- Hunting/fishing license
- Library card
- Shopping club/rental card
- Birth certificate
- Passport

Active duty military personnel assigned for duty within the state, as well as their sponsored dependents (spouse/children) are automatically Florida residents for tuition purposes. For verification, they need to submit a copy of their assignment orders and have their military ID card showing their status visually verified.

Information Resources

DHSMV Database-Access to the Division of Highway Safety and Motor Vehicle Database can be used exclu sively for the purpose of verifying driver's license, vehicle registration for students and their parents.

The Florida Dept. of State Voters Registration Look Up site can be used exclusively to verify voter registration status. https://registration.elec tions.myflorida.com/CheckVoterStatus

Requirements for Reclassification of Florida Residency for Tuition Purposes

Except as otherwise stated, a student who is classified as a non-resident for tuition purposes may become eligible for reclassification as a Florida resident for tuition pur poses by presenting a minimum of three (3) documents, one of which must be from the first group of documents and two (2) documents can be from either of the two groups previously identified under "Acceptable Docu ments for In-State Tuition Application" that demonstrate the establishment of permanent legal residence in Florida other than for the sole purpose of pursuing a postsecond ary education.

In addition, documentation must demonstrate that the independent student has, or the dependent student's par ents have, maintained legal residency in Florida for at least twelve (12) consecutive months prior to the student's request for reclassification.

Students interested in pursuing residency reclassifica tion or to appeal an initial residency classification decision may do so by contacting the dean of student services at any HCC campus. Requests for reclassification will be re viewed by HCC's Residency Appeals Committee.

Transfer Credit

HCC will accept transfer credit from other institutions if they are accredited by one of the following regional ac creditation agencies:

HLC: Higher Learning Commission

MSA: Middle States Commission on Higher Education

NECHE: New England Commission of Higher Education

NWCCU: Northwest Commission on Colleges and Universities

SACS: Southern Association of Colleges and Schools, Commission on Colleges

WASC-JR: Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges

WASC-SR: Western Association of Schools and Colleges, Senior Colleges and University Commission

HCC conducts transcript evaluations for all lower divi sion credit course work and upper division credit course work as appropriate, even when a prior degree has been earned. Applicants must provide official transcripts from each postsecondary institution they have attended.

For courses taken at accredited institutions, transfer credit will be awarded for courses in which a grade of "D" or better has been earned. Transfer courses taken at an in stitution where a plus/minus system was used will be rounded up or down to the corresponding whole letter grade.

Since certain HCC curricula and programs require that students earn a grade of "C" or better in specific courses, transfer students should meet with advisors to determine if courses taken elsewhere meet degree requirements. All students must complete 25 percent of their degree at HCC.

HCC reviews the content and objectives of courses completed at non-regionally accredited institutions on a course-by-course basis. Applicants must provide HCC with all required documents before the college will con sider awarding transfer credit.

The transcript office notifies students when evalua tions are complete.

Registration

Registration is held each semester. Students register through MyHCC which is covered in detail during orien tation. Students may seek assistance from any campus

Admissions & Registration or Academic Advising Office. The dates for registration are published in the college operational calendar in the front of this publication, and on the HCC Website.

HCC may withhold registration privileges from students who have unpaid fees; who have overdue student loans; who have overdue library materials, audiovisual equipment, or physical education equipment; who have failed to provide transcripts or other documents required for admission purposes; and who have been disqualified for academic or disciplinary reasons.

Audit Registration

Students who have been admitted to HCC but who wish to take courses without receiving credit may register as audit students. The following guidelines apply:

- Students must make the choice to audit when they register.
- Students may change from audit to credit or credit to audit only during the drop/add period.
- Fees for audit and credit courses are the same.
- Students should confirm their audit status with the instructor on the first class date.
- Students auditing classes are not eligible to receive veterans' benefits or financial aid for those classes.
- Students receiving senior citizen fee waivers are registered as auditing students.
- Students auditing classes must meet all course prerequisites including appropriate test scores.
- College preparatory courses follow state-mandated guidelines and requirements. Auditing these classes might not be an available option. (For details, see the college preparatory section in this catalog.)
- Attendance is optional.

Course Load and Enrollment Status

All courses carry a specified number of credits. The unit of credit is the semester hour. Courses requiring laboratory work or skill practice may meet for more minutes each week than the credits they confer.

The college strongly recommends that students enrolled for 12 or more credits limit their employment to a maximum of 20 hours per week.

Enrollment status can change during a term. For example, if a student initially registers as full-time and withdraws from a course during a term, the student's course load might fall below 12 credits. The student's enrollment status will be reduced to less than full-time from that point until the end of the term.

Registering as a full-time, three-quarter, or half-time student can affect eligibility for financial aid, veterans' benefits, scholarships, insurance benefits and international student visas. Students receiving financial aid should speak with a financial aid specialist about the enrollment requirements for receiving aid.

If students request in writing to the office of admissions and registration, they will provide verification of enrollment to employers, insurance agencies, and others.

For courses that do not coincide with the Board of Trustees' approved beginning and ending dates of a fall, spring or summer term, course load and enrollment verifications will be based upon the term in which the course begins, regardless of the actual meeting dates.

Enrollment status is based on the following course-load criteria:

Full-time: taking 12 or more credit hours during a term.
Three-quarter-time: taking nine to 11 credit hours during the term.
Half-time: taking six to eight credit hours during the term.
Less than half-time: taking five or less credit hours during the term.
Course Overload: Students can enroll in a maximum of 18 credit hours per semester (includes: Fall, Spring, and Summer terms of enrollment).
Students may exceed the credit maximum with approval from a student services faculty counselor (https://www.hccfl.edu/support-services/counseling). Requests will be evaluated on a case-by-case basis. Approval or denial of a credit overload request will be based on the review of the student's past academic history, grade point average, current courses requested and any other relevant factors.

Limiting Academic Programs

A student is allowed to pursue the following academic programs:

One Associate of Arts (AA) Degree
AND
A maximum of Two Associate of Science (AS) Degrees
AND/OR
A maximum of Four College Credit Certificates (CCC)

Programs MUST be considered related or stackable, as defined below.

- Related Programs: Programs that are aligned with one another, enhancing the student's academic and professional skills in the same area or field of study.
- Stackable Programs: Programs designed to be completed in a sequence, where credits or credentials from one program can contribute towards the completion of another.

Change of Academic Program

Students who are changing their program code and who are receiving Financial Aid, Veteran's Benefits and/or are enrolled as an International student, must check with the necessary departments to be sure their benefits will not be affected before making the change. If the current semester has begun, the change of program will be effective the following semester.

Course Adjustment Drop and Add

Schedule adjustments must be made during the drop/add period. Students should check their class schedule on MyHCC for the drop/add and withdrawal dates for each course.

IMPORTANT: If students stop attending a course but fail to officially drop or withdraw from the course, they will not be relieved of the financial obligation, and they might receive a failing grade.

Withdrawal Policy

Students may officially withdraw from one or all courses prior to the course withdrawal deadline date for each. The withdrawal deadlines are on the student schedule in MyHCC. Students who officially withdraw are issued a "W" grade. A student may withdraw using My HCC Self-Service or visit a campus AR&R department to complete this process.

IMPORTANT: Withdrawing from a course or courses may affect enrollment status and eligibility for athletics, financial assistance, veteran's benefits, international student visas, and benefits received from other federal agencies.

If students do not officially withdraw by the deadline, the instructor must assign a letter grade other than "W" to the grade report. If students have serious extenuating circumstances, they may petition the appropriate campus dean of student services for a late withdrawal. Students who officially withdraw from a class may not continue attending that class.

Instructors report non-attendance to the office of admissions, registration, and records, and an administrative withdrawal is initiated. The college will notify students whom the faculty has recommended, and the students will be given an opportunity to appeal the instructor-initiated withdrawal.

Repeated Course Attempts

Students may attempt a course only three times (including original grades, repeat grades, and withdrawals). Through the academic appeals process, students with significant extenuating circumstances may petition for a fourth attempt. To begin the academic appeals process, students must contact the appropriate campus dean of student services. All grades from the third and any subsequent attempts will be included in the grade point average calculation.

Students must pay the full cost of instruction (equal to out-of-state fees) for credit classes they attempt a third time and any additional times. If students have serious extenuating circumstances, they may petition the appropriate campus dean of student services for a one-time exemption from paying the full cost of instruction.

Microcredentials and Acceleration Mechanisms

Advanced Placement (AP)*

HCC awards college credit for scores of three, four, or five on the College Board Advanced Placement Program examinations given at high schools each May. Once credit is awarded, the student may not repeat the course for a letter grade. No credit will be awarded to students who have previously been awarded CLEP or regular college credit for the same course.

* **NOTE:** To see course equivalencies and related information, refer to www.floridashines.org.

Certified Administrative Professional

HCC will award 12 semester hours of credit to students who have passed the Certified Administrative Professional exam and earned the designation "CAP." (For further information, contact the appropriate campus academic dean or the Director of Technical Programs.)

College Level Examination Program (CLEP)*

CLEP provides an opportunity for those who have achieved a college level of education outside the classroom to demonstrate their achievement through testing and to earn college credit.

The advising and counseling staff can assist a student in determining which CLEP examination to attempt. CLEP tests are given at the Dale Mabry and Brandon Test Centers on the published dates. Applications are available at any HCC campus.

Students may earn up to 45 semester hours. The grade of satisfactory "S" is awarded for CLEP credit earned. Once credit is awarded, the student may not repeat the course for a letter grade.

NOTE: A student who is currently enrolled in a course is not eligible for CLEP credit for that course. A student who has completed a course and the grade earned was a "D" or an "F" is eligible for CLEP credit in a subsequent term. A student who has withdrawn or dropped a course is eligible for CLEP credit the following semester.

* **NOTE:** To see course equivalencies and related information, refer to www.floridashines.org.

DANTES*

A student may earn credits for State designated courses by successfully completing Defense Activity for Non-Traditional Education Support (DANTES) examinations. Once credit is awarded, the student may not repeat the course for a letter grade. No credit is awarded if credit for the same course has already been earned.

* **NOTE:** To see course equivalencies and related information, refer to www.floridashines.org.

Digital Badge Completion

Students will earn the Fundamentals of Written Communication digital badge upon completion of ENC 1101, or a course for which ENC 1101 is a prerequisite, with a grade of "C" or better.

Dual Enrollment*

HCC awards credits for in-state dual enrollment courses (courses which are granted simultaneous credit for both high school and college). These credits are awarded as general education, elective, and/or discipline credits. Dual enrollment courses taken out of state will be evaluated on a course-by-course basis. Dual enrollment courses will not count as excess hours in the 60-hour requirement of an AA or AS degree.

* **NOTE:** To see course equivalencies and related information, refer to www.floridashines.org.

Experiential Credit

The college provides for the award of experiential credit in a limited number of technical programs: Nursing LPN-RN transition option; Emergency Medical Services; Optical Management Technology; Radiography-ARRT option; and Industrial Management Technology. Students in these programs who provide documentation verifying licensure and/or certification within the appropriate field of study will be awarded credit. Students must obtain approval from the appropriate campus academic dean and pay a processing fee for each request.

HCC awards experiential credit in the following programs to students who meet the appropriate criteria:

- **Industrial Management Program Enrollees**

Students who have successfully completed one of the following Tampa Electric Company training programs and have successfully completed a minimum of 15 credit hours of industrial management courses will be awarded articulated credits toward an associate in science degree in Industrial Management based on the chosen technical path field.

- Controls Analyst
- Lineman Training
- Field Engineering
- Substation Electrician
- Plant Electrician

Students should obtain the experiential credit form from the appropriate campus academic dean, who will assist in completing and processing the form.

- **Nursing Program Enrollees**

Applicants for the LPN-RN transition program must have the following: a valid, current Florida LPN license; current CPR basic life support for health care providers; an official transcript from their LPN program; and 6 months full-time employment as an LPN during the past three years. Graduates from Erwin Vocational Technical Center are eligible for articulation credit in lieu of experiential credit.

- **Paramedic - Emergency Medical Services Associate Degree Program Enrollees**

Students who have completed paramedic training at a CoAEMSPs approved paramedic training center and who possess a valid Florida paramedic certification will be awarded up to 42 credits in EMS prefixed courses required for the College Credit Certificate in the Paramedic EMS program. These credits are also applicable to the Emergency Medical Services Associate Degree Program. No credit will be awarded for advanced cardiac life support (EMS 2551C).

International Baccalaureate*

The International Baccalaureate (IB) Diploma Program is a rigorous two-year, pre-university liberal arts program of study for highly motivated, academically oriented secondary students. The IB Diploma is awarded only to students who meet curricular, service, and thesis requirements and score at the prescribed level on internationally standardized subject examinations. Through the IB program, students may be awarded up to 30 credit hours. No grades will be assigned to credits awarded through the IB Program. Students will not receive credit for IB courses that duplicate credit awarded for courses attended at HCC or credit that was awarded through other accelerated programs, (i.e., AP, CLEP, etc.). To determine eligibility for IB credit, the student should contact any HCC campus advisor or counselor.

*__NOTE:__ To see course equivalencies and related information, refer to www.floridashines.org.

Military Credit

HCC awards credit for non-credit military training and education as specified and validated by the American Council on Education (ACE).

Active duty military students MUST submit their Joint Service or Community College of the Air Force (CCAF) transcript for evaluation and assignment of all possible military credits towards their degree. This is not optional, but required by the Department of Defense Memorandum of Understanding for college tuition assistance. If not done within their first semester (60 days per the MOU), they will not be eligible for further tuition assistance until evaluated and reflected in the student degree plan.

Financial Information

TUITION AND FEES ARE SUBJECT TO CHANGE WITH THE APPROVAL OF THE BOARD OF TRUSTEES AND THE STATE LEGISLATURE.

Except for students who have HCC fee waivers, all students must pay the applicable fees.

All fees must be paid by the payment deadline or you risk being de-registered from all of your classes. All

fees are due and payable in full by the payment due date as published in the student calendar of important dates. If you stop attending a course but fail to officially drop or withdraw from the course, you will not be relieved of the financial obligation. Payments can be made through MyHCC, HCC's online Web registration system, using a credit card. Payments may also be paid at any of the campus bursar's office using cash, cashier check, money order, and personal check.

Credit Courses:
Florida Residents (In-State)*

Tuition	$80.45
Access Fee	.54
Capital Improvement Fee	8.23
Student Activity Fee	7.23
Student Financial Aid Fee**	4.03
Technology	3.91
Total per Credit Hour	$104.39

Non-Florida Residents (Out-of-State)

Tuition	$80.45
Out-of-State Fees	241.54
Access Fee	.54
Capital Improvement Fee	18.12
Student Activity Fee	7.23
Student Financial Aid Fee**	16.10
Technology Fee	15.63
Total per Credit Hour	$379.61

* See residency requirements in this section.

** Allocated to the HCC Scholarship Fund as approved by the state legislature.

Non-Credit Courses (Postsecondary Adult Vocational):
Per Credit Hour Equivalent
Florida Residents (In-State)

Tuition	$71.51
Access Fee	.43
Capital Improvement Fee	3.57
Technology Fee	3.47
Total per Credit Hour	$78.98

Non-Florida Resident (Out-of-State)

Tuition	$71.51
Out-of-State Fees	214.55
Access Fee	.43
Capital Improvement Fee	14.30
Technology Fee	13.89
Total per Credit Hour	$314.68

Baccalaureate Programs:
Florida Residents (In-State)

Tuition	$91.79

Color	$.30/side
Returned Check Fee	$30.00
Service Learning Course Fee	$23.00
Test Proctoring Fee (non-HCC students)	$50.00
Veterinary Technician Application Fee	$30.00

Special Fees

For some courses special fees may be required to cover supplies, materials, equipment, and instruction of facilities.

Recreation and Leisure Courses

Fees for all recreation and leisure courses are set to recover 100 percent of the cost of the courses.

Fees may be adjusted when other community agencies contribute resources or when courses require special facilities, equipment and/or personnel.

Notification of Social Security Number (SSN) Collection and Usage

The HCC financial services office uses student social security numbers to report information to the Internal Revenue Service (IRS) via 1098T, the Florida Prepaid Tuition Plan, third parties paying for tuition and fees on behalf of the student, reporting information to collection agencies, and reports as required by the state and federal government.

Online Payments Using Visa, MasterCard, American Express, Discover or Electronic Check

Students may pay fees online. Log onto www.hccfl.edu and click on MyHCC.

Payments by Check

Personal checks will be accepted for the payment of tuition and fees. Checks must be payable to Hillsborough Community College and include the maker of the check's full name, address, home and work phone, maker's driver's license number and state, and student ID number.

If a check is returned for any reason by the college's bank:

- the student will be charged a $30.00 fee,
- the student's file will be placed in a hold status, and
- any returned check(s) will be referred to the State Attorney's office or the college's collection agency as appropriate. The student is responsible for any collection fees associated with returned checks.
- No additional personal checks will be accepted.

Tuition Installment Plan (TIPS)

To help meet a student's educational expenses, Hillsborough Community College provides the tuition payment plan, (TIPS). TIPS allows students to pay tuition monthly. The earlier you enroll in the TIPS plan, the more payment options are available. You may enroll in the TIPS plan or review the available payment plans online at https://www.hccfl.edu/paying-college/payment-information/tuition-installment-plan-tips. If there is a balance as a result of the student cancelling a TIPS contract, the balance will be the student's responsibility. In addition, access to current term courses may be restricted.
TIPS is administered for HCC by FACTS/Nelnet Business Solutions., Lincoln, NE.

Payment by Third Party Sponsors

If employers or other agencies are paying for student tuition and fees through direct payment to the college, students should present original letters of authorization signed by third party sponsors to the bursar office. HCC will not accept letters of authorization that are contingent upon students achieving a passing grade, completing courses or letters that state the employees will be reimbursed for their fees. Any fees that remain unpaid by third party sponsors will be the students' responsibility.

Unpaid Financial Obligations

If students have an outstanding financial obligation to HCC, they may not be permitted to access current term courses or register for future classes until the balance is paid in full. Payment may be made online through MyHCC or at any of the bursar offices until the account is referred to a collection agency.

If the unpaid obligation is referred to a collection agency, the student will be responsible for paying the amounts owed to the college and any collection fees assessed by the collection agency.

If an account has been referred to a collection agency, the student should contact the collection agency to make payment.

Title IV Federal Repayment Guidelines

Students receiving Federal Title IV financial aid such as Pell, FSEOG, Direct and Plus loans, must attend classes through at least 60 percent of the term. Failure to do so may require pay back of all or a portion of the Title IV funds received to the federal government and or HCC. This will result in delinquent student accounts and will be processed accordingly.

Refund of Fees

Tuition and fees are refunded to students who drop courses during the registration drop/add periods. The drop/add periods are located on HCC's website published under "My HCC" and listed in the operational calendar for the current year.

Students enrolled in courses that do not follow a regular term calendar will find this information on their schedules listed on MyHCC.

Outstanding financial obligations to HCC are deducted from refunds.

No refunds will be made to students who:

- are administratively withdrawn for disciplinary reasons.
- are administratively withdrawn (WN) for non-attendance.
- withdraw from class after the designated drop/add refund deadline.

Student Refunds through BankMobile

Hillsborough Community College has partnered with BankMobile for managing refunds from HCC. Each registered student will be mailed an enrollment packet from BankMobile to the current mailing address on file at the college.

Students must verify the accuracy of their address either online through MyHCC or at the admissions, records and registration window.

Students that select the Vibe Checking account as their refund preference will receive a physical card in the mail. Students are responsible for the **replacement fee of $10 to have their card reissued.**

Although, a refund may not be currently expected, a refund may be issued in the future.

For faster access to funds, a student may choose to have refunds deposited directly into a personal bank account. To choose the method of how to receive a refund go to RefundSelection.com.

Waivers

There are various waivers for tuition and fees as listed in **Florida Statute 1009.26**.

Senior Citizens Waiver

Florida residents age 60 and over are eligible to enroll in courses at HCC on the first day of class on a space-available basis. There are no registration, application or related fees. If the same course is taken more than twice, the student is responsible for paying an out-of-state fee as part of registration. No academic credit is given for these courses. If academic credit is sought, all applicable fees must be paid.

In order to register as a senior citizen using a fee waiver, an applicant must:

- Complete an HCC application for admission and present this form to the campus admissions office.
- Complete a registration form and present this form to the campus admissions office.
- Provide proof of age
- Complete a fee waiver form and present it to the campus bursar's office.

For further information regarding tuition waivers for senior citizens, visit the HCC website at www.hccfl.edu and for residency information log onto www.floridashines.org.

Exemptions

There are various exemptions for tuition and fees as listed in Florida Statute 1009.25.

Financial Aid

Financial aid is any scholarship, grant, loan, or employment (or a combination thereof) designed to help students meet their college expenses. The amount and types of financial aid given are based on state, federal and HCC guidelines. To be eligible for financial aid, students must be degree seeking, meet enrollment requirements, submit official high school transcripts showing graduation dates or official GED test scores, and make satisfactory academic progress.

Grants and scholarships are considered gifts and need not be repaid. Low-interest loans are usually repaid over an extended period of time after the student leaves college. Employment refers to an hourly wage paid to the student for work performed.

Federal Financial Aid Requirements

To apply for Federal Financial Aid, students must meet the following qualifications:

- Be U.S. citizens or national, or resident of the Marshall Islands, the Federated States of Micronesia, Palau, or be eligible non-citizens.
- Have a valid high school diploma, GED, or associate degree or higher.
- Be accepted for enrollment at HCC as a degree-seeking undergraduate student or a financial aid approved PSAV, or College Credit Certificate program.
- No previous four-year degrees (except for direct federal loans).
- Not have defaulted on any federal educational loan or owe a repayment to any Federal loan or grant program.
- Meet selective service requirements.
- Be enrolled for the minimum credit hours required based upon the type of financial aid awarded.
- Be in good academic standing and making satisfactory academic progress.

Federal Financial Aid Programs

Federal Pell Grant

This grant, based upon financial need, does not have to be repaid. A valid Student Aid Report (SAR) must be electronically received by HCC. Appropriate income tax returns and other financial aid forms must be submitted if the SAR indicates that the student's application has been selected for verification. Awards are based on enrollment on the published Pell census date.

Federal Supplemental Educational Opportunity Grant (FSEOG)

This grant, based upon exceptional financial need, does not have to be repaid. Amounts vary from $200 to $1,500 per year. A minimum of six credit hours is required.

Federal Work-Study (FWS)

Students are paid an hourly wage for working on campus for up to 20 hours per week at the approved Board of Trustees Salary Schedule. Students can use their earnings to help defray college costs. Students must complete an I-9 Form when employed. A minimum of six Title IV credit hours is required. Refer to the "Earn While You Learn" section for more details.

Federal Work-Study (Community Service Assignments)

Students may have opportunities to work on and off campus at community service designated locations. The assignments vary and are contingent upon the skill level of students. Refer to the "Earn While You Learn" section for more details.

Direct Federal Subsidized Loan

This is a long-term repayable loan. First-year students can borrow up to $3,500 per year. Second-year students can borrow up to $4,500 per year. Second year students include those students who have completed 31 credit hours toward their degree, not including college preparatory credits. HCC will determine the amount for which a student is eligible. Payment of this loan does not begin until

the student has been out of school for six months or drops below half-time status. A minimum enrollment of six credit hours per term is required. Visit www.studentloans.gov for the most up-to-date interest rates.

Direct Federal Unsubsidized Loan

This is a long-term loan that can be awarded in addition to or as a substitute for the Direct Federal Subsidized Loan. Interest begins accruing immediately; however, payments may be deferred while the student is in school. Dependent students who qualify may borrow up to $2,000. Independent students may borrow up to $9,500 (if fewer than 31 credit hours earned) or $10,500 (if over 31 credit hours earned). A minimum enrollment of six credit hours per term is required. For detailed information regarding loan amounts, students should contact a campus financial aid office. Visit www.studentloans.gov for the most up-to-date interest rates.

Direct Federal PLUS Loan

This program enables parents who do not have an adverse credit history to borrow funds to pay for the education of dependent children. Interest accrues while the student attends school. Repayment begins immediately. Parents can borrow up to the cost of education, minus any other financial aid. The student must enroll in a minimum of six credit hours per term.

Parents may process a Direct Federal PLUS loan application online at www.studentloans.gov. Click on the "Borrower Log-In" link and follow the instructions as noted. Visit www.studentloans.gov for the most up-to-date interest rates.

Loan Entrance and Exit Counseling

For students borrowing an entrance counseling session must be completed. Students are required to complete the loan exit counseling session during the last semester of enrollment or at the point of no longer attending at least a half-time (six credit hours) basis.

Earn While You Learn
Federal College Work Study

The Federal Work Study Program (FWS) offers excellent opportunities for students with financial need to gain meaningful work experience while earning money to help pay their educational expenses. FWS award recipients are granted a designated amount of money, based upon their individual need and the availability of funds. It is from that allocation that the student's wages are paid bi-weekly at the hourly rate set by the college's Board of Trustees. Students work up to 20 hours per week, around their class schedules, until they have earned the full amount of their FWS Grant awards.

Most job assignments are on-campus opportunities. Students may also work off-campus at "community service" locations. Community service jobs are assigned with federal, state, or local public agencies or organizations. These jobs are ones which provide literacy activities in a family literacy project for families with preschool age children services to students with disabilities, solutions to environmental concerns, and numerous other services designed to improve the quality of life for community residents, particularly low-income individuals. Community service positions afford FWS workers a bonus of the joy that comes from helping others.

State Financial Aid Requirements

To apply for state financial aid, students must:

- Be a permanent resident of Florida for at least one year.
- Be accepted at HCC as a degree-seeking undergraduate student. Students working towards a certificate are eligible for state financial aid.
- Florida Vocational Gold Seal Scholarship recipients are only eligible for Technical Degree Educational programs (AS, CCC, and PSAV).
- Be enrolled for a minimum of six credit hours each semester.
- Be U.S. citizen, national, or eligible non-citizen.
- Have a valid high school diploma or GED.
- Not have defaulted on any educational loans or owe a repayment on any educational loans or grants.
- Meet selective service requirements.
- Be in good academic standing and make satisfactory progress.

State Financial Aid Programs

Listed below are some of the state financial aid programs. For information on these and other state financial aid programs, students should call any campus financial aid office.

Florida Bright Futures Scholarship

Florida Bright Futures is a state funded, merit based scholarship program. Eligible students must enroll for a minimum of 6 credit hours per term. The scholarship program does not pay for preparatory classes.

Bright Futures Scholarship pays at a fixed per credit hour rate.

- Florida Academic scholarship pays 100% of tuition and approved fees and can be used in the Fall, Spring, and Summer semesters. This scholarship also provides a $300.00 book and educational expenses stipend in the Fall and Spring semesters.
- Florida Medallion scholarship pays 75% of tuition and approved fees.
- Florida Vocational Gold Seal pays $48.00 per credit hour.
- Amounts are subject to change during the 2019 State of Florida legislative session. Students will be notified of any revisions.
- Complete the Free Application for Federal Student Aid if you need additional funds to help pay for college. Visit www.fafsa.ed.gov.

Bright Futures Scholarship will not pay for lab fees.

- The student or other sources of financial aid will have to pay for lab fees assessed for classes enrolled.

Bright Futures Scholarship will not pay for Dropped or Withdrawn classes.

- Students will be required to repay the cost for any course dropped or withdrawn.
- Repayment for the cost of dropped or withdrawn courses is required to renew a Bright Futures award for a subsequent academic year.
- Students with documented extenuating circumstances may seek an appeal to this payment requirement.
- Contact your campus Financial Aid Office to inquire about:
  - The amount you will owe if you drop or withdraw from a class; and
  - If you qualify for an appeal waiving your obligation to repay for funds owed.

Renewal criteria revised.

- Bright Futures students are required to complete the number of credit hours paid by the scholarship program. For example:
  - if you received a Bright Futures scholarship for the semester based upon full-time enrollment, you are required to complete at least 12 credit hours.
  - if your term enrollment is 9 - 11 credit hours, you must complete the minimum of 9 credit hours.
  - if your term enrollment is 6 – 8 credit hours, you must complete the minimum of 6 credit hours.

Restoration options extended.

- Students who do not meet the minimum renewal credit hours may regain their eligibility by completing the outstanding credit hours in the Summer Term 2020.
- Review the State of Florida's website for additional information, www.floridastudentfinancialaid.org/SSFAD/bf

Florida Student Assistance Grant

Florida Student Assistant Grant (FSAG) is a grant of between $200 and $1,600 annually which is not repayable. Application priority deadline is June 19, 2019. To be eligible to receive a grant, students must enroll for a minimum of six credit hours per term and have processed a FAFSA application.

First Generation Matching Grant Program

This is a need-based program that provides financial aid funds to Florida undergraduate students who demonstrate financial need and whose parents have not earned a baccalaureate degree.

To receive this grant, the student must complete the annual FAFSA application and indicate the last level of education completed by the parent as high school.

Currently, distribution of this award is at $500 per term. The financial aid office implemented the following priorities for selecting students for this award:

- Students who have a cumulative grade point average of 3.0 or better.
- Students who are enrolled in college full-time.
- Students who have met all other state requirements for financial aid.

Students should contact their campus financial aid office for additional information.

Scholarships

HCC Scholarships

HCC offers scholarships in a number of areas. Students may apply directly to the HCC department that has the responsibility for awarding the scholarship. Specific criteria are available in the campus offices of financial aid, or you can contact the HCC Foundation at foundation@hccfl.edu for more information regarding the following scholarships:

- Art Scholarships
- Athletic Scholarships
- Board of Trustees Scholarships
- Child Care Award (off-campus)
- Child Care Award (on-campus)
- Dance Scholarships
- Drama Scholarships
- HCC Need Scholarships
- HOPE Scholarships
- Music Scholarships
- Presidential Scholarships
- Presidential Honors Scholarships
- Publications Scholarships
- Student Support Services Need & Incentive Scholarships
- Student with Disabilities Scholarships

Procedures for Applying

Each HCC scholarship recipient must have processed a Free Application for Federal Student Aid (FAFSA) application. This requirement is set forth by the State of Florida Department of Education. Although students may qualify for a merit-based scholarship, the completion of the FAFSA is required. Students may complete the FAFSA application by following the instructions noted under the "How to Apply" section.

Each scholarship program has its own application procedures. The campus financial aid offices have information regarding each of HCC's scholarship programs.

Student Eligibility Standards

- Demonstrate financial need or exhibit specific skills
- Enroll for the appropriate number of credit hours

- Maintain satisfactory academic progress

Criteria for Selection

Selection criteria for each scholarship program is established by HCC. Most HCC scholarships are awarded according to need or skills.

Criteria for Determining the Amount of the Award

- Based on appropriate recommendation or
- Student's unmet need

HCC Foundation Scholarships

Information regarding HCC Foundation Scholarships is available in any campus office of counseling and advising or online at https://hccfoundation.com/donate/scholarships/hccfoundationscholarships/

Other Scholarships

Information regarding other scholarships is available in the campus financial aid, counseling and advising offices and on the HCC website.

Students are urged to apply for external scholarships. A variety of local and national clubs and organizations offer financial aid to students meeting certain criteria.

How to Apply for Financial Assistance

Students seeking financial assistance must apply each academic year. To apply for the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Work-Study, Florida Student Assistance Grant and certain college scholarships, the following forms must be completed:

Free Application for Federal Student Aid (FAFSA):

Students are strongly advised to complete the FAFSA application electronically by accessing the Department of Education's financial aid website: www.fafsa.ed.gov. Students completing the FAFSA online may receive their results (Student Aid Report) within two weeks. If students do not have a computer at home, they may use computers at the following public locations: Hillsborough County Public Libraries, HCC Computer Labs, and HCC Libraries. Students must list HCC' school code, 007870, on their FAFSA application in order for the college to receive their results and Student Aid Report electronically.

Student Aid Report (SAR):

An official SAR is sent to all students who submit the Free Application for Federal Student Aid. This SAR contains information about a student's Pell Grant eligibility as determined by the U.S. Department of Education. The college's financial aid office reads the results of the application electronically as long as the student listed HCC's school code on the FAFSA application.

Application Deadline Dates:

Free Application for Federal Student Aid (FAFSA): The student should complete the FAFSA application as soon as possible after October 1 and no later than six weeks prior to the beginning of the term. The last day to complete the FAFSA application for the 2019-2020 academic year is June 30, 2020.

Because financial aid is not always available at the beginning of a semester for those who do not process by the suggested deadline date, students should budget their money to cover the cost of tuition, fees and books until they receive their funds. As an alternative, students may consider TIPS (Tuition Installment Plans) at https://www.hccfl.edu/paying-college/payment-information/tuition-installment-plan-tips.

Students are required to complete a 2019-2020 FAFSA application and submit all requested financial aid forms by June 19, 2019 in order to have their financial aid awards processed by the first day of fall 2019 classes.

Students applying for financial aid or submitting financial aid forms after June 19, 2019 will be expected to pay for their classes or sign-up for TIPS (Tuition Installment Plans). Students that are eligible for financial aid may receive a refund for the payment of tuition and fees once financial aid is awarded.

How Financial Aid is Awarded and Distributed

Students declared eligible for financial aid will receive an award notice from HCC's financial aid office.

Students awarded Federal Pell Grants, Federal Supplemental Educational Opportunity Grants, Direct Federal subsidized or unsubsidized loans, Florida Bright Futures Scholarships or institutional scholarships may use them to pay for the cost of tuition and fees at registration. Prior to the last day of drop/add of the semester, Pell Grant and subsidized and unsubsidized Direct Federal loan recipients who qualify can go directly to any HCC campus bookstore and purchase books and supplies against their award balance. Maximum book charges are contingent upon the available balance and credit hours enrolled.

After deductions for tuition, fees and book charges are made by HCC, the remaining balance in the students' account is forwarded to them via their BankMobile selection or other delivery method as selected by the student. For students awarded on or before the semesters drop/add date, the remaining balance will be available 14 days from the date the college credits their account. For students awarded after the semesters drop/add date, the remaining balance will be available 14 days from the date the college credits their account.

Students who are employed under the Federal Work-Study Program will receive bi-weekly checks from the office in which they work.

What are the required credit hours?

Financial Aid Programs	Minimum Hours Required
Federal Pell Grant	Contingent upon eligibility (most students: 1-12)
FSEOG	6
Direct Federal Loans	6
Federal Work Study	6
First Generation Matching Grant	6-12
Florida Bright Futures	6
Florida Student Assistance Grant (FSAG)	6
HCC's Presidential Scholarship	12
HCC's Board of Trustees Scholarship	12
HCC's Incentive & Need Based Scholarship	6
HCC's Athletic Scholarships	12

How Will Students Know the Awarding Amount(s)?

Once the financial aid office receives the results of the student's FAFSA and other documents requested, the student will receive an official Award Notification via Hawkmail. This document will direct them to MyHCC where they may check the specific type and the amount of financial aid the student is qualified to receive.

Student may check their financial aid award status on MyHCC.

Attention:

Withdrawing or dropping courses may have an impact on financial aid. Students may have to repay a percentage of financial aid, and their continued eligibility may be impacted. Prior to dropping or withdrawing from any class, students should consult a campus financial aid office to discuss how this may affect their financial aid.

Return of Title IV Funds

If students receive Title IV, Federal Student Financial Assistance, and if they withdraw, drop out, take a leave of absence, or are expelled prior to completing 60 percent of a semester for which they have been charged, the college must recalculate their eligibility for Title IV funds.

The formula for recalculating eligibility utilizes the following concepts:

- Percent of aid earned, and
- Percent of aid unearned
- The percent earned equals the days the student completed divided by the total days in the enrollment period.
- The percent unearned equals 100 percent minus the percent earned.
- The amount of Title IV Aid earned equals the percent earned (A) multiplied by the student's Title IV Aid.
- The amount of Title IV Aid unearned equals the percent unearned (B) multiplied by the student's Title IV Aid.
- The amount the college must return equals the total institutional charges multiplied by the percent unearned (B).

If the college returns the Title IV funds that were credited to a student's account, it will create a charge on the student account for which the student is responsible.

IMPORTANT: The student might also be responsible for paying back to the federal programs any unearned portion of the Title IV Aid that was disbursed directly to the student.

F. The amount the student must return to the federal programs equals the amount of Title IV Aid unearned - the amount returned by the college.

NOTE: Students are obligated to pay the college for any funds returned to the U.S. Department of Education. Students receiving financial aid are advised not to withdraw from any classes prior to discussing how this may impact financial aid. The financial aid office will notify the student with the amount owed.

Standards of Academic Progress

In order to remain eligible to receive Title IV, Student Financial Assistance (SFA) program funds while attending HCC, students must make steady progress toward their program of study. This requirement is known as the Satisfactory Academic Progress (SAP) requirement.

The SAP policy has three standards that a student must meet in order to remain eligible to receive Title IV, SFA - a qualitative standard, a quantitative standard, and a time standard. At HCC the qualitative standard requires recipients to maintain a cumulative GPA of 2.0. The quantitative standard requires recipients to satisfactorily complete 67 percent of all credit hours attempted. The time standard requires recipients to complete their academic program by the time they have attempted 150 percent of the credits required in their programs. Standards of progress evaluations occur at the end each semester.

Students who fail to meet the SAP standards will be placed on warning for one term. If after one term students are not making satisfactory progress, they will lose their eligibility for financial assistance. Students over 150% of attempted credit hours are immediately placed on suspension. In order to regain eligibility, students must meet the satisfactory progress standards or appeal for reinstatement.

Financial aid pays tuition and fees for the following:

All associate in arts and associate in science programs.

Advanced Technical Certificates

- Computed Tomography Advanced Imaging
- Magnetic Resonance Imaging
- Medical Laboratory Science

Advanced Technical Diploma

- Dental Assisting

College Credit Certificates

- Accounting Technology Management
- Accounting Technology Operations
- Accounting Technology Specialist
- Advanced Network Infrastructure
- Business Intelligence Professional
- Business Management
- Clinical Research Coordinator
- CNC Machinist
- Computer Programming
- Digital Forensics
- Drafting
- Early Childhood Administration
- Early Childhood Preschool
- Entrepreneurship and Innovation
- Fire Officer Supervisor
- Graphic Design Production
- Healthcare Support Specialist
- Help Desk Support Tech
- Health Navigator Specialist
- Human Resource Assistant
- Internet Services Technology Web Development Specialist - Designer
- Internet Services Technology Web Development Specialist – Developer
- Laser and Photonics Technician
- Logistics and Transportation Specialist
- Mechatronics
- Medical Information Coder
- Medical Office Management
- Motion Picture Production Management
- Network Enterprise Administration
- Network System Technology: Infrastructure
- Network System Technology: Support Tech
- Network System Technology: Server Admin
- NST: Security/Cybersecurity Cisco
- NST: Security/Cybersecurity Windows
- Office Management
- Robotics and Simulation

Postsecondary Adult Vocational (PSAV)

- Auto/Collision Repair and Refinishing
- Automotive Service Technology
- Law Enforcement
- Educator Preparation Institute (EPI)
- Diesel Engine Service Technology
- Heavy Equipment Service Technician
- Welding Technology

Financial Aid Offices

Each HCC campus has a financial aid office. Information about financial aid can be obtained from any of them. Normal working hours are as follows: Monday and Tuesday from 8:00 a.m. until 7:00 p.m. and Wednesday, Thursday, and Friday from 8:00 a.m. until 4:30pm.

Veterans' Benefits

Eligible veterans pursuing an associate in arts or an associate in science degree may use veterans' educational benefits at HCC. Eligible chapters are Chapter 30 (Montgomery Bill), Chapter 31 (Vocational), Chapter 32 (Post-Vietnam Veterans Education Assistance Program), Chapter 35 (Dependents Educational Assistance), and Chapter 1606 (Selected Reserve), and Chapter 1607 (REAP), and Chapter 33 (Post 911 GI Bill).

To be eligible, veterans must have any discharge other than a dishonorable and must have served on active duty for a specified period. For additional information, veterans should contact any campus admissions, registration and records office or call the department of veterans' affairs (DVA) toll free number 1-888-442-4551.

Deferments

In accordance with Florida law and college policy, any eligible veteran or dependent wishing to pursue an approved program within the meaning of VA Chapter 30, 31, 32, 33, 35, 1606, or 1607 will have, upon request, 60 days after the first day of classes to pay registration fees. One deferment per academic year is standard.

General Requirements

Veteran students must declare their final educational goals and choose their desired educational program when they apply for benefits. Benefits are paid only for courses applying to the students chosen program.

Veteran students must comply with attendance requirements established by instructors. If veterans withdraw, their last day of attendance will be reported to the Department of Veterans Affairs (DVA). HCC will notify the DVA of any changes in a student's enrollment status.

Benefits are not paid for courses when non-punitive grades such as "W," "N," or "U" are received. An "I" grade (incomplete grade) that has not been removed by the end of the semester after the grade was given (excluding Summer Session) will be reported as a non-punitive grade.

Attendance

Criminal Justice Institute, Firefighter Academy and Autobody Collision Programs

Veteran students participating in the college's Law Enforcement and Correctional Officer programs and Automotive Collision programs are encouraged to attend all class sessions. Veterans whose absences total more than 10 percent of the scheduled class sessions will be required to participate in counseling to determine if it is possible to make up the required coursework within a reasonable

time frame. If it is determined the work cannot be completed within the time constraints, the students' benefits will be terminated.

Paramedic and Emergency Medical Technician Programs

The Veterans Administration will be notified of unsatisfactory attendance at the point of the term that a veteran student accumulates three unexcused absences. The veteran student may not be recertified for veteran's benefits until 30 days of satisfactory attendance (no more than two unexcused absences in the 30-day period) have elapsed.

Repeating Courses

Veterans' benefits are not paid for courses in which students have already earned satisfactory grades. A "D" is considered satisfactory except when program requirements mandate a "C."

Transcripts

Veteran students must have transcripts sent to HCC from each college previously attended. Students will not be certified for a second term until all official transcripts are received.

Benefit Levels for Standard Terms

Standard sessions are 16 weeks. Credit hours for benefits are:

Full-time	12 hours
Three-quarter-time	9 hours
Half-time	6 hours

Students registered for less than half-time are eligible only for the direct cost of their courses. Students should see a VA Specialist about benefits for non-standard sessions.

Unsatisfactory Progress

Students receiving veterans' benefits must maintain a cumulative GPA of 2.0. Veterans (except Paramedic and Emergency Medical Technician Programs) with less than a 2.0 GPA will be given two probationary terms to bring their GPA up to a 2.0. Veteran students who fail to raise their GPA to 2.0 after two probationary terms will be reported to the DVA and benefits will be terminated. For those students in the Paramedic and Emergency Medical Technician Programs who fail to raise their GPA to 2.0 after one probationary term will be reported to the DVA and benefits will be terminated. These veterans will also be referred to an HCC counselor for reassessment of their academic goals.

Veterans who violate the student code of conduct will be reported to the DVA and their benefits will be terminated.

Veteran students who wish to seek reinstatement of benefits at HCC may see a counselor for assistance in petitioning the Department of Veterans' Affairs. However, the DVA makes all decisions on reinstating benefits.

Academic Policies

Academic Year

HCC's academic year consists of the Fall, Spring, and Summer terms. Faculty may make course materials available to students prior to the first official day of class. However, student participation, attendance, and work submitted before the first official day of class will not be counted for purposes of financial aid, grades, or material participation in the class until the first official day of class.

Attendance

Students are required to attend class regularly and punctually. If students miss classes, regardless of the cause, their opportunities for learning and academic success will be adversely affected.

The syllabus for each course contains the instructor's attendance and grading requirements. It is the student's responsibility to read the syllabus, comply with the instructor's policies, and arrange to make up work missed because of absence or lateness.

If students stop attending class, they will be assigned a letter grade unless they complete and submit a withdrawal form by the deadline published in the current catalog and credit course schedule. Students receiving financial aid are advised to discuss the impact of not attending classes on their financial aid or veterans benefits.

Online Attendance

Federal regulations require online students not only to attend but also to participate in coursework each term to be eligible for federal financial aid. Hillsborough Community College verifies student attendance in accordance with this regulation.

In a distance education context, logging into an online class is not sufficient, by itself, to demonstrate attendance by the student. Students must establish a record of participation in **academically related** activities in order to comply with this requirement.

Academically related activities include, but are not limited to

- physically attending a class where there is an opportunity for direct interaction between the instructor and students;
- submitting an academic assignment;
- taking an exam, an interactive tutorial or computer--assisted instruction;
- attending and participating in an online study group that is assigned by the instructor;
- participating in an online discussion about academic matters or
- initiating contact with a faculty member to ask a question about the academic subject studied in the course.

Academically related activities **DO NOT** include activities where a student may be present, but not academically

engaged, such as logging into an online class without active participation or participating in academic counseling or advisement session unrelated to a specific course assignment.

Students who have not established attendance/participation in online courses may have their federal financial aid eligibility adjusted.

Credit Hour Policy Statement

Florida Statutes (F.S.) 1001.64 *Florida College System institution boards of trustees; powers and duties*, F.S. 1004.68 *Florida College System institution; degrees and certificates*, and F.S. 1007.25 *General education courses; common prerequisites; other degree requirements* provide the basis for establishing credit hour policy at Hillsborough Community College. For purposes of calculation and monitoring, credit hours will be measured in Carnegie units.

A. Traditional lecture discussion courses must be scheduled to meet Carnegie units.

# of Credit Hours (50 Minute Carnegie Unit)	# of Clock Hours	# of Minutes in Classroom
1	15	750
2	30	1,500
3	45	2,250
4	60	3,000

B. Courses offered in alternative formats such as hybrid, online, independent study, cooperative education, internship and practicum must be identified as such in the schedule of classes, must meet the same student learning outcomes as the traditional format course, and must be scheduled to provide adequate time to achieve student learning outcomes.

Grading Policies

Grade Reports

Students may ask instructors about their academic progress throughout a term. Final grades may be viewed via MyHCC at the end of each term (see calendar). Only the final grade appears on the student's transcript which is posted on the www.floridashines.org website. Grades are not mailed. HCC may withhold the grades of students for the following reasons:

- Unpaid fees
- Overdue loans
- Overdue library materials
- Overdue audiovisual or physical education materials and equipment
- Disciplinary action

Students whose grades are being withheld may appeal to the appropriate campus dean of student services or his/her designee.

Students called to active military duty will be permitted to drop their course(s) or make arrangements with faculty to complete academic requirements and receive final grades. To qualify, students must provide a copy of their active duty orders. Contact the campus advising or counseling office.

Grading

Students will be awarded letter grades for courses taken at HCC. Course grades will be awarded and recorded following the final class meeting (or its equivalent in the case of online course).

Grades used in computing GPA:

Grade	Interpretation	Point Value
A	Excellent	4
B	Good	3
C	Average	2
D	Poor	1
F	Failure	0

Grades not used in computing GPA:

AU	Audit
AW	Administrative withdrawal
I	Incomplete
N	No credit
NR	Grade not reported by instructor
S	Satisfactory
U	Unsatisfactory
W	Withdrawal
WN	Withdrawal, non-attendance

Grade Point Average

Each letter grade has a point value. To determine grade point average (GPA), one multiplies the number of points for each grade earned times the number of the course's credits, adds the total grade-point values for all courses, then divides by the total number of credit hours.

A "B" (three points) in a three-credit course is worth nine points. An "A" (four points) in the same three-credit course is worth 12 points.

GPA Example:

ENC 1101	3 cr.	Grade A (4 points)	=	12
CGS 1000	3 cr.	Grade C (2 points)	=	6
HUM 2210	3 cr.	Grade F (0 points)	=	0
PEM 1954	1 cr.	Grade B (3 points)	=	3
Total	10 cr.	Total Points	=	21

WN Criteria per Modality							
	At Least One Student Action is Required to Prevent WN			Student Deadline	Faculty WN Posting Deadline		
Modality	Class Attendance	Submit Assignment or Discussion Post	Contact Instructor Stating Intention to Complete the Course	Student Action Should be Completed by:	Immediately After 1st Class following Add/Drop	On the 5th day following Add/Drop	Modality
Campus: Face-to-face, Simulcast, etc.	√	√	√	First class following Add/Drop	√		Campus: Face-to-face, Simulcast, etc.
Hybrid	√	√	√	First class following Add/Drop	√		Hybrid
Online Synchronous (e.g., DLIVC)	√	√	√	First class following Add/Drop	√		Online Synchronous (e.g., DLIVC)
Online Asynchronous (e.g., DLONL)		√	√	Fourth calendar day following Add/Drop		√	Online Asynchronous (e.g., DLONL)

Divide 21 points by 10 credits = 2.100 grade point average. A degree GPA of 2.0 or higher is required to receive an associate degree from HCC.

The following letter grades have special requirements:

Audit – awarded to students who enroll in credit classes for enrichment but not for credit. A change in enrollment from credit to audit or audit to credit can be made only during the designated schedule adjustment (drop/add) period.

Administrative Withdrawal – awarded by the college for reasons such as non-attendance, non-payment of fees, non-compliance with rules, or extenuating circumstances.

Incomplete – awarded only when requested by the students, approved by instructors and confirmed by the appropriate academic deans. "I" grades are given only when unforeseen circumstances prevent students from completing course requirements during the regular term. An "I" grade contract is agreed upon and signed by the student, instructor, and academic dean.

Contracts include a list of the course requirements students must complete and the deadline by which the work must be completed. To be eligible for an "I," students must have satisfactorily completed at least two-thirds of the course requirements. "I" grades must be removed before the end of the eighth week of the following term (excluding the summer term) or they will be changed to "F" grades on the students' permanent records. Students should refer to the student services Important Calendar for Students.

No Credit (N) – "N" grades are awarded only in college preparatory courses. The "N" grade is awarded to students who attend class through the end of the term but who do not reach the level of skill or knowledge required to move on to the next course. Students who receive an "N" grade do not earn credits, and "N" grades are not included in calculating students' cumulative GPAs.

Grade Not Reported – when instructors omit a grade, the notation "NR" is placed on transcripts.

Withdrawal – awarded to students who officially withdraw by the deadline.

WN – grades are initiated by faculty and awarded to students who have never attended or participated in a course. The WN grade must be submitted by the faculty following the first class meeting after the end of add/drop for a campus-based section or an online section with class meetings. For online classes without class meetings, the WN deadline is 4 days after the end of add/drop. The WN must be entered no later than the 5th day after add/drop. The student is financially responsible for cost of the course(s). Students who have not established attendance/participation may also have their federal financial aid eligibility adjusted. The table below provides additional information about WN actions and timelines.

Grade Forgiveness Policy

Courses in which a "C" or better is earned cannot be repeated regardless of where they are completed. All course attempts will appear on the transcript. Courses in which a grade of "D" or "F" is earned may be repeated for credit, and only the most recent grade earned will be used to calculate the cumulative grade point average. A student who has completed a course and the grade earned was a "D" or an "F" is eligible for CLEP, AP, and/or credit-by-exam in a subsequent term.

NOTE: Some courses may be repeated for credit, i.e., JOU 1949. This means the grade and quality points earned in each attempt for this course will be included in the GPA computation. Grade forgiveness does not apply to a course that may be taken more than one time for credit. Check the course description to determine if a course may be repeated for credit.

Students may attempt a course only three times - including the first attempt, repeat grades, and withdrawals. Students attempting a course for the third time must pay the full cost of instruction (withdrawal from a course counts as an attempt). Students who have serious extenuating circumstances may petition the appropriate campus dean of student services for an exemption from paying the full cost of instruction. Permission for a fourth attempt will be granted only through the academic appeals process and will be granted only to students who can document major extenuating circumstances. Students who wish to begin the academic appeals process should contact the appropriate campus dean of student services. Grades for the third and all subsequent attempts will be included in calculating grade point averages.

NOTE: Some colleges and universities may not accept grades earned for repeated courses; some might use only the grades originally earned. Students receiving financial assistance of any type should speak with a financial aid counselor to ensure that any repeat attempts will qualify for aid.

Dean's List

To earn placement on the Dean's List, a student must earn a 3.5 or higher term GPA for 12 or more semester hours in the term of attendance.

Honors

Students who graduate with the specified HCC cumulative grade point averages will be recognized as distinguished graduates.

Degree Grade Point Average

3.50 – 3.79	=	Honors
3.80 – 3.99	=	High Honors
4.00	=	Highest Honors

An honors statement will be placed on the student's transcripts and diploma.

Academic Progress

In order to have satisfactory academic standing, a student at Hillsborough Community College must maintain a cumulative grade point average of 2.0 "C." Students may be required to take reduced hours per semester to improve their GPA and must meet with a counselor for approval to register for classes. While financial benefits (financial aid, VA benefits, insurance, etc.) may be taken into consideration, it may not always be the basis for registration approvals. Only institutional GPA, including remedial coursework, would be included. Transfer GPA would not be included. For PSAV programs, GPA is calculated by class not by term.

The four steps in the process are Academic Warning, Academic Probation, Academic Suspension, and Academic Dismissal.

Academic Warning

When a student's cumulative GPA falls below 2.00, the student is placed on Warning and notified via Hawkmail or HawkGPS. A registration hold is placed on the student's record and the student must see a counselor to register. The student must maintain a term GPA of 2.00 or better thereafter. The student remains on warning until the cumulative GPA rises to 2.00 or better.

Academic Probation

If while on Warning, a student's term GPA falls below 2.00, the student is placed on Probation and notified via Hawkmail or HawkGPS. The registration hold remains, and the student must see a counselor to register. The student must maintain a term GPA of 2.00 or better thereafter. The student remains on Probation until the cumulative GPA rises to 2.00 or better.

Academic Suspension

If while on Probation, a student's term GPA falls below 2.00, the student is placed on Suspension and notified via Hawkmail or HawkGPS. The registration hold remains, and the student may not register for a period of one term. The student must see a counselor to be informed of the appeal process and timeline. The student will petition the Academic Standards Committee to be allowed to register. If the petition is successful, the student must maintain a term GPA of 2.00 or better thereafter. The Student remains on Suspension until the cumulative GPA rises to 2.00 or better. If while on Suspension a student's term GPA falls below 2.00, the student is placed on Dismissal and must meet with a counselor to discuss the appeal process to return.

Academic Dismissal

If while on Suspension a student's term GPA falls below 2.00, the student is placed on Dismissal and notified via Hawkmail or HawkGPS. The registration hold remains, and the student may not register for a period of one calendar year. The student must see a counselor to be informed of the appeal process and timeline to seek re-admission. The student will petition the Academic Standards Committee to be allowed to register. If the petition is successful, the student returns in the status of Suspension, under the conditions stated above regarding return from a one-term suspension.

Academic Grade Appeals

Students must adhere to the standards of academic performance established in the course syllabi provided by their instructors. However, students are protected against prejudicial or capricious evaluation and may dispute an assigned grade by asking the instructor for reconsideration. If grades remain in dispute, students should contact a faculty counselor. The counselor will direct students to the appropriate appeals procedure.

Application for Degree and Transcripts

Application for Degree

Students are requested to apply using the "Application for Graduation" option in MyHCC upon nearing graduation. Students who apply for graduation will have their diploma processed and mailed using the information in the HCC database.

Auto-identification for Graduation and Reverse Transfer

Students who do not apply for graduation but have met all graduation requirements may still have their graduation processed. HCC participates in a "reverse transfer" program. Students who do not complete their graduation requirements at HCC but complete them at a participating institution may still be graduated from their HCC program.

Transcript Request

To request an HCC transcript, follow the guidelines on the HCC website by going to https://www.hccfl.edu/admissions/ask-registrar/request-hcc-transcripts.

Academic Support Services

Learning at Hillsborough Community College

As an institution focused on student learning, Hillsborough Community College offers a variety of learning options to enhance its' strong traditional college programs.

Academic Success Centers

Each campus has an Academic Success Center (ASC). The ASCs provide learning environments, services, and resources designed to empower students to become successful, independent learners. They provide free tutoring, and resources for subject areas such as writing, reading, EAP/ESOL, foreign language, mathematics, sciences, computer science, developmental education, and business/finance. To learn more about the academic assistance offered at each campus visit their website: https://www.hccfl.edu/support-services/academic-success-centers.

Academic Technologies

Hillsborough Community College is committed to providing academic technologies for its student population, and therefore, has developed a wide array of on-site and Internet-based technologies. These technologies include programs such as MyHCC for managing student business, the college portal for communication and supplemental learning, Mythic for alternative coursework, web-based library resources, and an online tutoring service called Upswing. As a student at Hillsborough Community College, you will be able to access these resources both on-campus and from your home or other locations away from the college.

Students are expected to learn to use various technologies to communicate with HCC and with classmates. Students may also be required to use web-based programs, such as those in MyHCC or other technologies to complete homework assignments, course assessments and testing, or other learning activities as assigned by instructors. In the event a computer and internet access is needed, each campus has technology available to use in the libraries and computer labs.

Online classes may use an online proctoring tool. For more information, see the Online Learning Hub in the Student Intranet (https://hccfl.sharepoint.com/sites/online-learning/SitePages/Honorlock-Guidelines.aspx).

The college also provides helpdesk support for students with problems accessing their resources. You can call the helpdesk at 813-253-7000 ext. 4357 (HELP) to speak to a technician for assistance. The college helpdesk is limited to addressing only those problems associated with accessing web-based resources, i.e. MyHCC and Upswing.

Student Laptop Loan Agreement

Purpose: The Laptop Kit Loan Policy establishes the terms and conditions under which students may borrow Laptop Kits from the Hillsborough Community College (College) Library to support their academic needs. This policy supersedes any previous laptop loan policy and must be completed by the student in Etrieve prior to borrowing a laptop kit.

Eligibility: Any Hillsborough Community College student actively enrolled in for-credit courses, and who does not have a hold on their account of $50 or more, is eligible to borrow a laptop kit. Lending privileges for students start on the first day of their first course each semester. Laptop Kits are not included in reciprocal loan agreements. Laptop kits are not guaranteed for all requesting students and are made available on a "first come, first served" basis.

Loan Term: Laptops will be loaned as part of a standard kit which includes a laptop, carrying bag, and a charger. The loan period is two weeks. Students are responsible for all components of the kit during the loan period.

Terms and Conditions:

1. Use of any Hillsborough Community College laptop is subject to the requirements of the College's Acceptable Use Policy (Procedure 9.00) and the Student Code of Conduct (Admin. Rule 6HX-10-5.17)
2. Laptops are provided for Hillsborough Community College education and education-related uses only. Personal or business use of College laptops is not permitted. The College will comply with all lawful orders and/or subpoenas received regarding any use of College laptops.
3. Users of College technology (including but not

limited to laptops) have no expectation of privacy in the use, creation, or storage of any data, files, programs, or content. The College is not responsible for any deletion, loss, or interruption of data, files, programs, or content.

4. Students may renew a laptop kit once, subject to availability and account standing. Renewals must be completed before the due date. Depending on availability, another laptop may or may not be available for us.
5. The student is responsible for backing up any work saved on the laptop. Upon returning a laptop, students should assume the laptop will be reimaged and all files permanently deleted. The College is not responsible for saving or recovering any data left on the computer.
6. The laptop is to be returned in the same condition in which it was checked out. The student is liable for any and all cost of repair, replacement, or refurbishment if the laptop (or any part of it) is lost, stolen or damaged in any way. The student agrees that the College may, among other things, place a financial hold on student's account (which may prevent registration, graduation, or other activities) until all related costs are paid in full. Student shall immediately notify the College library if the laptop is lost, stolen, or damaged in any way. The student shall NOT replace or repair any item but shall bring the laptop to the College library for any repair or replacement.
7. The laptop is equipped with a geolocation tracking feature that allows the HCC to monitor and determine the location of the laptop and, accordingly, the location of individuals who use or possessthe laptop. STUDENTS EXPECT AND AGREE THAT THIS FEATURE MAY BE USED REGULARLY AND WITHOUT NOTICE.
8. The laptop must be returned within 2 business days of the student dropping all classes or otherwise withdrawing from all classes taken during a term.
9. No software may be installed on the laptop except that which is required to use a home printer/scanner/wireless keyboard and mouse and software authorized for and related to a student's current academic work. The College will not assist with these installations or any related technical support. College support is limited to hardware or firmware matters necessary to ensure basic functionality.

Libraries

Each campus has a library that provides materials to support the College curriculum. Campus library collections include books, magazines, journals, audiovisual materials, laptops, other tech accessories, and other items in print and online. In addition, campus-specific reserve collections contain documents and objects identified by HCC instructors for students' attention. Anyone seeking to check out library items must show an HCC ID.

Each library has computers for research, homework, and printing needs (including Wi-Fi). The library may not be the only walk-in computer lab at a given campus.

Campus librarians provide reference assistance online, by phone, and in-person; one-on-one instruction in locating information; and customized group instruction to classes upon instructor request.

Library hours vary by campus and are posted online at www.hccfl.edu/library, (under "Campus Libraries") and at each location.

Student Services and Activities

Student Services

HCC offers a wide variety of services to help students reach their academic, career and personal goals.

Academic Advising

Advisors are available on each campus to help students select educational programs and choose appropriate courses. Advisors review transcripts, interpret placement test scores, explain degree requirements, and provide information about transferring to four-year institutions. Students are encouraged to obtain an advising guide for their program from the HCC website (https://www.hccfl.edu/support-services/academic-advising/hawkgps) and review it with an advisor early in their academic career so that they know which courses to register for each semester.

Admissions, Registration and Records

In order to provide students with prompt, efficient service, HCC must collect accurate information and maintain reliable student records. The college operates an admissions and registration office on each campus to answer questions about admissions, assist with registration, help complete HCC forms, receive and respond to requests for transcripts, and provide information required by outside individuals and organizations. In addition, the campus admissions and registration office will help students understand the policies and procedures in this catalog.

Bookstores

Each campus has a bookstore. The bookstores sell textbooks, general reading materials, books and periodicals, school supplies, art and engineering supplies, gifts, computers, computer software and other miscellaneous items.

Career Resource Center

The Career Resource Center provides students with information on careers and helps them make career decisions. Students can take career assessments and explore occupations with a campus Career Resource Center staff member through a variety of resources.

If students prefer working on their own, the college offers several automated career exploration options. Students can get more information about the career exploration system by visiting any campus Career Resource Center.

Employment opportunities are posted in the campus career centers and the online job boards. The Career Resource Center sponsors job fairs; schedules on-campus interviews with employers; and helps students with resume writing, interviewing techniques and other career related issues.

College Publications and Information

HCC provides members of the college community with current information by maintaining and supporting a variety of publications and media.

Counseling Services

Professional counselors are available to help students with career decision-making, academic planning, and personal growth. Counselors help provide direction to and monitor the progress of students who are on academic probation and those who have been previously academically suspended or dismissed. All information students share with counselors is treated with strict confidentiality.

In addition to short-term individual and group counseling, counselors offer seminars and workshops on study skills, time management, interpersonal skills, test anxiety reduction, and career exploration. All counseling services are free to students.

Students who would like to meet with a counselor may call or stop by an HCC counseling office. Students will either be seen on a walk-in basis or given an appointment.

Disability Services

Hillsborough Community College (HCC) is committed to providing an accessible education for all students. Students with a disability who require accommodations to participate fully in the academic environment or programs, please contact the Office of Services for Students with Disabilities (OSSD). The OSSD offers a range of support services and accommodations to ensure that all students have the opportunity to succeed academically. The dedicated OSSD staff works with students to determine and implement appropriate accommodations based on individual needs. For more information and to register for Disability Services, visit the Disability Services Webpage.

The OSSD staff are available on all HCC campuses. Use the following campus emails below to contact an OSSD Coordinator:

- Dale Mabry: dmdisabilityservice@hccfl.edu
- Ybor: YBDisabilityservice@hccfl.edu
- Plant City: PCDisabilityservices@hccfl.edu
- Brandon: brdisabilityservice@hccfl.edu
- SouthShore: SSDisabilityservice@hccfl.edu

If you are a new student who has not registered with OSSD, start here:

- Complete the Disability Services Application,
- Submit supporting documentation from a licensed professional and
- Schedule an appointment with an OSSD Coordinator to discuss your required accommodations.

If you are a returning student who has registered and completed the above steps, start here:

- Read and approve that you understand your rights and responsibilities,
- Select the classes and required accommodations for each course,
- View the notification letter and submit it (emailed to instructor) for class implementation.

To appeal or dispute accommodations requested, submit a written complaint or email District Disability Services at DistrictDisabilitiesSS@hccfl.edu.

To report conduct that violates the Americans with Disability Act (ADA) or Section 504 of the Rehabilitation Act, complete the Discrimination Complaint Form.

Food Services

Cafeterias on the Dale Mabry, Ybor and Brandon campuses are open when classes are in session. The food facilities at the Plant City and South Shore campuses are open during posted hours. Vending machines are located on all campuses.

Student Housing

The Hawks Landing Apartment Complex is available to HCC students for occupancy. The complex is located on the Dale Mabry Campus. For rental information, contact (813) 875-6000 or visit the Hawks Landing Web page at https://www.hccstudenthousing.com/.

College ID Card

As of spring term 2010, the Hawk Card serves as the official HCC photo ID card for students, faculty, and staff. The Hawk Card does not replace the HigherOne card which will remain as the student financial reimbursement card.

The Hawk Card is available at the Dale Mabry, Ybor City, Brandon, and Plant City Campus bookstores and at the Dean's Suite on the South Shore Campus. The first card is issued free of charge. A $20.00 card replacement fee will be charged for each additional card.

Student Email

Upon admission to HCC, all students are provided personalized Hawkmail email address accessible through MyHCC, HCC's web-based service delivery portal. HCC has adopted email as the official means of communications with students because of its speed and efficiency in

delivering important college communications. For this reason, it is important for students to check their Hawkmail regularly.

During registration periods, students should check their Hawkmail daily for registration confirmations, notices regarding fees, financial aid and other pertinent information. Log-in information for email and other electronic services is provided in admissions acceptance communications. See HCC Login | Hillsborough Community College (hccfl.edu) for more information.

Hawk Alert

Hawk Alert is Hillsborough Community College's new text messaging system. It is easy to sign up! To receive text messages about emergencies, special notices and campus closures, go to https://www.hccfl.edu/alerts and sign up for this free service.* Stay connected by signing up today!

* **NOTE:** Some charges may apply based on your service provider.

Lost and Found

Students should turn in any articles found on campus to the campus security office. To claim lost articles, students must present proper identification.

TRiO Student Support Services Program

TRiO Student Support Services is a federally recognized program funded by the Department of Education for either first-generation, low-income, and/or disabled students. Students participating in this program must be currently enrolled and in good standing at Hillsborough Community College for consideration and must qualify through an application process.

Services are free to the students and include academic advising, academic tutoring, college tours, per diem for approved meals, educational events, cultural events, enrichment workshops, private computer lab access, and a host of office support services.

TRiO Student Support Services is available on all five campuses to both in-person and online learning. TRiO has three established offices on the Ybor City, Dale Mabry, and Brandon Campuses. Other campus access is available upon request.

Test Centers

Test Centers, located on all campuses, administer faculty make-up, distance learning, placement, and counseling-related tests. Before being allowed to take tests, students must show picture identification, either a government-issued photo ID such as a driver's license or an HCC student ID card. Appointments for some or all services may be required. Check the specific campus Test Center for information https://www.hccfl.edu/support-services/testing.

Students taking the CLEP test are required to provide two forms of identification. One form of identification must be a government-issued photo ID such as a driver's license.

Students with disabilities who require alternative testing arrangements must contact an HCC coordinator of services for students with disabilities.

Students using unauthorized or inappropriate materials and students who conduct themselves inappropriately in a test center will be denied future testing privileges in the center and may be subject to college disciplinary action.

Vocational Rehabilitation Services

The Division of Vocational Rehabilitation, the Division of Blind Services, the Veterans Administration, and government agencies fund academic and vocational (technical) training for individuals with disabilities. For information about services and eligibility requirements and for referral to the appropriate agencies, students should contact an HCC coordinator of services for students with disabilities.

WINGS

The WINGS program is designed to promote the graduation of students pursuing AS or college certificate programs. A variety of support services are offered to address short-term as well as lifelong goals. Students may qualify for partial tuition and textbook support, in addition to childcare assistance.

To qualify, students must be enrolled in a technical education program and be eligible to receive a Federal Pell Grant. **To obtain further information, students should call (813)253-7234.**

Student Activities

Student Government Association

The Student Government Association (SGA) provides opportunities for students to actively participate in programs and policy-making at HCC. The SGA serves as a major vehicle for communication between students and the administration. The Student Government Association represents all students.

Each campus has an SGA with a president, executive board and senate.

Student Union Facilities

Student union facilities are open to all students. These facilities usually house offices for the SGA and areas in which students can meet.

Student Publications

Student publications and the student press are valuable aids in establishing and maintaining an atmosphere of free and responsible discussion. The college requires that its student publications staff adhere to responsible journalistic practices. The Canons of Journalism, the Advertising Code, and the Advertising Standards of Acceptability serve as external standards for which the editors and staff of the student publications at HCC strive.

Newspaper

The Hawkeye is HCC's student newspaper. Published regularly, the paper is staffed by students from all campuses and receives assistance from a faculty advisor. The newspaper is free.

Galeria

The Galeria, HCC's literary-arts magazine, is published annually under the supervision of a faculty advisor. The Galeria has a staff of student volunteers, and students from all campuses contribute the material published. The magazine is free to all HCC students.

Triad

The Triad, HCC's general magazine, is published annually under the supervision of a faculty advisor. Volunteer journalism students staff the Triad, and the magazine is free.

Cultural and Special Events

Art Exhibitions

HCC's Dale Mabry and Ybor City campuses are home to a variety of professional visual art galleries, offering learning environments that develop and teach visual literacy to students as well as the Tampa Bay community. These spaces support the college's educational and cultural vision by providing continuous forums dedicated to the appreciation, enjoyment, and understanding of the visual arts through the presentation of diverse, high-quality exhibitions. Artists of regional, national, and international artists in all media are included. Admission is free.

HCC Dale Mabry Campus
Gallery221@HCC, Learning Resources Center, 2nd Floor
Gallery3@HCC, Learning Resources Center, 3rd Floor
Gallery Hours: Mon-Wed 9am-4pm; Thurs 9am-7pm; Fri 9am-2pm; closed Sat/Sun and holidays.
For more information, call (813) 253-7386

HCC Ybor City Campus
Gallery114@HCC, Performing Arts Building, 1st Floor
Gallery Hours: Mon-Wed 9am-4pm; Thurs 9am-7pm; Fri 9am-2pm; closed Sat/Sun and holidays.
For more information, call (813) 253-7674

Dance

During the academic year, the HCC Dance department produces several faculty and student performances, workshops and guest artists in residence. Auditions for these performance and other events are held each semester. Productions are held at the Ybor City Campus Performing Arts Building.

Films, Dances and Special Events

Each semester campus student government associations sponsor events such as films, dances, concerts, guest speakers, special forums and cookouts. All events are at no cost to current students with a valid HCC ID card.

Music

Student, faculty and artist recitals are held in the Ybor Performing Arts Building. Vocal and instrumental recitals and concerts are scheduled primarily during the fall and spring terms and feature student, faculty and guest artists in solo and ensemble performances.

Visual and Performing Arts Guest Series

The Visual and Performing Arts guest series offers students an opportunity to see cutting edge performances by top notch performers for free. Productions are held at the Ybor City Campus Performing Arts Building, Mainstage Theatre. This program Is sponsored by HCC Student Activities.

Theatre

During the academic year, theatrical presentations are held on the Ybor City Campus. The schedule and location of open auditions for upcoming productions are posted on the campus bulletin board and on the website. Theatre department productions are held at the Ybor City Campus Performing Arts Building.

Sports

Gymnasium, Weight Room and the Tejas Pradip Patel Tennis Center

HCC's Tennis Center is located at the northeast corner of the Dale Mabry Campus.

Tennis courts are available for educational and recreational use by HCC students and the community. Programs, clinics and lessons are available for players of all ages and levels. Further details are available by calling (813) 348-1173 or visiting the website at www.tampatennis.net.

The gymnasium, which serves as the home court of the Hawks basketball and volleyball teams, is located on the Dale Mabry Campus.

College weight training rooms are available for student use free of charge at designated times. There are weight rooms located on the Dale Mabry and Ybor City campuses. Hours of operation for the weight room are posted and vary from term to term. Students are required to dress appropriately.

Varsity Sports

The varsity sports program consists of volleyball, basketball, tennis and softball (fast pitch) for women; and basketball and baseball for men.

The Hawks are members of the Florida College System Activities Association, Suncoast Conference, Mid-Florida Conference and Region VIII of the National Junior College Athletic Association.

Financial aid is available to any full-time student who meets both athletic and academic qualifications. For details, students should contact the athletic office, Dale Mabry Campus, at (813) 253-7407. Upon request, the college will make available to current or future students the completion rates of student athletes.

Student Clubs and Organizations

Each campus has clubs and organizations that serve student needs and interests. Student clubs and organizations provide students with the opportunity to participate in organized activities with others having similar interests. They offer students a way to make friends, expand

The HCC Student Handbook has a current list of clubs and organizations offered at each campus.

Student Policies

Activities Calendar

Each campus maintains a calendar listing the time and location of approved activities. Students must make arrangements for scheduling an event and reserving a location for a co-curricular activity with the appropriate student government activities advisor before the event can be placed on the activities calendar.

ADA (Americans with Disabilities Act)

HCC complies with, and fully supports, the 1990 Americans with Disabilities Act (ADA). The ADA prohibits discrimination on the basis of disability in the services, programs and activities provided and operated by the college. HCC also complies with, and fully supports, other federal, state and local laws that protect the rights of disabled persons, such as the Rehabilitation Act of 1973 and the Florida Educational Equity Act. Unless the result will cause an undue hardship to the college or fundamentally alter a program or service provided by the college, HCC will provide reasonable accommodations and auxiliary aids to disabled applicants, employees, students and members of the college community.

AIDS

HCC recognizes that Acquired Immune Deficiency Syndrome (AIDS), AIDS Related Complex (ARC), or a positive test for HIV antibody represents a significant public health threat. It is HCC's policy to balance the rights of AIDS victims to an education and employment at HCC against the rights of other students and employees to an environment in which they are protected from contracting the disease.

HCC will offer students with AIDS the same opportunities and benefits offered to other students. Generally, HCC will not impose any rules on students with AIDS that may have the effect of limiting their participation in the educational programs or activities at HCC. Students with AIDS will not be isolated by HCC or prevented from participating in college activities unless such participation has been scientifically shown to endanger the wider community. Risk determinations will be made by medical professionals in consultation with an office of services for students with disabilities.

A campus coordinator of services for students with disabilities is responsible for reviewing HCC's procedures and ensuring they are both free of discrimination and pose no danger to the community at large. The coordinator will also meet, as needed, to consider and recommend appropriate action in individual occurrences of the disease. Any questions, concerns, consultation regarding AIDS, services or accommodations should be referred to an office of services for students with disabilities.

Audio/Video Recordings

Students may, without prior notice, record video or audio of a class lecture for a class in which the student is enrolled for their own personal educational use. A class lecture is defined as a formal or methodical oral presentation as part of an HCC course intended to present information or teach enrolled students about a particular subject. Recording class activities other than class lectures, including but not limited to lab sessions, student presentations (whether individually or part of a group), class discussion (except when incidental to and incorporated within a class lecture), clinical presentations such as patient history, academic exercises involving student participation, test or examination administrations, field trips, private conversations between students in the class or between a student and the faculty member, and invited guest speakers is prohibited. Recordings may not be used as a substitute for class participation and class attendance and may not be published or shared without the written consent of the faculty member. Failure to adhere to these requirements may constitute a violation of the HCC Student Code of Conduct.

Bulletin Boards

Each campus has several large community bulletin boards on which students may post announcements such as want ads, for-sale notices, notices of meetings, etc. Prior to posting, all notices from students must have the stamped approval of the appropriate campus dean of student services, the dean's designee, or the organization assigned authority and/or responsibility for the specific bulletin board.

Campus Disturbances

State law prohibits the disruption of or interference with the administration, function or activities of an educational institution. In addition, the law prohibits individuals from encouraging students to disrupt the educational process or to interfere with the attendance of any student or employee.

Individuals who violate this law will be charged with a second-degree misdemeanor and, upon conviction, be fined up to $500, imprisoned for up to 60 days, or both. In addition, students who violate this law will be subject to college disciplinary procedures.

Campus Events

All on-campus meetings must be scheduled with the appropriate campus student activity coordinator or through the office of the appropriate campus of dean of student services.

Children on Campus

For safety reasons, parents and others responsible for the care of minor children under the age of 17 should not bring them on campus while engaged in academic activities such as class, research, lab periods, or study groups. Minor children under the age of 17 should be on campus only when activities specifically allow for their involvement.

Disciplinary Action

The campus dean of student services, according to HCC administrative procedures, administers disciplinary action resulting from violations of the Student Code of Conduct. The Student Code of Conduct is located in the Student Handbook, which is available on the HCC website at www.hccfl.edu.

Dress Code

HCC believes that students are mature enough to determine what constitutes appropriate dress. However, state law requires students to wear shirts and shoes while on HCC's campuses.

Drugs & Alcohol

One of HCC's goals is to maintain a drug-free workplace and educational setting. Therefore, the manufacture, distribution, dispensation, possession, or use of alcohol or controlled substances on HCC property is prohibited. However, upon prior authorization by the President, alcoholic beverages may be served on HCC property and at HCC functions.

Annually, each registered student is provided detailed information about HCC drug policies and the behavioral, social and legal consequences associated with drug use.

Students charged with violating this policy will be referred for disciplinary action to the appropriate campus dean of student services. Students who violate the college's drug and alcohol policy will be subject to severe disciplinary sanctions including suspension or expulsion. In addition, the college will refer violators to the appropriate law enforcement agencies for prosecution and will assist law enforcement agencies in investigating students who may be using or trafficking drugs.

For more details regarding HCC's policy on alcohol and illicit drugs, see Drug and Alcohol Abuse Prevention Program | HCC (hccfl.edu), the Student Handbook or the HCC Administrative Rule 6HX-10-2.05.

The college will also provide future students with a review of HCC's alcohol and drug prevention and education programs.

Hazing

Officers, members, and others associated with HCC student organizations are prohibited from engaging in hazing and in participating in activities on or off campus that endanger students' health or safety.

Intellectual Property

HCC is committed to providing an environment that supports the academic activities of our students and encourages innovation. Students may produce endeavors that are subject to copyright, trademark or patents from independent work or through College-sponsored or supported efforts using College funds, staff, facilities, material or technological information.

HCC's Administrative Rule 6HX-10-2.12 and Administrative Procedure 4.23 provide additional information on intellectual property and student work.

Ombudsman/Student Advocate

The vice president for student services and enrollment management is the college's ombudsman/advocate for students. The vice president's office is located on the third floor of the district administration center. Students may appeal decisions related to course access and credits granted toward degrees to the office of the ombudsman.

Religious Observances

HCC will reasonably accommodate the religious observances, practices, and beliefs of students in its admission, class attendance and the examination policies and in work assignments. Students must notify instructors at least one week prior to a religious observance.

Students may file a grievance if they believe they have unreasonably been denied an educational benefit due to their religious beliefs or practices.

Public Safety

The HCC public safety office is available to assist all students and employees. The public safety office patrols college property to detect and deter criminal activity, provide protection to those on campus, provide security for college property, and detect and document hazardous, unusual and suspicious behavior and conditions.

The public safety department provides information and assistance on a 24-hour basis. The department utilizes uniformed patrol officers with marked vehicles and officers on foot patrol to observe and detect criminal behavior and suspicious activities; enforce traffic and parking regulations; and assist students and employees. Students, employees, and members of the community are required to obey all local, state and federal laws, statutes and ordinances. In addition, members of the college community must observe all HCC administrative rules and procedures. The public safety department is responsible for monitoring compliance with these laws and many of the college's rules and procedures.

Responsible Students and Employees should:

- Inform the public safety department about suspicious conduct, criminal activities and hazardous situations.
- Refrain from leaving doors and windows open when rooms are vacant.

- Walk to cars and classes in groups or with a companion. (**Call 253-7911** for an officer escort to the parking lots or garage.)
- Walk in well-lighted areas at night, even when in a group.
- Attend to their intuition. **(If students feel they are being followed, they should change direction and walk toward a group of people or to a secure area.)**
- Watch their belongings.
- Avoid strangers that appear suspicious or out of place.
- Freely contact Security to ask for assistance.

Students who notice situations that represent potential or real safety or security problems should notify the local campus security office by using the emergency telephones.

Upon request, the college will make available to future students its policies, procedures, statistics and other information about campus safety and security. For more information see https://www.hccfl.edu/support-services/public-safety.

Sexual Harassment Policy

Hillsborough Community College will maintain a workplace and educational setting free from harassment of any kind and from any source including but not be limited to supervisors, co-workers, administrators, students, faculty, consultants and visitors to the college. Each administrator, faculty member, professional-managerial employee, classified employee and student should pursue assignments and responsibilities at the college with a total commitment to basic ethical principles and professional codes of conduct.

The college believes sexual relationships between teachers and students or superiors and subordinates are ill advised as they might adversely affect the academic or workplace environment or relationships. Such relationships between superiors and subordinates or between teachers and students are unethical because the consent of students or subordinates may not in fact be voluntary given the "power imbalance" in such relationships.

Tobacco-Free Policy

HCC is dedicated to providing a healthy and productive environment for its faculty, staff, students, visitors, and contractors which includes eliminating tobacco use as part of our commitment to promoting healthy practices and choices for individuals.

Tobacco-use is prohibited on all Hillsborough Community College properties, including owned and leased buildings, student housing, outdoor areas, parking lots and garages, courtyards, entrance and exit ways and college vehicles. This policy includes all types of tobacco and tobacco-like products, including smoked and smoke-less tobacco, other smoking products, and electronic cigarettes.

Student Misconduct

Students must adhere to all published federal and state laws and ordinances and college administrative rules and procedures. Alleged violations of the Student Code of Conduct will be referred to the appropriate campus dean of student services. Following the guidelines in the Student Handbook and Academic Planner for student conduct and discipline, the dean will determine the appropriate college response.

HCC will cooperate with external police and judicial authorities investigating alleged violations of public laws or ordinances.

Telephones

Office telephones are for official use only. If the college receives an emergency call for a student, every effort will be made to locate and inform the student. However, the college will not deliver personal messages of a non-emergency nature.

Textbook Refund Policy

HCC bookstores grant full refunds on textbooks (whether purchased new or used) during the first two weeks of the semester and during the first week of summer term. Books returned after those deadlines will be purchased at used book prices (55 percent of purchase price). In determining the amount to be refunded, the bookstores will follow these guidelines:

- All refund requests must be accompanied by sales receipts.
- If purchased new, books must be unmarked and must not be defaced in any manner. Marked books will be purchased at used book prices. The bookstore staff members are the sole judge of whether a book is in new or used condition.
- Each HCC bookstore will refund textbooks purchased at any other HCC bookstore.
- Books or merchandise that is defective should be exchanged as soon as the defect is discovered. Defective used books must be returned for exchange during the first two weeks of class.
- Students must provide a student ID and a government-issued photo ID in order to receive refunds.
- Refunds are not given for merchandise other than text books.
- Refunds are not given for special-order books.
- When students' petitions for late drops are approved, the deadline for refunds will be waived.

Buy Back Policy

If a textbook is in good, resalable condition and is a required textbook for the next semester (except when the bookstore's current stock exceeds the anticipated demand), the bookstore may buy the book back at a price determined by the bookstore.

The buy-back period is the first two weeks and last week of each semester and on every Tuesday and Wednesday during the semester.

On each campus, bookstore hours are posted each term.

Threats of Violence

Threats by HCC students, staff or visitors to do bodily harm, damage property or disrupt the operation of the college are inimical with the goals of the college and will not be tolerated. Students or employees who make such threats, whether verbal or written, expressed or implied, will be disciplined according to the appropriate administrative procedures.

Records Policies

Confidentiality of Student Records

The Family Educational Rights and Privacy Act (FERPA) governs the confidentiality of student records. (Records are defined as all records, files and data directly related to students that are created, maintained, and used by HCC.)

Notification of Social Security Number Collection and Usage

Hillsborough Community College (HCC) will only use your social security number (SSN) as needed for lawful purposes within the business of HCC and for those specific purposes identified by the Social Security Administration, the Internal Revenue Service and other state and federal regulatory agencies. The SSN will not be used in any information system as the primary identification of individuals unless required by law. HCC is committed to provide security for our students, faculty and staff; and recognizes that the threat of identity theft is a growing problem. HCC departments that are authorized and required to collect, transmit, store or use a SSN will do so in a secure manner. Violations of this policy may result in disciplinary action up to and including discharge or dismissal in accordance with HCC rules and procedures.

In compliance with Section 119.071, Florida Statutes, this document serves to notify you of the purpose for the collection and usage of your SSN.

HCC collects and uses your SSN only for the following purposes in performance of the College's duties and responsibilities. To protect your identity, HCC will protect your SSN from unauthorized access, never release your SSN to unauthorized parties, and assign you a unique student/employee identification number. This unique ID number is used for all associated employment and educational purposes at HCC.

For the student information system (MyHCC), the primary identifier for a student will be the student identification number, which will be used to access student education records, and for electronic and paper data systems that identify, track and service students. Faculty and staff will require students to provide their student identification number for all transactions and not SSNs for any transactions requiring access to student records.

Providing your SSN is a condition of employment at HCC. Your SSN is used for legitimate employment business purposes in compliance with:

Completing an Employment Application/Packet

Completing and processing background checks

Completing and processing the Federal I-9 (Dept. of Homeland Security)

Completing and processing Federal W4, W2, 1099 (Internal Revenue Service)

Completing and processing Federal Social Security taxes (FICA)

Processing and distributing Federal W2 (Internal Revenue Service)

Completing and processing quarterly unemployment reports (FL Dept. of Revenue)

Completing and processing Florida retirement contribution reports (FL Dept. of Revenue)

Processing workers compensation claims Florida Community College Risk Management Consortium (FCCRMC) and Dept. of Labor

Completing and processing direct deposit files

Completing and processing 403b and 457b contribution and similar reports

Completing and processing group health, life and dental coverage enrollment

Completing and processing various supplemental insurance deduction reports

The HCC Office of Financial Aid requires students to submit their SSN on various financial aid forms to coordinate institutional, state and federal financial aid programs.

The HCC Admissions Department will collect student SSNs, which are needed for federal reporting requirements. However, students are assigned a student number which will be used for all college business of identification. All SSNs are protected by FERPA and are never released to unauthorized parties.

The HCC Financial Services Office uses student SSN's to report information to the Internal Revenue Service (IRS) via 1098T, the Florida Prepaid Tuition Plan, to third parties paying for tuition and fees on behalf of the student, for reporting information to collection agencies, and for reports required by the state and federal government.

The Upward Bound, Educational Talent Search and College Reach-Out Programs are youth outreach (intervention) projects funded by discretionary grants from the United States or Florida Department of Education (FDOE). As such, each project is required to exclusively serve eligible participants that are citizens or nationals of the United States; or, are permanent residents of the United States. In order to verify a participant's project eligibility, SSNs are required and also later used when submitting information for the annual performance reports due to the United States or FDOE.

Workforce programs, funded through the Agency for Workforce Innovation (AWI), use your SSN as an identifier for program enrollment and completion. Also, it is used for entering placement information into the statewide data collection and reporting system. Because these are performance-based contract programs, AWI requires that all participants and their program-related activities be recorded in the Florida state system.

HCC students have the right to:

- Inspect and review their educational reports and records.
- Have privacy of their educational reports and records maintained.
- Require the college to obtain written consent prior to disclosing personally identifiable information except in those instances specifically noted in the statute.
- Challenge and request a hearing on requiring the college to amend any portion of the students' records that are inaccurate, misleading or otherwise in violation of the students' privacy.

Right of Access

Students and parents or guardians of dependent (per Section 152 of the Internal Revenue Code) students are entitled to these rights and to access to students' records. Parents or guardians of students will not be given access to the students' records without the written consent of the student or documentation that the student is dependent.

Students and eligible parents or guardians may request a list of the types of student records maintained by HCC. These records include but are not limited to:

- Academic records, i.e., application, transcripts, enrollment verifications, course records, grades, etc. (Direct requests to the appropriate campus admissions, registration and records office.)
- Disciplinary records. (Direct requests to the appropriate campus dean of student services.)
- Financial aid records. (Direct requests to the appropriate campus financial aid office.)
- Student account and fee records. (Direct requests to the college financial services department.)

Eligible individuals may inspect or review student records and reports and receive copies for the cost of producing such copies. College employees may review student records when the reason for their review serves a legitimate educational or administrative purpose. Unless conducting approved research, faculty members may review the records only of students currently enrolled in their classes.

Right of Waiver of Access to Confidential Letters or Statements

A student, eligible parent, or guardian may waive the right of access to evaluations, confidential letters, or letters of recommendation. When requested, HCC will provide the names of individuals who have submitted such letters and evaluations. Moreover, HCC will endeavor to ensure the recommendations and evaluations are used only for the purpose(s) intended.

Corrections

HCC maintains student records electronically, on paper, on microfilm and on microfiche. In order to provide students the opportunity to correct errors and appeal discrepancies, the college will maintain the original documents on which the records are based for one year. After one year, the source documents may no longer be available and documenting errors will become the students' responsibility.

Right to Challenge and Hearing

Students and eligible parents or guardians have the right to challenge the content and request amendment of records and reports they believe to be inaccurate or misleading. To present such a challenge, students, eligible parents or guardians should contact the appropriate campus admissions, registration and records office.

Challenges may be settled informally by a written agreement. If challenges cannot be settled informally, either party may request, within a reasonable period of time, that a formal hearing be held to settle the dispute. If a request is made, the appropriate campus president will appoint an administrator, without an interest in the outcome, to serve as the hearing officer. Students, eligible parents or guardians, and college employees whose testimony is relevant to the issue may present evidence. After reviewing all available evidence and testimony the hearing officer will make a written recommendation to the appointing president. The campus president will issue a written decision.

Students and eligible parents or guardians have the right to appeal decisions of campus presidents' rulings on FERPA challenges to the vice president for student services and enrollment management.

Right to Privacy

Students have the right to privacy with respect to the educational records maintained by the college. Personally identifiable student records or reports are confidential and will not be released without the written consent of students. HCC will release directory information on students unless students submit written requests to the appropriate campus admissions, registration and records office requesting that directory information be withheld. Directory information includes students':

- Names;
- Majors;
- Participation in officially recognized activities and sports;
- Weight and height (of members of athletic teams);
- Dates of attendance;
- Degrees and awards received;
- Enrollment status.

Complaints

Individuals who believe their privacy rights have been violated may petition the Family Educational Rights and Privacy Acts Office at the Department of Health & Welfare in Washington, D.C. or file suit in Circuit Court to request enforcement of the rights they believe to have been violated.

Rule and Procedure

Students may obtain a copy of the administrative rule and procedure on student records, including the requirements of the federal and state laws, from their campus dean of student services.

Release of Information

Organizations requiring verification of student enrollment or graduation should contact the National Student Clearinghouse at www.studentclearinghouse.org. Unofficial verifications can be processed through the student's MyHCC account.

Since the federal government requires educational institutions to take precautions to prevent the misuse of student data, HCC will release student information only upon receipt of a signed, written request by the student or other authorized requestor.

Parties requesting information should submit their requests, and any accompanying forms, to the campus admissions, registration and records office. The college will try to process requests for information within 10 working days.

Faculty Retention of Student Records

Faculty members should keep proof of student grades for one full year. HCC maintains student records on paper, microfilm, and computer files. Students have one year to correct any discrepancies in these records. After that, source documents for microfilm and computer files may no longer be available. Therefore, the burden of proof for changes made after the one-year period lies with the student.

College Preparatory Curriculum

The college preparatory curriculum is designed to improve students' performance in reading, writing and mathematics. In accordance with SBE Rule 6A-10.0315 **Common Placement Testing and Instruction**, "a student who entered 9th grade in a Florida public school in the 2003-2004 school year, or any year thereafter, and earned a Florida standard high school diploma or a student who is serving as an active duty member of any branch of the United States Armed Services shall not be required to take the common placement test and shall not be required to enroll in developmental education instruction in a Florida College System institution." Students who are required to take the college placement test and who earn scores below the state-mandated minimum scores must enroll in college preparatory communication and computation instruction. Depending on the areas needing remediation, students will be placed into college preparatory writing, reading, and/or computation courses. Students **must** see an advisor to ensure that they enroll in the appropriate courses that will best meet their needs. Even if the placement test is not required, all students are encouraged to take the placement test to determine if college preparatory courses are advisable for them.

Students attempting a college preparatory course for the third time must pay the full cost of instruction (withdrawal from a course counts as an attempt). Students who have serious extenuating circumstances may petition the appropriate campus dean of student services for an exemption from paying the full cost of instruction. Students who fail to complete a preparatory course satisfactorily within three attempts will not be allowed to register again for that course, unless otherwise specified.

College Preparatory Courses

ENC	0022	Developmental Writing	4 cr.
ENC	0055	Developmental Writing Module	1 cr.
†REA	0019	Developmental Reading	4 cr.
†MAT	0018	Pre-Algebra	3 cr.
†MAT	0022	Integrated Arithmetic and Algebra	5 cr.
†MAT	0028	Beginning Algebra	3 cr.
†MAT	0029	Developmental Mathematics for Statistics and Liberal Arts	3 cr.

Suggested electives to take with preparatory course work:

CGS	1500	Applied Word Processing	1 cr.
†CLP	1000	Psychology of Personal Growth	3 cr.
†FIN	1100	Personal Finance	3 cr.
†OST	1142	Keyboarding I	1 cr.
†OST	1143	Keyboarding II	1 cr.
†OST	1741	Word Processing	1 cr.
REA	1105	Critical Reading Techniques	3 cr.
REA	2505	Vocabulary Improvement	3 cr.

English for Academic Purposes (EAP)

Courses in English for Academic Purposes are offered at the Ybor City, Dale Mabry and SouthShore campuses.

The six levels of instruction are designed to help non-native English speakers reach a level of proficiency that will prepare them for better employment or academic opportunities.

Students whose diagnostic tests indicate they need instruction in English for Academic Purposes (EAP) are eligible to take the Post-secondary Education Readiness Test (PERT) after they have successfully completed all Level IV classes and their grades have been posted.

If they obtain the required college-level PERT scores in both writing and reading, they may enroll in ENC 1101 and in other college-level courses that are in their intended major. If they do not meet the required college-level PERT scores in both writing and reading, they must complete Levels V and VI. Students may not skip Level VI or retake the PERT after beginning Level V. Students enrolled in EAP Levels V and VI are eligible to take the PERT test only in math.

In order to be admitted to EAP, students must meet the required minimum scores in reading and language use on the placement test. Students who do not meet the required minimum scores are advised to take *Foundations: Beginning in English* classes offered through HCC's Institute for Corporate and Continuing Education (ICCE). EAP courses are as follows:

Institutional Credit Level

†EAP	0100	Speech/Listening I	3 cr.
†EAP	0120	Reading I	3 cr.
†EAP	0140	Writing I	3 cr.
†EAP	0160	Grammar I	3 cr.
†EAP	0200	Speech/Listening II	3 cr.
†EAP	0220	Reading II	3 cr.
†EAP	0240	Writing II	3 cr.
†EAP	0260	Grammar II	3 cr.
†EAP	0300	Speech/Listening III	3 cr.
†EAP	0320	Reading III	3 cr.
†EAP	0340	Writing III	3 cr.
†EAP	0360	Grammar III	3 cr.
†EAP	0400	Speech/Listening IV	3 cr.
†EAP	0420	Reading IV	3 cr.
†EAP	0440	Writing IV	3 cr.
†EAP	0460	Grammar IV	3 cr.

Associate in Arts Degree Elective Level (up to 24 cr. hrs.)

HCC currently offers a total of 16 credit hours for EAP Levels V and VI. Up to 24 credit hours of EAP Levels V and VI may potentially be applied from coursework taken in previous catalog years at HCC or another institution. Please see an EAP advisor for more information.

†EAP	1520C	Reading V	4 cr.
†EAP	1540C	Writing V	4 cr.
†EAP	1620C	Reading VI	4 cr.
†EAP	1640C	Writing VI	4 cr.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

The Associate Degree

Hillsborough Community College offers associate in arts (AA) and associate in science (AS) degrees.

The AA degree is awarded to students who complete university transfer curricula designed to prepare them to enter as juniors at a four-year college or university.

The AS degree is awarded to students who complete technical programs. The AS degree is designed to prepare students for the workforce. A number of these degrees are designed so that students who earn them may transfer their credits into specialized programs at four-year institutions. In addition, students who earn one AS degree may qualify for another. Students wishing to earn a second AS degree must complete at least 15 hours at HCC beyond the first degree. Moreover, they must meet all requirements for the second degree.

To ensure a well-rounded education, degree curricula include general education courses within communications, humanities, natural sciences, mathematics and social and behavioral sciences. Where options are available, they are noted.

Excess Hours Advisory Statement

Section 1009.286, Florida Statutes, establishes an "excess hour" surcharge for a student seeking a baccalaureate degree at a state university. An excess hour surcharge equal to 100 percent of the tuition rate will be applied for each credit hour in excess of 110 percent.

All students whose educational plan may include earning a bachelor's degree should make every effort to enroll in and successfully complete those courses that are required for their intended major on their first attempt. Florida college students intending to transfer to a state university should identify a major or "transfer program" early and be advised of admission requirements for that program, including the approved common prerequisites. Course withdrawals and/or repeats, as well as enrollment in courses, non-essential to the intended major, may contribute to a potential excess hours surcharge.

Prerequisite Coursework "C" or Better Requirement

A student must earn a "C" or better in prerequisite coursework unless the instructor waives the requirement or unless otherwise stated in the course description.

Graduation Requirements

To earn an AA or an AS degree, students must:

- Complete the approved curriculum of not less than 60 credits including general education requirements, program requirements, and electives.
- Complete Civics Literacy requirement:

  Per Section 1007.25, Florida Statutes and SBE 6A-10.02413 Civic Literacy Competency, first-time in college associate in arts or baccalaureate students entering a Florida College System institution between 2018-19 to 2020-21 school year must demonstrate competency in civic literacy through one of the following options prior to graduation:

  - Successfully passing either AMH 2020, Modern American History **or** POS 2041, American Government.
  - Achieving the standard score on one of the following assessments:

Assessment	Standard Score
AP Government and Politics: United States	3
AP United States History	4
CLEP: American Government	50
CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

  - Associate in arts students entering a Florida College System Institution between 2021-22 to 2023-24 school year must successfully pass AMH 2020 or POS 2041 either by taking a course or passing an approved credit-by-examination (see below) and must achieve a standard score on one of the following assessments prior to graduation:

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

  * Satisfies the course and assessment requirement.

  - Associate in science students initially entering a Florida College System Institution between 2022-2023 to 2023-24 school year must successfully pass AMH 2020 or POS 2041 either by taking a course or passing an approved credit-by-examination (see above) and must achieve a standard score on one of the following assessments prior to graduation:

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

  * Satisfies the course and assessment requirement.

  - Associate in arts, associate in science, or bachelor's degree students initially entering a Florida College System Institution in the 2024-2025 school year, and thereafter, must successfully pass AMH 2010, AMH 2020, or POS 2041 either by taking a course

or passing an approved credit-by-examination, and must achieve a standard score on one of the following assessments prior to graduation. Note: AMS 2010 Civil Discourse and American Political Order can be taken Spring 2025. AMS 2010 is not currently offered at HCC but may transfer in.

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

* Satisfies the course and assessment requirement.

NOTE: Beginning with the 2021-22 school year, students who earned a passing score on the Florida Civic Literacy Examination while in high school are exempt from the post-secondary civic literacy assessment requirement.

NOTE: Beginning with the 2021-22 school year, credits earned through authorized acceleration mechanisms in s. 1007.27, F.S., will count toward the civic literacy competency requirement.

- Fulfill the degree requirements under the catalog in effect during the semester that begins the period of continuous enrollment immediately prior to the semester in which the student applies for graduation. The graduation requirements of the catalog year in which a student initially enrolls will be valid for six years. Students who graduate after six years from the time of their initial enrollment will graduate under the requirements of the catalog in effect during the academic year in which they wish to graduate.

  Exceptions:
  - Programs deleted from the College inventory have a two-year teach-out time period, and students must complete a deleted program within the two-year teach-out period.
  - State Framework changes or other changes coming from the state supersede the six-year time period.

  NOTE: Continuous enrollment is maintained by registering for at least one term each academic catalog year. An academic catalog year is defined as the beginning Fall, Spring and ending Summer terms for the academic year. If a student's enrollment is interrupted for more than one academic catalog year, the student will be considered a former student returning. A former student returning must meet the graduation requirements of the catalog in effect during the semester they return.

- Earn at least 25 percent of the credit hours applicable to the degree in residence at HCC.

In addition:

- Have no more than four credit hours of physical education activity/skills courses may be applied toward a degree.
- Have a 2.0 cumulative GPA and a 2.0 institutional GPA.

  NOTE: Credits from other colleges will be used in computing the GPA.
- Complete an application for graduation.
- Fulfill all financial obligations before the release of the diploma.

Programs are subject to change.

Students are responsible for obtaining current and accurate information prior to registering for classes.

The Associate in Arts Degree

University Transfer Program

HCC offers one associate in arts (AA) degree program, and it is designed primarily to meet the requirements for a student to transfer to the upper division level of a college or university to continue to work toward a bachelor's degree. No more than one AA degree will be awarded to students.

Students should be aware of the specific requirements for the AA degree imposed by state regulations and law. For example, general education and elective credit requirements integrate requirements established by the Southern Association of Colleges and Schools and Florida's State Board of Education Rule 6A-10.030 (the Gordon Rule). Section 1007.25 (7), Florida Statutes require that associate in arts degree requires no more than 60 credit hours. Those statutes also mandate that the general education courses required for the associates in arts degree be distributed within designated categories. Courses that comprise the 24 hours of electives may be designated for university program entry.

Meeting graduation requirements for an AA degree from a Florida community college is not synonymous with meeting the specific course requirements to enter a specific program at a state university or private college belonging to the Independent Colleges of Florida.

The HCC AA degree program prepares students for hundreds of possible transfer majors, each of which has a distinct listing of common prerequisite courses designated by the Florida State University System. To help students in their educational planning, HCC offers AA pathways that include courses that may be typically found in an associated baccalaureate degree program. These AA pathways are intended to guide students. Students are not obligated to choose the courses that are included in the pathway, nor do they graduate with a degree in their selected pathway. To ensure accuracy in selecting courses, students should consult an advisor. The following is a list of the available HCC AA pathways:

- Accounting
- Agriculture
- Anthropology
- Architecture
- Art
- Biological Sciences: General, Marine, or Aquatic
- Building Construction
- Business Administration
- Communication
- Computer Information Systems
- Computer Science (Engineering)
- Criminology
- Cybersecurity
- Dance
- Education/Teacher Preparation
- Engineering
- Entrepreneurship
- Exercise Science
- Finance
- Foreign Language
- Graphic Design
- Geology
- History
- Hospitality Administration Management
- Humanities
- Information Technology
- Liberal Arts and Sciences
- Marketing
- Mass Communications
- Math Education: Teacher Prep
- Mathematics
- Medical Science
- Music
- Pharmacy
- Philosophy
- Political Science
- Psychology
- Public Health
- Religious Studies
- Sociology
- Statistics
- Supply Chain Management
- Theatre

To earn an AA degree, students must complete a minimum of 60 credit hours with no less than 36 credits of specified general education courses and 24 credits in the university transfer program electives. Legislation may further affect the graduation requirement; therefore, students are advised to obtain more current information from the advising and transfer offices.

The articulation agreement between Florida community colleges and state universities specifies that students who have been certified as having satisfactorily completed the general education requirements in a university transfer program are exempt from any additional general education requirements after transferring to a state university or community college. However, to be eligible for admission into a limited access program at a state university, students may be required to take specific prerequisite courses (which may exceed the 60 credit hours) and meet other requirements such as a minimum GPA, minimum ACT/SAT test scores or audition/portfolio.

Students may pursue any combination of university transfer programs, but only one AA degree will be awarded.

Students are advised to contact the specific department of the institution where they plan to transfer as early as possible for information regarding courses to be taken at HCC. Courses required at transfer institutions may fulfill HCC general education requirements or electives.

SLS 1106 or an approved substitute is required for all first-time-in-college-students seeking an Associate in Arts degree. Please see an advisor for more information.

General Education Requirements

General education provides a foundation upon which a student's learning experience is built. It offers students the opportunity to acquire the skills and knowledge necessary to have a broad understanding of a changing world.

The HCC general education program is designed to provide students with the knowledge, skills, and vision necessary to allow them to become valued participants in a complex and culturally diverse world. The program encourages intellectual inquiry, helping students to develop an understanding of the human mind and spirit, as well as a sense of history and the dynamics of the society around them. As students plan for the world that is ahead of them, the general education program gives them an appreciation of the world that preceded them, as well as a frame of reference for the world in which they live.

Students who complete the HCC general education core curriculum should be able to demonstrate their:

- ability to think critically.
- ability to express themselves clearly in written and oral communication.
- ability to express themselves effectively in quantitative terms.
- understanding of and appreciation for the value and significance of culture.
- appreciation of the scientific method of inquiry and the historical and contemporary impact of science on daily life.
- understanding of global political, social, economic, and historical perspectives.
- ability to use technology to access, retrieve, process, and communicate information.

To earn an AA degree, students must complete 36 hours of general education courses which includes state-mandated core coursework. The general education courses are divided into three groups consisting of two or more disciplines. Each discipline category includes core options and additional HCC options. Specific instructions are provided for each discipline.

Group I – Communications and Humanities: 15 credits required

Discipline: Communications (9 credits required)

Core Options

Choose course below**:**

ENC 1101 English Composition I ..... 3 cr.

NOTE: Students will earn the Fundamentals in Written Communication digital badge upon completion of this course with a grade of C or better.

Additional HCC Options

Choose both options below:

ENC 1102 English Composition II ..... 3 cr.
SPC 1608 Public Speaking ..... 3 cr.

Discipline: Humanities (6 credits required)

Core Options

Choose one or two courses below:

ARH 1000 Understanding Visual Art ..... 3 cr.
HUM 1020 Introduction to the Humanities ..... 3 cr.
MUL 1010 Introduction to Music ..... 3 cr.
PHI 1010 Introduction to Philosophy ..... 3 cr.
THE 1000 Introduction to Theatre Arts ..... 3 cr.
LIT 2000 Introduction to Literature ..... 3 cr.*

*LIT 2000 is a selected topics course in literature. During any given term, sections will be offered covering a variety of literature subjects, such as the following possible topics:

American Literature to 1885
American Literature: 1885 to Present
African-American Literature
British Literature to 1800
British Literature: 1800 to Present
Latin-American Literature
World Literature to 1650
World Literature: 1650 to Present
Or other selected topics in literature.

Additional HCC Options

If only one course was selected from the core options, choose the second course from options below:

DAN 2100 Introduction to Dance ..... 3 cr.
HUM 2210 World Humanities: Prehistory to Early Modern Era ..... 3 cr.
HUM 2230 World Humanities: Early Modern to Contemporary ..... 3 cr.
PHI 1100 Elementary Logic ..... 3 cr.
PHI 1600 Ethics ..... 3 cr.
REL 2300 Introduction to Religion ..... 3 cr.

Group II – Mathematics and Natural Science: 12 credits required

Discipline: Mathematics (6 credits required)

Core Options

Choose one or two courses below:

MAC 1105 College Algebra ..... 3 cr.
MAC 1105C College Algebra with Integrated Review 3 cr.
MAC 2311 Calculus and Analytic Geometry ..... 5 cr.
MGF 1130 Mathematical Thinking ..... 3 cr.
STA 2023 Elementary Statistics ..... 3 cr.

Additional HCC Options

If only one course was selected from the core options, choose the second course from the options below:

MAC 1106 Combined College Algebra/Pre-Calculus 5 cr.
MAC 1114 Trigonometry ..... 3 cr.
MAC 1140 Pre-Calculus Algebra ..... 3 cr.
MAC 1147 Pre-Calculus Algebra and Trigonometry 5 cr.
MAC 2233C Calculus for Business and Social Science. 3 cr.
MAC 2312 Calculus and Analytic Geometry II ..... 5 cr.
MAC 2313 Calculus and Analytic Geometry III ..... 5 cr.
MAD 2104 Discrete Mathematics ..... 3 cr.
MAP 2302 Differential Equations ..... 3 cr.
MGF 1131 Mathematics in Context ..... 3 cr.

NOTE: Any student who completes a mathematics course for which one of the general education core course options in mathematics is an immediate prerequisite should be considered to have completed the mathematics core.

Discipline: Science (6 credits required plus at least one lab as a required elective)

Students must select at least one course in biological science and one course in physical science from the following list of courses. At least one science option must be a core option. For the additional HCC options, students may choose from the list below, or students may select any college-level science course higher than the core course options.

The selection must include at least one lecture course with its co-requisite laboratory in biological science or physical science. The co-requisite laboratory will count outside of the 36-hour general education requirement.

Courses with an asterisk denote courses that are intended for students who plan to pursue a major in the sciences, health care, or a related field. See an advisor for specific guidance on which courses to take.

Biological Science

Students must select at least one course below in the biological sciences from the core option or from the additional HCC options. Students may choose a lecture/lab combination from the biological sciences and/or from the physical sciences, but they must choose a lecture/lab combination from at least one of these sciences.

Core Options

BSC 1005	Biological Foundations/BSC 1005L, Biological Foundations Lab	4 cr.
BSC 2010	Biology I Cellular Processes/BSC 2010L Biology I Cellular Processes Lab*	4 cr.
BSC 2085	Human Anatomy and Physiology I/BSC 2085L Human Anatomy and Physiology I Lab*	4 cr.
EVR 1001C	Introduction to Environmental Science	3 cr.

Additional HCC Options

BSC 1025C	Nutrition and Drugs	3 cr.
BSC 1092	Human Biology /BSC 1092L, Human Biology Lab	4 cr.
BSC 2011	Biology II Biodiversity/BSC 2011L, Biology II Biodiversity Lab	4 cr.
BSC 2086	Human Anatomy and Physiology II/BSC 2086L, Human Anatomy and Physiology II Lab	4 cr.
OCB 2000	Marine Biology/OCB 2000L, Marine Biology Lab *	4 cr.
PCB 1730C	Human Reproduction and Inheritance	3 cr.
ZOO 1010C	General Zoology	3 cr.

Physical Science

Students must select at least one course below in the physical sciences from the core option or from the additional HCC options. Students may choose a lecture/lab combination from the physical sciences and/or from the biological sciences, but they must choose a lecture/lab combination from at least one of these sciences.

Core Options

AST 1002C	Astronomy	3 cr.
CHM 1020C	Chemistry and Society	3 cr.
CHM 2045	General Chemistry I/CHM 2045L, General Chemistry I Lab*	4 cr.
ESC 1000	Earth Science/ESC 1000L, Earth Science Lab	4 cr.
GLY 2010	Physical Geology/GLY 2010L, Physical Geology Lab *	4 cr.
OCE 2001C	Introduction to Oceanography	3 cr.
PHY 1020C	Conceptual Physics	3 cr.
PHY 2048	Physics with Calculus I/PHY 2048L, Physics with Calculus I Lab	5 cr.
PHY 2053	General Physics I/PHY 2053L, General Physics I Lab*	4 cr.

Additional HCC Options

CHM 2046	General Chemistry II/CHM 2046L, General Chemistry II Lab	4 cr.
CHM 1032	Chemistry for Health Sciences/CHM 1032L, Chemistry for Health Sciences Lab*	4 cr.
CHM 2210	Organic Chemistry I/CHM 2210L, Organic Chemistry I Lab	5 cr.
CHM 2211	Organic Chemistry II/CHM 2211L, Organic Chemistry II Lab	5 cr.
CHS 2440	Chemistry for Engineers/CHS 2440L, Chemistry for Engineers Lab	4 cr.
MET 2010C	Meteorology	3 cr.
PHY 2049	Physics with Calculus II/PHY 2049L, Physics with Calculus II Lab	5 cr.
PHY 2054	General Physics II/PHY 2054L, General Physics II Lab	4 cr.
PSC 1515	Energy and the Environment/PSC 1515L, Energy and the Environment Lab	4 cr.

* Intended for students who plan to pursue a major in the sciences, health care, or a related field. See an advisor for specific guidelines on which courses to take.

NOTE: Any student who completes a natural science course for which one of the general education core course options in natural science is an immediate prerequisite should be considered to have completed the natural science core.

Group III – Social Science: 9 credits required

Discipline: Behavioral Science (3 credits required)

Choose one course from core or additional options below:

Core Options

ANT 2000	Introduction to Anthropology	3 cr.
PSY 2012	General Psychology	3 cr.

Additional HCC Options

SYG 2000	Introduction to Sociology	3 cr.

Disciplines: History/Political Science (3 credits required)

Choose one course from core or additional options below:

Core Options

*AMH 2010	Early American History	3 cr.
*AMH 2020	Modern American History	3 cr.
*POS 2041	American Government	3 cr.

Additional HCC Options

EUH 2000 The Western World Origins to Early Modern Europe .....3 cr.
EUH 2001 The Western World: Modern Europe .....3 cr.
LAH 2020 Survey of Latin American History .....3 cr.
POS 1001 Introduction to Political Science .....3 cr.

Behavioral Science, History, Political Science, Economics (3 credits required)

Choose one course from core or additional options below:

Core Options

AMH 2010 Early American History .....3 cr.
AMH 2020 Modern American History .....3 cr.
ANT 2000 Introduction to Anthropology .....3 cr.
ECO 2013 Principles of Macroeconomics .....3 cr.
POS 2041 American Government .....3 cr.
PSY 2012 General Psychology .....3 cr.

Additional HCC Options

EUH 2000 The Western World Origins to Early Modern Europe .....3 cr.
EUH 2001 The Western World: Modern Europe .....3 cr.
LAH 2020 Survey of Latin American History .....3 cr.
POS 1001 Introduction to Political Science .....3 cr.
SYG 2000 Introduction to Sociology .....3 cr.

* See Civics Literacy Requirement section below.

Computer Proficiency Requirement

Computer proficiency is a core requirement of the associate in arts degree general education curriculum. Students must demonstrate computer proficiency in one of the following ways:

1. Successfully complete the approved HCC computer course, CGS 2100 (3 Credits). Successful completion requires that the student earn a grade of "C" or better in the course.
2. Provide an official transcript demonstrating successful completion of a college/university course(s) equivalent to the approved HCC course(s).
3. Pass the proficiency test administered by the college.

Students should check with the counseling/advising office on their campus for specific information about fulfilling the requirement to demonstrate computer proficiency.

Civics Literacy Requirement

Per Section 1007.25, Florida Statutes and SBE 6A-10.02413 Civic Literacy Competency, first-time in college associate in arts students entering a Florida College System institution between 2018-19 to 2020-21 school year must demonstrate competency in civic literacy through one of the following options prior to graduation:

1. Successfully passing either AMH 2020, Modern American History **or** POS 2041, American Government.
2. Achieving the standard score on one of the following assessments:

Assessment	Standard Score
AP Government and Politics: United States	3
AP United States History	4
CLEP: American Government	50
CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

- Associate in arts students entering a Florida College System Institution between 2021-22 to 2023-24 school year must successfully pass AMH 2020 or POS 2041 either by taking a course or passing an approved credit-by-examination (see below) and must achieve a standard score on one of the following assessments prior to graduation:

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

* Satisfies the course and assessment requirement.

- Associate in arts students initially entering a Florida College System Institution in the 2024-2025 school year, and thereafter, must successfully pass AMH 2010, AMH 2020, or POS 2041 either by taking a course or passing an approved credit-by-examination, and must achieve a standard score on one of the following assessments prior to graduation. Note: AMS 2010 Civil Discourse and American Political Order can be taken Spring 2025. AMS 2010 is not currently offered at HCC but may transfer in.

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

* Satisfies the course and assessment requirement.

NOTE: Beginning with the 2021-22 school year, students who earned a passing score on the Florida Civic Literacy Examination while in high school are exempt from the post-secondary civic literacy assessment requirement.

NOTE: Beginning with the 2021-22 school year, credits earned through authorized acceleration mechanisms in s. 1007.27, F.S., will count toward the civic literacy competency requirement.

Foreign Language Requirement

Section 1007.262, Florida Statutes require demonstration of foreign language competency for Associate in Arts degree-seeking students. Students must demonstrate competence in foreign languages by completing two credits in one foreign language at the secondary level or the equivalent at the postsecondary level. The equivalent at the postsecondary level is defined as completing a postsecondary course at the elementary 2 level in one foreign language or in American Sign Language.

Gordon Rule Requirements

State Board of Education Rule 6A-10.030 (the Gordon Rule) is a rule stipulating requirements of student performance in both the communications and mathematics areas. Satisfactory completion of this rule requires that a student earn a grade of "C" or better in each applicable course.

Students fulfill the Gordon Rule requirement upon successful completion of the general education curriculum. Within the communications area, the student is required to complete writing assignments as designated in the instructors' syllabi in the areas of English, humanities, history, natural science, physical science, behavioral science, and history/political science. Certain courses and disciplines have word-count requirements. Within the mathematics area, completion of the general education mathematics courses fulfills the requirement. Prerequisite courses must be completed, or appropriate test scores attained, before enrolling in Gordon Rule courses.

IDS 2891, CONNECTIONS Course Requirement

IDS 2891, Connections, is an interdisciplinary course that allows students to synthesize key components of their general education experience. Based on the selected topics approach, the course summarizes major points in the bodies of knowledge that were acquired while students participated in the general education curriculum, and it provides opportunities for students to use the knowledge and skills gained from their general education experience in an applied manner. Required for graduation by students enrolled in the associate in arts degree program, the course involves research skills, the application of theoretical models, and the use of learned skills. Prior to taking the course, students must have completed at least 45 hours of coursework towards the degree, including at least 24 hours of general education coursework with a minimum grade of "C."

SLS 1106, First Year Experience Course Requirement

SLS 1106, First Year Experience is a course designed to support and guide first-time-in-college students. Prior to earning 18 college credits, students in the A.A. Degree Program must enroll in SLS 1106--a three-credit, college-level course that is fully transferable and financial aid eligible. SLS 1106 will assist those new to college by pairing faculty and academic advisors in the classroom, where they will help students develop short and long-range goals, create a career-focused college completion plan, and learn about HCC's support services. The course content emphasizes student navigation and learning engagement at the College in order to help ensure that more learners persist into their second academic years and graduate on time. Students who have taken other SLS courses or who are accepted into certain programs or AA pathways (e.g., HCC Honors Program, FUSE, AA.THE. AA.MUSIC, AA.ART, AA.GRA) may be exempt from this program requirement. Be certain to consult an academic advisor to confirm an exemption. Non-exempt, first-time-in-college students must earn a "C" or better in SLS 1106 before completing 18 credit hours.

AA • Associate in Arts Degree

***Only one AA degree will be awarded upon satisfactory completion of 60 credit hours*. Unless restrictions apply, any transferrable course may be included and used as an AA elective. The AA pathways included in the catalog are guidelines and course requirements may vary by university; therefore, students are encouraged to visit the webpage or catalog at the college/university of interest to validate the recommended courses. Advisors should be consulted to help with the student's specific academic plan or for information on any pathway that is not included in the HCC Catalog.**

AA • Accounting Pathway

AA.ACG (60 credit hours)

This pathway is for students who want to pursue a four-year degree in Accountancy, which includes careers in business, industry, government, and other organizations.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

AA • Architecture Pathway

AA.ARC (72 credit hours)

The Architecture AA degree pathway prepares students for a career in architectural design and for transfer to university for a bachelor's or master's degree in architecture. Students entering this program should have artistic talent, an eye for detail, and an interest in both hand-drawing and drafting technology as they apply to architectural design. Students are also encouraged to take CADD (Computer-Aided Design & Drafting) courses in addition to the required AA track courses for transfer. Some of the coursework may also be relevant and transferable to other institutions for interior design and landscape architecture. Prospective students should consult with transfer institutions for detailed requirements.

This curriculum is from the current catalog and is meant to provide prospective students a guide/pathway to complete the following degree track. Students are highly encouraged to follow the curriculum track as outlined below. Please note that some courses within the degrees and certificates are not offered every term and only certain courses are offered as distance-learning modality. Some courses in the track are sequential and will thus require additional coursework. Students should consult the Department Chair, Joseph Tisdale, for advising questions.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

AA • Art Pathway

AA.ART (60 credit hours)

This pathway is for students who want to pursue a four-year college/university degree in such fields as fine arts, art education, art history, and design. The pathway offers foundation courses in studio skills and studio methods. Major studies include design, drawing, painting, sculpture, printmaking, ceramics, photography, and graphic art. Depending upon personal development, students may choose to work in a variety of art media or concentrate in a specialized area.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement. CGS 2100 may be able to be tested out for no credit.

AA • Computer Information Systems Pathway

AA.CIS (65 credit hours)

This pathway is for students who want to pursue a four-year degree in computer and information sciences and work in business or related fields. Careers include finance analysts, actuaries, statisticians, economists, and positions in designing, testing and implementing computer programs in various segments of business and industry, management, operations and business planning.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students.

YEAR I – First Semester

†CGS	1000	Introduction to Computers and Technology	3 cr.
†ENC	1101	English Composition I	3 cr.
*†MAC	2311	Calculus and Analytic Geometry	5 cr.

†SLS 1106 First Year Experience Orientation ..... 3 cr.

		Humanities General Education	3 cr.
		Elective	1 cr.

****Select 3 credit hours from the following Programming Fundamentals elective course options:**

COP	1030	Introduction to Python Programming	3 cr.
COP	1220	Programming in C	3 cr.
COP	2800	Java Programming	3 cr.
COP	2224	Programming in C++	3 cr.
COP	2360	Programming in C#	3 cr.
COP	2805C	Java Advanced	3 cr.

*****Select 3 credit hours from the following Object-Oriented Programming elective course options (must not be the same course as the Programming Fundamentals elective course option):**

COP	2805C	Java Advanced	3 cr.
COP	2224	Programming in C++	3 cr.
COP	2360	Programming in C#	3 cr.
COP	2800	Java Programming	3 cr.
COP	1030	Introduction to Python Programming	3 cr.

Common Course Prerequisites recommended by the State for successful transfer to the university are marked with an asterisk (*).

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

AA • Dance Pathway

AA.DAN (63 credit hours)

This pathway is for students who wish to pursue a four-year degree in dance or further their dance training at the university level or pursue a dance career. Dance courses are rigorous and demanding, but offer students opportunities for artistic explorations, creative thinking and individual growth. The associate in arts pathway in dance provides a comprehensive sequence of technique, choreography, repertory and analysis courses.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement. CGS 2100 may be able to be tested out for no credit.

AA • Foreign Language Pathway

AA.FORL (60 credit hours)

This pathway is designed to assist students who plan to transfer to a Florida public university as a junior to complete a four-year bachelors' degree with a major or minor in a Foreign Language. The Foreign Language pathway builds competencies in listening, speaking, reading, writing and culture. Students begin at the elementary language level and continue to the intermediate level. This is normally a 4 semester sequence. Proficiency at the intermediate level is required to enter a bachelors' degree program with a major or minor in a Foreign Language. In addition to the required language core courses, students will have the opportunity to choose elective interdisciplinary courses that further develop their cultural, social and historical knowledge. This broad interdisciplinary approach can lead to a variety of career paths, such as government and international affairs, business, journalism, service professions, education, criminal justice, social sciences and public health. Students who plan to transfer to a limited access program are responsible for completing the specific requirements of the institution to which they will transfer since **completion of this pathway does not guarantee admission to an upper division limited access program**. Students in this pathway must complete all required college-preparatory courses, prerequisites for the listed course requirements. Courses meeting the preceding requirements may be in addition to the 60 credit hours listed.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

YEAR I – First Semester

AA • History Pathway

AA.HIS (60 credit hours)

This pathway is for students who want to pursue a four-year college/university degree in such fields as history, humanities, education, pre-law, political science, museum studies, journalism, library science, archeology/classics or international studies programs. This pathway is broadly designed to allow students to cater the major to their own interests, however, students are encouraged to meet with a full-time history faculty member to discuss their program interests in their first semester at HCC.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

AA • Math: Education/Teacher Preparation Pathway

AA.MATH.EDU (60 credit hours)

This pathway is for students who want to pursue a four-year degree in mathematics education**. Students planning to become classroom teachers must have a standard high school diploma or a GED.**

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

AA • Political Science Pathway

AA.POS (60 credit hours)

This pathway is for students who want to pursue a four-year college/university degree in such fields as history, pre-law, political science, or international studies programs. The program is broadly designed to allow students to cater the major to their own interests; however, it is recommended that students meet with a full-time political science faculty member to discuss their program interests in their first semester at HCC.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

AA • Sociology Pathway

AA.SYG (60 credit hours)

This pathway is for students who want to pursue a four-year degree in sociology.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

YEAR I – First Semester

†ENC	1101	English Composition I	3 cr.
†SLS	1106	First Year Experience Orientation	3 cr.
		Biological Science General Education with lab	4 cr.
		†Humanities General Education CORE	3 cr.

YEAR I – Second Semester

†ENC	1102	English Composition II	3 cr.
		Mathematics General Education	3 cr.
†SPC	1608	Public Speaking	3 cr.
*†SYG	2000	Introduction to Sociology	3 cr.

YEAR I – Third Semester

†AMH	2010	Early American History or †AMH 2020, Modern American History *or* †POS 2041,	

American Government ..... 3 cr.
†ANT 2000 Introduction to Anthropology ***or*** †PSY 2012, General Psychology ..... 3 cr.
†CGS 2100 Computer Information Technology and Literacy ..... 3 cr.
†STA 2023 Elementary Statistics ..... 3 cr.

YEAR II – First Semester

†CHM 1020C Chemistry and Society ..... 3 cr.
†HUM 2210 World Humanities: Prehistory to Early Modern ..... 3 cr.
†PHI 1600 Ethics ***or*** †REL 2300, Introduction to Religion ..... 3 cr.
*†SYG 2010 Social Problems ..... 3 cr.

YEAR II – Second Semester

†IDS 2891 Connections ..... 3 cr.
†POS 1001 Introduction to Political Science or †EUH 2000, The Western World: Origins to Early Modern Europe ..... 3 cr.
*†SYG 2012 Introduction to Globalization ***or*** *†SYG 2430, Marriage and Family ..... 3 cr.
**Elective ..... 3 cr.

****Select 3 credit hours from the following elective course options:**

AFA 1001 Introduction to Black Culture ..... 3 cr.
†ANT 2000 Introduction to Anthropology ..... 3 cr.
†BSC 1025C Nutrition and Drugs ..... 3 cr.
†CCJ 1010 Introduction to Criminology ..... 3 cr.
†HUM 2230 World Humanities: Early Modern to the Contemporary ..... 3 cr.
†HUM 2410 Asian Humanities ..... 3 cr.
†HUM 2420 African Humanities ..... 3 cr.
†HUM 2461 Latin-American Humanities ..... 3 cr.
MAN 2604 Intercultural Relations in Business ..... 3 cr.
†MUL 1010 Introduction to Music ..... 3 cr.
†PHI 1010 Introduction to Philosophy ..... 3 cr.
†PHI 1600 Ethics ..... 3 cr.
†PSY 2012 General Psychology ..... 3 cr.
†REL 2300 Introduction to Religion ..... 3 cr.
†SYG 2340 Human Sexuality ..... 3 cr.

*†‡COP	1000	Programming Logic	3 cr.
*†MAC	2312	Calculus and Analytic Geometry II	5 cr.
		Behavioral Science/History/Political Science/Economics General Education	3 cr.

YEAR II – Second Semester

†IDS	2891	Connections	1 cr.
*†MAC	2313	Calculus and Analytic Geometry III	5 cr.
†MAP	2302	Differential Equations	3 cr.
		Humanities General Education	3 cr.

Common Course Prerequisites recommended by the State for successful transfer to the university are marked with an asterisk (*).

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

‡COP 1000 requires CGS 1000 as a prerequisite. If CGS 1000 is completed, it will satisfy the computer proficiency requirement; therefore, the student will not need to take CGS 2100 in addition to CGS 1000.

AA • Supply Chain Management Pathway

AA.SCM (60 credit hours)

This pathway is for students who want to pursue a four-year degree in the supply chain industry, which functions to facilitate the flow of goods, services, and finances among business on a global scale. Careers include positions in manufacturing, distribution, transportation, and retail.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement, and for most of the pathways, SLS 1106 is required for first-time-in-college students. CGS 2100 may be able to be tested out for no credit.

YEAR I – First Semester

*†CGS	2100	Computer Information Technology and Literacy	3 cr.
†ENC	1101	English Composition I	3 cr.
*†MAC	1105	College Algebra	3 cr.
†SLS	1106	First Year Experience Orientation or SLS 1261, Personal Skills for Business	3 cr.

YEAR I – Second Semester

*†ECO	2013	Principles of Macroeconomics	3 cr.
†ENC	1102	English Composition II	3 cr.
*†MAC	2233C	Calculus for Business and Social Science	3 cr.
		†Behavioral Science General Education	3 cr.

YEAR I – Third Semester

†AMH	2010	Early American History or †AMH 2020, Modern American History ***or*** †POS 2041, American Government	3 cr.
†SPC	1608	Public Speaking	3 cr.
		Biological Science General Education	3-4 cr.

YEAR II – First Semester

*†ACG	2021	Financial Accounting	3 cr.

*†ECO	2023	Principles of Microeconomics	3 cr.
*†STA	2023	Elementary Statistics	3 cr.
		†Humanities General Education CORE	3 cr.

YEAR II – Second Semester

*†ACG	2071	Managerial Accounting	3 cr.
†IDS	2891	Connections	1 cr.
		Humanities General Education	3 cr.
		Physical Science General Education	3-4 cr.
		Elective(s)	3-4 cr.

****Select electives from the following. Elective hours are contingent on initial math sequence placement.**

†MAN	2500	Operations Management	3 cr.
†SCM	1010	Introduction to Supply Chain Management	3 cr.

Common Course Prerequisites recommended by the State for successful transfer to the university are marked with an asterisk (*).

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

AA • Theatre Pathway

AA.THE (60 credit hours)

This pathway is for students who wish to pursue a four-year degree in drama or theatre. This program provides a foundation in acting, technical design, backstage work, and production. Additional careers include directing, writing and teaching.

This pathway is a guideline. Consult an academic advisor with questions related to pathways and course planning and/or validate the recommended courses by visiting the webpage or catalog of the college/university of interest. Note that only one AA degree will be awarded upon satisfactory completion of 60 credit hours. IDS 2891 is an AA degree requirement. CGS 2100 may be able to be tested out for no credit.

YEAR I – First Semester

†ENC	1101	English Composition I	3 cr.
†SPC	1608	Public Speaking	3 cr.
*†THE	1000	Introduction to Theatre Arts	3 cr.
*TPP	1110	Acting I	3 cr.
MGF	1130	Mathematical Thinking	3 cr.

YEAR I – Second Semester

*TPA	1200	Stagecraft	3 cr.
*TPP	1111	Acting II	3 cr.
*TPP	1160	Voice and Movement Techniques	3 cr.
		Mathematics General Education	3 cr.

YEAR I – Third Semester

		Biological Science General Education	3-4 cr.
		Humanities General Education (performing or visual arts related)	3 cr.
		Physical Science General Education	3-4 cr.

YEAR II – First Semester

†ENC	1102	English Composition II	3 cr.
†CGS	2100	Computer Information Technology and Literacy	3 cr.
TPA	1248	Makeup for the Stage	3 cr.
*TPA	1290	Performance Workshop	3 cr.
		Behavioral Science/History/Political Science/Economics General Education	3 cr.

YEAR II – Second Semester

†AMH	2010	Early American History or †AMH 2020, Modern American History ***or*** †POS 2041, American Government	3 cr.
†IDS	2891	Connections	1 cr.
*THE	1304	Script Analysis	3 cr.
		†Behavioral Science General Education	3 cr.
		Humanities Elective (performing or visual arts related)	3 cr.

Common Course Prerequisites recommended by the State for successful transfer to the university are marked with an asterisk (*).

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

Associate in Science Degree

Hillsborough Community College will award an associate in science (AS) degree if students complete a minimum of 60 credit hours in a curriculum designed to prepare students for employment. If students are interested in a specialized college program to prepare them for a job in business or industry, one of these degrees may be the right choice. If students decide to get a four-year degree, they may be able to transfer some or all of the courses taken here to a senior institution. Public universities in Florida now accept seven AS degrees to transfer to programs in their institutions. The AS degrees in this articulation agreement are Hospitality and Tourism Management, Computer Engineering, Electronics Engineering Technology, Nursing, Business Administration, Radiography and Criminal Justice Technology.

Other AS degrees may be transferred to a variety of four-year colleges and universities under individual agreements. For more information on current articulation agreements, consult an academic advisor or visit our website at https://www.hccfl.edu/academics/articulation-agreements.

General Education Requirements for the AS Degree

NOTE: Prior to the award of an associate in science degree, students must complete at least (1) general education **core** course from each of the general education subject area listed below.

Communications/Humanities:6 credits required:

- ENC 1101 and a general education core Humanities course.

Mathematics/Natural Science: 6 credits required:

- A general education core Mathematics course and a general education core Natural Science course.

Social Science: 3 credits required

- A general education core Social Science course.

NOTE: Students within an AS degree program must earn a grade of "C" or better in each applicable course in order to fulfill the college's general education requirements. A grade of "D" in a general education course can only be applied as elective credit.

General education courses are listed in the General Education section of this catalog. Consult an advisor or counselor for specific program requirements or consult the appropriate advising guide on the HCC website (https://www.hccfl.edu/support-services/academic-advising/hawkgps).

Civics Literacy Requirement

Per Section 1007.25, Florida Statutes and SBE 6A-10.02413 Civic Literacy Competency:

- Associate in science students initially entering a Florida College System Institution between 2022-2023 to 2023-24 school year must successfully pass AMH 2020 or POS 2041 either by taking a course or passing an approved credit-by-examination (see above) and must achieve a standard score on one of the following assessments prior to graduation:

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

* Satisfies the course and assessment requirement.

- Associate in science students initially entering a Florida College System Institution in the 2024-2025 school year, and thereafter, must successfully pass AMH 2010, AMH 2020, or POS 2041 either by taking a course or passing an approved credit-by-examination, and must achieve a standard score on one of the following assessments prior to graduation. Note: AMS 2010 Civil Discourse and American Political Order can be taken Spring 2025. AMS 2010 is not currently offered at HCC but may transfer in.

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

* Satisfies the course and assessment requirement.

NOTE: Beginning with the 2021-22 school year, students who earned a passing score on the Florida Civic Literacy Examination while in high school are exempt from the post-secondary civic literacy assessment requirement.

NOTE: Beginning with the 2021-22 school year, credits earned through authorized acceleration mechanisms in s. 1007.27, F.S., will count toward the civic literacy competency requirement.

Terms/Definitions:

College Credit Certificate (CCC)

College credit programs are offered for those who seek to learn new skills or to refresh or upgrade their present skills.

Advanced Technical Certificate (ATC)

This short-term certificate provides students with advanced training above the associate in science degree.

Applied Technology Diploma (ATD)

The ATD is a college-credit certificate, job preparatory program.

Postsecondary Adult Vocational (PSAV) Certificate

The PSAV Certificate is a non-college-credit job preparatory program.

Health Sciences

General Information

HCC offers associate degrees in the following health sciences areas: Cardiac Catheterization, Clinical Research Professional, Counseling and Human Services; Dental Hygiene; Diagnostic Medical Sonography Technology; Echocardiography, Emergency Medical Services; Health Navigator, Medical Laboratory Science, Nuclear Medicine Technology; Nursing; Opticianry; Radiation Therapy; Radiography; Respiratory Care and Surgical Technology. In addition to the degree programs, the College offers college credit certificate programs in Clinical Research Coordinator, Emergency Medical Technician, Health Navigator Specialist, Ophthalmic Laboratory Technician, Paramedic, and Visual Assessment; advanced technical certificates in Computed Tomography Advanced Imaging, Magnetic Resonance Imaging (MRI), and Medical Laboratory Science; and an advanced technical diploma in Dental Assisting. The college credit certificate programs are one-year programs for individuals who are pre-certified or licensed in a health science profession. Most health sciences and nursing programs are limited access programs with competitive application procedures because of the limited number of clinical placements the College has available for students to gain practical experience.

For more information about health science program admissions, contact the student services office at the Dale Mabry Campus at (813) 253-7364 or at https://www.hccfl.edu/academics/subjects/health-and-medical/health-sciences-admissions

Hillsborough Community College and its health science programs reserve the right to make changes in the regulations, offerings; prerequisites, requirements and any provision announced in this catalog at any time, as circumstances require.

Students who hold prior degrees and are taking preparatory coursework necessary for enrollment in an eligible program are eligible for loans for one consecutive 12-month period.

AS • Cardiac Catheterization

AS.CARD.TECH.INV (77 Credit Hours)

Cardiac Catheterization Technologists works alongside physicians to diagnose and treat diseases of the heart and blood vessels using X-ray imaging. These technologists are imaging specialists who also train to act as surgical assistants and circulators during cardiac and vascular catheterization procedures.

A Cardiac Catheterization Technologist's duties include assessment and care of the patient during the invasive procedure, surgically scrubbing to assist the physician, administration of medication under the physician's supervision, controlling procedural instruments and imaging technologies, and documenting/recording the procedural activities. These specialists are trained in invasive diagnostic cardiac and vascular catheterization procedures, cardiac and vascular invasive interventions, emergency cardiac care, structural heart repair, and invasive cardiac electrophysiology.

CAREER OPPORTUNITIES: A Cardiac Catheterization Technologist most commonly work at large healthcare institutions in cardiovascular catheterization and cardiac electrophysiology labs. Cardiac Catheterization Technologists are trained in pediatric and adult catheterization procedures and can work in labs that specialize in specific heart and vascular conditions.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

Prerequisite Courses Required for Application

†BSC	2085	Human Anatomy and Physiology I	3 cr.
†BSC	2085L	Human Anatomy and Physiology I Laboratory	1 cr.
†BSC	2086	Human Anatomy and Physiology II	3 cr.
†BSC	2086L	Human Anatomy and Physiology II Laboratory	1 cr.

CVT 2211 Critical Care Applications ..... 2 cr.

YEAR II – Second Semester

CVT 2846L Invasive Cardiovascular Clinical IV ..... 4 cr.
CVT 2921 Cardiovascular Technologist as a Profession ..... 2 cr.

*CVT 1001 must be successfully completed prior to start of the program.

AS • Clinical Research Professional

AS.CLIN.RES (60 Credit Hours)

The clinical research professional's primary role is to monitor clinical trials. The clinical research programs at HCC will build funda mental skills in adherence to IRB guidelines; safety for clinical research participants; coordination of clinical treatment and study visits; screening, recruitment and enrollment of study participants and clinical trial compliance with Federal and State regulatory laws. Those with clinical research professional training can expect to work in biological, pharmaceutical or social and behavioral clinical research settings.

Program Required Courses

YEAR I – First Semester

†ENC 1101 English Composition I ..... 3 cr.
†HSC 1531 Medical Terminology ..... 3 cr.
†HSC 2732 Fundamentals of Clinical Research ..... 3 cr.
†STA 2023 Elementary Statistics ..... 3 cr.

YEAR I – Second Semester

AS • Counseling and Human Services

AS.HUS (60 Credit Hours)

This program prepares the student to work in the fields of counseling, social work, human services, and rehabilitation. Coun seling and human services practitioners may, under supervision, provide individual and group counseling, lead workshops, provide training in daily living skills, assist with vocational planning, organize group activities, provide case management ser vices, and complete records and reports. Further, they may act as advocates for clients, mediators between clients and service agencies, direct clients to appropriate community facilities, and represent their clients before local service providers and govern ment agencies.

Counseling and human services professionals serve clients of all ages and backgrounds in hospitals, halfway houses, detoxi fication and drug treatment centers, mental health clinics, residential facilities, outpatient programs, nursing homes, adult and adolescent criminal justice facilities, adoption agencies and schools. The counseling and human service practitioner usually func tions as a member of a treatment team comprised of professionals from many disciplines, in order to provide effective and com prehensive care for individuals in need.

The class work in this program includes courses in counseling theory and applied therapeutic techniques, crisis intervention, psychology, abnormal behavior, behavior modification, family therapy, substance use disorders, group counseling, multicultural issues, professionalism, and ethics.

Supervised internships in community facilities and programs are a major component of the program. Students learn to trans late theory into actual practice under the guidance of highly trained and experienced faculty members and community profes sionals. This “hands-on” experience helps the graduate of this program to easily find employment in the profession.

The Counseling and Human Services courses meet once per week, primarily in the evening. Internships are held during day time, business hours. This allows students the ability to attend practicum and take courses in the same semester. The curriculum provides a strong foundation for securing employment and for pursuing advanced studies. Many program graduates continue their education to earn bachelor's and master's degrees, often while employed in the profession.

The Counseling and Human Services program is nationally accredited by the Council for Standards in Human Service Edu cation (CSHSE), 9600 SW Oak St, Ste 565, Tigard, OR 97223, (503) 253-9385, www.cshse.org

NOTE 1: The Counseling and Human Services program is an open enrollment program. Courses are not required to be taken in any particular order. However, HUS 1001, 1024, 1111, 1200, and 1406 must be completed prior to practicum.

NOTE 2: The program has transfer agreements for graduates who want to pursue their bachelor's degree at the following institutions: University of South Florida, Saint Leo University, and Indian River State College.

Program Required Courses

YEAR I – First Semester

†ENC	1101	English Composition I	3 cr.
HUS	1001	Introduction to Human Services	3 cr.
HUS	1111	Interpersonal Skills in Human Services	3 cr.
†PSY	2012	General Psychology or †SYG 2000, Introduction to Sociology	3 cr.

YEAR I – Second Semester

HUS	1024	Abnormal Behavior: Etiology and Treatment	3 cr.
HUS	1200	Introduction to Group Process	3 cr.
HUS	1406	Etiology and Treatment of Substance Use Disorders	3 cr.

YEAR I – Third Semester

AS • Dental Hygiene

AS.DENT (88 Credit Hours)

The Dental Hygiene Program leads to an associate in science degree and provides students with the skills and knowledge needed to complete national and state or regional board examinations to become licensed dental hygienists. A dental hygienist is a vital member of the dental team who performs dental procedures that include administration of local anesthesia, scaling, pol ishing and root planing procedures, exposing and processing radiographs, fluoride and dental sealant applications, and oral hygiene education. The graduate dental hygienist also becomes certified to perform expanded duties that are permitted by Flor ida Statute Title XXXII for dental auxiliaries. The dental hygiene curriculum includes five consecutive semesters of courses and requires a time commitment of 35-40 hours weekly. The program is offered on the Dale Mabry Campus only.

The Dental Hygiene program is accredited by the Commission on Dental Accreditation, 211 E. Chicago Avenue, Chicago, IL 60611, (312) 440-2500, https://www.eatrightpro.org/acend/accreditation-standards-fees-and-policies/2017-standards

NOTE: Graduates must pass the National Dental Hygiene Board examination, the ADEX Dental Hygiene Exam, and the Florida Laws and Rules examination to become a registered dental hygienist.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

Prerequisite Courses Required for Admission

†BSC	2085	Human Anatomy and Physiology I	3 cr.
†BSC	2085L	Human Anatomy and Physiology I Laboratory	1 cr.

NOTE: May be taken in advance or after admission to the dental hygiene program and must be completed with a grade of "C" or higher prior to graduation.

NOTE: HUN 2201 must be taken by the fall or spring term of the student's first year.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

ATD • Dental Assisting

ATD.DEA (50 Credit Hours)

The Applied Technology Diploma (ATD) in dental assisting prepares students for a rewarding career that requires both inter personal and technical skills. The duties of a dental assistant are among the most comprehensive and varied in the dental office, including work with dentists during a variety of procedures. During this one-year program, students will learn to expose radiographs, fabricate temporary crowns, take impressions for models, place sealants, polish teeth, and instruct patients on oral home care.

Graduates will earn an Expanded Functions Dental Assistant (EFDA) certificate for Florida and are eligible to sit for the Den tal Assisting National Board Examination to earn the Certified Dental Assistant (CDA) designation.

Career opportunities include private dental offices in general practice, orthodontics, periodontics, pediatric dentistry, oral surgery, or endodontics; or dental clinics located in correctional facilities, military bases, or public health units.

The Dental Assisting program is accredited by the Commission on Dental Accreditation, 211 East Chicago Avenue, Chicago, IL 60611, 312.440.4653 or https://www.ada.org/en/coda

NOTE: This is a limited access, one-year, full-time program and has specific admissions criteria.

AS • Diagnostic Medical Sonography Technology

AS.SON (77 Credit Hours)

Sonography is a medical specialty, which uses high-frequency sound waves to create images of the human body. These im ages are then analyzed, aiding in physician diagnosis. The sonographer is a skilled health care provider who provides imaging services under the supervision of a physician who is responsible for the use and interpretation of ultrasound procedures.

Upon completion of this program in abdomen, obstetrics and gynecology, and ultrasound physics and instrumentation, the graduate will be eligible to take the national registry examinations to become a certified sonographer. The examination is administered by the American Registry of Diagnostic Medical Sonographers. The minimum expectations of this program are to prepare competent entry-level sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains for the Abdominal sonography – Extended and Obstetrics and gynecology sonography concentrations.

The Diagnostic Medical Sonography program is accredited by the Commission on Accreditation for Allied Health Education Programs (CAAHEP), 9355 113th St. N, #7709, Seminole, FL 33775, www.caahep.org upon the recommendation of the Joint review Committee for Diagnostic Medical Sonography (JRCDMS).

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

Prerequisite Courses Required for Admission

†BSC	2085	Anatomy and Physiology I	3 cr.
†BSC	2085L	Anatomy and Physiology I Laboratory	1 cr.
†BSC	2086	Human Anatomy and Physiology II	3 cr.

AS • Echocardiography

AS.CARD.TECH (77 Credit Hours)

This program is designed to prepare students for employment as cardiovascular technologists.

Echocardiography is a medical specialty, which uses high-frequency sound waves to create images of the human body. These images are then analyzed, aiding in a cardiologist diagnosis. The echocardiographer is a skilled health care provider who provides imaging services under the supervision of a physician who is responsible for the use and interpretation of ultrasound procedures.

Upon completion of this program in Echocardiography, and ultrasound physics and instrumentation, the graduate will be eligible to take the national registry examinations to become a Certified Echocardiographer (RDCS). The examination is adminis tered by the American Registry of Diagnostic Medical Sonographers.

The minimum expectation for the HCC Echocardiography Program is to prepare competent entry-level sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains in the Adult cardiac sonography concen tration.

The Diagnostic Medical Sonography program is accredited by the Commission on Accreditation for Allied Health Education Programs (CAAHEP), 9355 - 113th St. N, #7709 Seminole, FL 33775. www.caahep.org upon the recom mendation of the Joint review Committee for Diagnostic Medical Sonography (JRCDMS).

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

AS • Emergency Medical Services

AS.EMST.TECH (73 Credit Hours)

If the student wants to become certified as an emergency medical technician or as a paramedic, the student will earn a college credit certificate.

All two levels are fully approved by the Florida Department of Health, and the student will be eligible to take the Florida or National Registry examination for EMT or paramedic upon completion of this program.

The Emergency Medical Services (EMS) program is fully credited by the Florida Department of Health, Bureau of Emergency Medical Services. Additionally, the Paramedic program is accredited by the Commission on Accreditation of Allied Health Educational Programs, www.caahep.org upon recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).

This program provides paramedics with an opportunity to further their education by earning an associate in science degree. To be enrolled into the paramedic program the student must be currently certified as EMT in the State of Florida.

Statewide curriculum guidelines allow students who complete an ATD (Advanced Technical Diploma) at a vocational technical center to be awarded 12 college credits upon enrolling at HCC. These credit hours will be applied toward an associate in science degree in Emergency Medical Services.

Program Required Courses

YEAR I – First Semester

†BSC	2085	Human Anatomy and Physiology I	3 cr.
†BSC	2085L	Human Anatomy and Physiology I Laboratory	1 cr.
†ENC	1101	English Composition I	3 cr.

Completion of EMT College Credit Certificate ..... **11 cr.**
Completion of Paramedic College Credit Certificate ..... **42 cr.**

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

CCC • Emergency Medical Technician

CCC.EMT (12 Credit Hours)

EMT training is a one-semester program designed to prepare students to provide basic life support measures, as a member of an ambulance crew, at the scene of an accident, during transport to a hospital or medical facility, and in the medical facility. Course work combines classroom lecture, practical skills laboratory and actual patient clinical experiences.

The lecture portion (seven credit hours) covers the National Emergency Medical Services Education Standards for the Emergency Medical Technician as well as skills required by the state.

The practical skills laboratory portion (three credit hours) includes application practice and performance testing in simulated patient care situations. The clinical portion (two credit hours) provides actual patient care during transport to a hospital and in the hospital setting. EMT is currently offered at the Dale Mabry, Plant City, and South Shore campuses.

NOTE: An additional cost for a criminal background check is required. Drug testing is required.

Program Required Courses

YEAR I – First Semester

†EMS	1119	Emergency Medical Technician	7 cr.

†EMS	1119L	Emergency Medical Technician Practicum	3 cr.
EMS	1431	Emergency Medical Technician (EMT) Clinical	2 cr.

EMT Re-tracking

Emergency Medical Technician (EMT) students have two years to successfully complete all course work and one year from course completion to obtain state certification. Students who do not successfully complete the EMT program within two years or who do not obtain state certification within one year after course completion must retake all courses of the EMT program.

CCC • Paramedic

CCC.PARA (42 Credit Hours)

In addition to performing the skills of an EMT, paramedics are trained in advanced life support techniques, including endo tracheal intubation, electrocardiogram monitoring and interpretation, defibrillation, and administration of intravenous fluids and medications.

The program is offered on different schedules with three admission dates per year (see the allied health admissions criteria and procedure section of this catalog).

Effective July 1, 2013, the Florida Department of Health and the Department of Education adopted the 2009 National Emer gency Medical Service Education Standards for Paramedic Instruction Guidelines to replace the 1998 DOT EMT and Paramedic National Standard Curriculum. Paramedic is currently offered at the Dale Mabry, Plant City, and South Shore campuses.

Program Required Courses

YEAR I – First Semester

†EMS	2621	Paramedic Phase I	7 cr.
EMS	2621L	Paramedic Phase I Practicum	4 cr.
EMS	2666	Paramedic Clinical I	3 cr.

YEAR I – Second Semester

AS • Nuclear Medicine Technology

AS.NMT (75 Credit Hours)

Nuclear medicine uses radioactive materials in the diagnosis and treatment of disease. Nuclear medicine technologists pre pare and administer radiopharmaceutical materials, operate nuclear instruments, position patients for "imaging" procedures, perform lab tests and work up diagnostic data for physicians. Graduates of this program are eligible to take national registry examinations and Florida licensure for nuclear medicine technologists.

The Nuclear Medicine Technology program is accredited by the Joint Review Committee on Educational Programs in Nu clear Medicine Technology, 2000 W. Danforth Road, Suite 130 #203, Edmond, OK 73003, (405) 285-0546 or jrcnmt@coxinet.net

Clinical evaluations are used to assess a student's performance in the clinical environment.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

Prerequisite Courses Required for Admission

†BSC 2085 Anatomy and Physiology I ..... 3 cr.

AS • Nursing

AS.NUR.NURB AS.NUR.NURT (72 Credit Hours)

Graduates of this program are eligible to apply for the nursing licensing examination administered by the National Council of State Boards of Nursing and, upon successful completion and review of all documentation may receive a Registered Nursing (RN) license.

The HCC Nursing (R.N.) program is accredited by the Accreditation Commission for Education in Nursing (ACEN) located at 3343 Peachtree Road NE, Suite 850, Atlanta, Georgia 30326, telephone (404) 975-5000 or fax (404) 975-5020 or https://www.acenursing.org/. Graduates of the associate in science degree nursing program are able to provide direct patient care to patients in hospitals and comparable health agencies.

The HCC Nursing program is offered at the Dale Mabry, Plant City, and South Shore campuses.

The duration of the program is six terms for the basic option. The program requires a full-time attendance commitment from the student. The program is offered in a day and evening format with both week day, evening, and weekend clinical experiences utilized.

Students, under the careful supervision of the nursing faculty, are provided valuable patient care experiences in participating hospitals, healthcare facilities and community agencies.

Enrollment in the nursing program is limited because of the availability of clinical placements for students to develop competence in their practical skills. Therefore, individuals must make application for consideration for admission to the nursing program. Individuals interested in applying to the program should obtain a nursing packet from Student Services on the Dale Mabry Campus, telephone (813) 253-7364 or online at https://www.hccfl.edu/academics/subjects/health-and-medical/nursing

Individuals are selected for admission to the Fall and Spring semesters of each academic year.

Students will be required to take nationally normed tests throughout the curriculum.

Minimum Progress Requirements

Basic Student

All non-nursing courses must be completed with a minimum grade of "C" before entering into the final semester of the nursing program.

Clinical Performance

A student who is determined to be unsafe in the clinical component of any nursing course may, at the discretion of the nursing faculty, be immediately removed from that course and will not be able to progress in the program. In addition any student who fails to follow guidelines related to credentialing policies, drug tests and background checks may be removed from their clinical and didactic courses for that semester.

NOTE: Beginning Fall Term 2000, all graduates of this program shall articulate into a Nursing baccalaureate degree in the designated university program under the provision of Rule 6A-10.024, Articulation Between Universities, Community Colleges, and School Districts.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

AS • Opticianry

AS.OPT (72 Credit Hours)

As an essential part of the "eye care delivery system," opticians' measure, fit and adapt eyeglasses and contact lenses to peo ple with vision problems. Coursework covers basic ocular science including: optics, anatomy, contact lenses, and refractometry. It also allows the students to gain specific skills in professional management, eyewear fabrications, and dispensing. Clinical ex perience is gained in a state-of-the-art on-campus dispensary and at affiliate sites. Graduates of the program are eligible to take state and national certification and/or licensure exams for opticians. Campus based or Internet based programs available. The Opticianry Program is accredited by the Commission on Opticianry Accreditation, P.O. Box 592, Canton, NY 13617.

Program Required Courses

YEAR I – First Semester

†OPT	1000	Ophthalmic Orientation	1 cr.
†OPT	1155	Ophthalmic Lens I	3 cr.
†OPT	1460	Ophthalmic Dispensing I	3 cr.
†OPT	1460L	Ophthalmic Dispensing I Laboratory	3 cr.

†OPT	2800L	Vision Care Clinical I	2 cr.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

AS • Radiation Therapy

AS.RAT.GEN (77 Credit Hours)

Radiation therapists are vital members of the cancer management team. They administer high energy radiation treat ments with external beam linear accelerators and operate CT simulators, which aid in the treatment planning process. Thera pists work directly with radiation oncologists to administer patient treatments. While in the program, students will learn to operate state-of-the-art equipment used in the treatment of cancer. The program uses an integrated didactic and clinical compe tency-based curriculum. Students should have a strong interest in math, physics and computers. In addition, students should have good communication skills, critical thinking skills, a strong work ethic and a desire to help others. Certified radiation thera pists enjoy mobility in the field of radiation therapy with opportunities in management, education, dosimetry and simulation.

Upon successful completion of the program, graduates are eligible to apply for the American Registry of Radiologic Technologists (ARRT) examination in radiation therapy.

The program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182 (312) 704-5300. Email: mail@jrcert.org

NOTE: All graduates of this program shall articulate into the University of South Florida bachelors of science in applied science (BSAS) degree program.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

AS • Radiography

AS.RTE (77 Credit Hours)

Radiographers perform diagnostic radiographic (X-ray) procedures and x-ray images of the human body which help diag nose and treat injury and disease. This program includes course work and practical experiences where students will work di rectly with patients in area clinical educational settings. Students will also simulate radiographic procedures in the program's state-of-the-art laboratory.

Graduates are eligible to take the national American Registry of Radiologic Technologists certification examination and will also be eligible for a Florida Radiographer license.

The Radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-2901, (312) 704-5300 or https://www.jrcert.org mail@jrcert.org

NOTE: Beginning Fall Term 2000, all graduates of this program shall articulate into a Radiologic Technology baccalaureate degree in the designated university program under the provision of Rule 6A-10.024, Articulation Between Universities, Commu nity Colleges, and School Districts.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

AS • Respiratory Care

AS.RET (76 Credit Hours)

Respiratory care is an allied health discipline operating with medical direction in the treatment, management, control, diag nostic evaluation and rehabilitation of patients with abnormalities of the cardiopulmonary system.

Respiratory care includes the therapeutic use of the following: medical gases and administration devices, environmental con trol systems, humidification, aerosols, medications, ventilatory support, bronchopulmonary drainage, pulmonary rehabilitation, cardiopulmonary resuscitation, and airway management. Specific testing techniques are employed in respiratory care to assist in diagnosis, monitoring, treatment and research. Clinical evaluations will be used to evaluate performance in the clinical environ ment.

Students who complete this program will be eligible to take the national certification and registry exams administered by the National Board for Respiratory Care (NBRC). Upon completion of the exams, students will be a Registered Respiratory Therapist (RRT). Most states require a license to practice.

The Respiratory Care program is accredited by the Commission on Accreditation for Respiratory Care, 264 Precision Blvd, Telford, TN, 37690, https://www.coarc.com/.

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

AS • Surgical Technology

AS.SURG.TECH (64 Credit Hours)

Surgical technologists are allied health professionals who are an integral part of the team of medical practitioners providing surgical care to patients. Surgical technologists work under the supervision of a surgeon to facilitate the safe and effective conduct of invasive surgical procedures, ensuring that the operating room environment is safe, that equipment functions correctly, and

that the operative procedure is conducted under conditions that maximize patient safety. Surgical technologists possess expertise in the theory and application of sterile and aseptic technique and combine the knowledge of human anatomy, surgical procedures, and implementation of instruments and technologies to facilitate a physician's performance of invasive therapeutic and diagnostic procedures.

The program and curriculum were built around the Association of Surgical Technologists' *Standards of Practice.* These stand ards and the *Core Curriculum for Surgical Technology* provide the foundation for the program. Upon graduation, students will be eligible to sit for the national certification examination administered by the National Board of Surgical Technology and Surgical Assisting (NBSTSA).

Math and Science prerequisite courses must be completed within seven (7) years of the program's admissions deadline. All other prerequisite courses do not expire, but can be petitioned to be repeated for a better grade if the course is older than seven (7) years prior to the admissions cycle.

Prerequisite Courses Required for Admission

†AMH	2010	Early American History or †AMH 2020, Modern American History ***or*** †POS 2041, American Government	3 cr.
†BSC	2085	Human Anatomy and Physiology I	3 cr.
†BSC	2085L	Human Anatomy and Physiology I Laboratory	1 cr.
†BSC	2086	Human Anatomy and Physiology II	3 cr.
†BSC	2086L	Human Anatomy and Physiology II Laboratory	1 cr.
†ENC	1101	English Composition I	3 cr.
†MAC	1105	College Algebra ***or*** higher math course in pathway	3 cr.

YEAR I – First Semester

HSC	2006	Orientation to Perioperative Services	3 cr.
HSC	2006L	Orientation to Perioperative Services Laboratory	1 cr.
HSC	2520	Microbiology for Perioperative Services	3 cr.
STS	1300	Surgical Anatomy and Pathophysiology	4 cr.
		Humanities General Education CORE	3 cr.

YEAR I – Second Semester

STS	1310	Surgical Techniques and Procedures	6 cr.
STS	1310L	Surgical Techniques and Procedures Laboratory	2 cr.
STS	1340	Pharmacology and Anesthesia	3 cr.
STS	1940	Introduction to Surgery Clinical	2 cr.

YEAR I – Third Semester

STS	2323	Surgical Procedures I	4 cr.
STS	2323L	Surgical Procedures Simulation Laboratory I	1 cr.
STS	2944	Surgical Clinical I	3 cr.

YEAR II – First Semester

STS	2324	Surgical Procedures II	4 cr.
STS	2324L	Surgical Procedures Simulation II Laboratory	1 cr.
STS	2365	Professional Skills for the OR Team	1 cr.
STS	2936	Surgical Certification Symposium	2 cr.
STS	2945	Surgical Clinical II	3 cr.
STS	2954	Surgical Technologist Portfolio	1 cr.

Associate in Science Degree/Technical Programs

AS • Accounting Technology

This program will prepare students for a position as an accountant or as an accounting paraprofessional in advanced profes sional accounting occupations requiring analysis, evaluation, theory, and design. The course work focuses on basic accounting functions as well as skills common to several fields of business, including finance, business law and general business topics.

AS • Financial Option

AS.ACG.TECH. FIN (60 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG	2021	Financial Accounting	3 cr.
†CGS	2100	Computers Information Technology and Literacy	3 cr.
†ENC	1101	English Composition I	3 cr.
†MAC	1105	College Algebra	3 cr.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

AS • Architectural Design and Construction Technology

AS.ADCT (66 Credit Hours)

The architectural design and construction technology AS degree prepares students for a career as a construction planner, con struction-related engineering drafter, construction estimator, plane surveyor, building inspector, or architectural design drafter. The coursework will also prepare students for the educational component requirement for the state of Florida for obtaining the contractor's license.

This curriculum is from the current catalog and is meant to provide prospective students a guide/pathway to complete the following degree and certificate tracks. Students are highly-encouraged to follow the curriculum track as outlined below. Please note that some courses within the degrees and certificates are not offered every term and only certain courses are offered as dis tance-learning modality. Some courses in the track may require additional coursework. Students should consult an Academic Advisor for AS Degree Programs or the AS ADCT Department Chair, Joseph Tisdale, for advising questions.

Program Required Courses

YEAR I – First Semester

BCN	1210	Construction Materials and Processes	3 cr.
BCN	1250C	Introduction to Graphic Technology	3 cr.
BCN	2272	Blueprint Reading	3 cr.
TAR	2053C	Introduction to Computer Aided Design and Drafting	3 cr.
†MAC	1105	College Algebra	3 cr.

YEAR I – Second Semester

ARC	2461	Materials and Methods I	3 cr.
BCN	2760	Building Codes	3 cr.
†ENC	1101	English Composition I	3 cr.
TAR	1170C	B.I.M. I Revit Residential	3 cr.
TAR	2054C	Intermediate Computer Aided Design and Drafting	3 cr.

YEAR I – Third Semester

†AMH	2010	Early American History or †AMH 2020, Modern American History ***or*** †POS 2041, American Government	3 cr.
		Humanities General Education CORE	3 cr.
		Natural Science General Education CORE	3 cr.

YEAR II – First Semester

BCT	2770C	Construction Estimating	3 cr.
TAR	1171C	B.I.M. II Revit Commercial	3 cr.
TAR	1172C	B.I.M. III Revit M.E.P.	3 cr.

YEAR II – Second Semester

*ARC	2304	Architectural Design IV	5 cr.
BCN	2049	Sustainable Design and Construction	3 cr.
BCN	2939C	Construction Capstone	3 cr.
SUR	2000C	Surveying I	3 cr.

*May require additional coursework.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

AS • Artificial Intelligence

AS.ART.INT (60 Credit Hours)

Successful completion of this degree program may lead to employment in a variety of different occupations and indus tries. Some examples of related occupations are Computer and Information Research Scientists, Computer Systems Analysts, Software Developers, and Machine Learning Engineer. It will enable individuals currently employed in the technology field to update skills to address these new emerging technologies for career advancement.

Program Required Courses

YEAR I – First Semester

†AMH	2010	Early American History or †AMH 2020, Modern American History ***or*** †POS 2041, American Government	3 cr.
CGS	1000	Introduction to Computers and Technology	3 cr.

AS • Business Administration

AS.BUS.MAN/AS.BUS.MAN.INT (60 Credit Hours)

AS • Business Administration and Management

AS.BUS.MAN

The associate in science degree in Business Administration and Management prepares students to assume management or supervisory positions in business, industry, and government. It provides basic skills in a broad range of business functions in cluding accounting, computer usage, management, and marketing.

NOTE: Beginning Fall Term 2000, all graduates of this program shall articulate into a business administration baccalaureate degree (in those programs not accredited by AACSB, please note USF is AACSB accredited) in the designated university pro gram under the provision of Rule 6A-10.024, Articulation between Universities, Community Colleges, and School Districts.

Program Required Courses

YEAR I – First Semester

AS • Computer Information Technology

AS.CIA (60 Credit Hours)

The Associate of Science in Computer Information Technology program prepares students for careers in computing support, help desk services, software applications, and information systems management. This program equips students with founda tional IT knowledge and practical skills in computer hardware, software, networking, database management, cybersecurity, and systems analysis.

Students will gain hands-on experience in hardware repair, enterprise operating systems, network security, database design, and project management, as well as develop professional business communication skills. The curriculum also covers manage ment information systems and systems analysis, ensuring students understand both the technical and strategic aspects of IT.

Program Required Courses

YEAR I – First Semester

AS • Computer Programming and Analysis

AS.COP (60 Credit Hours)

This program prepares students for a range of careers in software and application development. Graduates are prepared to enter the workforce in a variety of in-demand roles such as software developer, computer programmer, programmer analyst, data manager, or computer specialist. The program blends core computer science principles with practical, hands-on experience in multiple programming languages. Students will gain foundational knowledge in database design, systems analysis, network ing, and management information systems, while also sharpening their communication and business skills—ensuring graduates are not only technically capable but also workplace-ready. The program culminates in a capstone project, giving students the opportunity to apply their skills to a real-world programming challenge.**Program Required Courses**

AS • Criminology and Criminal Justice Studies

AS.CJT (60 Credit Hours)

The Criminal Justice associate in science degree program (AS to BS) offers students a broad background in the history, philosophy, organization, management and operation of the criminal justice system. Upon completion, this AS degree opens up entry-level, non-sworn positions in local, state, and federal agencies, i.e. juvenile justice, private security, law enforcement, cor rections, probation and parole, detention centers and community-based intervention programs. It can also be the first step to ward a career in law.

The AS degree will transfer into similar upper division programs in certain Florida universities and colleges, but students wishing to transfer must accept the responsibility for securing approval in advance from the transfer institution.

For students interested in a two-year degree in criminal justice, this program will prepare them to work in law enforcement agencies such as police departments, sheriff's offices, correctional institutions, criminal and juvenile courts, crime laboratories or crime scene units dealing with physical evidence and will also help them develop the educational skills needed to advance into and within various law enforcement related fields such as police work and corrections and law.

For more information, refer to the HCC Catalog or https://www.hccfl.edu/academics/subjects/law-criminal-justice-security/criminology-and-criminal-justice-studies

Program Required Courses

YEAR I – First Semester

†ENC	1101	English Composition I	3 cr.
†CCJ	1010	Introduction to Criminology ***or*** †CCJ 1010H, Honors Introduction to Criminology	3 cr.
†CCJ	1020	Introduction to Criminal Justice	3 cr.

†CGS	2100	Computer Information Technology and Literacy	3 cr.

YEAR I – Second Semester

†CJE	1000	Introduction to Law Enforcement	3 cr.
†CJE	2004	Career Choices in Criminal Justice	3 cr.
†POS	2041	American Government	3 cr.
		Natural Science General Education CORE (See Note 2 for recommended courses)	3 cr.

YEAR I – Third Semester

		Behavioral Science General Education (see Note 3)	3 cr.
		*Criminal Justice Electives	3 cr.

YEAR II – First Semester

†CJJ	1002	Juvenile Delinquency	3 cr.
†CJL	1100	Criminal Law or CJL 1100H, Honors Criminal Law	3 cr.
		Humanities General Education CORE	3 cr.
		Select 3 credits from the following	3 cr.

(These courses may be taken as an elective if not selected to satisfy this requirement (see Note 1).

CJL	1062	Constitutional Law
†CCJ	1488	Ethics in Criminal Justice or CCJ 1488H, Honors Ethics in Criminal Justice.
†CCJ	2013	Introduction to Victimology
†CJC	1000	Introduction to Corrections

YEAR II – Second Semester

†CJE	2600	Criminal Investigation	3 cr.
†CJL	2130	Criminal Evidence and Procedure	3 cr.
MGF	1130	Mathematical Thinking	3 cr.
		*Criminal Justice Elective	3 cr.

YEAR II – Third Semester

		*Criminal Justice Elective	6 cr.

***Select 12 credit hours from the following criminal justice courses:**

†CCJ	2111	Introduction to Theories of Criminal Behavior	3 cr.
†CCJ	2191	Crisis Intervention in Criminal Justice	3 cr.
†CCJ	2358	Criminal Justice Communication and Reports	3 cr.
†CCJ	2509	Introduction to Gangs	3 cr.
†CCJ	2600	Criminal Deviant Behavior in Society	3 cr.
†CCJ	2610	Introduction to Criminal Typologies	3 cr.
†CCJ	2618	Forensic Psychology	3 cr.
†CCJ	2648	Organized Crime	3 cr.
†CCJ	2671	Race, Gender, and Ethnicity in Criminal Justice	3 cr.
†CCJ	2685	Domestic and Sexual Violence	3 cr.
†CCJ	2720	Introduction to Criminal Justice Research Methods	3 cr.
†CCJ	2910	Guided Independent Research	3 cr.
CCJ	2935-9	Seminar on Criminal Justice Issues	3 cr.
CCJ	2940	Criminal Justice Internship	3 cr.
†CJC	2162	Probation and Parole	3 cr.
†CJE	1640	Introduction to Criminalistics	3 cr.
CJE	1642C	Introduction to Crime Scene Technology	3 cr.
CJE	1643C	Advanced Crime Scene Technology	3 cr.
†CJE	1653	Introduction to Crime Analysis and Intelligence	3 cr.
†CJE	1680	Introduction to Computer Crimes	3 cr.
†CJE	2233	Drug Abuse and Crime	3 cr.
†CJE	2300	Police Administration and Organization	3 cr.
†CJE	2614	Serial Killers	3 cr.
†CJE	2664	Advanced Crime and Intelligence Analysis	3 cr.
†CJE	2704	Introduction to Child Protective Investigations	3 cr.
†CJL	1000	Introduction to Law and Legal Issues	3 cr.
†CJL	1500	Introduction to the Court System	3 cr.
†CJL	2072	Civil Rights and Liability in Criminal Justice	3 cr.

†CJL	2610	Courtroom Presentation of Scientific Evidence	3 cr.
†DSC	1002	Introduction to Terrorism	3 cr.
†DSC	1003	Introduction to Homeland Security	3 cr.
†DSC	2033	Introduction to Terrorist Tactics and Weapons	3 cr.
†DSC	2570	Introduction to Cyber-Terrorism	3 cr.
†DSC	2590	Intelligence Analysis and Security Management	3 cr.
SCC	1000	Introduction to Security	3 cr.
SCC	1001	Introduction to Private Investigation	3 cr.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

*May be taken if not previously chosen from the "Select 3 credit hours from the following" category.

NOTE 1: CJL 1062, CCJ 1488, CCJ 2013, and CJJ 1000 may be taken if not previously chosen from the "Select 3 credit hours from the following" category.

NOTE 2: Recommended Natural Science CORE courses: AST 1002C or EVR 1001C or CHM 1020C.

NOTE 3: Behavioral Science General Education include: PSY 2012 General Psychology, SYG 2000 Introduction to Sociology, or ANT 2000 Introduction to Anthropology.

NOTE 4: Regardless of degree work completed, in order to be a sworn law enforcement, corrections, or probation officer in the State of Florida, candidates must successfully complete a state mandated training academy such as those offered by Hillsborough Community College's Criminal Justice Institute.

NOTE 5: Students who have successfully completed a Florida police or correction academy will be eligible for the articulated credit shown below toward the AS degree. Refer to the Criminal Justice Technology website at https://www.hccfl.edu/academics/subjects/law-criminal-justice-security/criminology-and-criminal-justice-studies for specific details

CJC	2940	Criminal Justice Practicum-Basic Corrections Academy	9 cr.
CJE	2940	Criminal Justice Practicum-Basic Police Academy	12 cr.

AS • Culinary Management

AS.CUL.CULA (60 Credit Hours)

This program will provide students with the skills necessary for employment as a restaurant cook or chef. The Culinary Management program and courses are accredited by the American Culinary Federation Foundation's Accrediting Commission at 180 Center Place Way, St. Augustine, Florida 32095.

NOTE: Beginning Fall term 2008, all graduates of this program are eligible to articulate the AS degree in Culinary Management to the BS degree in Hotel and Restaurant Management at the University of Houston, Conrad N. Hilton College of Hotel and Restaurant Management.

Program Required Courses

YEAR I – First Semester

†ENC	1101	English Composition I	3 cr.
†FSS	1223C	Food Preparation for Managers	4 cr.
†FSS	2100	Menu Development and Marketing	3 cr.

AS • Environmental Science Technology

AS.EVR.ETEC (64 Credit Hours)

This program will prepare students for positions as environmental pollution control technicians or environmental techni cians. The program curriculum will prepare students to conduct environmental surveys; conduct investigations and evaluations of noise, air, and water conditions for compliance with public laws and regulations; or to effectively manage natural resources.

Program Required Courses

YEAR I – First Semester

†ENC	1101	English Composition I	3 cr.
		Environmental Program Core Requirements and Specified Electives as available	9-12 cr.

YEAR I – Second Semester

†CGS	1000	Introduction to Computers and Technology	3 cr.
		Humanities General Education CORE	3 cr.
		Environmental Program Core Requirements and Specified Electives as available	9-12 cr.

YEAR I – Third Semester

†BSC	1005	Biological Foundations	3 cr.
†BSC	1005L	Biological Foundations Laboratory	1 cr.
†CHM	1025	Introductory Chemistry	3 cr.
†CHM	1025L	Introductory Chemistry Laboratory	1 cr.
†MAC	1105	College Algebra	3 cr.

YEAR II – First Semester

†POS	2041	American Government	3 cr.
		Environmental Program Core Requirements and Specified Electives as available	9-12 cr.

YEAR II – Second Semester

EVS	2942L	Environmental Technology Practicum	3 cr.
		Environmental Program Core Requirements and	

		Specified Electives as available	9-12 cr.

Environmental Program Core Classes

†EVR	2858	Environmental Law	4 cr.
†EVS	1001	Introduction to Environmental Sustainability	3 cr.
EVS	2891	Hydrology and Quality of Water Resources	4 cr.
EVS	2894C	Water Sampling and Analysis I	5 cr.
EVS	2895C	Water Sampling and Analysis II	5 cr.
EVS	2893C	Soil Sampling and Analysis	5 cr.
GIS	1041	Survey of GIS/GPS	1 cr.

Select 11 specified elective credits from the following:

Water Emphasis

EVS	1026	Chemistry and Biology of Natural Waters	4 cr.

Geographic Information Systems/Global Position Systems

EVR	1041	Natural Resource Management w/Applications in GIS	4 cr.
†GIS	2040	Fundamentals of GIS	3 cr.

Natural Resource Management

EVR	1328	Natural Resource Conversation and Ecology	3 cr.
FNR	1001	Natural Resource Management	3 cr.
ORH	1523	Native Upland Plants	2 cr.
ORH	1524	Native Wetland Plants	2 cr.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

AS • Financial Technology

AS.FIN.TECH (60 Credits)

The Financial Technology (FinTech) program delivers a comprehensive set of courses tailored to meet high academic and technical standards in the Information Technology (IT) sector. The FinTech program emphasizes both theoretical knowledge and practical skills, ensuring students are well-equipped for advanced IT education and careers. The curriculum delves into fi nancial big data modeling, spanning from algorithmic foundations to cloud-based financial technology solutions. Key areas of instruction include financial analytics, data visualization, machine learning in finance, and dynamic financial data modeling. The program aims to equip students with the expertise to innovate in the banking and finance sectors, emphasizing the use of mod ern tools to address contemporary challenges.

Program Required Courses

YEAR I – First Semester

	1011	Introduction to Business	3 cr.
†CGS	1000	Introduction to Computers and Technology	3 cr.
†ENC	1101	English Composition I	3 cr.
†FIN	1100	Personal Finance	3 cr.

YEAR I – Second Semester

AS • Internet Services Technology

AS.WEB.TECH.OPT1/AS.WEB.TECH.OPT2 (60 Credit Hours)

The Associate of Science in Web Design program equips students with the technical, creative, problem solving and critical thinking skills necessary for careers in internet-related fields, including Web Design, Site Development, and Internet Architec ture. This program provides a strong foundation in web authoring, multimedia design, programming logic, and project manage ment, preparing graduates for dynamic roles in the digital industry. Students in this program will gain expertise in HTML, scripting languages, multimedia authoring, vector graphics, digital audio/video design, and animation—all essential skills for creating engaging, functional and secure web experiences.

This program is ideal for individuals looking to enter the web development industry or advance their knowledge in multi media and interactive design. Graduates may also choose to pursue further studies in web development, digital media, or com puter science to enhance their career opportunities.

AS • Web Designer
AS.WEB.TECH.OPT1

AS • Web Developer

AS.WEB.TECH.OPT2

The Associate of Science in Web Development program provides students with the technical expertise needed to build, manage, and maintain dynamic and database-driven websites. This program prepares students for careers in web development, site creation, and programming, equipping them with essential skills in HTML, scripting, database management, and client and server-side programming (full stack development).

Students will develop a strong foundation in web technologies, programming logic, and database-driven web applications, as well as an understanding of ethical and legal considerations in information technology. Through coursework in Web Author ing, Scripting, and Database-Driven Web Programming, students will gain hands-on experience designing and implementing robust, interactive and secure websites.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.

AS • Network Systems Technology

AS.NST.DIG.FOR/AS.NST.ECC/AS.NST.INFR./AS.NST.SEC
(60 Credit Hours)

This collection of programs individually provides the skills necessary to plan, install, configure, monitor, troubleshoot, secure, and manage computer networks in a selected LAN/WAN environment. Students will be prepared to apply conceptual, theoreti cal and practical knowledge to the workplace utilizing technical skills learned during the program. Prepares student to be net work control operators, data communications analysts, network technicians, computer security specialists, network specialists, network managers, network systems analysts, network systems technicians, network troubleshooters, WAN/LAN managers, or systems administrators, or continue education at a four-year university or college.

AS • Digital Forensics

AS • Veterinary Technology

AS.VET.TECH (73 Credit Hours)

Veterinary Technology is a rapidly growing field. Employment of veterinary technicians/technologists is expected to grow much faster than the average for all occupations through the year 2012, according to the most recent information from the U.S. Department of Labor. Graduates from this program will find careers in areas such as private practice, animal shelters and hu mane societies, agriculture (equine services, farms, and ranches), biomedical research, zoo/wildlife medicine, tourist/recrea tional facility animal care and research, and pharmaceutical and government. This program which awards the associate in science degree will prepare students to enter the workforce prepared for clinical practice, research animal husbandry, or clinical management.

The HCC Veterinary Technology program is accredited by the American Veterinary Medical Association. Graduates of this program are eligible to take the Veterinary Technician National Examination.

Prerequisites for Admission

NOTE: Completion of prerequisites for admission with a grade of "C" or higher is required.

Prerequisite Courses Required for Admission

†ATE	1001	Introduction to Veterinary Technology	1 cr.
†ATE	1112	Animal Anatomy and Physiology I	3 cr.
†ATE	1113	Animal Anatomy and Physiology II	3 cr.
†ATE	1501	Veterinary Professional Development Ethics	1 cr.
†ATE	1741	Veterinary Medical Terminology	1 cr.
†ENC	1101	English Composition I	3 cr.
EVR	1001C	Introduction to Environmental Science *or* CHM 1020C, Chemistry and Society *or* PHY 1020C, Conceptual Physics	3 cr.
MGF	1130	Mathematical Thinking	3 cr.

NOTE: Completion of all general education and Veterinary Technology program required courses with a grade of "C" or higher is required for graduation.

Program Required Courses

YEAR I – First Semester

Bachelor Degree

The Bachelor's degree is an upper-level degree that offers students an opportunity to continue their education be yond the Associate level. Hillsborough Community College offers a Bachelor of Science in Nursing (BSN).

BS • Nursing

BS.NUR – 120 Credit Hours (includes 72 credit hours from the AS Nursing degree)

The RN to BSN Program at Hillsborough Community College affords registered nurses with an associate degree in nursing from a regionally accredited institution the opportunity to obtain a Bachelor of Science degree in Nursing delivered in an online for mat. The RN to BSN program is designed for current RNs who are ready to collaborate with interdisciplinary healthcare part ners seeking to improve patient outcomes and community health. The focus of the program is on healthcare needs of diverse populations, health promotion and risk reduction in communities, ethical and legal issues, evidence-based practice, and leader ship and management. Nurses in the program will develop a solid foundation for advancing their career or preparing for gradu ate nursing study. Classes are offered online and are held in eight-week courses. Experiential learning hours are required for NUR4636C Community and Public Health Nursing and NUR4835C Leadership and Management in Professional Nursing (Cap stone Course). These hours are independently arranged by the student, typically at a community agency or at the facility where the student is employed. Every course for the program is taught during every term to facilitate scheduling (i.e. fall, spring, & summer terms).

NOTE 1: This program of study is a suggested sequence of courses for the Nursing BSN program. Classes are offered in 8 weeks terms. Please consult an advisor or counselor for more guidance.

†NUR	4177	Introduction to Holistic Nursing	3 cr.
†NUR	4284	Dynamics of Aging	3 cr.
†NUR	4257	Introduction to Critical Care	3 cr.
†NSP	4695	Forensic Nursing	3 cr.

*NUR 3805 is a prerequisite for all the core courses, and it must be taken in the first term.
**NUR 4835C is the capstone course, and it must be taken in the last 8 weeks of the program.

In addition to completing the course requirements detailed in the curriculum to graduate, students must:

Earn a minimum 2.0 Hillsborough Community College (HCC) and Overall GPA.
Complete all core coursework with a minimum grade of C (2.0) in all courses.
Satisfy HCC's General Education requirements and Gordon Rule requirements unless you hold an associate in arts or a bachelor's degree or have completed the entire general education program at a regionally accredited institution.
Satisfy the civics literacy requirement:

Per Section 1007.25, Florida Statutes and SBE 6A-10.02413 Civic Literacy Competency, first-time in college associate in arts or baccalaureate students entering a Florida College System institution between 2018-19 to 2020-21 school year must demonstrate competency in civic literacy through **one** of the following options prior to graduation:

1. Successfully passing either AMH 2020, Modern American History **or** POS 2041, American Government.
2. Achieving the standard score on one of the following assessments:

Assessment	Standard Score
AP Government and Politics: United States	3
AP United States History	4
CLEP: American Government	50
CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

Baccalaureate students entering a Florida College System Institution between 2021-22 to 2023-24 school year must successfully pass AMH 2020 or POS 2041 either by taking a course or passing an approved credit-by-examination (see below) and must achieve a standard score on one of the following assessments prior to graduation:

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

* Satisfies the course and assessment requirement.

Baccalaureate students initially entering a Florida College System Institution in the 2024-2025 school year, and thereafter, must successfully pass AMH 2010, AMH 2020, or POS 2041 either by taking a course or passing an approved credit-by examination, and must achieve a standard score on one of the following assessments prior to graduation. Note: AMS 2010 Civil Discourse and American Political Order can be taken Spring 2025. AMS 2010 is not currently offered at HCC but may transfer in.

Assessment	Standard Score
*AP Government and Politics: United States	3
*AP United States History	4
*CLEP: American Government	50
*CLEP: History of the United States I	50
Florida Civic Literacy Exam	60%

Satisfies the course and assessment requirement.

NOTE: Beginning with the 2021-22 school year, students who earned a passing score on the Florida Civic Literacy Examination while in high school are exempt from the post-secondary civic literacy assessment requirement.

NOTE: Beginning with the 2021-22 school year, credits earned through authorized acceleration mechanisms in s. 1007.27, F.S., will count toward the civic literacy competency requirement.

Complete the Florida foreign language graduation requirement:

Option 1: High School Foreign Language You may complete two credits (two years) of high school instruction in one language other than English with a passing grade each year as documented on your official high school transcript.
Option 2: Demonstration of Proficiency through Exam Demonstration of intermediate proficiency by passing the AP (Advanced Placement) or CLEP (College Level Examination Program) foreign language test or a foreign language profi ciency test administered by the University of South Florida.
Option 3: College Foreign Language. You may complete two semesters in a single foreign language (FRE, *GER, ITA, SPN, or ASL)* with a letter grade of "C" or better.

- Complete at least 25% of the 120-credit hour degree program (30 credits) at Hillsborough Community College, based upon the Florida College System's requirement of a 2+2 admission into the baccalaureate program. Fifteen of those hours must be 3000 or 4000 level courses from the program core course list.
- Apply for graduation by the deadline listed in the Academic Calendar's official online catalog. To submit a graduation application, the student must have at least the minimum number of college-level credits for the degree, including all courses currently registered.
- Fulfill all financial obligations to Hillsborough Community College.
- Total Semester Credits required – 120 credit hours in addition to completing the Foreign Language Requirement above. The credit courses required may vary depending on the student's credits to the BSN program. Additional courses to complete the required 120 credit hours for graduation must apply to the degree and be approved by an advisor.

†Courses symbolized by a dagger (†) are offered online. Online availability may vary by academic term.

College Credit Certificates

A college credit certificate (CCC) may be awarded for programs of less than two years in selected technical areas leading to an associate in science degree. The CCC's are designed to prepare the student for entry into a particular field or to upgrade the skills of those already employed in the field.

ATC • Paralegal (Legal Assisting)

ATC.PLA (21 Credit Hours)

The Paralegal/Legal Assisting Advanced Technical Certificate is designed to enable students who already hold a bachelor's degree or higher to take paralegal courses at Hillsborough Community College and qualify to take the Certified Legal Assistant exam sponsored by the National Association for Legal Assistants. It further prepares those students for work of a legal nature in law offices, corporations or governmental agencies.

Program Required Courses

YEAR I – First Semester

†PLA	1003	Introduction to the Paralegal Profession	3 cr.
†PLA	1271	Tort Law	3 cr.
		*Any PLA specified elective offered during this term.	3 cr.

YEAR I – Second Semester

†PLA	1104	Writing and Research I	3 cr.
		*Any PLA specified elective offered during this term.	3 cr.

YEAR I – Third Semester

†PLA	2114	Writing and Research II	3 cr.
		*Any PLA specified elective offered during this term.	3 cr.

***Select 9 credit hours from the following:**

†PLA	1203	Litigation Procedures I	3 cr.
†PLA	1433	Business Organizations	3 cr.
†PLA	1600	Administration of Wills/Trusts/Probate	3 cr.
†PLA	1611	Real Estate Law/Property Transactions I	3 cr.
†PLA	1700	Legal Ethics and Professional Responsibility	3 cr.
†PLA	1949	Paralegal Internship	3 cr.
†PLA	2303	Criminal Litigation	3 cr.
†PLA	2421	Contract Law	3 cr.
†PLA	2460	Bankruptcy Law	3 cr.
†PLA	2531	Elder Law	3 cr.
†PLA	2612	Real Estate Law/Property Transaction II	3 cr.
†PLA	2732	Law Office Computer Applications	3 cr.
†PLA	2763	Law Office Management	3 cr.
†PLA	2800	Family Law	3 cr.
†PLA	2822	Sports and Entertainment Law	3 cr.
†PLA	2841	Immigration Law	3 cr.
†PLA	2933	Seminar In Legal Assisting Studies	3 cr.

NOTE: A grade of "C" or better must be attained for each course taken for this certificate.

NOTE: Coursework may be applied to the two-year AS degree Paralegal Studies program.

†Courses symbolized by a dagger (†) are offered online in addition to the traditional delivery method. Online availability may vary by academic term.

CCC • Accounting Technology Management

CCC.ACG.TECH.MGMT (27 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG	2021	Introduction to Financial Accounting	3 cr.
†CGS	2100	Computers Information Technology and Literacy	3 cr.
†GEB	1011	Introduction to Business	3 cr.

YEAR I – Second Semester

ACG 2061 Computers and Accounting ..... 3 cr.
†ACG 2071 Managerial Accounting ..... 3 cr.
†GEB 2214 Business Communications and Technology ..... 3 cr.

YEAR I – Third Semester

†AMH 2020 Modern American History or †POS 2041, American Government ..... 3 cr.

YEAR II – First Semester

ACG 2104 Intermediate Accounting I ..... 3 cr.
ACG 2681 Financial Investigation ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

CCC • Accounting Technology Operations

CCC.ACG.TECH.OP (18 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG 2021 Introduction to Financial Accounting ..... 3 cr.
†CGS 2100 Computers Information Technology and Literacy ..... 3 cr.
†GEB 1011 Introduction to Business ..... 3 cr.

YEAR I – Second Semester

ACG 2061 Computers and Accounting ..... 3 cr.
†ACG 2071 Managerial Accounting ..... 3 cr.
†GEB 2214 Business Communications and Technology ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

CCC • Accounting Technology Specialist

CCC.ACG.TECH.SPEC (12 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG 2021 Introduction to Financial Accounting ..... 3 cr.
†CGS 2100 Computers Information Technology and Literacy ..... 3 cr.
†GEB 1011 Introduction to Business ..... 3 cr.
†GEB 2214 Business Communications and Technology ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

CCC • Advanced Network Infrastructure

CCC.ADV.NET.INF (36 Credit Hours)

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.
*†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Second Semester

†CET 1600 Cisco Network Fundamentals ..... 3 cr.
†CNT 1401 Introduction to Network Security ..... 3 cr.
**†CTS 1303 Enterprise Operating Systems I ..... 3 cr.

YEAR I – Third Semester

*†CET 1610 Cisco Switching, Routing, and Wireless Essentials ..... 3 cr.
†CTS 1306 Enterprise Operating Systems II ..... 3 cr.

YEAR II – First Semester

†COP 1000 Programming Logic…….. ..... 3 cr.
†CET 2615 Cisco Enterprise Networking, Security, and Automation ..... 3 cr.

YEAR II – Second Semester

CIS	2772	Cybersecurity Operations Fundamentals	3 cr.
†CIS	2353	Security Management and Penetration Testing	3 cr.
†CNT	2510	Wireless Networking	3 cr.

*Permission of instructor required for concurrent enrollment with prerequisite.

**May require additional coursework.
†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Aquaculture Technology

CCC.AQUA (26 Credit Hours)

This program will prepare students for employment in the field of aquaculture technology and transfers into the associate in science degree program titled Aquaculture.

Program Required Courses

YEAR I – First Semester

†FAS	1012C	Aquacultural Organisms	3 cr.
ZOO	1450	Icthyology	3 cr.
ZOO	1450L	Icthyology Laboratory	1 cr.

YEAR I – Second Semester

FAS	1401L	Aquacultural Laboratory Techniques	3 cr.
FAS	2263C	Aquacultural Reproductive Techniques	3 cr.

YEAR II – First Semester

FAS	2240C	Aquacultural Nutritional Techniques	3 cr.
FAS	2253	Aquaculture Disease Processes	3 cr.
FAS	2253L	Aquaculture Disease Processes Laboratory	1 cr.

YEAR II – Second Semester

FAS	1404C	Aquacultural Field Techniques	3 cr.
FAS	2353C	Aquacultural Management Practices	3 cr.

NOTE: Coursework may be applied to the two-year AS degree Aquaculture program.

CCC • Artificial Intelligence Practitioner

CCC.ART.INT.PRAC (18 credit hours)

Program Required Courses

YEAR I – First Semester

CAI	2000	Introduction to Artificial Intelligence	3 cr.
COP	1030	Introduction to Python Programming	3 cr.

YEAR I – Second Semester

CAI	2100	Introduction Machine Learning	3 cr.
CTS	1106	Introduction to Linux	3 cr.

YEAR I – Third Semester

CAI	2300	Natural Language Processing	3 cr.
CAI	2800	Artificial Intelligence for Business Solutions	3 cr.

CCC • AutoCAD Foundations

CCC.ADCT.CAD (15 Credit Hours)

This college credit certificate provides students with the basic drafting skills needed for the architectural, building construc tion, and construction-related engineering fields. AutoCAD software skills are highlighted along with introductory manual drafting skills, construction materials education, and construction blueprint reading skills.

This curriculum is from the current catalog and is meant to provide prospective students a guide/pathway to complete the following certificate track. Students are highly-encouraged to follow the curriculum track as outlined below. Coursework com pleted in this certificate may be applied to the two-year Architectural Design and Construction technology AS (AS ADCT) de gree program. Please note also that some courses within the degrees and certificates are not offered every term and only certain

courses are offered as distance-learning modality. Some courses in the track may require additional coursework. Students should consult an Academic Advisor for AS Degree Programs or the AS ADCT Department Chair, Joseph Tisdale, for advising questions.

Program Required Courses

YEAR I – First Semester

BCN	1250C	Introduction to Graphic Technology	3 cr.
BCN	2272	Blueprint Reading	3 cr.
*TAR	2053C	Introduction to Computer Design and Drafting	3 cr.

YEAR I – Second Semester

ARC	2461	Materials and Methods I	3 cr.
*TAR	2054C	Intermediate Computer Aided Design and Drafting	3 cr.

*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Architectural Design and Construction Technology program.

CCC • Automation

CCC.EST (12 Credit Hours)

This certificate prepares students for engineering technology support positions dealing with PLCs, automation, and control systems in high tech production, manufacturing, distribution, and engineering research and development facilities.

Program Required Courses

YEAR I – First Semester

†ETI	1843	Motors and Controls	3 cr.
†ETS	1542	Introduction to Programmable Logic Controllers	3 cr.

YEAR I – Second Semester

†ETS	1535	Automated Process Control	3 cr.
†ETS	2604	Robotics Applications	3 cr.

NOTE: Coursework may be applied to the two-year AS degree Engineering Technology program.

CCC • Biotechnology Laboratory Specialist

CCC.BIO.TECH.SPEC (19 Credit Hours)

Program Required Courses

YEAR I – First Semester

*BSC	2420	Biotechnology I	3 cr.
*BSC	2420L	Biotechnology I Laboratory	2 cr.

YEAR I – Second Semester

†BSC	2419C	Plant and Animal Cell Culture	3 cr.
BSC	2427	Biotechnology II	3 cr.
BSC	2427L	Biotechnology II Laboratory	2 cr.

YEAR I – Third Semester

†BSC	2435C	Bioinformatics	3 cr.
†STA	2023	Elementary Statistics	3 cr.

Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Biotechnology Laboratory Technology program.

CCC • Broadcast Production

CCC.RTV (24 Credit Hours)

This certificate allows students to obtain basic training for a specific entry-level job in broadcast production.

Program Required Courses

YEAR I – First Semester

†RTV 1530 Electronic Field Production ..... 3 cr.
†RTV 2000 Introduction to Broadcasting ..... 3 cr.
†RTV 2560 Radio Production and Programming ..... 3 cr.

YEAR I – Second Semester

†RTV 2532 Advanced Electronic Field Production ..... 3 cr.
†RTV 2510 Broadcasting Techniques ..... 3 cr.
†RTV 2630 Broadcast News ..... 3 cr.

YEAR I – Third Semester

RTV 1941 Radio and TV Internship I ..... 3 cr.
†RTV 2512 Advanced Television Studio Production ..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Digital Television and Media Production program.

CCC • Business Intelligence Professional

CCC.BUS.PRO (20 Credit Hours)

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.
†COP 1000 Programming Logic ..... 3 cr.
STA 2023 Elementary Statistics ..... 3 cr.

YEAR I – Second Semester

†CGS 2301 Management Information Systems ..... 3 cr.
†COP 1030 Programming Logic ..... 3 cr.
ISM 2110 Business Intelligence I ..... 3 cr.

YEAR I – Third Semester

†CGS 1510 Spreadsheet Applications I or elective* ..... 1 cr.
†CGS 1540 Database Management or elective* ..... 1 cr.

***Students progressing into the AS-BIS program can substitute for Elective (3 credit hours) from any courses with prefix:**

CAP, CGS, CIS, COP, CTS

CCC • Business Management

CCC.BUS.MAN (24 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG 2021 Introduction to Financial Accounting ..... 3 cr.
†CGS 2100 Computers Information Technology and Literacy ..... 3 cr.
†GEB 1011 Introduction to Business ..... 3 cr.

YEAR I – Second Semester

†ACG 2071 Managerial Accounting ..... 3 cr.
†MAN 2021 Principles of Management ..... 3 cr.
†MAR 2011 Principles of Marketing ..... 3 cr.

YEAR I – Third Semester

†BUL 2241 Business Law I ..... 3 cr.
†GEB 2214 Business Communications and Technology ***or*** †SPC 1608 Pubic Speaking ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Business Administration program.

CCC • Business Operations

CCC.BUS.OPER (18 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG 2021 Introduction to Financial Accounting ..... 3 cr.
†GEB 1011 Introduction to Business..... 3 cr.
†MAN 2021 Principles of Management ..... 3 cr.

YEAR I – Second Semester

†BUL 2241 Business Law I..... 3 cr.
†GEB 2214 Business Communications and Technology ***or*** †SPC 1608 Pubic Speaking ..... 3 cr.
†MAR 2011 Principles of Marketing ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Business Administration program.

CCC • Business Specialist

CCC.BUS.SPEC (12 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ACG 2021 Introduction to Financial Accounting ..... 3 cr.
†GEB 1011 Introduction to Business..... 3 cr.

YEAR I – Second Semester

†GEB 2214 Business Communications and Technology ***or*** †SPC 1608 Public Speaking ..... 3 cr.
†MAN 2021 Principles of Management ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree Business Administration program.

CCC • Chef's Apprentice

CCC.CUL.CHEF (12 Credit Hours)

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in Culinary. It pro vides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills for entry-level positions as a pantry cook, prep cook or lead cook.

Program Required Courses

YEAR I – First Semester

†FSS 1223C Food Preparation for Managers ..... 4 cr.
†FOS 1201 Safety and Sanitation ..... 2 cr.

YEAR I – Second Semester

†FSS 1063C Food Specialty I (Baking) ..... 3 cr.

YEAR II – First Semester

†FSS 1248C Food Specialties II (Garde Manger I)..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Culinary Management program.

CCC • Cloud Computing

CCC.CLD.COMP (24 credit hours)

This program provides students with essential skills for entry-level roles in cloud technology, such as cloud support techni cian, IT help desk specialist, and junior cloud administrator. The coursework focuses on key cloud concepts, including network ing, virtualization, security, and enterprise operating systems with hands-on experience using major industry standard cloud platforms.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.
CTS 1106 Introduction to Linux..... 3 cr.
*†CTS 1305 Introduction to Networking ..... 3 cr.

CTS 2109 Introduction to Virtualization ..... 3 cr.

YEAR I – Second Semester

†CTS 1145 Introduction to the Cloud ..... 3 cr.
†CTS 1303 Enterprise Operating Systems I ..... 3 cr.

YEAR I – Third Semester

†CNT 1401 Introduction to Network Security ..... 3 cr.
†CTS 2375 Enterprise and Cloud Computing ..... 3 cr.

CCC • CNC (Computer Numerical Control) Machinist

CCC.CNC.MACH (12 Credit Hours)

This program prepares students for careers in Computer Numerical Control (CNC) machining and includes computer aided drafting and design skills, technical communications, maintenance and operation of various industrial tolls and equip ment, quality control and testing, material handling protocols, proper usage of tools and instrumentation, and programming, among others.

Program Required Courses

YEAR I – First Semester

†ETD 2364C Introduction to 3D Computer-Aided Design ..... 3 cr.
†ETI 1420 Manufacturing Processes and Materials ..... 3 cr.

YEAR I – Second Semester

PMT 1250C Computer Numerical Control (CNC) I ..... 3 cr.
PMT 2254C Computer Numerical Control (CNC) II ..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Engineering Technology program.

CCC • Computer Programmer

CCC.COP.OPT1 (36 Credit Hours)

This program prepares students for jobs in the field of computer programmer, junior programmer, senior programmer, data manager, programmer analyst, and mid-range computer specialist.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.
**Any specified electives offered during this term. ..... 3 cr.

YEAR I – Second Semester

†CGS 2541 Database Design ..... 3 cr.
†COP 1000 Programming Logic ..... 3 cr.
**Any specified electives offered during this term. ..... 3 cr.

YEAR I – Third Semester

†CGS 2301 Management Information Systems ..... 3 cr.
*†CIS 2321 Systems Analysis ..... 3 cr.
**Any specified electives offered during this term. ..... 3 cr.

YEAR II – First Semester

**Any specified electives offered during this term. ..... 12 cr.

****Select 21 credit hours from the following:**

†COP 1030 Introduction to Python Programming ..... 3 cr.
†COP 1120 COBOL ..... 3 cr.
†COP 1220 Programming in C ..... 3 cr.
†COP 1332 Visual BASIC ..... 3 cr.
†COP 1812 Introduction to XML Authoring ..... 3 cr.
*†COP 2224 Programming in C++ ..... 3 cr.
COP 2654 Mobile Platform Applications Development ..... 3 cr.
†COP 2360 Programming in C# ..... 3 cr.
†COP 2800 Java Programming ..... 3 cr.
*†COP 2805C Java, Advanced ..... 3 cr.

†COP 2833 Database-driven Web Programming: Client ..... 3 cr.
†COP 2836 Database-driven Web Programming: Server ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*Requires additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Computer Programming program.

CCC • Computer Programming Specialist
CCC.PROG.SPEC (18 Credit Hours)

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.

YEAR I – Second Semester

*†CIS 2321 Systems Analysis ..... 3 cr.
†COP 1000 Programming Logic ..... 3 cr.

YEAR II – First Semester

**Any specified electives offered during this term. ..... 9 cr.

****Select 9 credit hours from the following:**

†COP 1120 COBOL ..... 3 cr.
†COP 1220 Programming in C ..... 3 cr.
†COP 1332 Visual BASIC ..... 3 cr.
†COP 2360 Programming in C# ..... 3 cr.
†COP 2800 Java Programming ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*Requires additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Computer Programming program.

CCC • Crime Scene
CCC.CS (28 Credit Hours)

This program is designed to prepare graduates for work in the field of crime scene investigations and forensics. For more information, students can refer to the Criminal Justice Technology website at www.hccfl.edu/cjt. for specific details.

Program Required Courses

YEAR I – First Semester

†CCJ 1020 Introduction to Criminal Justice ..... 3 cr.
†CJE 1640 Introduction to Criminalistics ..... 3 cr.
CJE 1642C Introduction to Crime Scene Technology ..... 3 cr.
†CJE 2600 Criminal Investigation ..... 3 cr.
CJE 2671C Latent Fingerprint Development ..... 2 cr.
CJE 2672C Fingerprint Classification ..... 2 cr.

YEAR I – Second Semester

CJE 1643C Advanced Crime Scene Technology ..... 3 cr.
CJE 2770C Forensic Photography ..... 3 cr.
†CJL 2130 Criminal Evidence and Procedure ..... 3 cr.
†CJL 2610 Courtroom Presentation of Scientific Evidence ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree Criminology and Criminal Justice Studies program.

CCC • Criminal Justice Technology Specialist
CCC.CJT.SPEC (24 Credit Hours)

Program Required Courses

YEAR I – First Semester

†CCJ	1020	Introduction to Criminal Justice	3 cr.
†CGS	2100	Computer Information Technology and Literacy	3 cr.
†CJE	1000	Introduction to Law Enforcement	3 cr.
†CCJ	1488	Ethics in Criminal Justice	3 cr.

YEAR I – Second Semester

†CCJ	2618	Forensic Psychology	3 cr.
†CJJ	1002	Juvenile Delinquency	3 cr.
†CJL	2130	Criminal Evidence and Procedure	3 cr.
SCC	1000	Introduction to Private Security	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Criminology and Criminal Justice Studies program. For more information visit www.hccfl.edu/cjt

CCC • Culinary Arts

CCC.CULA (35 Credit Hours)

The purpose of this program is to prepare students for employment in commercial and institutional positions such as bakers, pantry cooks, prep cooks, and lead cooks in the culinary industry and/or to provide supplemental training for persons previ ously or currently employed in these occupations.

Program Required Courses

YEAR I – First Semester

†FOS	1201	Safety and Sanitation	2 cr.
†FSS	1223C	Food Preparation for Managers	4 cr.
†FSS	2100	Menu Development and Marketing	3 cr.
†HFT	2210	Supervisory Development	3 cr.

YEAR I – Second Semester

†FSS	1063C	Food Specialty I (Baking)	3 cr.
†FSS	1500	Food and Beverage Control	3 cr.
†FSS	2120	Food Purchasing and Storing	3 cr.

YEAR I – Third Semester

†HFT	1000	Introduction to Hospitality Industry Management	3 cr.
†HUN	2203	Culinary Nutrition	3 cr.
		Electives (Any FSS course)	2 cr.

YEAR II – First Semester

†FSS	1248C	Food Specialties II (Garde Manger I)	3 cr.
†HFT	2840	Maître D′ and Dining Room	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Culinary Management program.

CCC • Cybersecurity Analyst

CCC.CYBER.ANT (24 Credit Hours)

Program Required Courses

YEAR I – Second Semester

CGS	1000	Introduction to Computers and Technology	3 cr.
*†CTS	1305	Introduction to Networking	3 cr.
COP	1000	Programming Logic	3 cr.

YEAR I – Third Semester

CGS	2820	Web Authoring HTML	3 cr.
*†CNT	1401	Introduction to Network Security	3 cr.

YEAR II – First Semester

†CIS 2359C Information Assurance Network Systems ..... 3 cr.
CIS 2352C Information Assurance Local Systems ..... 3 cr.
COP 2830 Scripting for the Web ..... 3 cr.
*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Cybersecurity program.

CCC • Cybersecurity Operations Analyst

CCC.CYBER.OPR.ANT (24 Credit Hours)

Program Required Courses

YEAR I – First Semester

CGS 1000 Introduction to Computers and Technology ..... 3 cr.
*†CTS 1106 Introduction to Linux ..... 3 cr.
*†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Second Semester

CIS 2772 Cybersecurity Operations Fundamentals ..... 3 cr.
*†CNT 1401 Introduction to Network Security ..... 3 cr.
†CTS 2301C Linux Administration I ..... 3 cr.

YEAR I – Third Semester

†CIS 2381C Computer Forensics and Incident Response ..... 3 cr.
CIS 2621 Cybersecurity Operations Implementation ..... 3 cr.
*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Cybersecurity Operations program.

CCC • Database Administrator

CCC.DB.ADMIN (15 Credit Hours)

This certificate prepares students for jobs such as a junior or entry-level database administrator.

Program Required Courses

YEAR I – First Semester

*†CGS 2541 Database Design ..... 3 cr.

YEAR I – Second Semester

†CTS 2440 Database Programming – SQL ..... 3 cr.
†CTS 2441 Database Administration I ..... 3 cr.

YEAR I – Third Semester

†CTS 2442 Database Administration II ..... 3 cr.
†CTS 2445 Database Programming – Advanced ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS Database Technology program.

CCC • Digital Forensics

CCC.DIG.FOR (30 Credit Hours)

Program Required Courses

YEAR I – First Semester

*†CET 1172C PC Upgrading and Repair: Hardware ..... 3 cr.
*†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Second Semester

†CNT 1401 Introduction to Network Security ..... 3 cr.
†CTS 1106 Introduction to Linux ..... 3 cr.

YEAR I – Third Semester

†CGS 1761 Computer Operating Systems ..... 3 cr.
†CGS 2091 Information Technology: Ethical and Legal Ethics Issues ..... 3 cr.

YEAR II – First Semester

†CIS 2359C Information Assurance – Network Systems ..... 3 cr.
†CIS 2381C Computer Forensics and Incident Response ..... 3 cr.

YEAR II – Second Semester

†CIS 2352C Information Assurance – Local Systems ..... 3 cr.
†CIS 2353 Security Management and Penetration Testing ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS Network Systems Technology program.

CCC • Digital Media/Multimedia Instructional Technology

CCC.MMT.IT (15 Credit Hours)

This certificate prepares students for initial employment as an instructional developer, instructional media integrator, or in structional media specialist.

Program Required Courses

YEAR I – First Semester

*†CGS 1577 Presentation Systems ..... 3 cr.
*†CGS 1871 Multimedia Authoring I ..... 3 cr.

YEAR I – Second Semester

*†CGS 2820 Web Authoring – HTML ..... 3 cr.
*†CGS 2821 Graphics Design for Multimedia and Internet ..... 3 cr.

YEAR I – Third Semester

*†EME 2040 Introduction to Education Technology ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Digital Media/Multimedia Technology program.

CCC • Digital Media/Multimedia Production

CCC.MMT.PROD (15 Credit Hours)

This certificate prepares students for initial employment as a videographers or video editors.

Program Required Courses

YEAR I – First Semester

*†CGS 1577 Presentation Systems ..... 3 cr.
*†CGS 1871 Multimedia Authoring I ..... 3 cr.
*†CGS 2821 Graphics Design for Multimedia and Internet ..... 3 cr.

YEAR I – Second Semester

†CGS 2876 Digital Audio/Video Design ..... 3 cr.
†CGS 2877 Digital Animation Design ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Digital Media/Multimedia Technology program.

CCC • Digital Media/Multimedia Video Production

CCC.MMT.VIDEO (12 Credit Hours)

This certificate prepares students for initial employment as a videographers or video editors.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.

YEAR I – Second Semester

2821 Graphics Design for Multimedia and Internet ..... 3 cr.
*†CGS 2876 Digital Audio/Video Design ..... 3 cr.
*†CGS 2877 Digital Animation Design ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

*Requires additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Digital Media/Multimedia Technology program.

CCC • Digital Media/Multimedia Web Production

CCC.MMT.WEB (15 Credit Hours)

This certificate is designed to prepare the student for initial employment as a Web production assistant or Web production artist.

Program Required Courses

YEAR I – First Semester

*†CGS 2820 Web Authoring – HTML ..... 3 cr.
*†CGS 2821 Graphics Design for Multimedia and Internet ..... 3 cr.

YEAR I – Second Semester

*†CGS 2876 Digital Audio/Video Design ..... 3 cr.
*†CGS 2877 Digital Animation Design ..... 3 cr.
*†COP 2830 Scripting for the Web ..... 3 cr.

*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Digital Media/Multimedia Technology program.

CCC • Drafting

CCC.ADCT.DRAFT (24 Credit Hours)

The drafting college credit certificate provides students with an introduction to the two main software utilized by the architecture and construction industries. AutoCAD and Revit software skills are highlighted along with introductory manual drafting skills, construction materials education, and construction blueprint reading skills.

This curriculum is from the current catalog and is meant to provide prospective students a guide/pathway to complete the following certificate track. Students are highly-encouraged to follow the curriculum track as outlined below. Coursework completed in this certificate may be applied to the two-year Architectural Design and Construction technology AS (AS ADCT) degree program. Please note also that some courses within the degrees and certificates are not offered every term and only certain courses are offered as distance-learning modality. Some courses in the track may require additional coursework. Students should consult an Academic Advisor for AS Degree Programs or the AS ADCT Department Chair, Joseph Tisdale, for advising questions.

Program Required Courses

YEAR I – First Semester

BCN 1250C Basic Drafting Principles ..... 3 cr.
BCN 2272 Blueprint Reading ..... 3 cr.
*TAR 2053C Introduction to Computer-Aided Design and Drafting ..... 3 cr.

YEAR I – Second Semester

ARC	2461	Materials and Methods I	3 cr.
TAR	1170C	B.I.M. I Revit Residential	3 cr.
*TAR	2054C	Computer Aided Design and Drafting	3 cr.

YEAR II – First Semester

BCN	1210	Construction Materials and Processes	3 cr.
TAR	1171C	B.I.M. II Revit Commercial	3 cr.

*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Architectural Design and Technology program.

CCC • Early Childhood Education: Administrator

CCC.CHILD.ADM (12 Credit Hours)

Program Required Courses

YEAR I – First Semester

†EEC	1521	Early Childhood Center Management	3 cr.
†EEC	2732	Health, Safety and Nutrition for Young Children	3 cr.

YEAR I – Second Semester

†EEC	2527	Legal and Financial Issues in Child Care	3 cr.
†ENT	1000	Introduction to Entrepreneurship	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree Early Childhood Education program.

CCC • Early Childhood Education: Preschool

CCC.CHILD.PRE (12 Credit Hours)

YEAR I – First Semester

†EEC	1721	Physical Development in the Early Childhood Setting	3 cr.
†EEC	2732	Health, Safety and Nutrition for Young Children	3 cr.

YEAR I – Second Semester

†EEC	1603	Child Guidance	3 cr.
†EEC	2270	Meeting Special Needs of Children in Groups	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree Early Childhood Education program.

CCC • Electronics Technician

CCC.EET (31 Credit Hours)

This program prepares individuals for employment as electrical and electronics technicians, electronic engineering techni cians, or in related occupations in electronics. This program includes the Florida core electronics competencies as identified in the electronics industry. Graduates of this program will be able to assemble, install, operate, maintain, troubleshoot and repair electronic equipment used in industry.

Program Required Courses

YEAR I – First Semester

†CET	1112C	Basic Digital Systems	3 cr.
†EET	1036C	Basic AC and DC	3 cr.
†EET	1083C	Electronics Orientation	3 cr.
†MAC	1105	College Algebra	3 cr.

YEAR I – Second Semester

CET	2113C	Digital Systems Analysis	3 cr.
EET	1037C	Circuit Analysis	3 cr.
†EET	1141C	Solid State Devices	3 cr.

YEAR I – Third Semester

CET	2335C	Total Microcomputer Systems	3 cr.

†EET	1142C	Solid State Circuits	3 cr.
		*Electives	4 cr.

***Select 4 credit hours from the following:**

†CET	1123C	Introduction to Microprocessors/Microcontrollers	3 cr.
†CGS	1510	Spreadsheet Applications	1 cr.
†CGS	1540	Database Management I	1 cr.
EET	2155C	Linear Integrated Circuits	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree in Electronics Engineering Technology.

CCC • Engineering Technology Support Specialist

CCC.ET.SUP.SPEC (18 Credit Hours)

This certificate prepares students for entry level technical jobs in high tech production, manufacturing, distribution and engi neering research and development facilities. [It is aligned with the MSSC (Manufacturing Skill Standards Council) Certified Production Technician (CPT) certification.

Program Required Courses

YEAR I – First Semester

†ETI	1110	Introduction to Quality	3 cr.
†ETI	1810C	Introduction to Electricity and Electronics	3 cr.
†ETM	1010C	Mechanical Measurement and Instrumentation	3 cr.

YEAR I – Second Semester

†ETD	1320C	Computer-Aided Drafting for Engineers	3 cr.
†ETI	1420	Manufacturing Processes and Materials	3 cr.
ETI	1701	Industrial Safety	3 cr.

NOTE: Coursework may be applied to the two-year AS degree Engineering Technology program.

CCC • Entrepreneurship and Innovation

CCC.ENT.INN (12 Credit Hours)

This program provides students the fundamental skills necessary to start and operate their own businesses including rapid learning through active scientific experimentation. The program focuses on the development of an entrepreneurial mindset, a way of thinking that enhances problem solving, creativity, critical thinking, communication and collaboration. Students who complete this degree are eligible for applying for HCC's Everyday Entrepreneur Venture SEED Fund. All credits earned in the Certificate program may be ap plied toward the Associate of Science degree in Interdisciplinary Entrepreneurship.

Program Required Courses

YEAR I – First Semester

†ENT	1000	Introduction to Entrepreneurship	3 cr.
†ENT	1031	Entrepreneurship Marketing and Sales	3 cr.

YEAR I – Second Semester

†ENT	1411	Small Business Accounting and Finance	3 cr.
†ENT	1012	Entrepreneurship Management	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Interdisciplinary Entrepreneurship program.

CCC • Entrepreneurship Strategies

CCC.ENT.STR (25 Credit Hours)

Building upon the 12 and 18 College Credit Certificates in Entrepreneurship, Innovation and Ventures, this program is designed to prepare students to start, execute, and grow a small business, or work as a value adding employee intrapreneur for an existing business. As an integral part of the program, each student is required to develop a deep understanding for strategic decision making related to entrepreneurial finance, marketing, budgeting, management, and entrepreneurial leadership.

Students who complete this degree are eligible for applying for HCC's Everyday Entrepreneur Venture SEED Fund. All credits earned in the Certificate program may be applied toward the Associate of Science degree in Interdisciplinary Entrepreneurship.

Program Required Courses

YEAR I – First Semester

†ENT	1000	Introduction to Entrepreneurship	3 cr.
†ENT	1012	Entrepreneurship Management	3 cr.
†ENT	1031	Entrepreneurial Marketing and Sales	3 cr.
†FIN	1100	Personal Finance	3 cr.

YEAR I – Second Semester

†ECO	2013	Principles of Macroeconomics	3 cr.
†ENT	1411	Small Business Accounting and Finance	3 cr.
†ENT	1612	Creativity, Innovation, and Human Centered Design	3 cr.
ENT	2212	Entrepreneurial Leadership - Capstone	3 cr.
†CGS	1510	Spreadsheet Applications I **or** †FIL 2931, Career in Film and Video	1 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Interdisciplinary Entrepreneurship program.

CCC • Entrepreneurship Ventures

CCC.ENT.VEN (18 Credit Hours)

Building upon the 12 College Credit Certificate in Entrepreneurship and Innovation, this certificate program is designed for students who are interested in launching their own business venture or working in a small to medium sized business upon graduation. Students will engage in skill building related to new ventures that includes human centered problem solving, creativity, problem identification, level II business modeling, and rapid testing of new innovative prototypes and solutions. Students will also learn about social entrepreneurship, and gain a deeper understanding of small business finance and personal finance. Students who complete this degree are eligible for applying for HCC's Everyday Entrepreneur Venture SEED Fund. All credits earned in the Certificate program may be applied toward the Associate of Science degree in Interdisciplinary Entrepreneurship.

Program Required Courses

YEAR I – First Semester

†ENT	1000	Introduction to Entrepreneurship	3 cr.
†ENT	1012	Entrepreneurship Management	3 cr.
†ENT	1031	Entrepreneurial Marketing and Sales	3 cr.
†FIN	1100	Personal Finance	3 cr.

YEAR I – Second Semester

†ENT	1411	Small Business Accounting and Finance	3 cr.
†ENT	1612	Creativity, Innovation, and Human Centered Design	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Interdisciplinary Entrepreneurship program.

CCC • Event Planning Management

CCC.HFT.EVNT (24 Credit Hours)

This program prepares students for immediate employment in the hospitality industry with employable skills in the events planning area of hotels, resorts, convention centers, cruise ships and other hospitality-related areas. This technical certificate can help prepare students for the CSEP (Certified Special Events Professional) certification exam.

Program Required Courses

YEAR I – First Semester

†FSS	2100	Menu Development and Marketing	3 cr.
†HFT	1000	Introduction to Hospitality Industry Management	3 cr.
†HFT	2210	Supervisory Development	3 cr.
†HFT	2600	Hospitality Industry Law	3 cr.
†HFT	2750	Meeting, Convention and Exposition Industry	3 cr.

YEAR I – Second Semester

†ECO	2013	Principles of Macroeconomics ***or*** †ECO 2023, Principles of Microeconomics	3 cr.
†HFT	1790	The Event Industry	3 cr.

†HFT 2840 Maître D′ and Dining Room Service ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree in Hospitality and Tourism Management.

CCC • Financial Technology
CCC.FIN.TECH (24 Credit Hours)

The Financial Technology College Credit Certificate (C.C.C.) program is for the student seeking additional certifications or knowledge in Financial Technology.

Program Required Courses

YEAR I – First Semester

BRC 1301 Introduction to Financial Institutions ..... 3 cr.
†FIT 2000 Introduction to Financial Technology ..... 3 cr.

YEAR I – Second Semester

FIT 2700 Cybersecurity for Financial Technology ..... 3 cr.
FIT 2400 Financial Technology Payments Systems ..... 3 cr.

YEAR I – Third Semester

FIT 2500 Financial Technology Governance and Regulation ..... 3 cr.
FIT 2200 Advanced Financial Technology ..... 3 cr.

YEAR II – First Semester

FIT 2600 Coding for Financial Technology ..... 3 cr.
FIT 2100 Financial Technology Capstone ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

CCC • Fire Officer Supervisor
CCC.FIRE.OFF.SUP (12 Credit Hours)

Program Required Courses

YEAR I – First Semester

†FFP 1710 Company Officer ..... 3 cr.
†FFP 2120 Fire Service Building Construction ..... 3 cr.

YEAR I – Second Semester

†FFP 1810 Fire Fighting Tactics and Strategy I ..... 3 cr.
†FFP 2740 Fire Service Couse Delivery ..... 3 cr.

CCC • Food and Beverage Management
CCC.FOOD.BEV.MGT (31 Credit Hours)

This certificate provides a program of study designed to prepare students for employment as supervisors and managers in the food and beverage sectors of the hospitality industry.

Program Required Courses

YEAR I – First Semester

†FOS 1201 Sanitation and Safety Management ..... 2 cr.
†FSS 1223C Food Preparation for Managers ..... 4 cr.
†HFT 1000 Introduction to Hospitality Industry Management ..... 3 cr.

YEAR I – Second Semester

†FSS 1500 Food and Beverage Control ..... 3 cr.
†FSS 2120 Food Purchase and Storage ..... 3 cr.
†HFT 2840 Maître D′ and Dining Room Service ..... 3 cr.

YEAR I – Third Semester

†ECO 2023 Principles of Microeconomics ..... 3 cr.
†SPC 1006 Speech Improvement ..... 1 cr.

YEAR II – First Semester

†HFT	2210	Supervisory Development	3 cr.
†HFT	2600	Hospitality Industry Law	3 cr.
†HFT	2750	Meeting, Convention and Exposition Industry	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Restaurant Management program.

CCC • Food and Beverage Operations

CCC.FOOD.BEV.OP (18 credit hours)

Program Required Courses

YEAR I – First Semester

†FOS	1201	Safety and Sanitation Management	2 cr.
†FSS	2100	Menu Development and Marketing	3 cr.
†HFT	2210	Supervisory Development	3 cr.
†HFT	2600	Hospitality Law	3 cr.

YEAR I – Second Semester

†CGS	1107	Introduction to Computers	1 cr.
†FSS	2120	Food Purchase and Storage	3 cr.
†HFT	2840	Maître D′ and Dining Room Service	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Restaurant Management program.

CCC • Game Design and Development - Authoring

CCC.MMT.AUTH (12 Credit Hours)

This certificate is designed to prepare students for initial employment as a digital media/multimedia author.

Program Required Courses

YEAR I – First Semester

*†CAP	1023	Introduction to Game Development	3 cr.
*†CGS	2827	Advanced Graphics for Multimedia and Internet	3 cr.

YEAR I – Second Semester

		Specified Electives	6 cr.

***Select 6 specified elective credits from the following list:**

†CAP	2042	Game Design and Development - Modeling	3 cr.
†CAP	2043	Game Design and Development - Rigging	3 cr.
CAP	2041	Game Design and Development – Animation	3 cr.
†CAP	2044	Game Design and Development – Special Effects	3 cr.

*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Digital Media/Multimedia Technology program.

CCC • Graphic Design Production

CCC.GRA.PROD (27 Credit Hours)

Program Required Courses

YEAR I – First Semester

†ARH	1051	Art History II	3 cr.
ART	1201C	Visual Studies Foundations I	3 cr.
ART	1300C	Drawing I	3 cr.
PGY	2401C	Photography I	3 cr.

YEAR I – Second Semester

†GRA	2111C	Graphic Design	3 cr.
PGY	2801C	Digital Photography I	3 cr.

YEAR I – Third Semester

ART	2600C	Digital Art	3 cr.
GRA	2156C	Digital Illustration	3 cr.
GRA	2206C	Introduction to Typography	3 cr.

NOTE: Coursework may be applied to the two-year AA Graphic Design pathway.

CCC • Help Desk Support Technician

CCC.HELP.DESK (18 Credit Hours)

This certificate prepares students for jobs such as help desk technician, junior or entry-level technical support, IT help desk support technician, or desktop support technician.

Program Required Courses

YEAR I – First Semester

†CGS	1000	Introduction to Computers and Technology	3 cr.

YEAR I – Second Semester

†CET	1172C	PC Upgrading and Repair: Hardware	3 cr.
†CET	1174C	PC Upgrading and Repair: Software	3 cr.

YEAR I – Third Semester

†CTS	1305	Introduction to Networking	3 cr.

YEAR II – First Semester

†CNT	1401	Introduction to Network Security	3 cr.

YEAR II – Second Semester

†CTS	1303	Enterprise Operating Systems I	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS Network Systems Technology program.

CCC • Healthcare Support Specialist

CCC.HLTH.SUP.SPEC (21 Credit Hours)

Program Required Courses

YEAR I – First Semester

†AMH	2010	Early American History or †AMH 2020, Modern American History ***or*** †POS 2041, American Government	3 cr.
†ENC	1101	English Composition I	3 cr.
†BSC	2085	Human Anatomy and Physiology	3 cr.
†BSC	2085L	Human Anatomy and Physiology Laboratory	1 cr.

YEAR I – Second Semester

†MAC	1105	College Algebra **or** STA 2023, Elementary Statistics **or** MGF 1130, Mathematical Thinking **or** higher math	3 cr.
		Electives	8 cr.

****Select 8 credit hours of electives from the following:**

†BSC	2086	Human Anatomy and Physiology II	3 cr.
†BSC	2086L	Human Anatomy and Physiology II Laboratory	1 cr.
†HIM	1000	Introduction to Health Information Management	3 cr.
†HIM	1112C	Electronic Health Records	2 cr.
†HSC	1531	Medical Terminology	3 cr.
†MCB	2000	Microbiology and Human Disease	3 cr.
†MCB	2000L	Microbiology and Human Disease Laboratory	1 cr.

PHY	1025	Fundamental of Physics	3 cr.
PHY	1025L	Fundamental of Physics Laboratory	1 cr.
CHM	1025	Introductory Chemistry	3 cr.
CHM	1025L	Introductory Chemistry Laboratory	1 cr.
CHM	1032	Chemistry for Health Sciences	3 cr.
CHM	1032L	Chemistry for Health Sciences Laboratory	3 cr.
†PSY	2012	General Psychology	3 cr.
†SYG	2000	Introduction to Sociology	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

CCC • Home Staging Specialist

CCC.HM.STG.SPEC (12 Credit Hours)

The purpose of this program is to prepare students for careers in the interior design industry as home staging specialists. Home staging specialists are trained to design room layouts for the home furnishings and decor retail industry and prepare interior room layouts to market homes for the real estate industry.

This curriculum is from the current catalog and is meant to provide prospective students a guide/pathway to complete the following certificate track. Students are highly-encouraged to follow the curriculum track as outlined below. Please note that some courses within the degrees and certificates are not offered every term and only certain courses may be offered as distance-learning modality. Some courses in the track may require prerequisite coursework. Students should consult the Department Chair, Joseph Tisdale, for advising questions.

Program Required Courses

YEAR I – First Semester

ARC	1180C	Introduction to Digital Architecture	3 cr.
IND	1020C	Introduction to Interior Design	3 cr.
IND	1420	Materials and Methods	3 cr.
IND	1606C	Functions and Psychology of Space	3 cr.

CCC • Homeland Security Specialist

CCC.HSS (9 Credit Hours)

Program Required Courses

YEAR I – First Semester

†DSC	1003	Introduction to Homeland Security	3 cr.

Select 6 credit hours from the following:

†DSC	1002	Introduction to Terrorism	3 cr.
†DSC	2590	Intelligence Analysis and Security Management	3 cr.
†DSC	2033	Introduction to Terrorist Tactics and Weapons	3 cr.
†DSC	2570	Introduction to Cyber-Terrorism	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS Criminology and Criminal Justice Studies program. For more information visit www.hccfl.edu/cjt

CCC • Human Resource Assistant

CCC.OSS.HRS (21 Credit Hours)

This program teaches students the process of accomplishing administrative support functions for human resources managers in the areas of employee benefits, recruitment and staffing, training and development, salary and compensation, employee relations, and safety and worker's compensation.

Students are prepared for such positions as human resource assistant, employment interviewer, labor relations assistant, and human resource specialist.

Program Required Courses

YEAR I – First Semester

	1111	Basic Accounting	3 cr.
†MAN	2300	Introduction to Human Resource Management	3 cr.
†OST	2854C	Office Applications for Business	3 cr.

PLA 2421 Contract Law ..... 3 cr.

YEAR I – Second Semester

MNA 1320 HR Recruitment Interviewing and Selection ..... 3 cr.
†OST 1335 Business Communications ..... 3 cr.
†SLS 1261 Personal Skills for Business ..... 3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Internet Services Technology Web Development Specialist - Designer

CCC.WEB.OPT1 (35 Credit Hours)

This program prepares students for internet-related jobs such as Web designer, site designer or internet architect, and trans fers into the associate degree program titled Internet Services Technology-Web Designer.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.
*†CGS 2820 Web Authoring - HTML ..... 3 cr.

YEAR I – Second Semester

†CGS 1871 Multimedia Authoring I ..... 3 cr.
†CGS 2821 Graphics Design for Multimedia and Internet ..... 3 cr.
†CGS 2822 Web Site Creation ..... 3 cr.

YEAR II – First Semester

†CGS 2585 Desktop Internet Publishing ..... 3 cr.
†CGS 2786 Web 2.0 Applications ..... 3 cr.
†CGS 2876 Desktop Audio/Video Design/Animation ..... 3 cr.

YEAR II – Second Semester

†CGS 2827 Advanced Graphics Design for Multimedia and Internet ..... 3 cr.
†CGS 2877 Digital Animation Design ..... 3 cr.
†COP 2830 Scripting for the Web ..... 3 cr.

Select any 2 credit hours from any of the following courses prefixes: CAP, CEN, CET, CGS, CIS, CNT, COP, CTS

*Permission of instructor required for concurrent enrollment with prerequisite.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Internet Services Technology program.

CCC • Internet Services Technology Web Development Specialist - Developer

CCC.WEB.OPT2 (35 Credit Hours)

This program prepares students for internet-related jobs such as Webmaster, Web developer, site developer and internet programmer.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.
†COP 1000 Programming Logic ..... 3 cr.

YEAR I – Second Semester

*†CGS 2541 Database Design ..... 3 cr.
*†CGS 2820 Web Authoring - HTML ..... 3 cr.

YEAR I – Third Semester

†CGS 1103 Project Management ..... 3 cr.
†COP 1812 Introduction to XML ..... 3 cr.

YEAR II – First Semester

†COP 2830 Scripting for the Web ..... 3 cr.

†COP 2836 Database-Driven Web Program – Server ..... 3 cr.
†CTS 2440 Database Programming – SQL ..... 3 cr.

YEAR II – Second Semester

†CGS 2822 Web Site Creation ..... 3 cr.
†COP 2833 Database-Driven Web Program – Client ..... 3 cr.

Select 2 credit hours from any of the following courses prefixes: CAP, CEN, CET, CGS, CIS, CNT, COP, CTS

*Permission of instructor required for concurrent enrollment with prerequisite.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Internet Services Technology program.

CCC • Laser and Photonics Technician

CCC.LAS.TECH (12 Credit Hours)

Program Required Courses

YEAR I – First Semester

†EET 1036C Basic AC and DC ..... 3 cr.

YEAR I – Second Semester

†EET 1141C Solid State Devices ..... 3 cr.

YEAR II – First Semester

†ETS 2210C Introduction to Photonics ..... 3 cr.

YEAR II – Second Semester

ETS 2230C Introduction to Lasers ..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Electronics Engineering Technology program.

CCC • Lean Manufacturing

CCC.ETM (12 Credit Hours)

This certificate prepares students for engineering technology support positions dealing with quality systems and their imple mentation in high tech production, manufacturing, distribution, and engineering research and development facilities.

Program Required Courses

YEAR I – First Semester

†ETI 1110 Introduction to Quality ..... 3 cr.
†ETM 1010C Mechanical Measurement and Instrumentation ..... 3 cr.

YEAR I – Second Semester

†ETI 1622 Concepts of Lean and Six Sigma ..... 3 cr.
†ETI 1644 Production and Inventory Control ..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Engineering Technology program.

CCC • Logistics and Transportation Specialist

CCC.LOG.TRAN.SPEC (18 Credit Hours)

This program is designed to develop the student's general employability by improving work attitudes, communica tion, critical thinking, technical skills, problem-solving skills and occupation-specific skills relative to supply chain management. This program prepares students for employment in roles such as: Integrated Logistics Planner, Purchasing Analyst, Cargo Scheduler, International Logistics Clerk, Quality Associate, Inventory Control Manager, Logistics Analyst, Junior Buyer, Cus tomer Service Associate, Materials Analyst, Material Manager, Supply Manager, Dispatcher, Supply Technician, Operations Su pervisor, Order Fulfillment Associate, Transportation Coordinator, Distribution Planning Analyst, Packing Supervisor, Transportation Clerk, Cargo Sales, Receiving/Shipping Supervisor, Transportation Specialist, Procurement Clerk, Product Trac ing and Tracking Clerk, Warehouse Shift Supervisor, Import/Export Clerk, and Purchasing Agent.

Program Required Courses

YEAR I – First Semester

†ETI 1110 Introduction to Quality ..... 3 cr.
†SCM 1010 Introduction to Supply Chain Management ..... 3 cr.

†SCM 2270 Transportation and Distribution ..... 3 cr.

YEAR I – Second Semester

†MAN 2500 Operations Management ..... 3 cr.
†SCM 2150 Purchasing and Inventory Management ..... 3 cr.
†SCM 2230 Warehouse Management ..... 3 cr.

CCC • Mechatronics

CCC.MECH (30 Credit Hours)

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging aca demic standards and relevant technical knowledge and skills. It provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all fundamental aspects of Mechatronics. The content includes but is not limited to instruction in maintenance techniques, computer aided drafting/de sign skills, technical communications, maintenance and operation of various industrial components, material handling protocols, and proper usage of tools and instrumentation.

Program Required Courses

YEAR I – First Semester

†ETD 1320C Computer Aided Drafting for Engineers ..... 3 cr.
ETI 1701 Industrial Safety ..... 3 cr.
†ETI 1810C Introduction to Electricity and Electronics ..... 3 cr.
†ETM 1010C Mechanical Measurement and Instrumentation ..... 3 cr.

YEAR I – Second Semester

†ETI 1420 Manufacturing Processes and Materials ..... 3 cr.
†ETI 1843 Motors and Controls ..... 3 cr.
†ETS 1542 Introduction to Programmable Logic Controllers ..... 3 cr.
†ETS 2604 Robotics Application ..... 3 cr.

YEAR II – First Semester

†ETM 2315 Hydraulic and Pneumatic Systems ..... 3 cr.
†ETS 2527 Electromechanical components and Mechanisms ..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Engineering Technology program.

CCC • Medical Information: Medical Coder

CCC.MED.CODE (37 Credit Hours)

This program prepares students to be members of a health information service team. Coursework focuses on using a classifi cation system to assign code numbers and letters to each symptom, diagnosis, disease, procedure, and operation on a patient's chart. A high degree of accuracy, critical thinking skills, a working knowledge of medical terminology, and skill development in coding and computer software are required. Career opportunities include hospital inpatient/outpatient coding specialist, reim bursement specialist, coding abstracting or insurance claim analyst, managed-care coding specialist, procedural coding special ist, and physician's office or clinical coding specialist.

Program Required Courses

YEAR I – First Semester

HIM 1112C Electronic Health Records ..... 2 cr.
†HIM 1453 Anatomy and Physiology for Medical Coding or BSC 2085/L Human Anatomy And Physiology I and Lab ..... 4 cr.
†HSC 1531 Medical Terminology ..... 3 cr.

YEAR I – Second Semester

†HIM 1000 Introduction to Health Information Management ..... 3 cr.
†HIM 1433 Principles of Disease ..... 4 cr.
†HIM 1442 Pharmacology ..... 2 cr.
†OST 2854C Office Applications for Business ..... 3 cr.

YEAR I – Third Semester

†HIM 2253 CPT Coding ..... 3 cr.
†HIM 2724 ICD-10 Coding ..... 3 cr.

†HIM 2275C Medical Billing and Insurance I ..... 3 cr.

YEAR II – First Semester

†HIM 2283 Advanced Coding ..... 3 cr.
HIM 2941 Clinical Coding Practicum ..... 3 cr.
Elective** ..... 1 cr.

****Select 1 credit hour from the following:**

HIM 2960 Credentialing Exam Review ..... 1 cr.
OST 2943 Internship in Medical Office (up to 4 credits) ..... 1 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Medical Office Management - Management

CCC.OA.MED.MAN (34 Credit Hours)

Prepares individuals to support management by expediting and facilitating the maintenance and production of correspond ence and records; to transcribe recordings, telecommunicate, maintain office budget, prepare correspondence and resolutions; to file and maintain documents; and to assist in the administration of policy.

Program Required Courses

YEAR II – First Semester

†HIM 1112C Electronic Health Records ..... 2 cr.
†HSC 1531 Medical Terminology ..... 3 cr.
†OST 2854C Office Applications for Business ..... 3 cr.

YEAR I – Second Semester

HIM 2252 Introduction to CPT Coding ..... 3 cr.
HIM 2723 Introduction to ICD 10-CM/PCS ..... 3 cr.
†OST 1335 Business Communications ..... 3 cr.

YEAR I – Third Semester

†APA 1111 Basic Accounting ..... 3 cr.
†HIM 1000 Introduction to Health Information Management ..... 3 cr.
†MAN 2300 Introduction to Human Resource Management ..... 3 cr.

YEAR II – First Semester

*†HIM 2275C Medical Billing and Insurance I ..... 3 cr.
†OST 2135 Medical Office Procedures ..... 3 cr.
**Electives ..... 2 cr.

****Select 2 credit hours from the following:**

†CGS 1540 Database Applications ..... 1 cr.
HIM 2960 Credentialing Exam Review ..... 1 cr.
OST 1142 Keyboarding I ..... 1 cr.
OST 1143 Keyboarding II ..... 1 cr.
OST 1741 Word Processing I ..... 1 cr.
OST 1813 Desktop Publishing ..... 1 cr.
OST 2742 Word Processing II ..... 1 cr.
OST 2943 Internship in Medical Office ..... 1 cr.

*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Medical Office Management - Billing

CCC.OA.MED.BIL (34 Credit Hours)

Prepares individuals to support management by expediting and facilitating the maintenance and production of correspond ence and records; to transcribe recordings, telecommunicate, maintain office budget, prepare correspondence and resolutions; to file and maintain documents; and to assist in the administration of policy.

Program Required Courses

YEAR I – First Semester

†HIM	1112C	Electronic Health Records	2 cr.
†HIM	1453	Anatomy and Physiology for Medical Coding or BSC 2085, Human Anatomy and Physiology I and BSC 2085L, Human Anatomy and Physiology I Lab	4 cr.
†HSC	1531	Medical Terminology	3 cr.

YEAR I – Second Semester

†HIM	1000	Introduction to Health Information Management	3 cr.
HIM	2723	Introduction to ICD 10-CM/PCS	3 cr.
†OST	2854C	Office Applications for Business	3 cr.

YEAR I – Third Semester

†APA	1111	Basic Accounting	3 cr.
†HIM	2275C	Medical Billing and Insurance I	3 cr.
HIM	2252	Introduction to CPT Coding	3 cr.

YEAR II – First Semester

†HIM	2272C	Medical Billing and Insurance II	3 cr.
OST	2135	Medical Office Procedures	3 cr.
		**Elective	1 cr.

****Select 1 credit hour from the following:**

HIM	2960	Credentialing Exam Review	1 cr.
OST	1142	Keyboarding I	1 cr.
OST	1143	Keyboarding II	1 cr.
OST	2943	Internship in Medical Office (up to 4 credits)	1 cr.

*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Medical Office Specialist

CCC.OA.MED.SPEC (18 Credit Hours)

This college certificate will prepare students for medical office opportunities.

Program Required Courses

YEAR I – First Semester

†HIM	1453	Anatomy and Physiology for Medical Coding, or BSC 2085, Human Anatomy and Physiology I and BSC 2085L, Human Anatomy and Physiology I Lab	4 cr.
†HSC	1531	Medical Terminology	3 cr.
†OST	2854C	Office Applications for Business	3 cr.

YEAR I – Second Semester

†HIM	1000	Introduction to Health Information Management	3 cr.
†HIM	1112C	Electronic Health Records	2 cr.
†OST	2135	Medical Office Procedures	3 cr.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Microcomputer Repairer/Installer

CCC.CET.REPAIR (15 Credit Hours)

This certificate is designed to prepare students for employment as computer engineering technicians in electronics/information technology.

Program Required Courses

YEAR I – First Semester

†CET 1112C Basic Digital Systems ..... 3 cr.
†EET 1036C Basic AC and DC ..... 3 cr.

YEAR I – Second Semester

CET 2113C Digital Systems Analysis ..... 3 cr.
†EET 1141C Solid State Devices ..... 3 cr.

YEAR I – Third Semester

CET 2335C Total Microcomputer Systems ..... 3 cr.

NOTE: Coursework may be applied to the two-year AS degree Computer Engineering Technology program.

CCC • Motion Picture Production Management

CCC.MOV.PROD.MGMT (16 Credit Hours)

Program Required Courses

YEAR I – First Semester

†FIL 1000 Introduction to Film ..... 3 cr.
†FIL 1420C Motion Media I ..... 3 cr.

YEAR I – Second Semester

†FIL 2010 Films of Fantasy and Imagination ..... 3 cr.
†RTV 1530 Electronic Field Production ..... 3 cr.

YEAR I – Third Semester

†FIL 2905 Directed Independent Study: Film ..... 3 cr.
†FIL 2931 Careers in Film and Video ..... 1 cr.

NOTE: Coursework may be applied to the two-year AS degree Digital Television and Media Production.

CCC • Network Enterprise Administration

CCC.NST.ENT.ADM (27 Credit Hours)

This certificate prepares students for such jobs as junior or entry-level systems administrator, junior or entry-level network engineer.

Program Required Courses

YEAR I – First Semester

*†CET 1172C PC Upgrading and Repair: Hardware ..... 3 cr.
*†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Second Semester

†CET 1174C PC Upgrading and Repair: Software ..... 3 cr.
*†CTS 1303 Enterprise Operating Systems I ..... 3 cr.

YEAR I – Third Semester

†CNT 1401 Introduction to Network Security ..... 3 cr.
†CTS 1306 Enterprise Operating Systems II ..... 3 cr.

YEAR II – First Semester

†CNT 2510 Wireless Networking ..... 3 cr.
†CTS 1145 Introduction to the Cloud ..... 3 cr.

YEAR II – Second Semester

†CTS 2375 Enterprise and Cloud Computing ..... 3 cr.

*May require additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Network Infrastructure

CCC.NST.INF (21 Credit Hours)

This certificate prepares student for jobs such as junior or entry-level network infrastructure engineer, junior or entry-level infrastructure specialist.

Program Required Courses

YEAR I – First Semester

*†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Second Semester

†CET 1600 Cisco Network Fundamentals ..... 3 cr.
†CNT 1401 Introduction to Network Security ..... 3 cr.

YEAR I – Third Semester

†CET 1610 Cisco Switching, Routing, and Wireless Essentials ..... 3 cr.
†CNT 2510 Wireless Networking ..... 3 cr.

YEAR II – First Semester

†CET 2615 Cisco Enterprise Networking, Security, and Automation ..... 3 cr.
CIS 2772 Cybersecurity Operations Fundamentals ..... 3 cr.

*May require additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Network Security/Cybersecurity: Cisco

CCC.SEC.CYB.CISCO (30 Credit Hours)

This certificate prepares students for jobs such as junior or entry-level Cisco security technician, junior or entry-level network security technician.

Program Required Courses

YEAR I – First Semester

†CET 1600 Cisco Network Fundamentals ..... 3 cr.
*†CNT 1401 Introduction to Network Security ..... 3 cr.

YEAR I – Second Semester

*†CET 1610 Cisco Switching, Routing, and Wireless Essentials ..... 3 cr.
†CIS 2352C Information Assurance – Local Systems ..... 3 cr.
†CIS 2353 Security Management and Penetration Testing ..... 3 cr.

YEAR I – Third Semester

†CET 2615 Cisco Enterprise Networking, Security, and Automation ..... 3 cr.
†CGS 2091 Information Technology: Ethical and Legal Ethics Issues ..... 3 cr.

YEAR II – First Semester

CIS 2772 Cybersecurity Operations Fundamentals ..... 3 cr.
†CIS 2359C Information Assurance – Network Systems ..... 3 cr.
†CIS 2381C Computer Forensics and Incident Response ..... 3 cr.

*Permission of instructor required for concurrent enrollment with prerequisite.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Network Security/Cybersecurity: Windows

CCC.SEC.CYB.WINDOWS (30 Credit Hours)

This certificate prepares students for jobs such as junior or entry-level Windows Server systems engineer.

Program Required Courses

YEAR I – First Semester

*†CNT 1401 Introduction to Network Security ..... 3 cr.

YEAR I – Second Semester

†CIS 2352C Information Assurance – Local Systems ..... 3 cr.
†CIS 2353 Security Management and Penetration Testing ..... 3 cr.
*†CTS 1303 Enterprise Operating Systems I ..... 3 cr.

YEAR I – Third Semester

†CGS 2091 Information Technology: Ethical and Legal Ethics Issues ..... 3 cr.
†CTS 1306 Enterprise Operating Systems II ..... 3 cr.

YEAR II – First Semester

†CIS 2359C Information Assurance – Network Systems ..... 3 cr.
†CIS 2381C Computer Forensics and Incident Response ..... 3 cr.
†CTS 1145 Introduction to the Cloud ..... 3 cr.

YEAR II – Second Semester

†CTS 2375 Enterprise and Cloud Computing ..... 3 cr.

*Requires additional coursework.
†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.
NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Network Security Cybersecurity: Linux

CCC.SEC.CYB.UL (30 Credit Hours)

This certificate prepares students for jobs such as junior or entry-level Unix Security technician, junior or entry-level Linux Security technician.

Program Required Courses

YEAR I – First Semester

*†CNT 1401 Introduction to Network Security ..... 3 cr.
*†CTS 1106 Introduction to Linux ..... 3 cr.

YEAR I – Second Semester

†CIS 2352C Information Assurance – Local Systems ..... 3 cr.
†CIS 2353 Security Management and Penetration Testing ..... 3 cr.
†CTS 2301C Linux Administration I ..... 3 cr.

YEAR I – Third Semester

†CGS 2091 Information Technology: Ethical and Legal Ethics Issues ..... 3 cr.
†CTS 2322 Linux Administration II ..... 3 cr.
CTS 2333 Linux Networking ..... 3 cr.

YEAR II – First Semester

†CIS 2359C Information Assurance – Network Systems ..... 3 cr.
†CIS 2381C Computer Forensics and Incident Response ..... 3 cr.

*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Network Server Administration

CCC.NST.SVR.ADM (24 Credit Hours)

This certificate prepares students for jobs such as junior or entry-level IT support and administration, junior or entry-level Windows Server administrator, junior or entry-level network administrator.

Program Required Courses

YEAR I – First Semester

*†CET 1172C PC Upgrading and Repair: Hardware ..... 3 cr.
*†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Second Semester

†CET 1174C PC Upgrading and Repair: Software ..... 3 cr.
†CTS 1303 Enterprise Operating Systems I ..... 3 cr.

YEAR I – Third Semester

†CTS 1306 Enterprise Operating Systems II ..... 3 cr.

YEAR II – First Semester

†CNT 1401 Introduction to Network Security ..... 3 cr.
†CTS 1145 Introduction to the Cloud ..... 3 cr.

YEAR II – Second Semester

†CTS 2375 Enterprise and Cloud Computing ..... 3 cr.

*Requires additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Network Support Technician

CCC.NST.SPT.TECH (21 Credit Hours)

This certificate prepares students for such jobs as junior or entry-level network support technician, junior or entry-level network specialist, help desk technician, or support technician.

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computers and Technology ..... 3 cr.

YEAR I – Second Semester

*†CTS 1303 Enterprise Operating Systems I ..... 3 cr.
†CTS 1305 Introduction to Networking ..... 3 cr.

YEAR I – Third Semester

†CET 1172C PC Upgrading and Repair: Hardware ..... 3 cr.
†CTS 1306 Enterprise Operating Systems II ..... 3 cr.

YEAR II – First Semester

†CNT 1401 Introduction to Network Security ..... 3 cr.
†CET 1174C PC Upgrading and Repair: Software ..... 3 cr.

*May require additional coursework.

†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Network Systems Technology program.

CCC • Office Management

CCC.OA.OFM (27 Credit Hours)

Program Required Courses

YEAR I – First Semester

†APA 1111 Basic Accounting ..... 3 cr.
†GEB 1011 Introduction to Business ..... 3 cr.
†OST 1100C Keyboarding and Document Processing ..... 3 cr.
†OST 2854C Office Applications for Business ..... 3 cr.

YEAR I – Second Semester

†MAN 2021 Principles of Management ..... 3 cr.
†OST 1335 Business Communications ..... 3 cr.
†OST 2501 Office Administration ..... 3 cr.
SPC 1608 Public Speaking ..... 3 cr.

YEAR II – First Semester

OST 1813 Desktop Publishing ..... 3 cr.
†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Office Specialist
CCC.OA.SPEC (18 Credit Hours)

Program Required Courses

YEAR I – First Semester

†OST 1100C Keyboarding and Document Processing ..... 3 cr.
†OST 1335 Business Communications ..... 3 cr.
†OST 2854C Office Applications for Business ..... 3 cr.

YEAR I – Second Semester

†APA 1111 Basic Accounting ..... 3 cr.
OST 1813 Desktop Publishing ..... 3 cr.
†OST 2501 Office Administration ..... 3 cr.
†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Office Support
CCC.OA.OS (12 Credit Hours)

Program Required Courses

YEAR I – First Semester

†APA 1111 Basic Accounting ..... 3 cr.
†OST 1100C Keyboarding and Document Processing ..... 3 cr.
†OST 1335 Business Communications ..... 3 cr.
†OST 2854C Office Applications for Business ..... 3 cr.
†Courses symbolized with a dagger (†) are offered online in addition to the traditional delivery methods. Online availability may vary by academic term.

NOTE: Coursework may be applied to the two-year AS degree Office Administration program.

CCC • Pneumatics, Hydraulics and Motors for Manufacturing
CCC.MFG.PHM (13 Credit Hours)

This certificate prepares students for engineering technology support positions dealing with facilities operations and mainte nance in high tech production, manufacturing, distribution, and engineering research and development facilities.

Program Required Courses

YEAR I – First Semester

1420 Manufacturing Processes and Materials ..... 3 cr.
†ETI 1810C Introduction to Electricity and Electronics ..... 3 cr.
†ETI 1843 Motors and Controls ..... 3 cr.

CCC • Project Manager Associate
CCC.PRO.MAN.ASO (12 credit Hours)

Program Required Courses

YEAR I – First Semester

†CGS 1000 Introduction to Computes and Technology ..... 3 cr.

YEAR I – Second Semester

†CGS 1103 Project Management ..... 3 cr.

YEAR II – First Semester

CGS 2105 IT Project Management Software Applications ..... 3 cr.
Specified Elective ..... 3 cr.

Select 3 credit hours from the specified electives below:

†CGS 2091 Information Technology: Ethical/Legal Issues ..... 3 cr.
†CGS 2541 Database Design ..... 3 cr.
†CGS 2301 Management Information Systems ..... 3 cr.
†OST 1335 Business Communications ..... 3 cr.
*May require additional coursework.

NOTE: Coursework may be applied to the two-year AS degree Information Project Management.

CCC • Real Estate Paralegal

CCC.RES.LEGAL (12 Credit Hours)

The Real Estate Paralegal certificate prepares individuals for entry into the legal field as Real Estate Paralegals, Title Company Professionals, and Escrow / Closing Officers. The course content includes property law, real property transactions, ethics and professional responsibility, contract law, and employability skills.

Program Required Courses

YEAR I – First Semester

†PLA 1003 Introduction to the Paralegal Profession ..... 3 cr.
†PLA 1611 Real Estate Law/Property Transactions I ..... 3 cr.
†PLA 2421 Contract Law ..... 3 cr.
†PLA 2612 Real Estate Law/Property Transactions II ..... 3 cr.

CCC • Robotics and Simulation

CCC.ROB.SIM (12 Credit Hours)

This certificate is designed to expose students to the basic fundamentals of robotics and simulation and also prepare students for employment as an entry level Robotics and Simulation technician.

Program Required Courses

YEAR I – First Semester

†EET 1036C Basic AC and DC ..... 3 cr.

YEAR I – Second Semester

†CET 1123C Introduction to Microprocessors/Microcontrollers ..... 3 cr.
†EET 1141C Solid State Devices ..... 3 cr.

YEAR II – First Semester

†ETS 1603C Fundamentals of Robotics and Simulation ..... 3 cr.

CCC • Sustainable Design

CCC.ADCT.SUS (19 Credit Hours)

The Sustainable Design college credit certificate provides students with an introduction to the principles of sustainable design and construction in buildings. The certificate also focuses on the building design regulatory environment, construction materials quantification principles, building systems utilizing Revit, and building structural principles in the architecture and construction industries.

This curriculum is from the current catalog and is meant to provide prospective students a guide/pathway to complete the following certificate track. Students are highly-encouraged to follow the curriculum track as outlined below. Coursework com pleted in this certificate may be applied to the two-year Architectural Design and Construction technology AS (AS ADCT) de gree program. Please note also that some courses within the degrees and certificates are not offered every term and only certain courses are offered as distance-learning modality. Some courses in the track may require additional coursework. Students should consult an Academic Advisor for AS Degree Programs or the AS ADCT Department Chair, Joseph Tisdale, for advising questions.

Program Required Courses

YEAR I – First Semester

BCN	2049	Sustainable Design and Construction	3 cr.
BCN	2760	Building Codes	3 cr.
*BCT	2770C	Construction Estimating	3 cr.
TAR	1172C	B.I.M. III Revit M.E.P	3 cr.

YEAR I – Second Semester

*ARC	2501	Architectural Structures I	4 cr.
BCN	2939C	Construction Capstone	3 cr.

*May required additional coursework.

CCC • Technology Project Manager

CCC.TECH.PRO.MAN (24 credit Hours)

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as project man agers and professionals incorporating IT project management strategies in their business activities in the Information Technol ogy career cluster; provides technical skill proficiency, and competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

Program Required Courses

YEAR I – First Semester

†CGS	1000	Introduction to Computes and Technology	3 cr.

YEAR I – Second Semester

†CGS	1103	Project Management	3 cr.
		Specified Elective	3 cr.

YEAR I – Third Semester

†CGS	2091	Information Technology: Ethical/Legal Issues	3 cr.

YEAR II – First Semester

CGS	2105	IT Project Management Software Applications	3 cr.
		Specified Elective	3 cr.

YEAR I I– Second Semester

†CGS	2301	Management Information Systems	3 cr.
		Specified Elective	3 cr.

Select 9 credit hours from the specified electives below:

†ACG	2021	Introduction to Financial Accounting	3 cr.
†CET	1172C	PC Upgrading and Repair: Hardware	3 cr.
†GEB	1011	Introduction to Business	3 cr.
MAN	2300	Introduction to Human Resource Management	3 cr.
†OST	1335	Business Communications	3 cr.
		or any courses with prefix CAP, CEN, CGS, CIS, CNT, COP, CTS	

NOTE: Coursework may be applied to the two-year AS degree Information Project Management.

CCC • Water Quality Technician

CCC.ENV.WQ.TECH (12 Credit Hours)

This certificate is designed to prepare students for immediate entry into a career in the workforce as a water quality techni

Program Required Courses

YEAR I – First Semester

†EVS	1001	Introduction to Environmental Sustainability	3 cr.
EVS	2894C	Water Sampling and Analysis I	5 cr.
		*Specified Elective	4 cr.

***Select 4 credit hours from the following:**

**EVS	1026	Chemistry and Biology of Natural Waters	4 cr.
EVS	2891	Hydrology and Quality of Water Resources	4 cr.

**Requires additional coursework.
NOTE: Coursework may be applied to the two-year AS degree Environmental Science Technology program.

Postsecondary Adult Vocational Programs

Hillsborough Community College will award a Postsecondary Adult Vocational (PSAV) certificate for completion of a speci fied course of study designed to prepare individuals for employment. PSAV programs are designed for those students interested in a specific job in business or industry.

PSAV Certificate credit requirements vary in the number of hours required for completion. Courses in these programs are not considered as college credit.

All PSAV programs require students to possess a standard high school diploma or high school equivalency diploma with the following exceptions: Apprenticeship programs, Automotive Collision Technology Technician; Automotive Service Technology; Bail Bond Agent; Diesel Systems Technician, Heavy Equipment Service Technician, and Welding Technology.

For additional information about a particular certificate contact a counselor or advisor at one of the campus locations.

PSAV • Automotive Collision Technology Technician

VOC.ARR.TECH (1400 Clock Hours)

Students in the Automotive Collision Repair and Refinishing program learn automotive painting, body repair, frame straightening, trim and custom painting, tinting, welding, and glass and sheet metal installation.

Program Requirements

			Clock hr.	Voc. cr.
ARR	0022	Damage Analysis and Estimating	75 hr.	2.5 cr.
ARR	0112	Automotive Collision Welding, Cutting and Joining	75 hr.	2.5 cr.
ARR	0140	Automotive Collision Repair Helper/Assistant	150 hr.	5.0 cr.
ARR	0141	Automotive Collision Refinish Technician	450 hr.	15.0 cr.
ARR	0295	Structural Repair Technician	350 hr.	11.6 cr.
ARR	0312	Non-Structural Damage Repair Technician	300 hr.	10.0 cr.

PSAV • Automotive Service Technology

VOC.AST (1800 Clock Hours)

This program is designed for high school graduates who are interested in automotive technology as a career option or who desire postsecondary vocational training as a means of expanding or enhancing their career opportunities.

Program Requirements

			Clock hr.	Voc. cr.
AER	0014	Automobile Services Assistor	300 hr.	10.0 cr.
AER	0110	Engine Repair Technician	150 hr.	5.0 cr.
AER	0172	Automotive Heating and Air Conditioning Technician	150 hr.	5.0 cr.
AER	0257	Automatic Transmission and Transaxles Technician	150 hr.	5.0 cr.
AER	0274	Manual Transmissions and Drivelines	150 hr.	5.0 cr.
AER	0360	Automotive Electrical/Electronic System Technician	300 hr.	10.0 cr.
AER	0418	Automotive Brake Systems Technician	150 hr.	5.0 cr.
AER	0453	Automobile Suspension and Steering Technician	150 hr.	5.0 cr.
AER	0503	Automotive Engine Performance Technician	300 hr.	10.0 cr.

PSAV • Auxiliary Law Enforcement Officer

VOC.LAWE.AUX (360 Clock Hours)

Graduates are able to serve as a part-time volunteer law enforcement officer. Call the Criminal Justice Training Institute Public Service Program Manager at 253-7953 to obtain an application handbook. The program does have specified admission criteria that must be met for an individual to be considered for admission to an academy.

Program Requirements

			Clock hr.	Voc. cr.
CJK	0020	Law Enforcement Vehicle Operations	48 hr.	1.6 cr.
CJK	0023	Introduction to Law Enforcement	4 hr.	.13 cr.
CJK	0024	Legal Concepts	20 hr.	.66 cr.

PSAV • Bail Bonding

VOC.BB (120 Clock Hours)

This program prepares student for licensing and employment as a bail bond agent in the State of Florida. The bail bonding/surety agent PSAV program prepares you for employment as a licensed surety agent or bail bonds agent. The bail bond ing/surety agent pre-licensing certification course is the basic prerequisite course on the criminal justice system required to becoming licensed as a Surety Agent/Bail Bonds Agent in Florida and is approved by the Bureau of Licensing of the Florida Department of Financial Services. This course will cover the laws, rules, and practices involved in bail bonding including the issuance and execution of bail bonds, the supervision, apprehension, and surrender of defendants, as well as the operation of the criminal justice system. For more information, student can refer to the Criminal Justice Technology website at www.hccfl.edu/bbc for specific details.

Program Requirements

			Clock hr.	Voc. cr.
SCY	0010	Bail Bond	120 hr.	4.0 cr.

PSAV • Correctional Officer

VOC.COFR (420 Clock Hours)

This program prepares students for employment as a correctional officer in a criminal justice facility. Please call the Criminal Justice Training Institute Public Service Limited Access Admissions Office at 253-6462 to obtain an application handbook.

Program Requirements

			Clock hr.	Voc. cr.

CJK	0394	Cross-Over Program Updates	10 hr.	0.33 cr.

PSAV • Diesel Systems Technician

VOC.DIESEL.MECH (1800 Clock Hours)

This program provides entry level skills in heavy truck service and systems operation. The topics covered include shop safety, OSHA rules, applied math and science principles, identification and proper use of shop tools and equipment, heavy truck component identification, use of electronic service information, proper use of measuring tools, EPA rules on hazardous waste handling and disposal. Instruction will consist of classroom and laboratory activities designed to meet industry standards and safety.

Program Requirements

			Clock hr.	Voc. cr.
DIM	0101	Diesel Engine Mechanic Technician Helper	150 hr.	5 cr.
DIM	0102	Diesel Electrical and Electronics Technician	300 hr.	10 cr.
DIM	0103	Diesel Engine Preventative Maintenance Technician	150 hr.	5 cr.
DIM	0104	Diesel Engine Technician	300 hr.	10 cr.
DIM	0105	Diesel Brakes Technician	300 hr.	10 cr.
DIM	0106	Diesel Heating and A/C Technician	150 hr.	5 cr.
DIM	0107	Diesel Steering and Suspension Technician	150 hr.	5 cr.
DIM	0108	Diesel Drivetrain Technician	150 hr.	5 cr.
DIM	0109	Diesel Hydraulics Technician	150 hr.	5 cr.

PSAV • Fire Fighter

VOC.FIRE (492 Clock Hours)

Graduates are eligible to take the state certification examination administered by the Florida Bureau of Fire Standards and Training to become a certified fire fighter in Florida. Please call the Fire Fighter Program Manager at 253-7628 for more infor mation.

Program Requirements

			Clock hr.	Voc. cr.
FFP	0030	Fire Fighter I	191 hr.	6.4 cr.
FFP	0031	Fire Fighter II	301 hr.	10.0 cr.

PSAV • Heavy Equipment Service Technician

VOC.HEQUIP.TECH (1800 Clock Hours)

This program provides entry level skills in heavy equipment service and systems operation. The topics covered include shop safety, OSHA rules, applied math and science principles, identification and proper use of shop tools and equipment, heavy equipment component identification, use of electronic service information, proper use of measuring tools, and EPA rules on haz ardous waste handling and disposal. Instruction will consist of classroom and laboratory activities designed to meet industry standards and safety.

Program Requirements

			Clock hr.	Voc. cr.
DIM	0101	Diesel Engine Mechanic Technician Helper	150 hr.	5 cr.
DIM	0102	Diesel Electrical and Electronics Technician	300 hr.	10 cr.
DIM	0103	Diesel Engine Preventative Maintenance Technician	150 hr.	5 cr.
DIM	0104	Diesel Engine Technician	300 hr.	10 cr.
DIM	0106	Diesel Heating and A/C Technician	150 hr.	5 cr.
DIM	0107	Diesel Steering and Suspension Technician	150 hr.	5 cr.
DIM	0108	Diesel Drivetrain Technician	150 hr.	5 cr.
DIM	0110	Diesel Power Train Technician	150 hr.	5 cr.
DIM	0130	Diesel Brakes and Fluid Technician	300 hr.	10 hr.

PSAV • Law Enforcement

VOC.LAWE.GENR (770 Clock Hours)

This program prepares students for employment as a law enforcement officer. Please call the Criminal Justice Training Institute Public Service Limited Access Admissions Office at 253-6462 to obtain an application handbook. The program has specified admission criteria that students must meet to be considered for admission to an academy.

Program Requirements

			Clock hr.	Voc. cr.
CJK	0002	Introduction to Law Enforcement	12 hr.	0.40 cr.
CJK	0016	Communication	24 hr.	0.80 cr.
CJK	0018	Legal	64 hr.	2.13 cr.

CJK	0401	Traffic Stops	24 hr.	0.80 cr.
CJK	0402	Traffic Crash Investigations	30 hr.	1.00 cr.
CJK	0403	DUI Traffic Stops	24 hr.	0.80 cr.
CJK	0421	Dart-Firing Stun Gun	4 hr.	0.13 cr.

PSAV • Private Investigator Intern

VOC.PI (40 Clock Hours)

This program is for individuals who are interested in becoming a licensed Class C Private Investigator. Florida Statutes 493 requires these individuals to take and successfully pass a Private Investigator Intern course, make a contractual obligation with a Class C licensed Private Investigator to become their mentor for the two (2) year period of their internship and then apply for their Class C license. Students must be 18 years of age, a U.S. Citizen or Legal Resident and be able to pass a criminal back ground check.

Program Requirements

			Clock hr.	Voc. cr.
SCY	0051	Private Investigation I	24 hr.	0.8 cr.
SCY	0052	Private Investigation II	16 hr.	0.5 cr.

PSAV • Welding Technology

VOC.WELDING.TECH (1050 Clock Hours)

This program is designed to prepare students for a career in the welding technologies field. Students will learn basic entry level welding skills in SMAW, GMAW, FCAW, and GTAW welding processes. They will also learn welding safety, symbols, and blueprint reading for welders.

Program Requirements

			Clock hr.	Voc. cr.
PMT	0070	Welder Assistant I	150 hrs.	5.0 cr.
PMT	0071	Welder Assistant II	150 hrs.	5.0 cr.
PMT	0072	Welder, SMAW I	150 hrs.	5.0 cr.
PMT	0073	Welder, SMAW II	150 hrs.	5.0 cr.
PMT	0074	Welder	450 hrs.	15.0 cr.

PSAV • Welding Technology - Advanced

VOC.WELDING.ADV (750 Clock Hours)

The Advanced program is designed for incumbent welders that need to develop and expand their existing skills

Program Requirements

			Clock hr.	Voc. cr.
PMT	0075	Advanced Welder I	600 hrs.	20.0 cr.
PMT	0076	Advanced Welder II	150 hrs.	5.0 cr.

Program Placement Rates

*CIP (Classification of Instructional Programs) is a code used for State reporting to classify instructional programs. Placement rates are reported by the State-recognized CIP number for each program. Individual program options are not reported sepa rately.

"N/A" signifies that no placement rates were available - new program.

"No Grads" signifies that no placement rates were available - there were no graduates located in the follow-up process.

"No Match" signifies that the graduates did not match state job placement records.

"Not Related" signifies that student completers were found but their job is not related to the training received here.

Course Information

Florida's Statewide Course Numbering System

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and 41 participating non-public institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is at the SCNS website at https://scns.fldoe.org.

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course num bers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institu tion and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The list of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as "statewide course profiles."

Example of Course Identifier

Prefix	Level Code (first digit)	Century Digit (second digit)	Decade Digit (third digit)	Unit Digit (fourth digit)	Lab Code
ENC	1	1	0	1	
English Composition	Lower (Freshman) Level at this institution	Freshman Composition	Freshman Composition Skills	Freshman Composition Skills I	No laboratory component in this course

General Rule for Course Equivalencies

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course num ber and are guaranteed to be transferable between participat ing institutions that offer the course, with a few exceptions, as listed below in *Exception to Guaranteed Transferability*.

For example, a freshman composition skills course is of fered by 65 different postsecondary institutions. Each institu tion uses "ENC_101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills," and the unit digit "1" represents "Fresh man Composition Skills I."

In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" repre sents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a labora tory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a community college. The same course is offered at a state university as ENC 2101. A student who has success fully completed ENC 1101 at a Florida College System institu tion is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 again since ENC 1101 is equivalent to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving insti tution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native stu dents. It is the prerogative of the receiving institution, how ever, to offer transfer credit for courses successfully completed that have not been designated as equivalent.

NOTE: Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to in stitutions on semester-term systems. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

The Course Prefix

The course prefix is a three-letter designator for a major di vision of an academic discipline, subject matter area, or sub category of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the con tent of a course determines the assigned prefix to identify the course.

Authority for Acceptance of Equivalent Courses

Section 1007.24 (7), Florida Statute states: Any student who transfers among postsecondary institutions that are fully ac

credited by a regional or national accrediting agency recog nized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfac torily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appro priate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educa tional institutions to be academically equivalent to courses of fered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic con trol of the previous institution. The Department of Education shall ensure that credits to be accepted by a receiving institu tion are generated in courses for which the faculty possess cre dentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursu ant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

Exceptions to Guaranteed Transferability

Since the initial implementation of the SCNS, specific disci plines or types of courses have been excepted from the guaran tee of transfer for equivalent courses. These include variable topics courses that must be evaluated individually, or applied courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and will not transfer au tomatically. Transferability is at the discretion of the receiving institution.

A. Courses not offered by the receiving institution.
B. For courses at non-regionally accredited (private) institu tions, courses offered prior to the established transfer date of the course in question.
C. Courses in the _900-999 series are not automatically trans ferable and must be evaluated individually. These include such courses as Special Topics, Seminars, Internships, Ap prenticeships, Practicums, Study Abroad Experiences, The sis and Dissertations (including any similar individualized courses with numbers other than those In the 900-999 se ries).
D. College preparatory (developmental or remedial) and ca reer preparatory courses.
E. Graduate-level courses.
F. Applied courses in the performing arts (Art [prefix ART], Dance [DAA], Interior Design, Music [MVB, MVH, MVJ, MVK, MVO, MVP, MVS, MVV, and MVW], and Theatre [TPP with numbers ranging from 000-299]) and skills courses in Criminal Justice are not automatically transfera ble. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.) and must be evaluated Individually.

Courses at Non-regionally Accredited Institutions

The SCNS makes available on its home page (https://scns.fldoe.org) a report entitled "Courses at Non-re gionally Accredited Institutions" that contains a comprehen sive listing of all non-public institution courses in the SCNS inventory, as well as each course's transfer level and transfer effective date. This report is updated monthly.

Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to Millie Garrido, mgarridocaminero@hccfl.edu Curriculum Coordinator at the HCC-DGWS District Administration Center or to the Florida Department of Education, Office of Articulation, 701 Turling ton Building, Tallahassee, Florida 32399-0400. Special reports and technical information may be requested by calling the SCNS office at (850) 245-0427 or at https://scns.fldoe.org.

Credit Course Descriptions

ACG 2021
Introduction to Financial Accounting
3 Credits
Covers theory and logic that underlie accounting procedures. Course content includes an introduction to accounting con cepts, procedures for reading business transactions, prepara tion of financial statements, accounting for merchandising concerns, corporations, bonds, and other procedures to calcu late and maintain accounting information.
Prerequisites: College level reading, writing and math skills are required.

ACG 2021H
Honors Introduction to Financial Accounting
3 Credits
The same course description as AGC 2021 with honors content.

ACG 2030
Capstone Review for Accounting Principles
3 Credits
This course guides the student in dealing with ethics, internal control, fraud and financial statement analysis in the account ing environment, including confronting and resolving account ing problems by integrating and applying skills and techniques acquired in their previous courses, aiding students in developing a personal code of ethics by exploring ethical di lemmas and pressures that they will face as accountants, and helping the student understand financial statement analysis and its relationship to fraud and fraud detection. College level reading, writing, and math skills required.
Prerequisites: ACG 2021, ACG 2071, ACG 2104, ACG 2450, ACG 2061.

ACG 2061
Computers and Accounting
3 Credits
This course teaches various computerized accounting applica tions, including the use of Excel, to prepare accounting records and reports and interpret accounting information. College reading, writing, and math skills required.
Prerequisites: ACG 2021
Co-requisite: ACG 2071

ACG 2071
Managerial Accounting
3 Credits
Focuses on analyzing accounting records and using the results in making management decisions. College level reading, writ ing and math skills are required.
Prerequisite: ACG 2021

ACG 2071H
Honors Managerial Accounting
3 Credits
The same course description as ACG 2071 with honors content. Honors Program permission required.
Prerequisite: ACG 2021

ACG 2104
Intermediate Accounting I
3 Credits
This course reviews accounting procedures and then expands into the specialized treatment of financial statements, current assets, current liabilities, long-term plant assets and tax proce dures. College level reading, writing, and math skills required.
Prerequisite: ACG 2021

ACG 2450
Microcomputers in Accounting
3 Credits
This course introduces the student to the use of computers for preparing and analyzing accounting records.
Prerequisites: ACG 2021, ACG 2071, CGS 1000

ACG 2681
Financial Investigation
3 Credits
This course examines the field of fraud examination and how fraud occurs and is detected within financial statements. Col lege level reading, writing, and math skills required.
Prerequisite: ACG 2021

ACG 2949
Cooperative Education Internship in Accounting
3 Credits
This course provides the student with a practical application of knowledge acquired in the classroom, including: experience accounting in a business setting; provide real-life situations and applications of accounting; encourage critical thinking and problem-solving; and develop teamwork and interpersonal communication skills. College level reading, writing, and math skills required.
Prerequisites: ACG 2021, ACG 2030, ACG 2071, ACG 2104, ACG 2450

ACG 2961
Comprehensive Examination – Tax Option
3 Credits
This course guides the student in dealing with ethical and tax accounting issues of individuals and businesses. In addition, students utilize their knowledge of the tax law, integrating and applying skills and techniques acquired in their previous courses to pass the Accredited Tax Preparer (ATP) certification exam. College level reading, writing, and math skills required.
Prerequisites: ACG 2021, ACG 2071, ACG 2104, ACG 2681, TAX 2000, TAX 2010.

ACG 2960
Comprehensive Examination – Financial Option
3 Credits
This course guides the student in dealing with accounting the ory, internal control and error correction in the accounting en vironment, including confronting and resolving accounting

problems by integrating and applying skills and techniques ac quired in their previous courses. College level reading, writ ing, and math skills required.
Prerequisites: ACG 2021, ACG 2061, ACG 2071, ACG 2104, ACT 2681, TAX 2000.

AFA 1000
Introduction to Black Studies
3 Credits
Includes the nature and meaning of the Afro-American experi ence from its beginning to the present, with an emphasis on visual arts, music, literature, philosophic thought and social history.

AFA 1001
Introduction to Black Culture
3 Credits
Examines the black person's interactions in the American cul ture, with emphasis on social values, attitudes, behaviors and processes that identify black Americans as an ethnic group.

AFR 1101
The Foundation of the U.S. Air Force, Part I
1 Credit
This course serves as an introduction to the Air Force Reserve Officer Training Corps (AFROTC) and U.S. Air Force (USAF) lessons in officership/professionalism and an introduction to communications skills. Enrollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

AFR 1120
The Foundation of the U.S. Air Force, Part II
1 Credit
A study of Air Force installations, core values, leadership, team building, and diversity within the armed forces. Enroll ment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

AFR 2001
Air Force ROTC Leadership Laboratory
0 Credit
This course is required for each of the AFR courses. Instruc tion is conducted within the framework of an organized cadet corps with progression of experiences designed to develop each student's leadership potential. Leadership laboratory in volves a study of Air Force customs and courtesies; drill and ceremonies; career opportunities in the Air Force; and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical laboratory which typically includes field trips to Air Force installations. Enrollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

AFR 2130
The Evolution of USAF Aerospace Power, Part I
1 Credit
A study of air power from balloons and dirigibles through the jet age. Emphasis is on the employment of air power in WWI and WWII and how it affected the evolution of air power con cepts and doctrine. Enrollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines ap plication to enroll in this course.

AFR 2140
The Evolution of USAF Aerospace Power, Part II
1 Credit
An historical review of air power employment in military and non-military operations in support of national objectives. Em phasis is placed on the period from post WWII to present. En rollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

AMH 2010
Early American History
3 Credits
In this course, students will examine united states history from before European contact to 1877. Topics will include but are not limited to indigenous peoples, the European background, the colonial period, the American revolution, the articles of confederation, the constitution, issues within the new republic, sectionalism, manifest destiny, slavery, the American civil war, and reconstruction.
Prerequisites: College level reading and writing skills are re quired.

AMH 2010H
Honors Early American History
3 Credits
Same as AMH 2010 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

AMH 2020
Modern American History
3 Credits
In this course, students will trace the history of the United States from the end of the reconstruction era to the contempo rary era. Topics will include but are not limited to the rise of industrialization, the united states' emergence as an actor on the world stage, constitutional amendments and their impact, the progressive era, world war I, the great depression and new deal, world war ii, the civil rights era, the cold war, and the United States since 1989.
Prerequisites: College level reading and writing skills are re quired.

AMH 2020H
Honors Modern American History
3 Credits
Same as AMH 2020 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

AMH 2051
U.S. Military History
3 Credits
Examines the conflicts of the nation from its beginning to the present with an emphasis on military action, political aspects and historical significance.
Prerequisites: College level reading and writing skills are re quired.

AMH 2090
History of Women in the United States
3 Credits
This course explores the history of women's experience in American Society. The focus will be to examine the construc tion of womanhood throughout United States history and the experience of gender, ethnicity, class and sexual orientation from/upon women's experiences. Students will study the con tribution of various individual women and groups of women in creating the modern United States, and will analyze social, political, economic and cultural forces affecting women to both join and resist movements for social change from pre-contact to the present. Prerequisites: College level reading and writing skills are required.

AML 2010
American Literature to 1885
3 Credits
Focuses on American writers from the Colonial, Federal and Romantic periods. Topics include major trends in Puritanism, Transcendentalism and Romanticism.
Prerequisites: College level reading and writing skills are re quired.

AML 2020
American Literature: 1885 to Present
3 Credits
Focuses on American writers since 1865. Topics include major trends in realism, naturalism and primitivism in the 19th and 20th centuries.
Prerequisites: College level reading and writing skills are re quired.

AML 2020H
Honors American Literature: 1885 to Present
3 Credits
Same as AML 2020 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

AML 2600
African-American Literature
3 Credits
Provides an overview of African-American literature and cul tural expression in the United States from the pre discursive period to the present. Through reading, discussion, lectures, and films the historical forces that have influenced the voice of African-American literature will be discussed. The politics of African-American literature will also be explored.
Prerequisite: ENC 1101

AML 2600H
Honors African-American Literature
3 Credits
Same as AML 2600 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

ANT 2000
Introduction to Anthropology
3 Credits
In this course, students will learn the foundations of anthropol ogy as the study of human variation in its biological, social, and cultural dimensions. Students will learn about anthropo logical concepts, principles, and methodologies to understand and explore past and present human behavior. They will apply the anthropological approach to analyze issues pertaining to past and contemporary cultures, and develop intellectual skills and habits to understand behavioral, social, and cultural issues from multiple disciplinary perspectives.
Prerequisites: College level reading and writing skills are re quired.

ANT 2000H
Honors Introduction to Anthropology
3 Credits
Same as ANT 2000 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

ANT 2410
Cultural Anthropology
3 Credits
Presents the social science and humanities aspects of anthro pology in contrast to physical anthropology. Human behavior, customs, and the values and goals of various cultures are ex amined.

ANT 2511
Introduction to Biological Anthropology
3 Credits
This course will trace the origins of humanity from very early primates through extinct hominins to arrive at modern people. Students in this course will learn the basics of evolutionary theory and genetics, investigate human evolutionary history through the fossil record, observe contemporary non-human

primates, and apply this knowledge to a bio-cultural under standing of human variation, past and present.

ANT 2511L
Introduction to Biological Anthropology Laboratory
1 Credit
This is a lab companion to an overview of Biological Anthro pology. The student will be doing laboratories which are rele vant to the class topics covered in the lecture and material in ANT 2511.

ANT 2930
Special Topics in Anthropology
3 Credit
Topics evaluated in the course will demonstrate the holistic and interdisciplinary approach of anthropology and highlight evidence spanning across all times and places. The course will analyze concepts, theories, terminology, methods, and data re lated to the selected topic,

APA 1111
Basic Accounting
3 Credits
Covers basic accounting procedures and concepts and business terminology; designed for students with no financial training.

ARC 1180C
Introduction to Digital Architecture
3 Credits
An introduction to digital design software and visualization concepts for communicating architectural design intent. Practi-cal skills and design theories will be explored through the crea tion of portfolio pages, design presentations, and 3D visualization projects. Software covered will include Pho toshop, Illustrator, In-Design, Rhino and brief overviews of CADD software.

ARC 1301
Architectural Design I
4 Credits
Provides an introduction to architectural design, with an em phasis on the tools of architectural communications.
Prerequisite: College level reading, writing skills are required.
Co-requisite: ARC 1701

ARC 1302
Architectural Design II
4 Credits
Focuses on organizational systems and space, with an empha sis on freehand drawing, mechanical drawing, one point per spectives and model making. College level reading, writing and math skills are required.
Prerequisites: ARC 1301, ARC 1701

ARC 1701
Architectural History I
3 Credits
A general introduction to architecture as a reflection of the cul tural, social, economic and technological forces in various peri ods of civilization from antiquity to the Renaissance.
Co-requisite: ARC 1301

ARC 2164C
Advanced Topics in Digital Architecture
3 Credits
The course is an advanced architectural, digital design soft ware and visualization course that builds on the objectives of the ARC 1180C Introduction to Digital Architecture course. Advanced concepts for communicating architectural design in tent will be studied. Advanced skills and design theories will be explored through the creation of advanced portfolio pages, design presentations, and 3-D visualization projects. Software will include: Photoshop, In-Design, Illustrator, Sketchup, and Revit.
Prerequisites: ARC 1180C. College level reading, writing, and math skills are required.

ARC 2201
Theory of Architecture
3 Credits
Focuses on the critical study of architecture with an emphasis on gaining an educated perspective of design methods. College level reading, writing and math skills are required.
Prerequisites: ARC 1301, ARC 1701
Co-requisite: ARC 2303

ARC 2303
Architectural Design III
5 Credits
Focuses on diagramming, design response and decision mak ing. College level reading, writing and math skills are re quired.
Prerequisites: ARC 1301, ARC 1302 and ARC 1701
Co-requisite: ARC 2201

ARC 2304
Architectural Design IV
5 Credits
Focuses on how human action, structure, enclosure systems, geography and history influence architectural design. Comple tion of ARC 1301, ARC 1701, ARC 2201 and ARC 2303 strongly recommended. Completion of BCN 1250C, TAR 170C and TAR 1171C strongly recommended for AS.ADCT program. Enroll ment in ARC 2501 strongly recommended.

ARC 2461
Materials and Methods I
3 Credits
Provides an introduction to building materials, systems and the construction process in residential and commercial scale projects. Study of the environmental impact of material and system selection using LEED and Sustainable Design criteria explored. College level reading and writing skills are required.

ARC 2501
Architectural Structures I
4 Credits
An introduction into structural theory and analysis for trusses, beams and columns subjected to gravity loads. Topics include shear and moment diagrams and the determination of section properties, internal stresses, deflection and internal forces. Completion of ARC 2461 strongly recommended. Enrollment in ARC 2304 strongly recommended.

ARH 1000
Understanding Visual Art
3 Credits
In this course, students will develop an appreciation of and the ability to think critically about culture and be provided with the tools to understand, analyze, and discuss works of visual art and material culture.
Prerequisites: College level reading and writing skills are re quired.

ARH 1000H
Honors Understanding Visual Art
3 Credits
Same as ARH 1000 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

ARH 1050
Art History I
3 Credits
Presents a historical review of Western art from prehistory through the Middle Ages with an examination of works in painting, sculpture, architecture and the minor arts. Students are NOT required to take ARH 1050 either prior to or in con junction with ARH 1051.
Prerequisites: College level reading and writing skills are re quired.

ARH 1051
Art History II
3 Credits
Presents a historical review of Western art from the start of the Renaissance to the present with an examination of works in painting, sculpture, architecture and the minor arts. Students are NOT required to take ARH 1050 either prior to or in con junction with this class.
Prerequisites: College level reading and writing skills are re quired.

ARH 1500
Non-Western Art History
3 Credits
This course presents a general introduction to the visual arts of Asian, African, pre-Columbian, Native American, and Oceanic cultures from ancient times to the present.
Prerequisite: College level reading and writing skills required.

ART 1201C
Visual Studies Foundations I
3 Credits
This is an introduction to basic visual art studio concepts. This course includes fundamentals of art making, the elements of two dimensional forms, modes of representation and visual art theory. Studio assignments are supplemented by class critique, discussion and hands-on experimentation with various media. Emphasis is placed on creative expression and examination of visual elements.

ART 1203C
Visual Studies Foundations II
3 Credits
This course builds upon the fundamental principles and ele ments of art making, form and composition introduced in ART 1201C, and builds on their application to three dimensional space, both implied and practical. The nature of this transition inherently focuses on light and shadow. The student will be subjected to many lectures and projects concerning these ef fects. Studio assignments are supplemented by class critique discussion and hands-on experimentation with various media.
Prerequisite: ART 1201C

ART 1300C
Drawing I
3 Credits
Covers the basic principles of drawing tangibles such as still life, landscape and the nude figure. The course deals with black and white media such as pencil and charcoal. The class topics include composition, line, value, volume, negative space, directional forces, perspective and proportion. Drawing I is recommended before taking upper level courses: painting, computer graphics, photography, sculpture, ceramics and printmaking.

ART 2301C
Drawing II
3 Credits
Covers advanced problems in color media and the exploration of a variety of media and formats. Topics include investigation of contemporary personal direction and the development of a portfolio.
Prerequisite: ART 1300C

ART 2400C
Printmaking I
3 Credits
Provides an introduction to printmaking, including the basic techniques of lithography, etching and silk screen. A special fee will be charged for this course.
Prerequisite: ART 1201C

ART 2401C
Printmaking II
3 Credits
Covers advanced printmaking techniques, such as multiple printing, registration and chemical reversals, with an emphasis

on creativity and the development of a personal style. A spe cial fee will be charged for this course.
Prerequisite: ART 2400C

ART 2500C
Painting I
3 Credits
Covers basic painting techniques with an emphasis on classic and contemporary applications of oil and acrylic media. Topics include the use of composition, color, texture, form and value through still life, landscape, portrait, figure and old masters re production.
Prerequisite: ART 1300C

ART 2501C
Painting II
3 Credits
Emphasizes the development of a personal and creative use of painting media through an exploration of contemporary im agery. Students will pursue personal imagery or select eight options from contemporary art movements.
Prerequisite: ART 2500C

ART 2600C
Digital Art
3 Credits
This course is intended to introduce students to basic digital imaging manipulation skills within the fine art context of crea tive expression. Focus on digital imaging manipulation tech niques learned within a raster-based environment, primarily including the fundamentals of various special effects, filters, layers and masks used to explore the creation of artistically ex pressive images. Students will use current computer imaging software to create original art in a variety of final output for mats. Hardware and image input processes are also discussed.
Prerequisite: ART 1201C or PGY 2801C

ART 2701C
Sculpture I
3 Credits
Covers the problems and techniques of applied three-dimen sional design, with an emphasis on the use of materials and tools. Topics include clay, plaster, stone, wood, metal and wax. A special fee will be charged for this course.
Prerequisite: ART 1203C

ART 2702C
Sculpture II
3 Credits
Provides continued experience with expression in three-di mensional forms. This course will require students to conduct independent investigations in the design and creation of sev eral sculpture projects. Techniques may include metal fabrica tion, glass casting, stone carving, woodworking, installations, wax and metal casting. A special fee will be charged for this course.
Prerequisite: ART 2701C or permission of instructor.

ART 2750C
Ceramics I
3 Credits
An introductory course emphasizing the total ceramic process from moist clay to fired ware. A special fee will be charged for this course.

ART 2751C
Ceramics II
3 Credits
Emphasizes the processes of casting, wheel-thrown forms, hand building and glaze formulation. A special fee will be charged for this course.
Prerequisite: ART 2750C

ART 2901
Directed Independent Study: Ceramics
3 Credits
This course is designed to establish a framework for further self-learning in various areas of ceramics for the advanced stu dent. The student will shape the course to fit their needs by planning activities and preparing a contract coordinated with an art faculty member. The contract will specifically outline a specific project, or a particular set of goals and requirements that the student wishes to achieve. The contract must be satis factorily completed and reviewed by the assigned faculty member. May be taken four times for credit.

ART 2902
Directed Independent Study: Drawing
3 Credits
This course is designed to establish a framework for further self-learning in various areas of drawing for the advanced stu dent. The student will shape the course to fit their needs by planning activities and preparing a contract coordinated with an art faculty member. The contract will specifically outline a specific project, or a particular set of goals and requirements that the student wishes to achieve. The contract must be satis factorily completed and reviewed by the assigned faculty member. May be taken four times for credit.

ART 2903
Directed Independent Study: Painting
3 Credits
This course is designed to establish a framework for further self-learning in various areas of painting for the advanced stu dent. The student will shape the course to fit their needs by planning activities and preparing a contract coordinated with an art faculty member. The contract will specifically outline a specific project, or a particular set of goals and requirements that the student wishes to achieve. The contract must be satis factorily completed and reviewed by the assigned faculty member. May be taken four times for credit.

ART 2904
Directed Independent Study: Sculpture
3 Credits
This course is designed to establish a framework for further self-learning in various areas of sculpture for the advanced stu dent. The student will shape the course to fit their needs by planning activities and preparing a contract coordinated with an art faculty member. The contract will specifically outline a specific project, or a particular set of goals and requirements that the student wishes to achieve. The contract must be satis factorily completed and reviewed by the assigned faculty member. May be taken four times for credit.

ART 2905
Directed Independent Study: Art
3 Credits
Designed to establish a framework for further self-learning in various areas of visual arts for the advanced student. The stu dent will shape the course to fit their needs by planning activi ties and preparing a contract coordinated with an art faculty member. The contract will specifically outline a specific pro ject, or a particular set of goals and requirements that the stu dent wishes to achieve. The contract must be satisfactorily completed and reviewed by the assigned faculty member. May be taken four times for credit.

ART 2930C
Selected Topics in Art
3 Credits
Selected Topics in Art is a studio course centered around topics of special interest to the class and professor. Topics or focus will be based on the needs and areas of interest, which may vary from semester to semester. Exceptions to the prerequisite will be considered by the instructor. Transfer credit is the pre prerogative of the receiving institution. May be taken eight times for credit.
Prerequisites: ART 1201C or ART 1300C or ART 2500C

ART 2950C
Professional Art Practices
3 Credits
This class is designed to provide students with the opportunity to learn professional art practices through hands on experi ence. Skill sets taught will revolve around the development of a personal artist's portfolio, intended as an aid for college placement submissions as well as for proposals for personal exhibitions. Additional skill sets will also revolve around learning the practices of gallery operations.
Prerequisite: ART 1201C

ASL 1140C
American Sign Language I
3 Credits
This course provides an overview of the American Sign Lan guage and the deaf community in America with an emphasis on the linguistics and vocabulary of ASL, and the development of conversational sign language skills and deaf culture.
Prerequisites: College level reading and writing skills are re quired.

ASL 1150C
American Sign Language II
3 Credits
This course continues the development ASL skills for students who have successfully completed ASL 1140C. This course fo cuses more on the ASL vocabulary, grammatical principles, and cultural protocols that students need to function at a basic level in the work place and socially.
Prerequisites: ASL 1140C, College level reading and writing skills are required.

AST 1002C
Astronomy
3 Credits
This course provides a comprehensive look at modern astron omy, emphasizing the use of the scientific method and the ap plication of physical laws to understand the universe including earth and its environment. Throughout this course, students will develop the ability to discern scientific knowledge from non-scientific information by using critical thinking.
A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills re quired.

ATE 1001
Introduction to Veterinary Technology
1 Credit
This course presents an overview of veterinary technology in cluding ethical, legal, and safety issues in veterinary medicine, practice management, and effective communication within the veterinary practice. Career opportunities in the veterinary field are also addressed.
Prerequisites: College level reading, writing and math skills re quired.

ATE 1031
Applied Mathematics for Veterinary Technicians
1 Credit
This course will cover basic conversions, dose calculations, di lutions/solutions, compounding, and continuous rate infusion calculations, among other topics.
Prerequisites: College level reading, writing, and math skills required. ATE 1943, ATE 2636C, ATE 1652L, ATE 2639, ATE 2639L, ATE 2661
Co-requisites: ATE 1944, ATE 2611, ATE 2671C

ATE 1110
Animal Anatomy
3 Credits
This course covers the basic gross and microscopic anatomy of domestic animals, especially the canine and feline with empha sis on locating and identifying anatomical regions and land marks and applications. The student will be introduced to the descriptive and topographical terms needed to communicate to the professional staff.

Prerequisites: Admission to the Veterinary Technology pro gram. College level reading, writing and math skills required.
Co-requisite: ATE 1211

ATE 1110L
Animal Anatomy Laboratory
1 Credit
This course is designed to acquaint the student with the funda mental techniques involved in anatomic dissection as well as necropsy procedures. This laboratory will correlate with ATE 1110 lecture material and will help visualize concepts.
Prerequisites: College level reading, writing and math skills re quired. Admission to the Veterinary Technology program and coding as A.S. Vet Tech.

ATE 1112
Animal Anatomy and Physiology I
3 Credits
This course covers the basic gross and microscopic anatomy of domestic animals, especially the canine and feline with empha sis on locating and identifying anatomical regions and land marks and applications. The student will be introduced to the descriptive and topographical terms needed to communicate to the professional staff. This course covers the basic physiology of domestic animals, especially the canine and feline. It in cludes basic chemistry and organic chemistry for physiology, cell biology, and tissue types of the skeletal, integumentary, muscular, cardiovascular, blood, lymph, immune, and respira tory system.
Prerequisite: College level reading, writing, and math skills are required.

ATE 1113
Animal Anatomy and Physiology II
3 Credits
This course covers the basic gross and microscopic anatomy of domestic animals, especially the canine and feline with empha sis on locating and identifying anatomical regions and land marks and applications. The student will be introduced to the descriptive and topographical terms needed to communicate to the professional staff. This course covers the basic physiology of domestic animals, especially the canine and feline. It in cludes basic chemistry and organic chemistry for physiology, cell biology, and tissue types of the digestive, nervous, sense organ, endocrine, urinary, and reproductive system.
Prerequisite: ATE 1112, College level reading, writing, and math skills are required.

ATE 1211
Animal Physiology
3 Credits
This course is designed to acquaint the student with physiol ogy of domestic animals. Emphasis is placed on the functions of organ systems relevant to veterinary technology. Aspects of physiology relating to the pathogenesis of certain diseases will be discussed.
Prerequisite: Admission to the Veterinary Technology pro gram.
Co-requisites: ATE 1110, ATE 1110L

ATE 1311L
Veterinary Office Procedure Lab
1 Credit
Designed to acquaint the student with office procedures, client education, mathematics and veterinary computer applications.
Prerequisite: College level reading, writing and math skills re quired. Admission to the Veterinary Technology program and coding as A.S. Vet Tech.

ATE 1501
Veterinary Professional Development and Ethics
1 Credit
This course presents laws and agencies governing the care, use, and movement of animals. Other areas of focus include re sume writing, employment skills, veterinary medical ethics, and current trends in veterinary practice.
Prerequisite: College level reading, writing, and math skills are required.

ATE 1650L
Veterinary Clinical Practice Laboratory I
1 Credit
Acquaints the student with basic laboratory sample collection and nursing skills, including restraint, history taking, exam room techniques, and administration of medicine.
Prerequisite: College level reading, writing and math skills re quired. Admission to the Veterinary Technology program and coding as A.S. Vet Tech.

ATE 1652L
Veterinary Clinical Practice Laboratory II
2 Credit
Acquaints the student with the basic knowledge of skills used in veterinary practice for anesthesia induction and monitoring, patient preparation for surgery, aseptic technique, and surgical assistance.
Prerequisites: ATE 1110L, ATE 1311L, ATE 1650L, ATE 2050, ATE 2838, ATE 2638L
Co-requisites: ATE 1943, ATE 2636C, ATE 2639, ATE 2639L, ATE 2661

ATE 1741
Veterinary Medical Terminology
1 Credit
This course presents veterinary medical terminology including word parts, medical terms related to anatomical structures and physiology, body systems terminology, and abbreviations used in veterinary medical practice.
Prerequisites: College level reading, writing and math skills re quired.

ATE 1943
Veterinary Work Experience I
1 Credit
A course consisting of supervised clinical experience in a workplace approved and monitored by the instructor. Skills emphasized in curriculum up to this point will be reinforced.
Prerequisites: ATE 1110L, ATE 1311L, ATE 1650L, ATE 2050, ATE 2838, ATE 2638L

Co-requisites: ATE 1652L, ATE 2636C, ATE 2639, ATE 2639L, ATE 2661

ATE 1944
Veterinary Work Experience II
1 Credit
A course consisting of supervised clinical experience in a workplace approved and monitored by the instructor. Skills emphasized in curriculum up to this point will be reinforced.
Prerequisites: ATE 1943, ATE 2636C, ATE 1652L, ATE 2639, ATE 2639L, ATE 2661
Co-requisites: ATE 1031, ATE 2611, ATE 2671C

ATE 2020C
Contemporary Clinical Issues
3 Credits
Focuses on the contemporary and anticipated developments in veterinary technology and clinical application of those devel opments in medicine, surgery, dentistry, radiology and behav ior through lectures. Students will become familiar with related medical terms, protocols and needed materials and supplies. Students will engage in lectures and then utilize and put into application skills learned during the program.
Prerequisites: ATE 2614, ATE 2630, ATE 2631, ATE 2631L, ATE 2722, ATE 2945
Co-requisites: ATE 2634, ATE 2710, ATE 2946

ATE 2050
Small Animal Breeds and Behavior
1 Credit
This is a lecture-based course on canine and feline breed iden tification, as well as behavior and training. Discussion topics will include normal canine and feline behavior, behavior de velopment, and causes of behavior problems in dogs and cats. The student will be exposed to training methods, will discuss or apply canine good citizen test components or corrections for common behavioral problems, and will identify numerous ca nine and feline breeds.
Prerequisites: College level reading, writing and math skills re quired. Admission to the Veterinary Technology program and coding as A.S. Vet Tech.

ATE 2611
Animal Medicine I
3 Credits
This course is designed to introduce veterinary technician stu dents to immunology, vaccinology and infectious diseases.
Prerequisites: ATE 1943, ATE 2636C, ATE 1652L, ATE 2639, ATE 2639L, ATE 2661
Co-requisites: ATE 1031, ATE 1944, ATE 2671C

ATE 2614
Animal Medicine II
3 Credits
The course is designed to introduce veterinary technician stu dents to pathologies of body systems with an emphasis on non-infectious diseases.
Prerequisite: ATE 1031, ATE 1944, ATE 2611, ATE 2671C
Co-requisites: ATE 2630, ATE 2631, ATE 2631L, ATE 2722, ATE 2945

ATE 2630
Pharmacology for Veterinary Technicians
2 Credits
Designed to explain the drug classifications pertaining to ani mal use, methods of calculating appropriate drug dosage, routes of administration and evaluation of drug efficacy.
Prerequisite: ATE 1031, ATE 1944, ATE 2611, ATE 2671C
Co-requisites: ATE 2614, ATE 2631, ATE 2631L, ATE 2722, ATE 2945

ATE 2631
Small Animal Nursing I
3 Credits
This course presents technical skills of drug administration, ra diography, veterinary dentistry and bandaging. This course also covers nursing care of veterinary patients including intra venous catheterization and fluid therapy, blood transfusion, enteral nutrition, bandaging, and wound management.
Prerequisite: ATE 1031, ATE 1944, ATE 2611, ATE 2671C
Co-requisites: ATE 2614, ATE 2630, ATE 2631L, ATE 2722, ATE 2945

ATE 2631L
Small Animal Nursing Laboratory
2 Credits
This course is designed to acquaint the student with treatment techniques, anesthesia, diagnostic imaging, dentistry, and bandaging procedures used in small animal veterinary pa tients.
Prerequisite: ATE 1031, ATE 1944, ATE 2611, ATE 2671C
Co-requisites: ATE 2614, ATE 2630, ATE 2631, ATE 2722, ATE 2945

ATE 2634
Small Animal Nursing II
3 Credits
Advanced nursing concepts relative to patients with specified disease states will be presented. Techniques covered include alternative diagnostic imaging, jugular and peripheral central line placement, parenteral nutrition, critical care ventilation, fluid acquisition, arterial catheterization, and chest tube place ment. College level reading, writing and math skills required.
Prerequisites: ATE 2614, ATE 2630, ATE 2631, ATE 2631L, ATE 2722, ATE 2945
Co-requisites: ATE 2020C, ATE 2710, ATE 2946

ATE 2636C
Large Animal Clinical and Nursing Skills
2 Credits
This course presents large animal breed identification, con cepts in production animal health and housing, husbandry, re straint and common clinical procedures utilized in the practice of large animal veterinary medicine.
Prerequisites: ATE 1110L, ATE 1311L, ATE 1650L, ATE 2050, ATE 2838, ATE 2638L

Co-requisites: ATE 1652L, ATE 1943, ATE 2639, ATE 2639L, ATE 2661

ATE 2638
Animal Clinical Pathology I
3 Credits
This course is designed to introduce the veterinary technician to hematology, immunology, and parasitology.
Prerequisite: College level reading, writing and math skills required. Admission to the Veterinary Technology program and coding as A.S. Vet Tech.

ATE 2638L
Animal Clinical Pathology Laboratory I
2 Credits
This course is designed to acquaint the student with clinical laboratory procedures covered in ATE 2638. Areas of emphasis include parasitology, hematology, coagulation studies, serology, and general laboratory etiquette.
Prerequisite: College level reading, writing and math skills required. Admission to the Veterinary Technology program and coding as A.S. Vet Tech.ATE 2639

Animal Clinical Pathology II
3 Credits
This course is designed to introduce veterinary technician students to blood chemistry, urinalysis and cytology.
Prerequisites: ATE 1110L, ATE 1311L, ATE 1650L, ATE 2050, ATE 2838, ATE 2638L
Co-requisites: ATE 1652L, ATE 1943, ATE 2636C, ATE 2639L, ATE 2661

ATE 2639L
Animal Clinical Pathology Laboratory II
2 Credits
This course is designed to acquaint the student with clinical laboratory procedures covered in ATE 2639. Areas of emphasis include urinalysis, blood chemistry and gas analysis, microbeology, and cytology.
Prerequisites: ATE 1110L, ATE 1311L, ATE 1650L, ATE 2050, ATE 2838, ATE 2638L
Co-requisites: ATE 1652L, ATE 1943, ATE 2636C, ATE 2639, ATE 2661

ATE 2661
Large Animal Diseases
2 Credit
This course is designed to acquaint the student with the fundamentals of preventive medicine and common diseases present in large animals.
Prerequisites: ATE 1110L, ATE 1311L, ATE 1650L, ATE 2050, ATE 2838, ATE 2638L
Co-requisites: ATE 1652L, ATE 1943, ATE 2636C, ATE 2639, ATE 2639L

ATE 2671C
Medicine of Laboratory Animals
2 Credits
A study of the technical and clinical aspects of laboratory animal care, including restraint and handling, common diseases, and nutrition.
Prerequisites: ATE 1943, ATE 2636C, ATE 1652L, ATE 2639, ATE 2639L, ATE 2661
Co-requisites: ATE 1031, ATE 1944, ATE 2611

ATE 2710
Animal Emergency Medicine
2 Credits
This course is designed to acquaint the student with fundamentals of emergency veterinary medicine, including veterinary first aid, toxicology and specialized medical techniques and procedures.
Prerequisites: ATE 2614, ATE 2630, ATE 2631, ATE 2631L, ATE 2722, ATE 2945
Co-requisites: ATE 2020C, ATE 2634, ATE 2946

ATE 2722
Avian and Exotic Pet Medicine
1 Credit
Describes exotic animal and avian medical care. Veterinary technicians will understand the idiosyncrasies of these species in order to become proficient and useful to the exotic and avian practitioner.
Prerequisite: ATE 1031, ATE 1944, ATE 2611, ATE 2671C
Co-requisites: ATE 2614, ATE 2630, ATE 2631, ATE 2631L, ATE 2945

ATE 2945
Veterinary Work Experience III
1 Credit
A course consisting of supervised clinical experiences in a workplace approved and monitored by the instructor. Skills emphasized in curriculum up to this point will be reinforced.
Prerequisite: ATE 1031, ATE 1944, ATE 2611, ATE 2671C
Co-requisites: ATE 2614, ATE 2630, ATE 2631, ATE 2631L, ATE 2722

ATE 2946
Veterinary Work Experience IV
1 Credit
A course consisting of supervised clinical experiences in a workplace approved and monitored by the instructor. Skills emphasized in curriculum up to this point will be reinforced.
Prerequisites: ATE 2614, ATE 2630, ATE 2631, ATE 2631L, ATE 2722, ATE 2945
Co-requisites: ATE 2020C, ATE 2634, ATE 2710

BCN 1210
Construction Materials and Processes
3 Credits
Provides a basic understanding of materials and manufacturing processes consistent with sound engineering principles; focuses on the most prevalent sources of building materials, including wood, concrete, masonry, metals, plastics, glass and composites. Materials are evaluated with respect to relevant codes and trade publications, including the AISC, ACI, APA, ASTM and UL. Elements of sustainable design explored.

BCN 1250C
Basic Drafting Principles
3 Credits
Introduces the principles of industrial graphics. Topics include the care and use of drawing instruments, lettering, multi-view projections and sketching techniques. Designed for the student without drawing experience.

BCN 2049
Sustainable Design and Construction
3 Credits
The basic theories and practices of ecology relating to building design products will be introduced. Students will gain an un derstanding of the impact of their building design selections on
the environment. "green" design will be introduced as students understand renewable resources, environment pollution, and conservation.
Prerequisite: College-level reading, writing and math skills are required.

BCN 2272
Blueprint Reading
3 Credits
Includes the principles of interpreting blueprints and specifica tions common to the building trades. Focuses on reading de tails for grades, foundations, floor plans, elevations, walls, doors, windows and roofs of residential, light and heavy con struction.

BCN 2291C
Construction Materials Testing
3 Credits
A hands-on laboratory involving industry standard techniques for testing construction materials to determine their physical properties with an emphasis on soils, Portland cement, con crete and asphalt. Completion of BCN 1210 strongly recom mended. A special fee will be charged for this course.

BCN 2760
Building Codes
3 Credits
A study of the regulations involved in protecting public health, safety and general welfare as related to the building design and construction industries.
Prerequisite: College-level reading, writing and math skills are required.

BCN 2939C
Construction Capstone
3 Credits
The construction capstone course will allow the student to demonstrate the required skill sets acquired throughout the AS degree Architectural Design and Construction Technology pro gram and will prepare the student for transition into the de signing and construction industries. All aspects of design, material and building component selection, estimating and use of computer-aided design and drafting will be evaluated. This course is presented in an independent study format with as signed due dates and meeting times.

BCN 2942C
Construction Internship
3 Credits
Student works a minimum of 140 hours during one term in a pre-approved industrial job; also prepares a resume and CD-ROM portfolio of program course work.
Prerequisites: ARC 2461, BCN 2291C, TAR 2054C

BCT 2770C
Construction Estimating
3 Credits
Deals with the computation of building costs for typical con struction projects and the computation of labor and materials from take-off to the final estimates. Completion of BCN 1210 and ARC 2461 strongly recommended. Enrollment in ARC 2304 and ARC 2501 strongly recommended.

BRC 1301
Introduction to Financial Institutions
3 Credits
An introduction to the U.S. banking system, the role of banks, credit unions and thrifts as financial service providers. Banking principles, various products/services, and the laws and regu latory agencies governing the different types of financial insti tutions will be discussed.

BSC 1005
Biological Foundations
3 Credits
This course applies the scientific method to critically examine and explain the natural world including but not limited to cells, organisms, genetics, evolution, ecology, and behavior. This course is intended for non-science majors.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: BSC 1005L

BSC 1005H
Honors Biological Foundations
3 Credits
Same as BSC 1005 with honors content. Honors Program per mission required.

BSC 1005L
Biological Foundations Lab
1 Credit
Laboratory intended to accompany BSC 1005 lecture. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: BSC 1005

BSC 1005L (Honors)
Honors Biological Foundations Lab
1 Credit

Same as BSC 1005L with honors content. Honors Program per mission required.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: BSC 1005H

BSC 1025C
Nutrition and Drugs
3 Credits
Primarily intended for non-science majors. Focuses on basic nutrients and their roles in human nutrition. Topics include the problems and possible solutions of deficiency diseases, world food shortages, obesity, commonly used drugs, drug ef fects on the body and drug addiction. Combined and inte grated with a hands-on laboratory component. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills re quired.

BSC 1026C
Reproductive Biology and Inheritance
3 Credits
Focuses on the various aspects of reproductive biology and in heritance. Topics include the male and female reproductive systems, embryology/development, birth control, fertility, sex ually transmitted infections (STI's), certain effects of aging, he redity and evolution. Combined and integrated with a hands-on laboratory component to enhance the subject matters. This course is intended for students not majoring in the biological sciences or allied health. College level reading, writing, and math skills required.

BSC 1092
Human Biology
3 Credits
Intended for those not majoring in the biological sciences or al lied health fields. Provides introductory material in human anatomy and physiology to focus on understanding the body organization and the interrelations of body organs systems.
Prerequisites: College level reading, writing and math skills re quired. Co-requisite: BSC 1092L

BSC 1092L
Human Biology Lab
1 Credit
Laboratory to accompany BSC 1092. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills re quired.
Co-requisite: BSC 1092

BSC 1420C
Introduction to Biotechnology
3 Credits
This course provides an introduction to the basic foundations of biotechnology, and the techniques used in research and in dustry environments. This course will integrate historical back ground, current concepts, and techniques in DNA and RNA technology and their role in cell and genetic disorders. Stu dents will demonstrate knowledge of the scientific method, lab safety, and best laboratory practices. Students will demonstrate competency with various instrumentation, including pH me ters, centrifuge, spectrophotometer, chromatography, and gel electrophoresis.

BSC 2010
Biology I Cellular Processes
3 Credits
In this course students will apply the scientific method to criti cally examine and explain the natural world. This course will cover molecular biology, cellular biology, genetics, metabo lism, and replication. This course is intended for natural sci ence majors.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: BSC 2010L

BSC 2010L
Biology I Cellular Processes Lab
1 Credit
A special fee will be charged for this course. Experiments rein force concepts from BSC 2010 and include data collection, use of lab equipment and techniques to study cell biology, the sci entific method, creating various types of data visualizations, and facilitate data literacy.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: BSC 2010

BSC 2011
Biology II Biodiversity
3 Credits
Biodiversity is an analysis of biological systems at the organis mal level; evolution, speciation, history and diversity of life, phylogenetics, plant and animal structure and function, and ecology.
Prerequisites: BSC 2010, BSC 2010L
Co-requisite: BSC 2011L

BSC 2011H
Honors Biology II Biodiversity
3 Credits
Same as BSC 2011 with honors content. Honors Program per mission required.
Prerequisites: BSC 2010, BSC 2010L
Co-requisite: BSC 2011L

BSC 2011L
Biology II Biodiversity Lab
1 Credit
A special fee will be charged for this course. Reinforces con cepts from BSC 2011, emphasizing evolution, phylogeny diver sity, life cycles, and anatomy of select phyla.
Prerequisite: BSC 2010, BSC 2010L. College level reading skills required.
Co-requisite: BSC 2011

BSC 2085
Human Anatomy and Physiology I
3 Credits
This course is the first part of a two-semester sequence in which students examine human anatomy and physiology through a systems approach based on the interaction between form and function, from the microscopic components of cells and tissues to the organismal level. Emphasis is placed on his tology and the integumentary, skeletal, muscular, and nervous systems. This course is intended for Allied Health and Science majors.
Prerequisites: College level reading, writing and math skills re quired.
Co-requisite: BSC 2085L

BSC 2085L
Human Anatomy and Physiology Laboratory
1 Credit
A special fee will be charged for this course.
Prerequisites: College level reading and writing and math skills are required.
Co-requisite: BSC 2085.

BSC 2086
Human Anatomy and Physiology II
3 Credits
Focuses on cardiovascular, respiratory, digestive, endocrine, immune, lymphatic, urinary and reproductive systems.
Prerequisite: BSC 2085, BSC 2085L
Co-requisite: BSC 2086L

BSC 2086L
Human Anatomy and Physiology II Laboratory
1 Credit
College level reading and writing skills are required. A special fee will be charged for this course.
Prerequisite: BSC 2085, BSC 2085L
Co-requisite: BSC 2086

BSC 2419C
Plant and Animal Cell Culture
3 Credits
This course will introduce the skills used in the biotechnology industry for plant, and animal cell culture. This course empha sizes on hands-on training in the principles and practices of cultivation, maintenance and preservation of established cell lines, including implementation of these practices in project design, and management. Students will gain extensive knowledge of how to grow bacteria, plant and animal cells in culture flasks and plates using aseptic techniques. Students will also learn to operate and maintain laboratory equipment such as centrifuges, pH meters, analytical balances, laminar flow hoods, spectrophometers, microscopes, and CO2 incuba tors; prepare cell growth media, reagents, buffers, and stains following standard operating procedures (SOPs).
Prerequisites: BSC 2427, BSC 2427L

BSC 2420
Biotechnology I
3 Credits
This course will focus on recombinant DNA and RNA technol ogy, and genetic engineering. The course will present the ba sics of genomics and proteomics with DNA protein structure function relationship. This course will introduce biomedical biotechnology, pharmacogenomics, regenerative medicine, gene therapy, cloning and stem cell applications. Practical ap plications of biotechnology will be explored.
Prerequisites: BSC 2010, BSC 2010L, CHM 2045, CHM 2045L
Co-requisite: BSC 2420L

BSC 2420L
Biotechnology I Laboratory
2 Credits
This laboratory course will provide practical hands-on experi ence in basic biotechnology laboratory methods and tech niques.
Prerequisites: BSC 2010, BSC 2010L, CHM 2045, CHM 2045L
Co-requisite: BSC 2420

BSC 2427
Biotechnology II
3 Credits
This course will provide a relatively in-depth exploration of modern biotechnology as required for the study, development, and application of genetic engineering and biomedical biotech nology. There will be emphasis on pharmaco-economics, stem cell technology, and immune-biology. The practical applica tions of forensics, bioremediation, and medical, animal, plant biotechnology will be examined.
Prerequisites: BSC 2420, BSC 2420L
Co-requisite: BSC 2427L

BSC 2427L
Biotechnology II Laboratory
2 Credits
This laboratory course will continue the study of modern mo lecular and cell biology with focus on advanced methods and techniques of biotechnology, emphasizing genomics, prote omics, genetic engineering and recombinant DNA technology.
Prerequisites: BSC 2420, BSC 2420L
Co-requisite: BSC 2427

BSC 2435C
Bioinformatics
3 Credits
Students will gain hands on experience in performing bioinfor matics analysis using both nucleic acids and protein sequences. Use of open source software and publicly available databases such as NCBI will be demonstrated and conceptual under standing of associated algorithms and statistics will be applied to resulting data analysis. Specific topics to be covered include file formatting and management; retrieval, submission, and alignment of sequences using the most current tools, gene ex pression; phylogenetics; and primary literature searches.

Prerequisites: BSC 2420, BSC 2420L

BSC 2943
Biotechnology Internship
3 Credits
The objective of this course is to provide students with mean ingful work experience. This is a practical application of pro cedures and professionalism in real world settings with biotechnology and closely related fields.
Prerequisites: BSC 2427, BSC 2427L

BUL 2241
Business Law I
3 Credits
Covers the main concepts of legal institutions, the legal envi ronment, business ethics, public and private business law, con tracts, business regulations the UCC (Uniform Commercial Code) and related laws.
Prerequisites: College level reading and writing skills required.

BUL 2242
Business Law II
3 Credits
Covers commercial paper, agency, partnerships, corporations, secured transactions, bankruptcy, securities regulations, real and personal property, trusts, wills and associated legal prob lems. Prerequisite: BUL 2241

CAI 2000
Introduction to Artificial Intelligence
3 Credits
This course presents basic concepts and applications of artifi cial intelligence (AI), including the four AI project cycles. The focus is on issues surrounding AI including ethics, bias, cul ture, regulations, and professional expectations.
Prerequisites: CGS 1000 and college level reading, writing and math skills are required.

CAI 2001
Introduction to AI-Driven Systems
3 Credits
Explores the integration of AI and AI-powered machines. Stu dents will learn AI algorithms, machine learning, and princi ples of autonomous systems, with a focus on sensor integration, autonomous navigation, and human-machine in teraction. The course includes simulation exercises, preparing students to build and program intelligent, AI-driven machines.

CAI 2100
Introduction to Machine Learning
3 Credits
This course is an introduction to machine learning concepts, in cluding data acquisition, supervised and unsupervised learn ing, and data modeling. This course will introduce the fundamental concepts and algorithms that enable computers to learn from experience, with an emphasis on their practical application to real problems.
Prerequisites: CAI 2000, General Education Math

CAI 2300
Natural Language Processing
3 Credits
This course presents fundamental concepts in natural language processing (NLP) and text processing. The focus is on the knowledge and skills necessary to create a language recogni tion application.
Prerequisite: COP 1030, College-level reading, writing, and math skills are required.

CAI 2800
Artificial Intelligence for Business Solutions
3 Credits
This course presents fundamentals of artificial intelligence (AI) and machine learning to support business solutions. Students will learn basic algorithms focused around how to predict scores, classes, and clusters from data. Students will learn how AI is being applied for customer service, sales, and marketing.
Prerequisite: CAI 2000, College-level reading, writing, and math skills are required.

CAI 2950
Artificial Intelligence Capstone
3 Credits
This course is designed for the student to apply theoretical knowledge acquired during the AI program to a project in volving an actual product in a realistic setting. During the pro ject, students engage in the entire process of solving a real-world AI problem, from collecting and processing actual data to applying suitable and appropriate analytic methods to the problem. Both the problem statements for the project assign ments and the databases originate from real-world domains similar to those that students might typically encounter within industry, government, and/or non-governmental organiza tions.
Prerequisite: College-level reading, writing, and math skills are required. Permission from instructor required.

CAP 1023
Introduction to Game Development
3 Credits
Survey of the various aspects of game development including: game programming and scripting, design, modeling and ren dering. Students will work on projects involving design and storyboarding, computer programming and scripting, as well as multimedia presentations and artwork. Aspects of the gam ing industry will be covered to include human computer inter-action, mathematical and physics consideration, and the business of game production and distribution.
Prerequisites: CGS 1000

CAP 2042
Game Design and Development - Modeling
3 Credits
In this hands-on course the student will practice creating 3D models using game and simulation software. The student will perform polygonal as well as NURBS modeling to create pro grammable 3D objects capable of being rendered for simula tion software and computer games.
Prerequisite: CAP 1023

CAP 2043
Game Design and Development - Rigging
3 Credits
In this hands-on course the student will practice rigging 3D models using game and simulation software. The student will develop skeletons, joints and animation points to create 3D ob jects capable of being animated for simulation software and computer games.
Prerequisite: CAP 1023

CAP 2041
Game Design and Development - Animation
3 Credits
In this hands-on course the student will practice animating 3D models using game and simulation software. The student will develop aminations along paths, practice complex timing, and enhance animations with graphics editors to create 3D objects capable of being rendered for simulation software and com puter games.
Prerequisite: CAP 1023

CAP 2044
Game Design and Development - Special Effects
3 Credits
In this hands-on course the student will practice enhancing 3D objects and scenes using game and simulation software. The student will apply lighting effects and camera angles to objects in a 3D scene, create special effects like smoke, dust and rain, and apply complex textures to 3D objects capable of being ren dered for simulation software and computer games.
Prerequisite: CAP 1023

CAP 2816
Database Management II
1 Credit
This Is a continuation of CGS 1540, Database Management I. Advanced database management techniques are emphasized.
Prerequisite: CGS 1540

CAP 2905-35
Special Topics in Multimedia
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to multimedia design and development. College level reading and writing skills are re quired. The course may be taken twice for up to six credits.
Prerequisite: CGS 1000

CAP 2939
Digital Media/Multimedia Technology Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject based experience. The student's project requirements will be designed in concern with his/her area of curriculum em phasis. Permission from instructor required.

CCJ 1010
Introduction to Criminology
3 Credits
Focuses on the complex factors related to crime in America, in cluding basic issues, scope and economic impact.

CCJ 1010H
Honors Introduction to Criminology
3 Credits
Same as CCJ 1010 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

CCJ 1020
Introduction to Criminal Justice
3 Credits
Covers the historical and philosophical backgrounds of crimi nal justice agencies and examines the development of the courts, correctional agencies, and law enforcement processes. Topics include the Supreme Court, the 14th Amendment, indi vidual rights, and requirements and opportunities in the law enforcement and correctional fields.

CCJ 1488
Ethics in Criminal Justice
3 Credits
This course is a practical overview of key issues, questions, and concepts in applied ethics in the field of criminal justice. The course will include the historical development of ethical theories, morality and law, and ethical decision making in law enforcement, courts, and corrections.

CCJ 1488H
Honors Ethics in Criminal Justice
3 Credits
Same as CCJ 1488 with honors content. Honors Program per mission required.

CCJ 2013
Introduction to Victimology
3 Credits
This course is about victims of crime. It provides an introduc tory level review of the many facets of criminal victimization and the efforts to assist crime victims. The course covers a wide range of topics including trends and interpretations of victimization research, laws, programs, and services, the emo tional and social impact of crime, victim rights and restitution

and the extent of participation by victims in the criminal justice process.

CCJ 2111
Introduction to Theories of Criminal Behavior
3 Credits
This course presents the major theoretical explanations of crime and criminal behavior. It focuses on the historical de velopment of criminological theory based on various defini tions of crime. The primary purpose of this course is to provide a clear overview of the major academic explanations (or theories) that dominate criminology in an effort to clarify what is known about crime based upon empirical research. To this end, this course is designed to provide students with a basic understanding of historical and current criminological perspectives, as these are the foundations upon which both criminological research and public policy are based.

CCJ 2191
Crisis Intervention in Criminal Justice
3 Credits
This course provides a study of human nature and the peculi arities of human behavior and how it relates to crime and de linquency with emphasis on how this behavior relates to the duties and responsibilities of the criminal justice practitioner. The course will emphasize abnormal behavior and how crimi nal justice practitioners should react with primary emphasis on the behavioral aspects of people in crisis situations and how criminal justice practitioners should respond. The course will deal with issues of police crisis intervention and crisis manage ment.

CCJ 2358
Criminal Justice Communication and Reports
3 Credits
This course provides an overview of basic principles of effec tive communication, written, verbal, and digital for personnel in the criminal justice profession. Students will be exposed to police report writing, drafting correspondence, ad preparing written summaries. Students will learn to research statistics, texts, internet, and intranet systems as well as to write and edit documents common to the criminal justice system. Students will also participate in group discussions and prepare and de liver short oral presentations. Basic computer skills for com munication ad research in criminal justice will be covered as well.

CCJ 2509
Introduction to Street Gangs
3 Credits
This course will examine the history of gangs, how to identify gang activity, including gang specific colors, clothing, symbols and signs. Traditional gang patterns as well as non-traditional hybrid gangs will be included into this curriculum along with their use of violence, drugs and guns. Topics will include a na tional overview of major types of gang activity around the United States. Students will study reasons why youth join gangs and discuss community gang assessments and re sponses. In addition, this class will provide information on ap propriate prevention, intervention and suppression responses to gangs.

CCJ 2600
Criminal Deviant Behavior in Society
3 Credits
Studies the various deviant behaviors with which criminal jus tice practitioners interact daily. Topics include the nature of deviance, sexual deviance, alcoholism, drug addiction, mental illness, violence, and suicide.

CCJ 2610
Introduction to Criminal Typologies
3 Credits
The primary goal of this course is for students to recognize and understand the utility of constructing typologies as a precursor to understanding criminal behavior. Students will review the differences in varying patterning of criminality.

CCJ 2618
Forensic Psychology
3 Credits
This course is an examination of the psychology of human be havior as it relates to crime. The student will be introduced to psychopathology, the sexually violent offender, and serial murderers. The student will also examine violent juvenile of fenders and the process of psychological conditioning which allows them to commit violent criminal acts. The student will also be introduced to criminal profiling. It is recommended that the student complete PSY 2012 before taking CCJ 2618.

CCJ 2648
Organized Crime
3 Credits
This course involves an examination of organized crime, in cluding its history, structures, activities and government ef forts to control it.

CCJ 2671
Race, Gender, and Ethnicity in Criminal Justice
3 Credits
Discrimination and disparities have long been points of inter est and discontent in the field of criminal justice. This course looks on the impact of race and ethnicity, class, gender, and sexuality in criminal justice. These four factors affect the ad ministration of justice for offenders, and also impact the career of the criminal justice professional. The goal of the course is to broaden our understanding of diversity and discrimination in criminal justice.

CCJ 2685
Domestic and Sexual Violence
3 Credits
This course is designed to examine the various expressions of violence within the family structure including child , spouse, partner, and elder abuses. Topics will also include sexual abuse, sexual assault, stalking, and domestic homicide. Also included will be topics on the psychological and social causes

of domestic and sexual violence, recognizing its signs, and studying its effect on its victims as well as programs and poli cies for prevention and treatment.

CCJ 2686
Introduction to Victim Advocacy
3 Credits
This course introduces the students to the responsibilities of victim advocates working within the criminal justice system. The course will cover the roles of the victim advocate when dealing with crime victims, victim families, the police, the prosecution, and the court system. Topics will include the background and history of victim advocacy, laws governing victim rights and victim compensation, and techniques victim advocates utilize when dealing with victims of abuse, sexual assault, domestic violence, and other violent crimes as well as when dealing with the families of homicide victims. This course will also cover the role of the victim advocate in areas involving suicide prevention and crisis intervention.

CCJ 2720
Introduction to Criminal Justice Research Methods
3 Credits
The primary goal of this course is for students to recognize and understand the basics of research structure within the criminal justice and criminology disciplines. Upon successful comple tion of this course, students will have an understanding of the social scientific approach which includes the fundamental con cepts of ethics, research design, data collection and analysis, and finally interpretation.

CCJ 2910
Guided Independent Research
3 Credits
An individualized study project which applies the objective approach in the observation and reporting of information relat ing to social problems, with a focus on understanding and in terpreting data, as well as basic statistics. Documented research paper required and must relate to a criminal justice subject area. College level reading and writing skills required.

CCJ 2935-9
Seminar on Criminal Justice Issues
3 Credits
Focuses on selected topics and issues not usually covered in other courses.

CCJ 2940
Criminal Justice Internship
3 Credits
Provides an opportunity for the student with no criminal jus tice experience to observe the criminal justice system in opera tion. The student will be expected to compare classroom theory with the day-to-day operation of the criminal justice agency and the roles and responsibilities of the professional in the field. The student will be required to spend a total of 100 clock hours, spread over the semester, in the agency.
Prerequisites: Restricted to Criminal Justice majors only.

CEN 2904, 2905, 2930-33
Special Topics in Networking
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to computer and information technology networking. The course may be taken twice for up to six cred its. College level reading and writing skills are required.
Prerequisite: CGS 1000

CEN 2939
Network Administrator Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concern with his/her area of curriculum em phasis. Permission from instructor required.

CET 1112C
Basic Digital Systems
3 Credits
This course is an introduction to basic digital electronics and is for the student who has previously taken EET 1083C or will be taking both classes in the same semester. Topics covered in this course are computer number systems, Boolean algebra, combinational logic circuits, logic family characteristics, and flip flops. Laboratory exercises will be assigned to reinforce the major concepts covered in the lecture segment of the courses.
Prerequisites: College level reading, writing and math skills re quired.

CET 1123C
Introduction to Microprocessors/Microcontrollers
3 Credits
This introductory course presents material on microprocessing. Topics include the microprocessor/microcontroller chip and its architecture, bus systems, memory map, input/output de vices, interface devices, machine and assembly languages, in structions, and addressing modes. Laboratory exercises are included.
Prerequisite: CET 1112C

CET 1172C
PC Upgrading and Repair: Hardware
3 Credits
Covers the knowledge and skills necessary for upgrading and repairing the hardware of a typical personal computer (PC). In cludes the study of microprocessors, basic bus architectures, input/output (I/O) interface types, PC storage, printers, vari ous types of semiconductor memories found in a typical PC, basic networking and network cabling concepts. Also studied is the layout of the drives set up by a disk operating system and how the operating system works with the hardware. This course will further prepare the student for the A+ Certification test. Laboratory exercises are included.
Prerequisite: CGS 1000 or permission of instructor.

CET 1174C
PC Upgrading and Repair: Software
3 Credits
This course covers advanced PC software, both operating sys tems and system software. Concepts are introduced that pro vide the student with a complete, step-by-step approach for learning the fundamentals of supporting and troubleshooting computer software. Computer service business concepts are also introduced. This course will further prepare the student for the A+ Certification test. Laboratory exercises are in cluded.
Prerequisite: CGS 1000 or permission of instructor.

CET 1600
Cisco Network Fundamentals
3 Credits
Prepares a student to apply and understand the basics of net working hardware. Course covers the OSI model and industry standards; network topologies; IP addressing, including subnet masks; and basic network design. This is the first of a four-part series designed to prepare students for the Cisco Certified Net working Associate examination.
Prerequisite: CTS 1305.

CET 1610
Cisco Switching, Routing, and Wireless Essentials
3 Credits
Designed to prepare a student to apply and understand the ba sics of networking hardware. The course covers beginning router configurations; routed and routing protocols; and intro duction to LAN switching. This is the second of a four-part series to prepare students for the Cisco Certified Networking Associate examination. The first part of this series is covered in CTS 1305.
Prerequisite: CET 1600

CET 2113C
Digital Systems Analysis
3 Credits
This course is a continuation of the basic digital electronics covered in CET 1112C. The analysis of combinational logic and sequential logic circuits is covered in the lecture segment of the course. Circuits include adder/subtractor, registers, counters, multiplexors, and others. Laboratory exercises will be assigned to reinforce these major concepts and circuits.
Prerequisite: CET 1112C

CET 2152C
Advanced Microprocessors
3 Credits
Covers the communications between the microprocessor and external devices. Topics include writing and debugging com munications programs, analyzing and building interface cir cuits. Laboratory exercises are included.
Prerequisites: CET 1123C, CET 2113C

CET 2335C
Total Microcomputer Systems
3 Credits
This course covers the total microcomputer system, including system construction (architecture), programming and hard ware, I/O interfacing, diagnostic testing, maintenance and troubleshooting.
Prerequisites: CET 2113C

CET 2615
Cisco Enterprise Networking, Security, and Automation
3 Credits
Designed to prepare a student to apply and understand the ad vanced principles and applications of networking hardware. The course covers advanced router configurations; LAN switching; network management; and advanced network de sign. This is the third of a four-part series to prepare students for the Cisco Certified Networking Associate examination.
Prerequisites: CET 1610

CET 2620
Cisco WAN Technologies
3 Credits
Designed to prepare a student to apply and understand the ad vanced principles, applications, and implementation of net working hardware. The course covers advanced network design projects and advanced network management projects. This is the fourth of a four-part series to prepare students for the Cisco Certified Networking Associate examination.
Prerequisites: CET 2615

CET 2939C
Computer Engineering Technology Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concert with his/her area of curriculum empha sis.
Prerequisites: EET 2155C. College level reading, writing, and math skills are required.

CGS 1000
Introduction to Computers and Technology
3 Credits
Covers the use and impact of computers in information tech nology. Course provides hands-on experience with software including word processing, presentation, spreadsheet, and da tabase, for business analysis, employability and personal use. Provides students with an introductory overview of the Inter net, World Wide Web, impact of computers on society and business, historic development of data processing, and basic operating system functionality, including storage and file man agement.

CGS 1000H
Honors Introduction to Computers and Technology
3 Credits
Same as CGS 1000 with honors content. Honors Program per mission required.

CGS 1103
Project Management
3 Credits
This course introduces the student to project management con cepts, practices, and terminology. Topics include project life cycle, project management processes, managing projects, pro curement management, quality, human resource management, and risk assessment.
Prerequisites: CGS 1000

CGS 1107
Introduction to Computers
1 Credit
An introductory computer literacy course with emphasis on current technology and the implications for and the effects on our society and MS Office. Software applications will include word processing, spreadsheets, database management and presentation systems.

CGS 1160
Desktop Information Management
1 Credit
A general introduction to the basic capabilities of a desktop infor mation management program, such as Outlook. Topics covered include organizing information, managing your time and sched ule, and communicating with other people.

CGS 1500
Applied Word Processing
1 Credit
Focuses on basic word processing applications, with an em phasis on term papers, reports and resumes. Prerequisite for this course are OST 1142 or ability to type 20 wpm or permis sion of instructor.

CGS 1510
Spreadsheet Applications I
1 Credit
Focuses on basic spreadsheet applications such as replication, automatic recalculation, financial modeling, analysis and pro jection, and general mathematical calculations.

CGS 1520
Electronic Presentations I
1 Credit
Focuses on creating electronic presentations using text, graphic images, charts, sound, video and animation. Different types of presentations will be created to communicate information in an organized manner for educational and professional busi ness settings.

CGS 1521
Adobe Photoshop Elements
1 Credit
Introduces Adobe Photoshop Elements program. Focuses on simple editing techniques and manipulating and modifying objects.

CGS 1540
Database Management I
1 Credit
Teaches how to work effectively with a data management ap plication, with an emphasis on assembling and organizing data in manageable records and files. Not intended for students planning to transfer to USF.

CGS 1554
Internet Basics
1 Credit
An introductory course designed to teach the basics of navi gating the Internet and the World Wide Web.

CGS 1555
Introduction to the Internet
3 Credits
An introductory course designed to teach the basics of navi gating the Internet including the World Wide Web. Students are introduced to various communication tools for finding and using information and resources available on the World Wide Web. Includes a hands-on tutorial on creating Web pages.
Prerequisite: CGS 1000

CGS 1577
Presentation Systems
3 Credits
Introduces the student to planning, designing, and developing multimedia presentations using presentation software.
Prerequisite: CGS 1000

CGS 1761
Computer Operating Systems
3 Credits
This course provides an overview of computer operating sys tems. Basic theories, concepts and terminology, and evolution of computer operating systems are covered. Development, function, and comparisons of common mobile, desktop, and server operating systems are discussed. In particular, this class is meant to introduce concepts such as user interfaces, file sys tems, process management, memory management, input/out put management, and communication.
Prerequisite: CGS 1000

CGS 1871
Multimedia Authoring I
3 Credits
Introduces the student to multimedia basics, application struc ture, and organization. Focus is on the conceptual elements of multimedia implementation and authoring basics.
Prerequisites: CGS 1000

CGS 2091
Information Technology: Ethical and Legal Issues
3 Credits
After taking this course the student will be able to identify dif ferent types of computer crime and distinguish the various types of law applicable. Existing and emerging legislation per taining to computer crime will be presented. The student will

be exposed to various types of incidents and the proper evi dence handling techniques. Ethics codes will be presented and discussed.

CGS 2100
Computer Information Technology and Literacy
3 Credits
Covers the use and impact of computers in all areas of business organizations. Course provides hands-on experience with soft ware packages for business, including word processing, presentation, spreadsheet, database, and mail and calendar programs for business analysis, employability and personal use. Provides students with an introductory overview of the internet, World Wide Web, impact of computers on society and business, historic development of data processing, and basic operating system functionality, including storage and file management.

CGS 2100H
Honors Computers Information Technology and Literacy
3 Credits
Same as CGS 2100 with honors content. Honors program per mission required.

CGS 2105
IT Project Management Software Applications
3 Credits
This course will introduce students to software applications used in project management and project planning. Topics will include planning, work breakdown structure, task time estima tions, cost, and baseline project plan evaluation and adjust ments. Prerequisite: CGS 1000, College level reading, writing, and math skills are required.

CGS 2108
Advanced Computer Applications
3 Credits
An advanced applications course which covers and integrates word processing, spreadsheets, database, and presentation software.
Prerequisite: CGS 1000

CGS 2301
Management Information Systems
3 Credits
Focuses on the role of information systems in the management process, with emphasis on the various aspects of processing data, characteristics of communication and information, and problem solving.
Prerequisite: CGS 1000

CGS 2511
Spreadsheet Applications II
1 Credit
This is a continuation of CGS 1510, Spreadsheet Applications I. Intermediate concepts are emphasized.
Prerequisite: CGS 1510

CGS 2512
Spreadsheets III
1 Credit
This is a continuation of CGS 2511, Spreadsheets II. More ad vanced concepts and macro programming are emphasized.
Prerequisite: CGS 2511

CGS 2525
Electronic Presentations II
1 Credit
This is a continuation of CGS 1520, Electronic Presentations I. Advanced concepts are emphasized.
Prerequisite: CGS 1520

CGS 2541
Database Design
3 Credits
Focuses on the use and development of a database program, with an emphasis on loading, modifying and querying capabil ities. Topics include storage devices, data design, administra tion, analysis and implementation, data structures, indexed and direct file organizations, and hierarchical network and re lational models. Students enrolled in a degree or college credit certificate program must complete all prerequisites.
Prerequisite: CGS 1000

CGS 2585
Desktop and Internet Publishing
3 Credits
Covers principles and techniques of document and internet publishing using an industry standard software program(s). Topics include design principles, document creation and lay out, and publishing techniques for print and the Web.
Prerequisite: CGS 1000

CGS 2786
Web 2.0 Applications
3 Credits
This course will cover various Web 2.0 applications. Topics in clude forms, blogs, wikis, calendars, slideshows and Web host ing.
Prerequisite: CGS 2822

CGS 2804
Vector Graphic Applications
3 Credits
This course concentrates on the methods and computer appli cations used in two-dimensional vector-based software appli cations. Topics include illustration and design strategies.
Prerequisite: CGS 1000

CGS 2820
WEB Authoring HTML
3 Credits
Students are introduced to the fundamentals of Web page au thoring. Students will learn how to use HTML to create Web pages. They will learn how to generate HTML links, add graphics, create image maps, tables, and forms. Advanced

techniques include new HTML tags, integration of audio, video and multimedia, as well as styling via cascading style sheets. Students will also learn how to use FTP to upload and download files.
Prerequisite: CGS 1000

CGS 2821
Graphics Design Multimedia and Internet
3 Credits
Introduces graphic design for the Internet and multimedia pro jects. Focus is on instructional design process, effective page design, and scanning techniques. Students will use digital im aging software such as PhotoShop to create effective computer screen design elements. Color theory and visual communica tion is introduced.
Prerequisite: CGS 1000

CGS 2822
Web Site Creation
3 Credits
This course is designed to introduce the student to software applications and web development tools necessary to create a website. Students will develop a website that meets specifica tions from initial concept to publication.
Prerequisite: CGS 2820

CGS 2827
Advanced Graphics Design for Multimedia and Internet
3 Credits
A continuation of CGS 2821. Focus is on advanced graphic de sign techniques. Students use digital imaging software to pre pare graphics for use in effective design elements.
Prerequisites: CGS 2821

CGS 2874
Multimedia Authoring II
3 Credits
A continuation of CGS 1871 Multimedia Authoring I, with em phasis on advanced authoring skills. Students will develop in-depth projects using video, audio, text, hypertext, and graphics while controlling the program direction.
Prerequisites: CGS 1871

CGS 2876
Digital Audio/Video Design
3 Credits
Introduces the student to the essential software, tools, and techniques commonly used by Web and multimedia designers to produce digital audio and video. Various audio/video pro grams such Adobe Premiere, After Effects and Audacity may be used in this course.
Prerequisite: CGS 1871

CGS 2877
Digital Animation Design
3 Credits
Introduces the student to the essential software, tools, and techniques commonly used by Web and multimedia authors and designers to produce digital animation effects. Various an imation programs such Adobe Animate may be used in this course
Prerequisites: CGS 1871

CGS 2930-35
Special Topics in Internet Services Technology
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to Internet services technology. The course may be taken twice for up to six credits. College level reading and writing skills are required.
Prerequisite: CGS 1000

CGS 2939
Internet Services Technology Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concern with his/her area of curriculum em phasis. Permission from instructor required.

CHM 1020C
Chemistry and Society
3 Credits
This course provides students with an introduction to chemical principles and applications for the non-science major. Students will engage in problem solving and critical thinking while ap plying chemical concepts. Topics will include the scientific method of problem solving, classification of matter, atomic the ory, the periodic table, gases, chemical reactions, energy, and chemical bonds. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills are required.

CHM 1025
Introductory Chemistry
3 Credits
Covers an elementary treatment of mathematical tools of the chemist, atomic theory, periodic arrangement of the elements, chemical bonding, nomenclature of compounds, chemical reac tions, and stoichiometry. Designed for students with no chem istry background.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: CHM 1025L, MAC 1105

CHM 1025H
Honors Introductory Chemistry
3 Credits
Same as CHM 1025 with honors content. Honors Program per mission required.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: CHM 1025L

CHM 1025L
Introductory Chemistry Laboratory
1 Credit
Accompanies CHM 1025. Topics include laboratory tech niques, measurement, chemical reactions, abbreviated qualita tive analysis, and quantitative chemistry techniques. College level reading, writing and math skills are required. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: CHM 1025

CHM 1032
Chemistry for Health Sciences
3 Credits
A chemistry course designed for allied health programs. Fo cuses on basic chemical and physical principles applied to the life process. Topics include inorganic, organic, and physiologi cal chemistry. Mathematics applications are minimal.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: CHM 1032L

CHM 1032L
Chemistry for Health Sciences Laboratory
1 Credit
Accompanies CHM 1032. Topics include laboratory tech niques, measurement, chemical bonding, radioactivity, gases, and examples of common inorganic, organic, and biological re actions. A special fee will be charged for this course. Prerequi sites: College level reading, writing and math skills are required.
Co-requisite: CHM 1032

CHM 2045
General Chemistry I
3 Credits
This course is designed for students pursuing careers in the sciences or who need a more rigorous presentation of chemical concepts than is offered in an introductory course. Students will engage in problem solving and critical thinking while ap plying chemical concepts. Topics will include the principles of chemistry including atomic theory, electronic and molecular structure, measurement, stoichiometry, bonding, periodicity, thermochemistry, nomenclature, solutions, and the properties of gases. College level reading, writing and math skills are re quired.
Prerequisites: CHM 1025 or CHM 1032 or satisfactory grade on the chemistry placement test and MAC 1105.
Co-requisite: CHM 2045L

CHM 2045L
General Chemistry I Laboratory
1 Credit
Accompanies CHM 2045. Topics include analytical techniques, physical property determinations, gas laws and thermochemi cal processes. College level reading, writing and math skills are required. A special fee will be charged for this course.
Prerequisite: CHM 1025L or CHM 1032L or satisfactory grade on the chemistry placement test and MAC 1105.
Co-requisite: CHM 2045

CHM 2046
General Chemistry II
3 Credits
Second part of a two-semester sequence. Topics include liquid and solid behavior, physical properties of solutions, kinetics, chemical equilibria, electrochemistry and chemical thermody namics. College level reading, writing and math skills are re quired.
Prerequisite: CHM 2045 and CHM 2045L with a minimum grade of C.
Co-requisite: CHM 2046L

CHM 2046L
General Chemistry II Laboratory
1 Credit
This course accompanies CHM 2046. Topics include spectro photometric determinations, chemical kinetics, electrochemis try, inorganic qualitative analysis and chemistry equilibria. College level reading, writing and math skills are required. A special fee will be charged for this course.
Prerequisite: CHM 2045L
Co-requisite: CHM 2046

CHM 2210
Organic Chemistry I
4 Credits
First part of a two-semester sequence. Focus is on the chemis try of hydrocarbons. Topics include nomenclature, chemical bonding, synthetic methods, characteristic reactions, spectro scopic analyses, reaction mechanisms and structure determina tions. College level reading, writing and math skills are required.
Prerequisites: CHM 2046, CHM 2046L
Co-requisite: CHM 2210L

CHM 2210L
Organic Chemistry I Laboratory
1 Credit
Accompanies CHM 2210. Topics include organic separations, synthesis, spectroscopy, chromatography and identification of organic compounds. College level reading, writing and math skills are required. A special fee will be charged for this course.
Prerequisites: CHM 2046, CHM 2046L
Co-requisite: CHM 2210

CHM 2211
Organic Chemistry II
4 Credits
Second part of a two-semester sequence. Focus is on the chem istry of hydrocarbon derivatives. College level reading and math skills are required.
Prerequisites: CHM 2210, CHM 2210L
Co-requisite: CHM 2211L.

CHM 2211L
Organic Chemistry II Laboratory
1 Credit
Accompanies CHM 2211. Topics include the analysis of NMR spectra, multi-step synthesis and organic qualitative analysis. College level reading and math skills are required. A special fee will be charged for this course.
Prerequisite: CHM 2210L
Co-requisite: CHM 2211

CHM 2910L
Guided Undergraduate Research
1 Credit
This course is intended for students majoring in STEM areas who desire to gain experience with research techniques, meth ods and procedures. It is intended to create supervised study through guided design of laboratory experiments, study of rel evant literature, and achievement in specific research skills. Students will develop independence in the laboratory regard ing their research project and will learn how to write a scien

CIS 2321
Systems Analysis
3 Credits
Focuses on the systems development life cycle, with an empha sis on identifying and assessing system requirements, analyz ing and designing new systems in relation to use in business.
Prerequisites: CGS 2301, CGS 2541

CIS 2352C
Information Assurance Local Systems
3 Credits
Hands-on course teaches students how to hack into infor mation systems using ethical standards. The student will learn local system vulnerabilities, the tools and techniques used to exploit vulnerabilities such as social engineering, buffer over flows, etc., and how to defend against attacks. Suggested pre requisite: CTS 2301C.
Prerequisite: CNT 1401

CIS 2353
Security Management and Penetration Testing
3 Credits
In this course the student will learn the steps necessary to per- form penetration testing. The student will create an audit pro ject plan based on various information technology scenarios and then practice performing fieldwork, analyzing data to draw conclusions and preparing an audit report offering rec ommendations. Suggested prerequisite: CTS 2301C
Prerequisite: CNT 1401

CIS 2359C
Information Assurance Network Systems
3 Credits
Hands-on course teaches students how to hack into infor mation systems using ethical standards. The student will learn network system vulnerabilities, the tools and techniques used to exploit vulnerabilities such as SQL Injection, Denial of Ser vice, etc., and how to defend against attacks.
Prerequisite: CNT 1401

CIS 2381C
Computer Forensics and Incident Response
3 Credits
The student will design and develop strategies for inspecting potentially corrupted servers, networks and workstations. In this hands-on course the student will practice detecting possi ble intrusion inspecting log files, tracking violators. Students will practice computer forensic exercises using detection tools and tracking methodologies.
Suggested prerequisite: CTS 2301C
Prerequisites: CNT 1401

CIS 2598
Cybersecurity Capstone
3 Credits
This course is designed for students to demonstrate their knowledge and skills applicable to the area of cyber security and its core competencies. The course is designed as a project based experience to develop a portfolio quality product. The students project requirements will be designed along with in structor input to demonstrate curriculum expertise.
Prerequisites: College level reading, writing and math skills re quired.

CIS 2621
Cybersecurity Operations Implementation
3 Credits
This course is the second of two advanced cybersecurity courses where students learn core network security concepts and techniques that are needed in today's Security Operations Center (SOC) to monitor, detect, analyze, and respond to threats on a network using a variety of security tools. Students will acquire hands-on experience on how to detect and re spond to security incidents while preparing for the CCNA Cy bersecurity Operations certification. College level, reading, writing and math skills required.
Prerequisite: CIS 2772

CIS 2772
Cybersecurity Operations Fundamentals
3 Credits
This course is the first of two advanced cybersecurity courses where students learn core network security concepts and tech niques that are needed in today's Security Operations Center (SOC) to monitor, detect, analyze, and respond to threats on a network using a variety of security tools. Students will acquire hands-on experience on how to detect and respond to security incidents while preparing for the CCNA Cybersecurity Opera tions certification. College level reading, writing and math skills required.
Prerequisites: CET 1600, CNT 1401 or permission from instruc tor.

CIS 2900 - 2904
Special Topics in IT Project Management
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to IT Project Management. The course may be taken twice for up to six credits. College level reading and writing skills are required.
Prerequisite: CGS 1000

CIS 2905, 2932-36
Special Topics in Computer Administration
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to computer administration. The course may be taken twice for up to six credits. College level reading and writing skills are required.
Prerequisite: CGS 1000

CIS 2939
Computer Information Administrator Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concern with his/her area of curriculum em phasis. Permission from instructor required.

CIS 2945
IT Project Management Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concern with his or her area of curriculum em phasis.
Prerequisites: Completion of 75% of program requirements.

CJC 1000
Introduction to Corrections
3 Credits
Provides an introduction to the historical, theoretical and ob jective understanding of crime, the offender and the correc tional process in society. Topics include custodial procedures and theory, correctional treatment, and basic social systems in relation to crime problems.

CJC 2162
Probation and Parole
3 Credits
Explores the history, functions, purposes and operations of community corrections programs within the criminal justice system which provide diversion, supervision and treatment of offenders. This course reviews the theories and practices of probation and parole within a community setting. The princi ples and methods of probation and parole systems at federal, state and local levels, court procedures, the role of the proba tion and parole officers and their associates in the rehabilita tion process will be covered.

CJC 2940
Criminal Justice Practicum – Basic Corrections Academy
9 Credits
Articulated credits granted to students who successfully com pleted an FDLE state mandated certification training program in law enforcement.

CJE 1000
Introduction to Law Enforcement
3 Credits
This course covers the history and philosophy of law enforce ment in America including the organization and objectives of local, state and federal agencies. Areas covered will include contemporary problems facing modern law enforcement. The course will also cover the various approaches to modern law enforcement and the selection of and training of career officers to enforce the laws in a democratic society. Topics covered will include law enforcement as a balance of social, historical, polit ical, legal, individual and organizational forces.

CJE 1640
Introduction to Criminalistics
3 Credits
This course explains and discusses the crime laboratory and its procedures, functions and duties. Crime scene procedures and techniques for locating, preserving and security evidence will also be discussed. Selected laboratory techniques and proce dures such as comparison and identification of tool markings, blood, hair, fibers, drugs, chemicals, photographs, firearms, ballistics and documents will be explained.

CJE 1642C
Introduction Crime Scene Technology
3 Credits
This course explains and discusses the basic scientific tech niques used in criminal investigation with emphasis on the role of the crime scene investigator. This course will focus on such areas as recording the crime scene, collecting and preserv ing physical evidence, and the examination of evidence. The techniques used by the crime scene investigator to collect, pro tect, process, and analyze crime scene evidence will be ex plored.

CJE 1643C
Advanced Crime Scene Technology
3 Credits
This course explains and discusses advanced principals and theories in crime scene technology. This course will cover spe cialized collection procedures for biological evidence, weap ons, traffic crash evidence, arson evidence; gunshot residue, blood spatter and bodies.
Prerequisite: CJE 1642C

CJE 1653
Introduction to Crime Analysis and Intelligence
3 Credits
This course involves an introduction to the field of crime anal ysis. The course will provide the student with an overview of basic criminal intelligence and investigative analysis tech niques in modern law enforcement. The course will include ge ographic information systems and crime mapping techniques.

CJE 1680
Introduction to Computer Crimes
3 Credits
Provides the student with an overview of crimes involving the use of computer technology and the Internet. It will cover how computer related crimes are committed and how they are in vestigated. Topics covered will include computer crime scene management and the legal issues involved in the prosecution of computer crimes.

CJE 2004
Career Choices Criminal Justice
3 Credit
This course will expose the students to the diversity of require ments and career opportunities within the criminal justice sys tem. This course will provide the students with an understanding of the different agencies within the criminal jus tice system including police, courts and corrections. This course will cover all levels of agencies including city, county, state and federal. The course will also cover careers related to criminal justice including juvenile justice, private investigation and security, and bail bonds agents. The course will cover the roles of these agencies and employment opportunities. The course will also provide students with information on law en forcement academies and strategies for job searching, resumes and job interviews.

CJE 2007
Introduction to Federal Law Enforcement and Investigations
3 Credit
This course will examine criminal justice at the federal level with the emphasis on federal criminal law and its enforcement. The course will examine the role of the different federal law enforcement agencies. The course will review security, investi gations, prosecutions, probations, and corrections within the federal criminal justice system. Major areas include an over view of federal crimes, elements of the United States code, and the role of federal agents in the support of prosecutions. This course will include the mission of and interrelationships be tween individual agencies. Topics will also include mail fraud, official bribery and corruption, organizational crime, drug en forcement, criminal civil rights violations, human trafficking, federal vs. state prosecution, and the UCMJ.

CJE 2233
Drug Abuse and Crime
3 Credits
This course will introduce students to the negative effects of drugs, alcohol, and other substance abuse. This course will cover the problems created by the illegal use of narcotics and other dangerous substances and its relationship to criminal be havior. This course will emphasize the criminal implications and control of drug and substance abuse as well as touching on the social and historical implications.

CJE 2300
Police Administration and Organization
3 Credits
Provides an introduction to the principles of law enforcement, organization and supporting services as they apply to staff functions, personnel recruiting, training, promotions, plan ning, research, inspection, control, and policy formation. Top ics include functions of patrol, criminal investigation, vice control units, juvenile bureau, intelligence, sections, detention facilities, supply and transportation.

CJE 2600
Criminal Investigation
3 Credits
Covers methods of investigation, interviews, interrogation, electronic equipment, surveillance and sources of information, with an emphasis on case preparation and problems in crimi nal investigations.

CJE 2614
Serial Killers
3 Credits
This course involves an examination of serial killers and mass murderers, including the history, profiling of the offenders, and techniques for the investigation. Special issues that will be covered include media coverage and punishment.

CJE 2664
Advanced Crime and Intelligence Analysis
3 Credits
This course is an advanced course in crime and intelligence analysis. The course will build upon the principles learned in CJE 1653 and will give the student an in-depth look into crime analysis computer applications and GIS mapping software.
Prerequisite: CJE 1653

CJE 2671C
Latent Fingerprint Development
2 Credits
This course explains and discusses the techniques involving detection, enhancement and recovery of latent fingerprints from physical evidence. This course will cover mechanical and chemical methods and surfaces will be analyzed and evaluated for application in both theory and practice.
Prerequisite: CJE 2672C

CJE 2672C
Fingerprint Classification
2 Credits
This course explains and discusses the Henry modified system of fingerprint classification. This course will deal with all as

pects of fingerprint classification, identification, and filing sys tems and will prepare the student to conduct inked fingerprint examinations.

CJE 2704
Introduction to Child Protective Investigation
3 Credits
This course introduces the students to the responsibilities of Child Protective Service investigators, the various types of child maltreatment, the characteristics of the perpetrators, and the indicators of child abuse. The course will also, cover the roles of the child protective investigator, of the police, of the court system in matters of child abuse and neglect, the multi disciplinary team approach, and the laws of procedures of the dependency court system.

CJE 2770C
Forensic Photography
3 Credits
This course explains and covers basic crime scene photography skills, including camera operation, exposure control, profi ciency in relational photos, and flash control for crime scene and evidentiary documentation. The course will also cover special light sources and the use of filters, specialized equip ment, digital cameras, and hand held video camera recorders. Prerequisite: CJE 1642C

CJE 2940
Criminal Justice Practicum – Basic Police Academy
12 Credits
Articulated credits granted to students who successfully com pleted an FDLE state mandated certification training program in law enforcement.

CJE 2941
Criminal Justice Practicum – 911 Public Safety Telecommunicator
3 Credits
This course will grant articulated credit as mandated by Flor ida's Gold Standard Certification Articulation Agreement to students who successfully complete a State approved 911 Pub lic Safety Telecommunicator state mandated certification train ing program.

CJJ 1002
Juvenile Delinquency
3 Credits
Focuses on the history, nature, causes and scope of juvenile crimes with an examination of the justice system and treatment facilities.

CJL 1000
Introduction to Law and Legal Issues
3 Credits
This course will cover the evaluation, debate, and critical anal ysis of law and legal issues that affect individuals, their fami lies, ad communities. Students will learn about practical aspects of criminal, civil, and constitutional law as well as do mestic, immigration, and consumer law in a diverse society. The course will use case studies, simulated legal exercises, small group exercises, and analytical thought problems.

CJL 1062
Constitutional Law
3 Credits
Provides an in-depth study of criminal law, with an emphasis on the role of the Supreme Court and constitutional law as it applies to law enforcement and civil rights.

CJL 1100
Criminal Law
3 Credits
Focuses on the classification and analysis of criminal acts, such as homicide, rape, assault, robbery, larceny, burglary, and auto thefts, with an emphasis on specific cases and selected court decisions. Topics include court organization, court orders, writs, warrants, and other papers.

CJL 1100H
Honors Criminal Law
3 Credits
Same as CJL 1100 with honors content. Honors Program per mission required.

CJL 1500
Introduction to the Court System
3 Credits
This course examines the history, traditions and philosophy of the American court system. Emphasis will be placed on the roles of the prosecutor, the judge, the defense attorney, the ju rors, the defendants and the public. the course will focus on the general themes of law on the books, law in action and law in controversy. Course content will include an overview of the structure and operations of the court system with special em phasis on the Florida Court System.

CJL 2072
Civil Rights and Liability in Criminal Justice
3 Credits
This course will provide students with an overview of federal civil rights legislation and state federal tort law as it applies to criminal justice. Topics covered will include practitioner and supervisor liability, 1983 actions, 241 crimes, wrongful death actions, and various personnel laws including ADA, EEOC, age and sex discrimination and sexual harassment.

CJL 2130
Criminal Evidence and Procedure
3 Credits
Provides an introduction to criminal procedures such as arrest, search and seizure, use of force and handling evidence. Topics include the legal use and degree of force, rights of suspects and arrested persons, types of evidence, admissibility, proof and competence of evidence as related to criminal law and recent court decisions.

CJL 2610
Courtroom Presentation of Scientific Evidence
3 Credits
This course explains and discusses how to present physical, documentary, and scientific evidence in the courtroom. The course will cover proper dress, speaking, listening, and stress. The student will understand how to present courtroom testi mony, especially in areas of scientific evidence. The course will also include how to prepare and present visual aids and exhib its collected at crime scenes. The course will include mock trial exercises.

CLP 1000
Psychology of Personal Growth
3 Credits
Covers the origin and development of individual needs and personality patterns, approaches to self-management, and self-control and assessment of personal value systems. Emphasis is on personal awareness and experientially based activities. Is not acceptable as a prerequisite for other psychology courses.

CLP 2140
Abnormal Psychology
3 Credits
This course examines the historical and current perspectives of the science of abnormal behavior. Topics include classification, diagnosis, theories, assessment methods, treatment, preven tion, and legal and ethical issues. The course will also discuss the importance of empirically-based treatments. The impact of mental illness on the individual, family, and society are ex plored.
Prerequisites: PSY 2012 or permission of instructor. College level reading and writing skills are required.

CNT 1401
Introduction to Network Security
3 Credits
Basic computer and network security theory, concepts and ter minology are presented. The CIA triad, basic threats, intrusion techniques, vulnerabilities and their various counter measures are included. Students will also discuss ethical behaviors and basic security practices for authentication, encryption and se cure network topologies.
Prerequisites: CET 1600 or CTS 1305

CNT 2510
Wireless Networking
3 Credits
This course presents an overview of common wireless technol ogies including theories, concepts of their operation, installa tion, and basic troubleshooting. Basic computing and common wireless technologies are discussed as well as new trends as they develop. Wireless local area networks and integration with wired networks are also included.
Prerequisite: CTS 1305.

COM 1000
Introduction to Communications
3 Credits
This course introduces students to the study of human com munication and includes surveys of communication theories, perspectives, processes, concepts, roles and contexts. Students will improve basic and practical communications skills and in crease active awareness and best practices for effective and eth ical communication.
Prerequisite: College level reading and writing skills required.

COP 1000
Programming Logic
3 Credits
Introduces programming logic, emphasizing best practices and design methodology. Makes use of pseudocode and flowcharts to cover procedural and object-oriented programming, along with variables, constants, file input/output, arrays, modulari zation, and structured programming concepts.
Prerequisite or Co-requisite: CGS 1000

COP 1030
Introduction to Python Programming
3 Credits
An introduction to programming using the Python language. Students will learn how basic programming ideas, such as var iables, data, loops, and functions are used in Python to create useful programs. Other topics include program design, style, documentation, and working with files and text.
Prerequisite: COP 1000

COP 1120
COBOL
3 Credits
Covers programming in a business environment; emphasis on the fundamentals of structured program design, development, testing, implementation, and documentation of common busi ness-oriented applications using COBOL. Coverage of lan guage syntax, data and file structures, and operating system functions for implementing batch programs for report genera tion, table processing and sequential file creation and access.
Prerequisite: COP 1000

COP 1220
Programming in "C"
3 Credits
Introduces programming in the "C" language with an empha sis on basic input/output functions. Topics include interactive programming, style and methodology, top-down design and structured programming.
Prerequisite: COP 1000.

COP 1332
Visual BASIC
3 Credits
A thorough introduction to programming in Visual BASIC. Covers structured programming and application development for the Windows environment in the .NET framework and pre pares the student to develop simple multiple form applica tions. Emphasis is on event-driven programming methods to design, code, test and debug Graphical User Interfaces and ap plications in a Windows environment.

Prerequisite: COP 1000

COP 1812
Introduction XML Authoring
3 Credits
This course teaches students how to use XML to create custom ized tags for Web pages and to work effectively with XML. Students will develop websites integrating XML into their pro jects.
Prerequisite: COP 1000

COP 2050
R Programming
3 Credits
R Programming is an introductory course in the R program ming language. The student will learn how to install and con figure the R software, use R for statistical analysis, and graphics visualization of data. This course will include reading data into R, accessing R packages, writing R functions, debug ging; commenting; and code organization, applied statistical analysis using R and how to generate graphs and charts for data visualization.
Prerequisite: CGS 1000, COP 1000, STA 2023, College level reading, writing and math skills required.

COP 2224
Programming in C++
3 Credits
Basic C++ programming with a survey of advanced C++ top ics, including inheritance, generics (templates), modular and object-oriented programming, dynamic memory, using the standard library, and proper programming best practices in cluding an introduction to design, testing, documentation, and deployment. Course focuses on how C++ is used for systems and embedded programming.
Prerequisites: COP 1000, and either COP 1220 or COP 2360

COP 2344
Shell Scripting
3 Credits
This course is intended for students who have mastered the basic Linux/Unix operating environment and who would like to read and understand the various administrative scripts, and to write scripts to automate day-to-day tasks. This course is de signed to teach students skills they need to effectively read, write and debug shell scripts. This course explores in detail the Bash shell scripting language. Major topics covered include reading, writing, modifying, and debugging shell scripts, the shell environment, regular expressions, text filtering with grep, sed, and the awk commands, conditional control statements and loops, interactive scripts, the use of other shell features such as variables, parameters, argument lists, shell functions, shell traps.
Prerequisites: COP 1000 and CTS 1106 both with a minimum grade of C.

COP 2360
Programming in C#
3 Credits
An introductory course to programming in the C# language. Emphasis is placed on the basic data, methods and classes of the C# language. Additionally, object oriented programming concepts will be introduced. Programming style and object ori ented methodology will be stressed throughout the course.
Prerequisite: COP 1000

COP 2654
Mobile Platform Application Development
3 Credits
This is an introductory course in application development for popular tablet and smartphone mobile platforms. Students will learn about hardware, software, and programming envi ronments for the major types of mobile devices in current use. Student will also examine the different models for application development and distribution on these devices, plus design, code, test, and execute a mobile application.
Prerequisite: COP 1220 or COP 2224 or COP 2360 or COP 2800

COP 2800
Java Programming
3 Credits
Introduces programming in Java. This course will cover the basic features of Java, including procedural programming (datatypes, variables, operators, control structures, etc.), an in troduction to object-oriented programming concepts (objects and classes, abstraction, encapsulation, and inheritance), GUI programming, error handling with exceptions, and other Java techniques.
Prerequisite: COP 1000 or permission of instructor.

COP 2805C
Java Advanced
3 Credits
A continuation of COP 2800. The focus is on software develop ment workflow tasks (requirements, design, testing, deploy ment). Topics include advanced object orientated and functional programming in Java, collections, multi-threading, files, database use, and other features of modern Java.
Prerequisite: COP 2800

COP 2830
Scripting for the Web
3 Credits
Introduces scripting languages used to enhance Web docu ments. The emphasis is on the use of scripts and how they re late, integrate and function in a web-based environment. Students will develop programs using modern scripting lan guages.
Prerequisites: CGS 2820, COP 1000

COP 2833
Database-driven Web Programming: Client
3 Credits
The student will be introduced to techniques for coding Web pages that interact with back-end databases. The emphasis in this class is to develop code that runs on the client computer and to develop techniques for balancing the client-side code

with server-side code. Topics covered will be specific pro gramming language fundamentals and logic, and an introduc tion to data maintenance using data manipulation coding techniques. Other topics include writing secure Web code, er ror handling and data validation.
Prerequisite: COP 2836, Database-driven Web Programming: Server

COP 2836
Database-driven Web Programming: Server
3 Credits
The student will be introduced to techniques for coding Web pages that interact with back-end databases. The emphasis in this class is to develop code that runs on back-end servers with back-end database. Topics covered will be specific program ming language fundamentals and logic, and an introduction to data maintenance using data manipulation code such as SQL, as well as an introduction to back-end DBMS concepts and ter minology. Other topics include writing secure Web code, error handling and data validation.
Prerequisites: CGS 2820, COP 1000

COP 2930-35
Special Topics in Programming
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to programming. The course may be taken twice for up to six credits. College level reading and writing skills are required.
Prerequisite: CGS 1000.

COP 2939
Computer Programming Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concern with his/her area of curriculum em phasis. Permission from instructor required.

CRW 1001
Creative Writing I
3 Credits
Creating original work such as poetry, fiction, creative, non-fic tion, and other genres of creative writing. Students will have the opportunity to receive feedback from their peers and en gage contemporary works to understand elements of style and craft.

CRW 1001H
Honors Creative Writing I
3 Credits
The same course description as CRW 1001 with honors con tent. Honors Program permission required.

CRW 1002
Creative Writing II
3 Credits
Further critical analyses of both the student's own writings and the writings of others combined with the readings and discus sions of the process of creative writing. Continuation of the skills developed from CRW 1001. College level reading and writing skills are required.
Prerequisite: CRW 1001

CTS 1106
Introduction to Linux
3 Credits
This course is designed to introduce Linux operating system through lecture, demonstration, and practical hands-on train ing, is designed for students who are new to Linux and who want to develop a good working knowledge of the operating system using the command line. The student will explore the same tools and practice techniques used by Linux end users. This course covers Linux software and hardware, the boot pro cess, file and file system management, disk management, and working with text files. After completing this course, the stu dent should be able to competently work with any major Linux distribution.
Prerequisite or Co-requisite: CGS 1000

CTS 1145
Introduction to the Cloud
3 Credits
This course is designed to teach student core concepts and knowledge applicable to cloud computing. This includes Cloud concepts, architecture, configuration and deployment, management, security, troubleshooting and technical support. Coverage includes preparation for the CompTIA Cloud+ exam.
Prerequisite: CTS 1305

CTS 1303
Enterprise Operating System I
3 Credits
This course is designed to provide students with the knowledge and skills necessary to install, configure and ad minister Microsoft Windows and LINUX operating systems, local and remote management, file and storage services, Hy-per-V virtualization, and high availability in an enterprise en vironment.
Corequisite: CTS 1305 or permission of instructor.

CTS 1305
Introduction to Networking
3 Credits
Introduces the students to the basics of local area networks. Provides an overview of networking, including a history of de velopment and the uses and benefits of networks. Students are introduced to major network components with a discussion of critical selection considerations. Covers the prerequisite concepts necessary for the Microsoft program and will provide background information for the Cisco certification program.

Prerequisite or Co-requisite: CGS 1000 or permission of in structor.

CTS 1306
Enterprise Operating Systems II
3 Credits

Prerequisite: CTS 1303 or permission of instructor.

CTS 2203
Introduction to Adobe Acrobat
1 Credit
Provides students with the knowledge and skills necessary to create, post to the Internet, and distribute PDF files.

CTS 2109
Introduction to Virtualization
3 Credit

CTS 2301C
Linux Administration I
3 Credits
This course is a continuation of CTS 1106 (Introduction to Linux). The focus is hands-on Linux system administration. Topics include system administration concepts, system instal lation and configuration. Additional topics include under standing the Linux file system, configuring basic system hardware and services, managing user accounts, basic system security and backups. Major Linux variants will also be cov ered. This course continues with CTS 2322, Linux Administra tion II. Student must have prerequisite or permission of instructor.
Prerequisite: CTS 1106

CTS 2311
Linux Security
3 Credits
This course covers the concepts and administration of system and network security on Linux systems. Students will gain the skills needed to protect Linux servers from various types of threats. Students will understand, plan and implement security on Linux servers including developing security policies, local system security, network security, monitoring systems and networks, basic firewall setup and the use of various security related tools (e.g., PAM, sudo). College level reading and writ ing skills are required.
Prerequisite: CTS 2322

CTS 2322
Linux Administration II
3 Credits
This course is a continuation of CTS 2301C, Linux Administra tion I. The focus is on Linux administration. Topics include software development tools, software licensing and open source issues, managing documentation and creating "man" pages', configuring network services including email, Web, and DNS. Also covered will be building and configuring cus tom kernels and kernel modules, patching and updating the kernel and applications, system and service monitoring and logging, and basic system security. Students will gain hands on experience installing, configuring and using Linux.
Prerequisite: CTS 2301C

CTS 2333
Linux Networking
3 Credits
This course covers the concepts and administration of net working services on Linux systems. Topics include Windows network integration with SMB (Samba), DNS, email services and other common network services such as DHCP, FTP, LDAP and NTP (network time protocol). Students will review basic network concepts such as network models and LANs, IPv4, IPv6 and PPP. Students will also gain hands-on experi ence with basic network security, and network configuration and troubleshooting using common network management tools.
Prerequisites: CTS 1305, CTS 2322. College level reading and writing skills are required.

CTS 2375
Enterprise and Cloud Computing
3 Credits
This course is designed to provide students with the knowledge and skills necessary to learn PaaS cloud services and how to use Cloud as the infrastructure for existing and new services. Students will learn Amazon Elastic Cloud, Mi crosoft's Azure, Google App Engine, and many other Cloud of ferings. Students will use open-source implementations of highly available clustering computational environments, as well as RESTful web, serverless, and FaaS services to build powerful and efficient applications. Student also learn how to deal with not trivial issues in the Cloud, such as load balanc-ing, caching, distributed transactions, and identify and author ization management in an enterprise environment.
Prerequisite: CTS 1145, College-level reading, writing and math skills are required.

CTS 2440
Database Programming - SQL
3 Credits
This course covers the concepts of both relational and object re lational databases using the SQL programming language. Stu dents are taught to create and maintain database objects and to store, retrieve and manipulate data. Students learn to retrieve data by using advanced techniques, grouping operations and navigational retrieval. They also learn to write SQL queries to generate report-like output. Hands-on practice using assigned projects reinforce the fundamental concepts.
Prerequisite: CGS 2541

CTS 2441
Database Administration I
3 Credits
Provides students with the knowledge and skills required to install, configure, administer and troubleshoot a specific data base management system (DBMS) in a client/server environ ment. Topics such as backing up and restoring a database, as well as scheduling, monitoring and performance will be cov ered. Sizing database objects such as tables and indexes will be covered, as well as database securities. The course may be re peated one time for purposes of preparing the student as an administrator on a second database platform. Permission of instructor is required. Prerequisite: CGS 2541

CTS 2442
Database Administration II
3 Credits
Provides students with the knowledge and skills required to install, configure, administer and troubleshoot a specific data base management system (DBMS) in a client/server as well as web-based environment. Topics such as complex restoring of a database will be covered. Advanced concepts such as data warehousing, data mining and transaction processing will be covered. The course may be repeated one time for purposes of preparing the student as an administrator on a second data base platform. Permission of instructor is required.
Prerequisite: CTS 2441

CTS 2445
Database Programming Advanced
3 Credits
This course covers advanced coding concepts of a specific DBMS. For example, if the student is studying MS Access, this course covers coding using Visual Basic for Applications (VBA). If the student is studying MS SQL Server, this course introduces advanced concepts using Transact SQL (TSQL). If the student is studying Oracle DBMS, the student will code in PL/SQL. Students will be taught to code programs to perform error handling and create triggers. Students will program stored procedures and custom functions and learn to call those reusable programs. The course may be repeated one time for purposes of preparing the student as an administrator on a sec ond database platform. Permission of instructor is required.
Prerequisite: CTS 2440

CTS 2930-35
Special Topics in Database Administration
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to database administration. The course may be taken twice for up to six credits. College level reading and writing skills are required.
Prerequisite: CGS 1000

CTS 2939
Database Technology Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject based experience. The student's project requirements will be designed in concern with his/her area of curriculum em phasis. Permission from instructor required.

CTS 2941
Enterprise Cloud Computing Capstone
3 Credits
This course is designed for the students to apply knowledge acquired during the cloud computing program to a project in volving actual product in a realistic setting. During the project, students engage in the entire process of solving a real-world cloud computing problem, from analyzing and designing to applying suitable and appropriate solution methods to the problem. Both the problem statements for the project assign ments and its deliverables originate from real-world domains similar to those that students might typically encounter within industry.
Prerequisites: College-level reading, writing, and math skills are required.

CVT 1000
Introduction to Cardiovascular Technology and Patient Care
3 Credits
This course should introduce the student to the field of sonog raphy and cardiovascular. The role of a cardiovascular tech nologist in the health care environment. Topics also cover professionalism and health care provider. Medical and ethical issues that may affect a cardiovascular technologist will be dis cussed. Emphasis is placed on the foundations and origins of cardiovascular technology, orientation to sonography, learning methods, basic patient care techniques, sonographic techniques and communication skills.
Prerequisites: Admission to Cardiovascular Technology Pro gram.
Corequisite: CVT 1261

CVT 1001
Introduction to Invasive Cardiovascular Technology
3 Credits
This course is an overview of the profession including basic skills and terminology related to historical development, cur rent profession trends, professionalism, and professional code

of ethics, professional organizations, patient confidentiality, in fection control, asepsis, and basic cardiopulmonary patient as sessment using electrocardiography, chest roentgenography, clinical laboratory tests, and vital signs.
Prerequisites: BSC 2085, BSC 2085L

CVT 1191
Introduction to Cardiovascular Practicum I
3 Credits
This course provides hands-on experience in the lab for the di agnostic procedure (scanning) in non-invasive echocardiog raphy based on didactic class topics. Standard echocardiographic views in 2D, M mode, and Doppler modali ties as well as basic scanning techniques will be emphasized.
Prerequisite: Admission to Program
Corequisite: CVT 1000

CVT 1220
Cardiovascular Pharmacology
3 Credits
This course is designed to provide the cardiovascular technol ogy student with a foundation of the pharmacology needed to function in clinical experiences. This includes classifications of medications, modes of action, indications, contraindications, and their effect on the cardiovascular system and cardiac pa tients. The course also prepares the student to recognize basic cardiac arrhythmias, understand basic radiographic theory, safety protection, and cardiac catheterization laboratory equip ment.
Prerequisite: CVT 1001
Corequisites: CVT 1800L, CVT 1260

CVT 1260
Cardiopulmonary Anatomy and Physiology
3 Credits
This course covers cardiopulmonary anatomy and physiology in detail, diffusion and transport of cardio-respiratory gases, blood gas, renal and acid base physiology, EC and basic hemo dynamic analysis, cardiopulmonary exercise testing, and hu man gestational development of the cardiopulmonary systems. The physiologic calculations related to quantification of cardio pulmonary performance are also emphasized.
Prerequisite: CVT 1001
Corequisites: CVT 1800L, CVT 1220

CVT 1261
Cardiovascular Anatomy and Physiology
3 Credits
This course is divided into four units: normal cardiovascular anatomy and physiology, embryology, congenital heart dis ease, and acquired cardiac and vascular diseases. The essen-tials of diagnosis and treatment are incorporated in these units.
Prerequisite: Admission to Program
Corequisite: CVT 1000

CVT 1800L
Invasive Cardiovascular Techniques I
3 Credits
Supervised clinical practice in the on-campus cardiac catheteri zation laboratory. Areas of concentration in this pre-clinical course include aseptic techniques, vascular access and angio graphic techniques, patient care and monitoring, procedural preparation, and radiation safety.
Prerequisite: CVT 1001
Corequisites: CVT 1220, CVT 1260, CVT 2511

CVT 1801L
Invasive Cardiovascular Techniques II
4 Credits
Supervised clinical practice in the on-campus cardiac catheteri zation program. This course builds on the knowledge and skills from CVT 1800L, Invasive Techniques I. Areas of concen tration are coronary angiography, left ventriculography, con trast selection, post-procedural patient assessment, and ACLS techniques.
Prerequisites: CVT 1800L, CVT 1220, CVT 1260, CVT 2511

CVT 2110L
Invasive Cardiovascular Clinical II
3 Credits
Clinical experience in procedures performed in the cardiovas cular laboratories, including use of equipment, performing tests and patient care as it relates to the cardiovascular areas with emphasis on cardiac catheterization, ECG, stress testing. Holter monitoring, and an introduction to echocardiography.
Prerequisite: CVT 1801L
Corequisites: CVT 2420C, CVT 2805C, CVT 2622C

CVT 2211
Clinical Care Applications
2 Credits
This course presents an in-depth study of critical care hemody namic measurements for medical, surgical, and emergency pa tients. Intra-aortic balloon pumping, Swan-Ganz monitoring, artificial airways, oxygen delivery devices, cardiovascular pharmacology, and basic ACLS algorithms are also presented.
Prerequisite: CVT 2420C
Corequisite: CVT 2421C

CVT 2320
Vascular Ultrasound I
3 Credits
This course provides an introduction to vascular imaging and peripheral vascular angiography. The student will review cer ebrovascular anatomy and the peripheral vascular systems. This course will cover fundamental introduction to carotid du plex scanning and peripheral vascular imaging. Students will learn normal and abnormal hemodynamics, protocols and pa thology relative to cerebrovascular testing. This course will also cover fundamental introduction to peripheral angi ography.
Prerequisites: CVT 1000
Corequisite: CVT 2320L

CVT 2320L
Introduction to Cardiovascular Practicum II
3 Credits
During this laboratory training, the student gains skills in the use of fundamental ultrasonic equipment designed to detect blood flow in peripheral arteries. It will be a lab component and a clinical component. Practice of basic vascular exams: ca rotid arteries, upper and lower extremity venous studies. Basic cardiac echocardiography exam.
Prerequisites: CVT 1000
Corequisite: CVT 2320

CVT 2321
Vascular Ultrasound II
3 Credits
This course introduces the characteristics of abnormalities in blood flow. Disease states, etiologies and treatments are ex plored. Testing modalities used to diagnose vascular diseases in the extremities and abdomen are presented.
Prerequisites: CVT 2320
Corequisite: CVT 2840

CVT 2420C
Invasive Cardiology I
6 Credits
This course introduces the student to the specific procedures performed in the cardiac catheterization laboratory and the use of the resulting data for patient diagnosis. Additional topics include aseptic techniques, sterilization, patient assessment, ra diography pharmacology, cardiac wave forms, coronary artery anatomy, equipment and tools utilized in cardiac catheteriza tion, hemodynamic data and analysis, right and left heart cath eterization, and complications and treatments including dysrhythmias that may occur during cardiac catheterization procedures. Students will practice cardiac catheterization pro cedures in the cardiac catheterization lab on campus.
Prerequisite: CVT 1801L
Corequisites: CVT 2622C, CVT 2805C, CVT 2110L

CVT 2421C
Invasive Cardiovascular II
6 Credits
This course is designed to tie together cardiac disease pro cesses with diagnostic and interventional cardiac catheteriza tion procedures. Students will be presented with classifications and the use of equipment, and techniques used in invasive cardiology. An in-depth presentation of various cardiac diseases including coronary artery disease, angina, my ocardial infarction, heart failure, valve diseases, cardiomyopa thies, pericardial disorders, arrhythmias, congenital anomalies, pharmacology, and repair procedures is also presented. Addi tionally, students learn the various calculations performed in the catheterization lab including cardiac outputs, vascular re sistance, valve areas and stunts.
Prerequisite: CVT 2420C
Corequisite: CVT 2211

CVT 2500
Cardiovascular ECG
3 Credits
This course relates electrophysiological principles of EKG com ponents to heart function. Students identify the individual components of the EKG complex and discuss the best lead placement for a diagnostic EKG versus lead placement for in tra-procedural monitoring. After identifying rhythm rules, students differentiate between normal and abnormal rhythm strips and paced rhythms, in correlation with known patholo gies. Students demonstrate the ability to identify heart rhythms and arrhythmias and gain the ability to set up a 12 lead EKG.
Prerequisites: Admission to the program
Corequisite: CVT 1000

CVT 2511
Radiation Biology and Safety
3 Credits
This course will include the fundamentals of x-ray production and the specifications of the x-ray tube equipment, the interac tion of ionizing radiation with biological systems, early and late effects of radiation exposure, with the principles of radia tion protection. Additional topics include image intensifica tion, digital flat plate technology and cineangiographic filming with quality control of the latent image.
Prerequisites: Admission to the program

CVT 2620
Cardiac Ultrasound I
3 Credits
This first course in the non-invasive cardiology series deals with the theory, rationale, application, performance and inter pretation of a standard 2D echocardiogram. Standard views recommended by the American Society of Echocardiography will be performed. Measurements from M-mode and 2D will be discussed and demonstrated. This course will cover funda mentals of color flow imaging and spectral Doppler. Normal and abnormal values will be discussed.
Prerequisite: CVT 1000
Corequisite: SON 1210

CVT 2621
Cardiac Ultrasound II
3 Credits
This companion course to CVT 2620, presents an in-depth view of the diagnosis of common cardiac and vascular disease states. Instruction is provided in the application of theory, techniques, and interpretation of 2-dimensional echocardiog raphy, M-mode, color flow imaging, and pulsed and continu ous wave doppler. Advanced techniques in echocardiography are also discussed, such as stress and pharmacologic echocar diography, transesophageal echocardiography and contrast echocardiography.
Prerequisite: CVT 2620
Corequisite: CVT 2621L

CVT 2621L
Cardiac Ultrasound II Laboratory
3 Credits
This laboratory course allows the student to apply the techniques and interpretation modalities in echocardiography as it related to the cardiac abnormalities taught in CVT 2621.
Prerequisite: CVT 2620
Corequisite: CVT 2621

CVT 2622C
Non-Invasive Cardiology
2 Credits
This course presents an introduction to non-invasive cardiology and those tests performed in this area. In addition, normal and abnormal heart rhythms, ECG acquisition and analysis, patient safety, stress testing. Holter monitoring and an introduction in echocardiography are presented.
Prerequisite: CVT 1801L
Corequisites: CVT 2420C, CVT 2805C, CVT 2110L

CVT 2805C
Cardiovascular Interventional Pre-Practicum
3 Credits
Supervised clinical practice continues in the on-campus cardiac catheterization laboratory. This course builds on the knowledge and skills from CVT 1801L. Areas of concentration in this pre-clinical course include interventional cardiac catheterization, balloon angioplasty, rotational atherectomy and intracoronary stenting.
Prerequisite: CVT 1801L
Corequisites: CVT 2420C, CVT 2622C, CVT 2110L

CVT 2840
Cardiovascular Practicum I
3 Credits
This laboratory course introduces the student to non-invasive cardiology by hands-on experience with modalities discussed in CVT 2620. This course has a lab component and a clinical practicum component.
Prerequisite: CVT 2500
Co-requisite: CVT 2321

CVT 2841
Cardiovascular Practicum II
3 Credits
Students participate in clinical education at an affiliate hospital, performing procedures in accordance with industry standards. Students acquire clinical experiences and proficiencies sufficient to demonstrate competency in a variety of procedures while providing the highest level of patient care.
Prerequisite: CVT 2840
Corequisite: CVT 2621L

CVT 2842
Cardiovascular Practicum III
4 Credits
This course is the final practicum and provides a more in-depth clinical experience to polish skills in the echocardiography/vascular lab. There will be a lab component and a clinical practice covers cardiovascular techniques and procedures, hemodynamic monitoring, scrubbing with panning and manipulation of imaging clinical practice covers performance of 2-D echocardiography with more in-depth clinical experience in stress echocardiography, pharmacological stress, transesophageal echocardiography and other advanced techniques in non-invasive cardiology.
Prerequisite: CVT 2841
Corequisites: CVT 2920

CVT 2845L
Invasive Cardiovascular Clinical III
4 Credits
This course is designed for students to gain more in-depth clinical experience in invasive cardiology including pre- and post-cardiac catheterization activities, cardiovascular techniques, hemodynamic monitoring, intra-aortic balloon pumping, and cardiac output measurements. Clinical practice in the cardiac catheterization lab includes circulating, scrubbing, recording and manipulating the imaging equipment during both diagnostic and interventional catheterization procedures.
Prerequisite: CVT 2110L
Corequisites: CVT 2421C, CVT 2211

CVT 2846L
Invasive Cardiovascular Clinical IV
4 Credits
This course is designed for students to gain additional clinical experience and polish their skills in the cardiac catheterization laboratory performing all duties involved in diagnostic and interventional cases.
Prerequisite: CVT 242lC, CVT 2845L, CVT 2211
Corequisite: CVT 2921

CVT 2920
Seminar in Cardiac Ultrasound
3 Credits
This course is designed for students to integrate their academic knowledge with case studies observed in clinical practicum. This course will cover registry board exam preparation for the specialty in non-invasive cardiac ultrasound. This course also will cover resume preparation and job interview skills.
Prerequisite: CVT 2841
Corequisite: CVT 2842L

CVT 2921
Cardiovascular Technologist as a Professional
2 Credits
The professional relationship of the cardiovascular technologist to other health professional is presented along with a basic format for research. Resume preparation and interview skills are also discussed. Students also present case studies and receive instruction and testing in Advanced Cardiac Life Support (ACLS).
Prerequisites: CVT 2421C, CVT 2211
Corequisite: CVT 2846L

CVT 2930
Seminar in Vascular Ultrasound
3 Credits
This course covers a comprehensive review of all aspects of non-invasive vascular ultrasound and registry preparation for the specialty in non-invasive vascular ultrasound. This course is also designed for students to integrate their academic knowledge with case studies observed in clinical practicum. This will prepare students for task-oriented testing.
Prerequisite: CVT 2321
Corequisite: CVT 2841

DAA 1100
Modern Dance Basics for Non-Majors
1 Credit
Modern Dance Basics is a studio course designed to introduce students with no training to the basic concepts of modern dance. The emphasis in this class will be placed upon attaining correct body alignment, learning the positions of the arms and feet, and the use of time, space, weight and energy. Students will learn basic dance vocabulary while developing flexibility, strength and musicality. This is a studio course and may be re peated 2 times for credit.

DAA 1101
Modern Dance I
2 Credits
Elementary level modern dance training is for those with entry level skills in modern dance. The course will offer students the opportunity to develop an understanding of the basic princi ples and concepts of modern dance technique through several movement experiences and explorations. Students explore and develop awareness of body alignment, dance vocabulary, self-awareness, coordination, strength and musicality. Attendance at and written critiques of dance performances provide an en hanced view of the scope of the dance field. This course may be taken twice for credit.

DAA 1102
Modern Dance Basics for Pre-Majors
1 Credit
Modern Dance Basics is a studio course designed to introduce students who plan to further pursue dance with a foundation knowledge of modern dance. The emphasis in this class will be placed upon attaining correct body alignment, ~ the use of time, space, weight and energy and the ability to accurately learn dance combinations and phrase work. Students will learn dance vocabulary while developing flexibility, strength and musicality. This is a studio course and may be repeated 2 times for credit.

DAA 1104
Modern Dance II
2 Credits
This studio course will serve as a continuation of Modern Dance I and will further explore basic principles of modern dance technique. It will broaden students' awareness of dance concepts such as momentum, weight shift, rebound and re lease. It will further develop dance vocabulary, body align ment, and develop an introductory framework for dance aes thetics. Attendance at and written critiques of dance performances will provide deeper insight into the dance field. This course may be taken twice for credit.
Prerequisite: Audition or Instructor Permission

DAA 1200
Ballet I
2 Credits
Elementary level ballet training for those with entry level skills in ballet. Emphasis is on correct placement and alignment of the body, a knowledge of basic ballet terminology, and the de velopment of spatial awareness as it applies to the execution of ballet exercises, positions and steps. Attendance at written cri tiques of dance performances provide an enhanced view of the scope of the dance field. This is a studio course and may be re peated twice for credit.
Prerequisite: Audition or Instructor Permission

DAA 1201
Ballet Basics for Non-Majors
1 Credit
Ballet Basics is a studio course designed to introduce students with no training to the basic concepts of ballet technique. The emphasis in this class will be placed upon attaining correct body alignment, learning the positions of the arms and feet, and the understanding of the sequence of the ballet class. Stu dents will learn basic dance vocabulary while developing strength and musicality. This is a studio course and may be re peated 2 times for credi**t.**

DAA 1202
Ballet Basics for Pre-Majors
1 Credit
Ballet Basics is a studio course designed to introduce students who plan to further pursue dance with a foundation knowledge of ballet. The emphasis in this class will be placed upon attaining correct body alignment, positions of the arms and legs, and ability to properly execute ballet steps. Students will learn ballet vocabulary while developing flexibility, strength and musicality. This is a studio course and may be re peated 2 times for credit.

DAA 1204
Ballet II
2 Credits
Ballet II is a continuation of Ballet I. Student experiences an in tensification of barre work through the use of more complex coordination of the arms and legs. Intensified center work in cludes more complex floor patterns to develop the use of space in movement sequences. Introduction to steps requiring an ad vanced beginning expertise in ballet. Leotards, tights and ballet shoes are required. Attendance at and written critiques of dance performances will provide deeper insight into the dance field. May be repeated for credit for a maximum of 4 credit hours.

DAA 1610L
Dance Composition I
2 Credits
This creative studio course examines basic tools of the choreo graphic craft. Students gain experience in structural movement from simple phrases to complex organizational units through motif development, exploration of shape, space, time, transi tions and basic compositional forms. The student will explore solo, partner and group structures and use various devices to create their own artistic expressions. Reading, writing and crit ical analysis of dance included.

DAA 1680L
Dance Ensemble
1 Credit
This creative studio course provides an opportunity for dance performers to work in a repertory company and to explore the various devices and skills of ensemble performance. Culmi nates in a stage performance. This course is repeatable for elec tive credit. Prerequisite: Audition required.

DAA 1900
Dance Practicum
1 Credit
This activity/analysis course provides for the expansion of the student's range of expression and performance/production or pre-professional skills through a directed study experience. Working with a dance faculty advisor, the student will choose, refine, develop, document and present a project whose intent will be the increase of the student's mastery of selected skills from the coursework attempted to date.
Prerequisite: Audition or consent of instructor.

DAA 1931-9
Special Topics in Dance
1 Credit
This course is designed to allow flexibility for presenting a va riety of selected topics related to dance. Topics will require both an applied and theoretical approach. Examples of topics include: labanotation, technology, dance pedagogy, etc.

DAA 2105
Modern Dance III
2 Credits
This studio course is intended to further the understanding of the principles of modern dance technique through more com plex exercises and exploration of movement dynamics while developing speed in movement analysis and synthesis. Intri cate rhythmical structures and increased spatial awareness will challenge students. Continuing critical analysis will be ex pected, along with a sharpening of both the student's overall dance knowledge and aesthetic understanding of the dance form. This course may be taken twice for credit.
Prerequisite: Audition or Instructor Permission

DAA 2106
Modern Dance IV
2 Credits
This studio course is a continuation of Modern Dance III. Em phasis is on expanding the technical training of the student by increasing complexity of movement capabilities. More empha sis will be placed spatial awareness, rhythmical structures, ex ploration and on partnering. Continuing critical analysis will be expected, along with a sharpening of both the student's overall knowledge and aesthetic understanding of the dance form. The course will focus more attention on the student's in dividual dance preparation. Attendance at and written cri tiques of dance performances will provide deeper insight into the dance field. This course may be taken twice for credit.
Prerequisite: Audition or Instructor Permission

DAA 2205
Ballet III
2 Credits
The continuation of ballet training at the beginning of the inter mediate level. Emphasis is on strength and technical develop ment through the skilled execution of intermediate level steps and center floor combinations. Uses the technical demands of ballet to further develop stamina and to increase expertise in spatial awareness. Attendance at and written critiques of dance performances increase the student observation and analytical skills.
Prerequisite: Audition or Instructor Permission

DAA 2206
Ballet IV
2 Credits
Ballet IV is a continuation of Ballet III. Student experiences an intensification of barre work through the use of more complex coordination of the arms and legs. Intensified center work in cludes more complex floor patterns to develop the use of space in movement sequences. Introduction to steps requiring an ad vanced beginning expertise in ballet. Introduction of pointe work if student proficiency is met. Attendance at and written critiques of dance performances will provide deeper insight into the dance field. This course may be taken twice for credit.
Prerequisite: Audition or Instructor Permission

DAA 2500L
Jazz Dance
1 Credit
Jazz dance is a studio course designed to introduce the student to the historical development of modern jazz dance, its tech nique, and methods of expression through exercise, locomo tion, and non-locomotion. Emphasis is placed on technique, terminology, movement combination and historical infor mation. This course may be taken twice for elective credit.

DAA 2611
Dance Improvisation
2 Credits
Dance Improvisation is a studio course that challenges stu dents to explore movement through spontaneous problem-solving. The course will evoke the students' creative individu ality and sense of ensemble. Students are guided through a se ries of excises that uses sensorial and kinesthetic engagement.

Essential tools of improvisation will be acquired. This course is repeatable twice for credit.

DAN 1600C
Music for Dance
2 Credits
The study of music and its relationship to the dancer. In addi tion to basic rhythmic structures the student will learn to use them as a tool in teaching dance and in choreography. The stu dent will further gain insight into the process of selecting ap propriate music for various choreographic projects.

DAN 1750
Dance Conditioning
2 Credits
Conditioning for strength, tone, flexibility and posture in dance in order to enhance optimal performance. The class serves as a laboratory for movement theory, body alignment and somatic techniques. May be repeated with a change of modality (i.e., Pilates, Body Mind Centering, Yoga) up to six credits.

DAN 2100
Introduction to Dance
3 Credits
Introduction to Dance includes aesthetic, vocational, social and historical aspects of world dance forms, including selections from the Western canon. This course is an introductory class that examines dance as a primary mode of human expression and communication. This course introduces dance as an art form and will enhance knowledge of the historical, cultural and aesthetic aspects of dance. Students encounter the basic content and methodology of the principle areas of knowledge of dance through an examination of its related systems, roles, and structures. Reading, writing, critical analysis and some physical activity are included.
Prerequisites: College level reading and writing skills are re quired.

DEH 1002
Dental Hygiene Instrumentation
1 Credit
Dental Hygiene Instrumentation introduces the student to the theory and practical skills necessary for basic instrumentation. Laboratory sessions are included to demonstrate proficiency in utilizing dental hygiene instruments and dental charting. Ad ditional topics that will be covered in lecture include profes sionalism and ethics, communication skills, asepsis and maintenance of hand instruments and hand pieces, patient as sessment, oral prophylactic procedures, and dental charting.
Co-requisites: DEH 1002L, DES 1020C

DEH 1002L
Dental Hygiene Instrumentation Laboratory
2 Credits
Dental Hygiene Instrumentation Lab introduces the student to the practical skills necessary for basic instrumentation. Labora tory sessions are included to demonstrate proficiency in utiliz ing dental hygiene instruments and dental charting. Additional topics that will be covered in laboratory include professionalism and ethics, communication skills, asepsis and maintenance of hand instruments and hand pieces, patient as sessment, oral prophylactic procedures, and dental charting.
Co-requisites: DEH 1002, DES 1020C

DEH 1130
Embryology and Histology
1 Credit
A comprehensive study of the embryonic, fetal, and postnatal development, and microanatomy of the cells and tissues that comprise the head, neck and oral cavity. Lecture topics include development and histology of the structures of the head, neck, and oral cavity; development and histology of teeth develop ment and histology of the tooth supporting structures; and de velopment and histology of orofacial structures.
Prerequisite: DES 1020C

DEH 1720
Preventive Dentistry
1 Credit
This is a one-hour credit course designed to introduce the stu dent to the practice and philosophy of preventive dentistry. The student will learn the roles of the dental hygienist, meth ods of dental biofilm control, formation of tooth deposits, stains, and dental caries, oral physiotherapy, inter dental care, oral health care products and the use of fluorides and sealants. Proper communication and behavior modification skills are emphasized to facilitate the role of the dental hygienist as an educator.

DEH 1800C
Clinical Dental Hygiene I
3 Credits
Clinical Dental Hygiene I is the first term for direct patient care. Students apply the principles and perform clinical activi ties for the prevention of oral disease, including data collec tion, prophylaxis, application of prevention agents, and oral home care instructions. This is a combined course with class room interactions and clinical experience. Students are re quired to successfully complete a number of procedures.
Prerequisites: DEH 1002, DEH 1002L, DES 1800 and DES 1800L

DEH 1802C
Clinical Dental Hygiene II
2 Credits
DEH 1802C is a continuation of DEH 1800C. It is a combined course that provides discussion of clinical activities along with clinical experience. This is the second term for direct patient care. Students apply the principles and perform clinical activi ties for the prevention of oral disease, including patient assess ment, treatment planning, scaling, debridement, root planning, application of preventive agents, oral irrigation and antimicro bial agents, treatment of hypersensitivity, and oral home care instructions. Additional topics include oral communication skills, instrument sharpening, pulp vitality testing, special needs patients, nutritional counseling, ultra-sonics, and air pol ishing. Students are required to successfully complete a num ber of procedures.

Prerequisite: DEH 1800C

DEH 1811
Dental Ethics, Jurisprudence
1 Credit
This course is designed to provide knowledge of professional ethics and legal responsibilities, professional organizations, state and dental practice acts and continuing education regula tions and requirements. Dental office management will be in troduced to provide dental hygiene students with the business and professional skills necessary to practice in an office and/or alternate practice setting. Emphasis will be placed on the stu dent's ethical and legal roles as a dental hygienist and on the business aspects of the profession. In addition, preparation for the National Board examination and test taking skills will be covered.
Prerequisites: DEH 2804C, DEH 2702
Co-requisite: DEH 2702L

DEH 2300
Pharmacology and Oral Medicine
3 Credits
Pharmacology, oral medicine, anesthesiology, and dental emergencies introduces principles of basic pharmacology as they pertain to the practice of dentistry and dental hygiene. It emphasizes actions and reactions of medications commonly used in the dental office or taken by dental patients. Topics in clude terminology, pharmaceutical references, prescriptions and abbreviations, pharmacokinetics, drugs used in dentistry and their pharmacokinetics, drugs that may alter dental treat ment and their pharmacokinetics, drugs used in dental emer gencies, drug abuse, and nitrous oxide monitoring (as mandated in the Florida State Administrative Code Chapter 64B 14).
Prerequisites: DEH 1802C, DEH 2400
Co-requisites: DEH 2804C, DEH 2809

DEH 2400
General and Oral Pathology
3 Credits
General and Oral Pathology presents the principles of general pathology in relation to diseases of the teeth, soft tissue, and supporting structures of the oral cavity, as well as general pathologic conditions affecting the head and neck. Topics in clude terminology and diagnostic procedures, variants of nor mal conditions, benign conditions of unknown cause, inflammation and repair, caries and pulpal pathology, immune response, oral diseases with immunological pathogenesis, au toimmune diseases, infectious diseases, embryology of the head and neck, developmental disorders of the soft tissues and teeth, developmental cysts, neoplasia, odontogenic tumors, other tumors of oral structures, genetics, genetic syndromes and diseases of the head and neck, general pathologic con tions affecting the oral structures, TMJ disorders, and dental implants.
Prerequisites: DEH 1130, MCB 2000 and MCB 2000L
Co-requisites: DEH 1800C, DEH 2602

DEH 2602
Periodontology
2 Credits
This course provides information on the principles of perio dontology pertinent to dental hygiene practice. Topics include tissues of the periodontium, epidemiology of periodontal dis eases, classification of periodontal diseases, disease prevention, disease treatment and management, drug therapy, immunol ogy and host defense mechanisms, microorganisms associated with periodontology, surgical and nonsurgical treatment, im plantology and maintenance, and periodontal endodontic emergencies.
Prerequisites: DEH 1130, MCB 2000 and MCB 2000L
Co-requisites: DEH 1800C, DEH 2400

DEH 2604
Periodontology II
1 Credits
This course provides information on the principles of perio dontology pertinent to dental hygiene practice. Topics include periodontal care modifications for systemic conditions, deci sion making during treatment planning, helping patients change behavior, periodontal surgical concepts, periodontal maintenance, periodontal/endodontic emergencies, implantol-ogy and maintenance, and future directions of periodontal pa tients.
Prerequisite: DEH 2602

DEH 2702
Community Dental Health
2 Credits
This course is designed to provide knowledge of attitudes, skills, and behaviors necessary to promote dental health and prevent disease through organized community-based pro grams. Students will be responsible for assessing, planning, implementing, and evaluating procedures in a community oral health program.
Prerequisite: DES 1830C
Co-requisites: DEH 2804C, DEH 2809

DEH 2702L
Community Dental Health Practicum
1 Credit
This course is designed to provide the student with commu nity-based experiences in public health settings for the promo tion of dental health and the prevention of dental disease. Students will apply principles of program assessment, imple mentation, and evaluation procedures for all sites visited.
Prerequisite: DEH 2702
Co-requisites: DES 2502, DEH 1811

DEH 2804C
Clinical Dental Hygiene III
3 Credits
Clinical Dental Hygiene III, a continuation of DEH 1802C, is a combined course that provides discussion of clinical activities along with clinical experience. This is the third term for direct

patient care. Students apply the principles and demonstrate improved patient care skills while performing clinical activities for the prevention of oral disease, including patient assess ment, treatment planning, scaling, debridement, root planning, ultra-sonics, and air polishing application of preventive agents, oral irrigation and antimicrobial agents, and oral home care in

Prerequisites: DEH 1802C, DES 1830C
Co-requisites: DEH 2300, DEH 2809

DEH 2806C
Clinical Dental Hygiene IV
4 Credits
Clinical Dental Hygiene IV is a continuation of DEH 2804C. This course combines advanced clinical activities with previ ous clinical experience. This is the fourth term for direct pa tient care, which emphasizes quality patient care, time constraints, and communication skills. Students will continue to perform clinical activities for the prevention of oral disease, including patient assessment, treatment planning, scaling, deb ridement, root planning, ultra-sonics, and air polishing appli cation of preventive agents, oral irrigation and antimicrobial agents, and oral home care instructions. Additional experience will include office management, legal aspects, ethics, dental hygiene practice settings, dentistry and dental hygiene regula tion, and general office procedures. Students are required to successfully complete an advanced number of procedures.
Prerequisites: DEH 2804C and DEH 2809
Co-requisites: DEH 1811 and DES 2502

DEH 2809
Advanced Clinical Procedures
2 Credit
Advanced Clinical Procedures is a lecture course that is a con tinuation of concepts and clinical procedures introduced in previous clinical courses. This course provides discussion of case based studies and the application of specialized care treat ment procedures. Students develop critical thinking skills-based on the application of theory and advanced dental hy giene procedures. Topics include dietary surveys, recall sys tems and applied techniques with an emphasis on patients having specialized needs and unusual case factors that may complicate routine care.
Prerequisites: DEH 1802C, DEH 2400
Co-requisites: DEH 2300, DEH 2804C

DEP 1004
Developmental Psychology of the Life Span
3 Credits
Emphasizes developmental and psychosocial growth from conception to death. Topics include Piaget's stages of cognitive development, Erickson's "Eight Ages," the concept of maturity, changing personalities in later adulthood, theories of aging and death and dying.
Prerequisite: College level reading and writing skills are re quired.

DEP 1004H
Honors Developmental Psychology of the Life Span
3 Credits
Same as for DEP 1004 with honors content. Honors Program permission required.
Prerequisite: College level reading and writing skills are re quired.

DEP 2102
Child Development
3 Credits
Focuses on the development and psychosocial aspects of the child through adolescence. Topics include heredity, maturity and social determinants of child behavior. College level read ing and writing skills are required.

DES 1020C
Oral, Head, and Neck Anatomy
2 Credits
Oral, Head and Neck Anatomy is a detailed study of the gross anatomy of the head and neck, and the external and internal morphology of the primary and permanent dentition. Anatom ical models of the skull and teeth along with videos and work books allow the student to apply didactic information in the laboratory setting.
Co-requisites: DEH 1002, DEH 1002L

DES 1022
Head, Neck, and Dental Anatomy
2 Credits
This dental assisting program course is a detailed study of the gross anatomy of the head and neck, and the external and in ternal morphology of the primary and permanent dentition. Anatomical models of the skull and teeth along with videos and workbooks allow the student to apply didactic infor mation in the laboratory setting.
Co-requisites: DES 1022L

DES 1022L
Head, Neck, and Dental Anatomy Laboratory
1 Credit
This dental assisting program course is a study of the anatomy of the head and neck with emphasis on the maxilla and mandi ble. In addition, the anatomy of the deciduous and permanent definitions and supporting structures will be covered. This course will be taught by lecture, demonstration, hands-on, il lustrations, and use of models.
Co-requisites: DES 1022

DES 1023
Dental Anatomy and Physiology
1 Credit
This dental assisting program course is a study of the develop ment of the human body along with a survey of the structure, growth, and function of the body's organ system along with the diseases of the body.

DES 1052C
Dental Pharmacology/Pain Control
2 Credit
This dental assisting program combination course will provide students with didactics, lab experience, basic knowledge in use of pain control in dental offices, and in the use of Nitrous Ox ide sedation. Additionally, this course provides the student with laboratory experience in taking and monitoring patient vitals as well as monitoring nitrous oxide sedation.

DES 1060
Allied Dental Theory
2 Credits
This dental assisting program course provides the student with fundamental knowledge of embryology and oral histology, mi crobiology, oral pathology, nutrition, and infection control in the dental office.

DES 1100
Dental Materials
2 Credits
Dental Materials focuses on the nature, qualities, composition, and manipulation used in dentistry. The primary goal of this course is to enhance the student's ability to make clinical judg ments regarding the use and care of dental materials based on how these materials react in the oral environment. Lecture top ics include dental material standards, dental material proper ties, impression materials, gypsum products, mouth guards and whitening systems, dental bases, liners and cements, tem porary restorations, classifications for restorative dentistry, di rect restorative materials, indirect restorative materials, polishing procedures for dental restorations, removable dental prostheses, sealants and implants. Students will have hands on laboratory experience in the proper manipulation of dental materials commonly employed in dentistry. Some of the mate rial taught in DES 1100C provides didactic, practical, and clini cal experience necessary for the dental hygiene student to perform expanded functions as required by, and outlined in Florida Statue Title XXXII, Chapter 466, Section 466.024, and in the Florida Administrative Code Chapter 64, Sections B5 16.001, B5 16.002, and B5 16.006 through B5 16.010.
Prerequisites: CHM 1032, CHM 1032L, MCB 2000, MCB 2000L
Co-requisites: DES 1100L

DES 1100L
Dental Materials Laboratory
1 Credit
This course is designed to provide basic knowledge and labor atory practice necessary for the proper manipulation of dental materials commonly employed in dentistry.
Prerequisites: CHM 1032, CHM 1032L
Co-requisites: DES 1100, DES 1830C

DES 1152
Dental Psychology and Communications
1 Credit
This dental assisting program course is designed to introduce students to the basic theories of psychology to have a better understanding of behavioral patterns and how those patterns relate to dentistry. The course will also allow the student a bet ter understanding of verbal and written communication.

DES 1200
Dental Radiology
2 Credits
This course provides the student with fundamental knowledge of the nature, physics and biological effects of radiation to maximize understanding of proper control and safety precau tions to be used in exposing, processing, mounting, and evalu ating diagnostically acceptable radiographs.
Co-requisites: DES 1020C, DES 1200L

DES 1200L
Dental Radiology Laboratory
1 Credit
This course provides the student with laboratory experience in exposing, processing, mounting, and critiquing diagnostically acceptable intraoral and extra-oral radiographs.
Co-requisites: DES 1020C, DES 1200

DES 1201
Dental Radiology
3 Credit
This dental assisting program course provides the student with funda mental knowledge of the nature, physics, and biological effects of radia tion to maximize understanding of proper control and safety precautions to be used in exposing, processing, mounting, and evaluat ing diagnostically acceptable radiographs.
Co-requisite: DES 1201L

DES 1201L
Dental Radiology Laboratory
2 Credit
This dental assisting program course provides the student with laboratory experience in exposing, processing, mounting, and critiquing diagnostically acceptable intraoral and extraoral ra diographs.
Co-requisite: DES 1201

DES 1503
Dental Office Management
1 Credit
This dental assisting program course enables the student to gain knowledge and proficiency in all procedures necessary for office management. The course includes basic computer, equipment maintenance, telephone techniques, ordering sup plies, charting, recall system, appointment control, book-keep ing, scheduling, billing, and insurance procedures. The student will make use of dental software to enhance knowledge for dental office management.

DES 1600
Dental Office Emergencies
2 Credits
This course is designed to teach students basic dental medical emergencies. Special emphasis will be placed on etiology, signs, treatment, prevention of medical emergencies and will provide students with an understanding of protocols, and use of equipment for emergencies in the dental environment.

DES 1601
Dental Office Emergencies
1 Credit
This dental assisting program course is designed to teach students basic dental medical emergencies. Special emphasis will be placed on etiol ogy, signs, treatment, prevention of medical emergencies and will pro vide students with an understanding of protocols, and use of equipment for emergencies in the dental environment.

DES 1800
Introduction to Clinical Procedures
2 Credits
This core course introduces the dental hygiene student to the basic concepts of clinical practice. Topics include the history of dentistry, dental health team members, professional organiza tions, medical/dental history, vital signs, operation and maintenance of dental equipment, operator/patient, four-handed techniques, oral evacuation, dental charting, cleaning of removable appliances, coronal polishing, and fluoride appli cation techniques.
Co-requisites: DES 1800L, DEH 1002 and DEH 1002L

DES 1800L
Introduction Clinical Procedures Lab
1 Credit
This course is designed for the practical application of profes sionalism and clinical procedures. Development of introduc tory skills is practiced in the clinical setting. Demonstration of required procedures is evaluated using preset standards.
Co-requisites: DES 1800, DEH 1002, DEH 1002L

DES 1801
Introduction to Clinical Procedures
4 Credit
This core course introduces the dental assisting student to the basic con cepts of clinical practice. Topics include the history of dentistry, dental health team members, professional organizations, medical/dental his-tory, vital signs, operation and maintenance of dental equipment, opera tor/patient, four-handed techniques, oral evacuation, dental charting, cleaning of removable appliances, coronal polishing, and fluoride appli cation techniques
Co-requisite: DES 1801L

DES 1801L
Introduction to Clinical Procedures Laboratory
1 Credit
This core dental assisting program course is designed for the practical application of professionalism and clinical proce dures. Development of introductory skills is practice in the clinical setting. Demonstration of required procedures is evalu ated using preset standards.
Co-requisite: DES 1801

DES 1805
Dental Clinical Practice I
4 Credit
This dental assisting program course is designed to introduce students to the basic theories and procedures involved in vari ous dental specialties including restorative/cosmetic dentistry endodontic, periodontics, pediatric dentistry, oral surgery, or thodontics, and fixed and removable prosthodontics.
Prerequisites: DES 1801 and DES 1801L
Co-requisite: DES 1805L

DES 1805L
Dental Clinical Practice I Laboratory
4 Credit
This dental assisting program course is designed to give the student closely supervised instruction and clinical experience involving patients and a dentist performing all functions re quired of a general dentistry chair-side assistant and specialty dental. The student will have additional responsibilities in the area of radiography, sterilization, patient management, ex panded functions, and preventive oral hygiene care. Seminar Discussions will be conducted for students to share clinical ex periences.
Prerequisites: DES 1801 and DES 1801L
Co-requisite: DES 1805

DES 1830C
Expanded Duties for Dental Hygienists
2 Credits
Expanded Duties for Dental Hygienists is a combined lecture and clinical course designed to provide didactic, practical, and clinical experience necessary for the dental hygiene student to perform expanded functions as required by, and outlined in Florida Statue Title XXXII, Chapter 466, Section 466.024, and in Florida Administrative Code Chapter 64, Sections B5 16. 001, B5 16.002, and B5 16.006 through B5 16.010.
Prerequisite: DEH 1800C
Co-requisites: DES 1100, DES 1100L, DEH 1802C

DES 1832
Expanded Functions
4 Credits
This dental assisting program course is designed to provide students with basic knowledge and clinical practice necessary for the dental assistant to perform the expanded functions per mitted by the rules and regulations of the Florida state board of dentistry. This course also includes instruction on the his tory of orthodontics, malocclusion, orthodontic vocabulary,

photographs, bracket slot, wires, tooth movement, and all phases of bonding, wires, headgear, and retainer finishing

DES 1832L
Expanded Functions Laboratory
2 Credits
This dental assisting program course is designed to provide basic knowledge and clinical practice necessary for the dental assistant to perform the expanded functions permitted by the rules and regulations of the Florida state board of dentistry. This lab course will also allow the dental assisting student to practice the state of Florida's orthodontics expanded functions
Co-requisite: DES 1832

DES 1840
Preventive Dental Health
2 Credits
Dental assisting program students are introduced to the phi losophy and principle of preventive dentistry. Emphasis is on the dental auxiliary's role in patient's education and care. Top ics include development of plaque and calculus, development of carious lesions, plaque control techniques for the patient, fluorides, tooth stains. Plaque indices, patient education and motivation, caries activity testing, and smoking cessation

DES 1855L
Dental Clinic Practicum
5 Credits
This dental assisting program course will provide the student the opportunity to continue application and practice of all gen eral chair-side and specialty dental assisting functions. The stu dent will participate in supervised internships in private dental offices and special clinical settings. The student will continue building skills as a general dentistry chair-side assis tant. Through observation and chair-side, the student will also be doing some dental specialty procedures.

DES 1932
Dental Assisting Seminar
1 Credit
This dental assisting program course is designed to provide students with preparation for the Dental Assisting National Board Exam and to provide the student with an understanding of ethics, jurisprudence, and risk managements as related to dentistry. In addition, seminar discussions will be conducted to share clinical experiences with students and faculty

DES 2051
Pain Control in Dentistry
2 Credits
This course acquaints the dental hygienist with the academic and practical aspects of local anesthetics in dental patients. It provides the student with the required training and infor mation to safely and effectively relieve pain and reduce anxi ety in the dental patient. It requires that the student apply knowledge from pharmacology, biochemistry, physiology and anatomy. The student should also realize the competency and ultimate proficiency in the administration of local anesthesia requires repeated administration and self-reeducation. This course is specifically designed to obtain certification for local anesthesia in the State of Florida.
Prerequisites: DES 1020C
Co-requisite: DES 2051L

DES 2051L
Pain Control in Dentistry Laboratory
1 Credit
This course acquaints the dental hygienist with the academic and practical aspects of local anesthetics in dental patients. It provides the student with the required training and infor mation to safely and effectively relieve pain and reduce anxi ety in the dental patient. It requires that the student apply knowledge from pharmacology, biochemistry, physiology and anatomy. The student should also realize the competency and ultimate proficiency in the administration of local anesthesia requires repeated administration and self-reeducation. This course is specifically designed to obtain certification for local anesthesia in the State of Florida.
Prerequisites: DES 1020C
Co-requisite: DES 2051

DES 2101
Dental Materials
3 Credit
This dental assisting program course provides the student with the theoretical knowledge of the composition, preparation, and application of materials commonly used in dentistry.
Co-requisite: DES 2101L

DES 2101L
Dental Materials Laboratory
2 Credit
This dental assisting program course provides the student basic knowledge and laboratory practice necessary for the proper manipulation of dental materials commonly employed in dentistry.
Co-requisite: DES 2101

DES 2502
Office Management
1 Credit
This course enables the student to gain knowledge and profi ciency in all procedures necessary for office management. The course includes telephone techniques, ordering supplies, recall system, appointment control, bookkeeping, billing, and insur ance procedures.
Prerequisites: DEH 2804C, DEH 2809
Co-requisite: DEH 2702L

DIE 1121
Management of Food and Nutrition Services
3 Credits
This course introduces students to food service management in non-commercial operations such as hospitals, schools, and long-term care facilities. Content includes food service man agement, personnel and communications, sanitation and safety, and business operations.
Prerequisite: FSS 2100 and HFT 2210 with a minimum grade of C.
Co-requisite: FSS 1500 and FSS 2120

DIE 2210
Nutrition Therapy I
3 Credits
This course presents information on the fundamentals of nutri tion science, medical nutrition therapy, nutrition screening and documentation, and nutrition intervention and client care.
Prerequisite: DIE 1121 and HUN 2203 with a minimum grade of C.
Co-requisite: DIE 2271

DIE 2271
Clinical Nutrition II
3 Credits
This course provides and advanced study of dietetics and the application of the science of nutrition to various disease states.

DIE 2940
Dietary Manager Food Practicum
3 Credits
This course provides field experience hours to meet required competencies in the areas of foodservice, personnel and communications, and food sanitation and safety as identified by the association of food and nutrition professionals (ANFP). The content of these hours is determined by the exam content outline for the certified dietary manager (CDM) credentialing exam.
Prerequisites: DIE 1121 with a minimum grade of C and College-level reading, writing and math skills required.

DIE 2942
Dietary Manager Clinical Practicum
3 Credits
This course provides field experience hours to meet required competencies in nutrition, foodservice, personnel and commu nications, food sanitation and safety, and business operations as identified by the association of food and nutrition profes sionals (ANFP). The content of these hours is determined by the exam content outline for the certified dietary manager (CDM) credentialing exam.
Prerequisite: DIE 2210 with a minimum grade of C, and col lege-level reading, writing, and math skills are required.

DSC 1002
Introduction to Terrorism
3 Credits
This course teaches the foundations of national security as it relates to international and domestic terrorism and the United States engagement in the war against terrorism. This course is a survey of the history and development of terrorist organiza tions and extreme political militancy both in the United States and the world.

DSC 1003
Introduction to Homeland Security
3 Credits
This course provides an introspective review of the history U.S. Homeland Defense Initiative and will explore the evolu tion of homeland security in the United States including an overview of the government agencies and laws involved.

DSC 2033
Introduction to Terrorist Tactics and Weapons
3 Credits
This course introduces students to various types of weapons of mass destruction. The student will be introduced to basic princi ples of weapons of mass destruction, recognition, identification, decontamination, and treatment protocols. The student will un derstand the importance of personal protective equipment and its proper uses and understand the toxicology, physical and chemical properties associated with weapons of mass destruction.

DSC 2570
Introduction to Cyber-Terrorism
3 Credits
This course is designed to provide students with a general un derstanding of what cyber-terrorism is and the major issues as sociated with cyber-security. This course will cover the technological, social, and legal controls implemented by gov ernment and private entities to secure electronic communica tions and data networks from manipulation, theft and attack by enemies of the state, terrorists, hackers, competitors, and other adversaries. Students will learn basic computer termi nology, history, policy, laws, and enforcement protocols as it related to home security.

DSC 2590
Intelligence Analysis and Security Management
3 Credits
This course examines intelligence analysis and its indispensa ble relationship to the security management of terrorist attacks, man-made disasters and natural disasters. It also explores vul nerabilities of our national defense and private sectors, as well as the threats posed to these institutions by terrorists, man-made disasters, and natural disasters. Students will discuss substantive issues regarding intelligence support of homeland security measures implemented by the United States and ex plore how the intelligence community operates.

EAP 0100
Speech/Listening I
3 Credits
A low beginning listening and speaking course in which stu dents develop the ability to understand and participate in brief

conversations on familiar topics and begin to develop their pronunciation. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: Required minimum score on placement test

EAP 0120
Reading I
3 Credits
A low beginning course for EAP students with emphasis on comprehension of limited written materials. Students must ob tain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: Required minimum score on placement test

EAP 0140
Writing I
3 Credits
A low beginning writing course in which students develop the ability to write grammatically correct sentences and learn basic organizational skills for paragraph writing. Students must ob tain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: Required minimum score on placement test

EAP 0160
Grammar I
3 Credits
Low beginning grammar course for EAP students with empha sis on basic verb tenses and simple sentence patterns. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: Required minimum score on placement test

EAP 0200
Speech/Listening II
3 Credits
A high beginning listening and speaking course in which stu dents continue to develop their ability to understand and par ticipate in conversations and further develop their pronunciation skills. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0100

EAP 0220
Reading II
3 Credits
A high beginning reading course for EAP students with em phasis on developing reading skills and vocabulary. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0120.

EAP 0240
Writing II
3 Credits
A high beginning writing course in which students continue to develop writing skills in the context of guided discourse with an emphasis on logical organization and mechanics. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0140

EAP 0260
Grammar II
3 Credits
A high beginning grammar course for EAP students with em phasis on basic grammatical structures and statement/ques tion patterns. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0160

EAP 0300
Speech/Listening III
3 Credits
A low intermediate listening/speaking course in which stu dents continue to develop their ability to understand and par ticipate in conversations and discussions, and further improve their pronunciation. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0200

EAP 0320
Reading III
3 Credits
A low intermediate reading course for EAP students with em phasis on vocabulary expansion and application of critical reading skills. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0220

EAP 0340
Writing III
3 Credits
A low intermediate writing course in which students continue to develop the writing skills necessary to produce organized paragraphs on a variety of academic topics. Students must ob tain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0240

EAP 0360
Grammar III
3 Credits
A low intermediate grammar course for EAP students with an emphasis on increasing the accuracy of grammatical structures appropriate to classroom discussion and the writing of aca demic paragraphs. Students must obtain a grade of "C" or bet ter in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0260

EAP 0400
Speech/Listening IV
3 Credits
A high intermediate listening/speaking course in which stu dents continue to develop their ability to understand and par ticipate in more complex classroom discussions. Students must

obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0300

EAP 0420
Reading IV
3 Credits
A high intermediate reading course for EAP students with em phasis on extensive reading and the enhancement of critical reading skills. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0320

EAP 0440
Writing IV
3 Credits
A high intermediate writing course in which students further develop their writing skills by acquiring the ability to write more sophisticated structured academic paragraphs and es says. Students must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0340

EAP 0460
Grammar IV
3 Credits
A high intermediate grammar course for EAP students with emphasis on verb tenses and complex syntactic structures. Stu dents must obtain a grade of "C" or better in order to advance to the next level of EAP coursework.
Prerequisite: EAP 0360

EAP 1520C
Reading V
4 Credits
A low advanced college-level reading skills course in which students will be equipped with the skills necessary for the effi cient processing of general academic texts. This course in cludes an integrated reading skills lab designed to increase student's active and passive vocabulary. This class takes the place of a college-level elective.
Prerequisite: EAP 0420

EAP 1540C
Writing V
4 Credits
A low advanced college-level writing course for EAP students in which students begin to write basic, structured academic es says with an emphasis on accuracy and cohesiveness. Stu dents also learn to execute other related writing tasks. This course includes an integrated grammar lab designed to help students comprehensively review and expand the grammatical structures necessary to write academic English. This class takes the place of a college-level elective.
Prerequisites: EAP 0440, EAP 0460

EAP 1620C
Reading VI
4 Credits
A high advanced college-level reading skills course in which students will further develop the skills necessary for the effi cient processing of general academic texts. This course in cludes an integrated reading skills lab designed to increase student's active and passive vocabulary. This class takes the place of a college-level elective.
Prerequisites: EAP 1520C or EAP 1520 and EAP 1520L

EAP 1640C
Writing VI
4 Credits
A high advanced college-level writing course for EAP students in which students develop the ability to write a variety of col lege level essays and other academic writing tasks with sophis tication and fluency consistent with academic English conventions. This course includes an integrated writing skills lab designed to further increase students' grammatical accu racy. This class takes the place of a college-level elective.
Prerequisites: EAP 1540C or EAP 1540 and EAP 1540L

ECO 2013
Principles of Macroeconomics
3 Credits
In this course, students will learn the foundations of macroeco nomics as the branch of economics concerned with how deci sion-making, in an environment of scarcity, maps onto the aggregate economy. Students will examine theories and evi dence related the following core set of topics: national income determination, money, monetary and fiscal policy, macroeco nomic conditions, international trade and the balance of pay ments, and economic growth and development.
Prerequisites: College level reading, writing and math skills are required.

ECO 2023
Principles of Microeconomics
3 Credits
Introduction to the theory of the market system with emphasis on supply and demand. This course includes analysis of price and output decisions under different market structures.
Prerequisites: College level reading, writing and math skills are required.

EDF 1005
Introduction to the Teaching Profession
3 Credits
This is a survey course including historical, sociological and philosophical foundations of education, governance and fi nance of education, education policies, legal, moral and ethical issues and the professionalism of teaching. Students will be provided information on the Florida Educator Accomplished Practices, Florida Standards, and the Professional Educator Competencies. Students are required to complete a minimum of 15 hours of field-based experience with children and

youth in schools or similar settings and not via virtual modes of film or Internet.
Prerequisites: College level reading and writing skills are re quired.

EDF 2085
Introduction to Diversity for Educators
3 Credits
Designed for the prospective educator, this course provides the opportunity to explore issues of diversity, including an under standing of the influence of exceptionalities, culture, family, gender, sexual orientation, and socioeconomic status, religion, languages of origin, ethnicity and age upon the education ex perience. Students will explore personal attitudes toward di versity and exceptionalities. Students will be provided information on the Florida Educator Accomplished Practices, Florida Standards, and the Professional Educator Competen cies. A minimum of 15 hours of field-based experience work ing with diverse populations of children and youth in schools or similar settings is required. The field experience should not be via virtual modes of film or Internet. College level reading and writing skills are required.
Prerequisite: EDF 1005

EDP 2002
Educational Psychology
3 Credits
Focuses on the teaching/learning process, including the condi tions and determinants necessary for efficiency and the appli cation of related psychological principles. College level reading and writing skills are required.
Prerequisite: PSY 2012

EEC 1300
Planning the Early Childhood Program
3 Credits
Introduces planning strategies for creating significant learning experiences for children 3 to 5 years of age. Emphasis is on ma turity levels, daily activities, assessment and development of personal teaching techniques.

EEC 1401
The Family and Early Childhood Education
3 Credits
Addresses professional responsibilities in working with par ents, with an emphasis on sharing information, joint problem solving, home visits and parents meetings.

EEC 1521
Early Childhood Center Management
3 Credits
Covers the management and delivery of educational services, with an emphasis on planning, equipment, space, security, and educational goals.

EEC 1601
Observing and Recording Children's Behavior
3 Credits
This course is designed to provide the student with an over view of the importance of observation, screening and assess- ment in planning developmentally appropriate programs for young children. The course covers the use of a variety of obser- vational methods and developmentally appropriate assess ment practices. Ten hours of observation in a licensed early childhood program is required.

EEC 1603
Child Guidance
3 Credits
This course provides child guidance and classroom manage ment strategies to foster the psychosocial development of young children. Positive guidance is emphasized. Ten hours of observation in a licensed early childhood program is required.

EEC 1721
Physical Development in the Early Childhood Setting
3 Credits
Focuses on teaching techniques for helping students develop large and small motor coordination and improve balance. Top ics include maturational changes and growth patterns.

EEC 1941
Child Care Practicum I
3 Credits
Presents the opportunity to practice skills and translate theo retical knowledge into developmentally appropriate early childhood education experiences (240 clock hours).
Prerequisite waiver by permission of instructor required.
Prerequisite: EEC 1521
Co-requisite: EEC 1300

EEC 1943
Child Care Practicum II
3 Credits
A continuation of EEC 1941; presents the opportunity to prac tice skills and translate theoretical knowledge into develop mentally appropriate early childhood education experiences (240 clock hours).
Prerequisites: EEC 1941.

EEC 2270
Meeting Special Needs of Children in Groups
3 Credits
Focuses on the special language and cultural needs of pre school disadvantaged students. Emphasis is on the strategies for increasing communication between children and adults, communication as part of the socialization process, and the pros and cons of English as a second language.

EEC 2271
Children with Special Needs
3 Credits
Focuses on identifying and understanding the needs of chil dren with cultural differences, the handicapped, gifted and tal ented. Emphasis is on mainstreaming in the classroom setting.

EEC 2527
Legal and Financial Issues in Child Care
3 Credits
This course is designed to provide advanced-level Director cre dential training in early childhood management. The course fo cuses on financial planning, budgeting, compensation, financial resource development, marketing, record keeping, le gal obligations and regulatory requirements.
Prerequisite: EEC 1521

EEC 2732
Health, Safety and Nutrition for Young Children
3 Credits
This course will provide students with knowledge of appropri ate health, safety, and nutritional practices implemented in de velopmentally-appropriate educational programs for children ages birth through eight years. Health and safety regulations, legal issues, community resource and emergency procedures are addressed. Ten hours of observation in a licensed early childhood program is required.
Prerequisite: Current pediatric first aid and CPR certification.

EET 1036C
Basic AC and DC
3 Credits
This course is for the student who has previously taken EET 1083C, Electronic Orientation, or is taking both classes in the same semester. It covers voltage, current, resistance, and power concepts in DC and AC circuits. It also includes prob lem solving in AC and DC circuits using Ohm's Law with an emphasis on constructing, measuring performance, trouble shooting, and repairing circuits. Laboratory exercises are in cluded. College level reading, writing and math skills required. Prerequisites: MAC 1105.

EET 1037C
Circuit Analysis
3 Credits
Covers electronic filters, resonance, and RC and RL time con stants concepts. Also covers AC and DC theorems used to ana lyze complex circuits. Laboratory activities such as constructing AC and DC circuits, verifying calculated circuit performance, and identifying and repairing circuit faults are included.
Prerequisites: EET 1036C.

EET 1083C
Electronics Orientation
3 Credits
Provides an introduction to computer operating systems, and to computer programs used in the analysis of electronic cir cuits. Also covers the use of electronics laboratory equipment such as digital multi meters, oscilloscopes, function generators, breadboards and trainers used in the program. Basic soldering skills included. Laboratory exercises are included.
Prerequisites: College level reading, writing and math skills re quired.

EET 1141C
Solid State Devices
3 Credits
Covers the basic concepts of solid state devices used in elec tronics with an emphasis on semiconductor materials, diodes, transistors, (bipolar and FET), thyristors, basic operational am plifiers and related test equipment. Laboratory exercises are in cluded. Prerequisite: EET 1036C.

EET 1142C
Solid State Circuits
3 Credits
Covers the basic concepts of analog circuits. Topics include multistage amplifiers, linear integrated circuits, basic power supplies and filters, audio amplifiers, oscillators, motor con trols, cathode ray tubes, optoelectronic devices and related test equipment.
Prerequisite: EET 1141C

EET 2155C
Linear Integrated Circuits
3 Credits
Covers analog integrated circuits, operational amplifiers, power supply regulator feedback, waveform generators, spe cial amplifiers and frequency response. Laboratory exercises are included. A special fee will be charged for this course.
Prerequisite: EET 1142C

EET 2326C
Communications Systems I
3 Credits
Provides an introduction to the communications field. Topics include AM, FM, television and single sideband multiplexing. Laboratory exercises are included. A special fee will be charged for this course.
Prerequisite: EET 2155C

EET 2939C
Electronics Engineering Technology Capstone
3 Credits
The capstone course is designed for the student to demonstrate his/her knowledge and skills applicable to the degree core competencies and outcomes. The course is designed as a pro ject-based experience. The student's project requirements will be designed in concert with his/her area of curriculum empha sis.
Prerequisite: EET 2155C. College level reading, writing, and math skills are required.

EGN 2122C
Geometric Dimensioning and Tolerancing
3 Credits
This course provides the fundamentals of geometric dimen sioning and tolerancing (gd and t) as based on the American Society of Mechanical Engineers standard ASME Y14.5m 1994. The coverage of topics includes geometric tolerancing symbols and terms, the rules of geometric dimensioning and toleranc ing, datums, material condition symbols, tolerances of form, profile, orientation and run-out, and location tolerances.

Prerequisite: ETI 1403

EME 2040
Introduction to Technology for Educators
3 Credits
Application of instructional design principles for the use of technology to enhance the quality of teaching and learning in the classroom. The course includes hands-on experience with educational media, emerging technologies, and hardware, soft ware, and peripherals for the personal computer as well as data-driven decision-making processes. Identification of ap propriate software for classroom applications, classroom pro cedures for integrating technologies with emphasis on legal and ethical use, and effective instructional strategies for teach ers and students in regard to research, analysis, and demon stration of technology. Students will be provided an overview of the Florida Educator Accomplished Practices, Sunshine State Standards, the Professional Educator Competencies and the national Education Technology Standards. College level read ing and writing skills are required.
Prerequisite: EDF 1005

EMS 1119
Emergency Medical Technician
7 Credits
Provides the lecture, theory and discussion in compliance with the National Emergency Medical Services Education Standards the Emergency Medical Technician. Also includes additional content related to esophageal intubation, intravenous fluid maintenance and automated defibrillation.
Prerequisites: College-level reading and writing and MAT 0018 or equivalent HCC placement test scores.
Co-requisites: EMS 1119L, EMS 1431

EMS 1119L
EMT Practicum
3 Credits
Provides the competency-based practice and testing of skills presented in the companion lecture course. Those skills include all the required skills of the National Emergency Medical Ser vices Education Standards for the Emergency Medical Techni cian plus the additional skills of esophageal intubation, intravenous maintenance and automated defibrillation. In cludes strenuous skills such as lifting and patient carrying. A special fee will be charged for this course.
Prerequisites: College-level reading and writing and MAT 0018 or equivalent HCC placement test scores.
Co-requisites: EMS 1119L, EMS 1431

EMS 1431
EMT Clinical
2 Credits
Provides the field experience and hospital clinical portions of the National Emergency Medical Services Education Standards for the Emergency Medical Technician. Includes strenuous skills such as lifting and carrying techniques in actual patient care situations. Exposure to blood and blood borne pathogens is possible in-patient care situations. A special fee will be charged for this course. An additional cost for a criminal back ground check is required. Drug testing is required.
Prerequisites: College-level reading and writing and MAT 0018 or equivalent HCC placement test scores.
Co-requisites: EMS 1119L, EMS 1431

EMS 2551C
Advanced Cardiac Life Support
2 Credits
The American Heart Association's Advanced Cardiac Life Sup port Provider course is designed to provide instruction and skill testing of specific therapies for various cardiac emergen cies. The target population for this course is the practicing phy sician, paramedic or critical care nurse. Includes strenuous skills such as lifting and carrying techniques in actual patient care situations.
Prerequisite: Current CPR certification required on the first class day

EMS 2617C
Assessment Based Management and Proficiency
2 Credits
Provides a review of the didactic and practical skills of the par amedic certificate program followed by written and practical examinations.

EMS 2621
Paramedic Phase I
7 Credits
Provides knowledge and skills contained in the 2009 National EMS Education Standards for Paramedic, Module 1: Prepara tory, Module 2: Anatomy and Physiology, Module 3: Medical Terminology, Module 4: Pathophysiology, Module 5: Life Span Development, Module 6: Public Health, Module 7: Pharmacol ogy, Module 8: Airway Management, Respirations and Venti lations, Module 9: Patient Assessment, , Module 13: Special Populations, Module 14: EMS Operations.
Co-requisite: EMS 2621L

EMS 2621L
Paramedic Phase I Practicum
4 Credits
Provides knowledge and skills contained in the 2009 National EMS Education Standards for Paramedic, Module 1: Prepara tory, Module 2: Anatomy and Physiology, Module 3: Medical Terminology, Module 4: Pathophysiology, Module 5: Life Span Development, Module 6: Public Health, Module 7: Pharmacol ogy, Module 8: Airway Management, Respirations and Venti lations, Module 9: Patient Assessment, , Module 13: Special Populations, Module 14: EMS Operations.
Co-requisite: EMS 2621

EMS 2622
Paramedic Phase II
8 Credits
Provides knowledge and skills contained in the 2009 National EMS Education Standards for Paramedic, Module 10: Medicine (specifically, cardiovascular and EKG), Module 11: Shock and Resuscitation, Module 12: Trauma.

Prerequisites: EMS 2621, EMS 2621L
Co-requisite: EMS 2622L

EMS 2622L
Paramedic Phase II Practicum
4 Credits
Provides knowledge and skills contained in the 2009 National EMS Education Standards for Paramedic, Module 10: Medicine (specifically, cardiovascular and EKG), Module 11: Shock and Resuscitation, Module 12: Trauma.
Prerequisites: EMS 2621, EMS 2621L
Co-requisite: EMS 2622

EMS 2623
Paramedic Phase III
6 Credits
Provides knowledge and skills contained in the 2009 National EMS Education Standards for Paramedic, Module 10: Medi cine(specifically, cardiovascular and Advanced Cardiac Life Support (ACLS), Module 13: Special Populations.
Prerequisites: EMS 2622, EMS 2622L
Co-requisite: EMS 2623L

EMS 2623L
Paramedic Phase III Practicum
2 Credits
Provides knowledge and skills contained in the 2009 National EMS Education Standards for Paramedic, Module 10: Medicine (specifically, cardiovascular and Advanced Cardiac Life Sup port (ACLS), Module 13: Special Populations.
Prerequisites: EMS 2622 and EMS 2622L
Co-requisites: EMS 2623

EMS 2666
Paramedic Clinical I
3 Credits
Focuses on the demonstration of EMT and basic paramedic skills in actual patient care situations with an emphasis on ini tial assessment and management of airway management, intra venous and medication administration, and patient and stretcher handling in field and hospital settings. Includes phys ically strenuous activity. Laboratory fee assessment is made for professional liability insurance. A special fee will be charged for this course. Prerequisite: Admission to Paramedic program.

EMS 2667
Paramedic Clinic II
3 Credits
Focuses on the demonstration of skills of the primary provider of patient care in actual situations. Topics include advanced as sessment and evaluation, EKG monitoring and rhythm inter pretation, defibrillation and cardioversion, chest decompress sion, and advanced airway management. Involves physically strenuous activity. A special fee will be charged for this course.
Prerequisite: EMS 2666

EMS 2668
Paramedic Clinic III
3 Credits
An advanced clinical experience focusing on decision making and direct patient care that stresses the completion of competencies introduced in previous courses and includes a field preceptor transition program.
Prerequisite: EMS 2667

ENC 0022
Developmental Writing
4 Credits
Designed to provide instruction in written communication skills. Basic grammar and rhetorical skills including parts of speech, sentence structure, mechanics, and word choice will be introduced. Emphasis is placed on learning to express ideas in clear, logical standard English and on paragraph and essay de velopment. This class does not satisfy general education re quirements and generates compensatory credit only.

ENC 0027
Developmental Reading and Writing
4 Credits
This developmental course offers integrated reading and writ ing instruction. It is designed to prepare students for success ful completion of college-level courses requiring intensive reading and writing. Skills taught focus on improving literal and critical comprehension, vocabulary, and essay writing skills. The connection between reading and writing is rein forced through reading response opportunities. This course does not satisfy general education requirements and generates compensatory credit only.
Prerequisite: This course is for students designated "non-ex empt from placement testing/appropriate placement score. Students also must have the ability to communicate orally in English and understand spoken English.

ENC 0055
Developmental Writing Module
1 Credits
Conducted in a lab setting, this is a modular course designed to allow students to focus on their individual grammar, punc tuation, mechanics, and language usage needs to supplement college-credit English courses (not applicable for degree com pletion). A student is administered a diagnostic test to identify skills for an individualized learning plan so that he or she works on only the skills not yet mastered. Possible topics in the learning plan include basic grammar, sentence skills, mechan ics, and language usage and style. While addressing specific skills utilized in ENC 1101, this course may be taken prior to, in conjunction with, or independently from that course. The course may be repeated up to eight times for successful completion of the individualized learning plan. Grading is Pass/Fail (S/N). This course will be available to non-exempt students who test within three points of the cut off" score for ENC 1101 and exempt students who are identi fied by their instructors in ENC 1101.

ENC 1101
English Composition I
3 Credits
This course introduces students to rhetorical concepts and au dience-centered approaches to writing including composing processes, language conventions and style, and critical analysis and engagement with written texts and other forms of commu nication.
Prerequisite requirements: College level reading and writing skills required.
NOTE: Students will earn the Fundamentals in Written Com munication digital badge upon completion of this course with a grade of C or better.

ENC 1101H
Honors English Composition I
3 Credits
Same as ENC 1101 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

ENC 1102
English Composition II
3 Credits
A continuation of ENC 1101. Instruction is persuasive and lit erary based critical and evaluative skills in English composi tion. Documented research paper required.
Prerequisites: ENC 1101 with a minimum grade of C or S.

ENC 1102H
Honors English Composition II
3 Credits
Same as ENC 1102 with honors content. Honors Program per mission required. College level reading and writing skills are required.
Prerequisites: ENC 1101H with a minimum grade of C or S.

ENC 2210
Technical Writing
3 Credits
Focuses on writing and designing documents in technical and professional discourse communities. Students produce a num ber of technical genres including correspondence, reports, a proposal, and instructions for various technical and lay audi ences. Assignments are intended to create a real world situa tion and present a set of rhetorical considerations and re straints.
Prerequisite: ENC 1101

ENC 2341
Magazine Writing and Design
3 Credits
This course is designed for writing of expository, descriptive and narrative articles on subjects of contemporary interest. Topics will include non-fiction, essay writing, fiction, and po etry. Class lectures will cover the publication process from start to finish and include hands-on work with software design programs. All work produced for the class may be submitted to the student publications. Design software will be utilized as the design and layout program for the course, and participants will receive extensive training in magazine layout, design, edit ing and production. Completion of ENC 1101 is preferred.
Prerequisites: College level reading and writing skills are re quired.

ENG 2100
Introduction to Film
3 Credits
Presents film as an art form, with an emphasis on analysis and evaluation. Topics include vocabulary, techniques, story, script, cinematography, sound, directing, acting, historical per spective, cultural settings and comparative status among other films.

ENG 2930
Special Topics in English
3 Credits
This course will meet the requirements of its objectives and will provide breadth and depth of exploration of a focused topic defined by a literary agenda. It is an advanced study that focuses on developing reading, writing, research, and analyti cal skills. This course is designed by each individual instructor who selects to teach it. It may be taken twice for up to six cred its.
Prerequisite: ENC 1101

ENL 2012
British Literature to 1800
3 Credits
Focuses on selected British writers, with an emphasis on major periods and trends, such as Anglo Saxon, Middle Ages, neo classicism and pre-romanticism.
Prerequisites: College level reading and writing skills are re quired.

ENL 2022
British Literature: 1800 to Present
3 Credits
Focuses on 19th and 20th century writers from the romantics to the present.
Prerequisites: College level reading and writing skills are re quired.

ENL 2022H
Honors British Literature: 1800 to Present
3 Credits
Same as ENL 2022 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

ENT 1000
Introduction to Entrepreneurship
3 Credits
This course is designed to provide a broad overview of the process of turning an idea into a successful enterprise. This course will be useful for anyone, whether or not they have had

prior business or entrepreneurial experience. The course ex plores the characteristics of the entrepreneurial mind and the environment in which these ventures succeed. The course pro vide self-assessment of the skills and commitment necessary to successfully start and operate an entrepreneurial venture**.** College level reading, writing, and math skills are required.

ENT 1012
Entrepreneurship Management
3 Credits
This course seeks to provide the knowledge, skills, and tools for students to successfully plan, design, and manage a new business venture. It is intended for those students considering self-employment for the first time or for those who are already committed as entrepreneurs. The processes of launching an entrepreneurial venture and learning the skills and techniques necessary for effective management, growth, and exit strategy will be covered in the course. Students will analyze the deci sion-making models and strategies and apply them in the man agement of business ventures. College level reading, writing and math skills required.

ENT 1031
Entrepreneurial Marketing and Sales
3 Credits
This course explores key marketing concepts, methods, and strategic issues relevant for start-up and early-stage entrepre neurs. College level reading and writing skills are required.

ENT 1411
Small Business Accounting and Finance
3 Credits
This course provides an introduction to key topics in account ing and finance for those involved in new ventures. College level reading, writing, and math skills are required.

ENT 1612
Creativity, Innovation, and Human Centered Design
3 Credits
This course will lead students through major phases of the cre ative problem-solving process and methods of human cen tered-design thinking. Students will learn the basic skills for creative problem solving, innovation, and user-centered de sign. Students will identify and evaluate problems and oppor tunities; they will sketch, create, develop, test, and select the best prototyping options for a new product or service. Prerequisite: College level reading, writing, and math skills are required.

ENT 2212
Entrepreneurial Leadership - Capstone
3 Credits
ied entrepreneurial settings, including private businesses, cor

College level reading, writing, and math skills are required.

EPI 0001
Classroom Management
3 Credits
This course prepares the student to set up a classroom; employ classroom management techniques; express an understanding of school safety; integrate sunshine state standards into lesson development; create lesson plans; establish and maintain coop erative relations with parents; develop and administer various forms of assessment describe the implications of FCAT and other standardized tests; and demonstrate an understanding of the ethical and legal obligations of the teaching profession. EPI permission required to allow audit.

EPI 0002
Instructional Strategies
3 Credits
This course prepares the student to identify different learning styles, recognize Bloom's Taxonomy prepare lesson plans, use various styles on presentations, employ varied teaching strate gies, explain cooperative, group, contextual, and project based learning, apply behavioral management strategies, and discuss accommodations for exceptional students. EPI permission re quired to allow audit.

EPI 0003
Classroom Technology
3 Credits
This course prepares the student to develop computer based record keeping, to identify additional application software productivity tools prepare multimedia presentations, describe content area instructional strategies, identify Internet re sources, describe WebQuests, demonstrate knowledge of webpage development and computer aided instruction inte grate technology into the learning process, and describe copy right and fair use guidelines. EPI permission required to allow audit.

EPI 0004
Teaching and Learning Process
3 Credits
This course prepares the student to research professional liter ature to seek best practices in teaching and to hone the craft of effective instruction. EPI permission required to allow audit.

EPI 0010
Foundations of Language and Cognition through Research-Based Practices in Reading
3 Credits

Teachers will develop substantive understanding of the six components of reading as a process oral language, phonologi cal awareness, phonics, fluency, vocabulary and comprehen sion. Teachers will also scaffold student learning by applying principles of research-based reading instruction and integrat ing the six components of reading to better serve the needs of diverse learners. EPI permission required to allow audit.

EPI 0013
Assessment and Differentiated Instructional Planning
3 Credits
Teachers will understand how to select and administer appro priate assessments and analyze data to inform reading instruc tion to meet the needs of all students. Teachers will engage in the systematic problem solving process. Teachers will have a broad knowledge of students from different profiles in order to understand and apply research-based instructional practices by differentiating process, product and context. Teachers will engage in the systemic problem solving process. EPI permis sion required to allow audit.

EPI 0014
Demonstration of Accomplishment
3 Credits
This course integrates research-based theory and practice, us ing innovative teaching strategies for K-12. Students will en gage in activities that promote reading skills and that are easily adaptable to meet the various learning styles and needs found in today's classroom. The focus is on the following literacy ar eas: oral language, phonemic awareness, phonics, vocabulary, comprehension and fluency. This course integrates research-based theory and practice, using innovative teaching strategies for K-12. Students will engage in activities that promote read ing skills and that are easily adaptable to meet the various learning styles and needs found in today's classroom. The fo cus is on the following literacy areas: oral language, phonemic awareness, phonics, vocabulary, comprehension and fluency.
Prerequisites: EPI 0010 and EPI 0013.

EPI 0020
Professional Foundations
2 Credits
This course provides the foundation for the student to become a productive member of the teaching profession. Students will gain an understanding of the organization and administration of the public school, the laws governing teachers, the code of ethics, and the purpose of schools. Students will attain a pro fessional perspective as well as a sense of grounding in the profession of teaching. EPI permission required to allow audit.

EPI 0030
Diversity
2 Credits
This course provides the student with an understanding of the variety of backgrounds and cultures that may be found in a typical classroom. EPI permission required to allow audit.

EPI 0940
Field Experience – Module 3
1 Credit
Participants will complete a field experience in a public, char ter, or private school. These field experiences will provide the opportunity to gain insight into the instructional process. Those participants who are teaching will be required to com plete the field experiences in the schools where they are as signed. EPI permission required to allow audit.

EPI 0945
Field Experience – Module 4
1 Credit
This course provides the student with a field experience in the classroom to give a broader view of the social aspects of diver sity and cause the participant to re-evaluate personal beliefs and prejudices that may adversely affect the learning process. EPI permission required to allow audit.

ESC 1000
Earth Science
3 Credits
Using the scientific method, critical thinking skills, data analy sis, this course will examine the fundamental processes of the earth system, composed of an atmosphere, hydrosphere, litho sphere, biosphere, and exosphere, through time. The course will also explore interactions between these spheres, including critical analysis of scientific theories and emphasize earth's connections with humans.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: ESC 1000L

ESC 1000H
Honors Earth Science
3 Credits
Same as ESC 1000 with honors content. Honors Program per mission required.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: ESC 1000L

ESC 1000L
Earth Science Laboratory
1 Credit
The focus of this course is to familiarize the student with sci ence laboratory techniques and procedures including collect ing and recording data, performing calculations, analyzing data, and interpreting results. This is accomplished through experiments and exercises related to topics in earth science. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: ESC 1000.

ETD 1320C
Computer-Aided Drafting for Engineering
3 Credits

This course uses the major features of computer-aided design software (AutoCAD) to make graphic displays, including basic geometric figures, orthographic views of three-dimensional ob jects, production of mechanical drawings, and pictorial draw ings of various three-dimensional applications. Major topics include drawing, file handling, text and text editing, dimen sioning and plotting.

ETD 1340C
Intermediate CAD
3 Credits
Provides experienced CAD students the opportunity to ap proach detailed and intricate drafting and design problems from computer perspective. Provides hands-on experience in creating custom menus, slides, text fonts, attributes, extrac tions, 3-D drawings, and rotations.
Prerequisite: College level reading, writing and math skills re quired. ETD 1320C

ETD 2364C
Introduction to 3D Computer-Aided Design
3 Credits
This course is an introduction to new designing techniques and capabilities of solid modeling using 3D computer aided design software. Topics include the integration of advanced paramet ric solid modeling drawing tools.
Prerequisites: College level reading, writing and math skills are required.

ETI 1110
Introduction to Quality
3 Credits
A survey course addressing quality management, quality sys tems, quality assurance, quality control and total quality man agement topics. The student will become familiar with ISO 9000, Pareto charts, and other quality techniques and tools.

ETI 1420
Manufacturing Processes and Materials
3 Credits
This course is an introduction to modern manufacturing mate rials, processes and systems, which are the basic building blocks of manufacturing and are best taught together. The stu dent will learn to identify and distinguish appropriate materi als processing selections given general performance needs and production rates. Material physical and mechanical properties are covered, along with equipment and processing methods used in manufacturing.

ETI 1622
Concepts of Lean and Six Sigma
3 Credits
This course provides a comprehensive overview of the Lean and Six Sigma methodologies including: define, measure, ana lyze, improve and control (DMAIC) process improvement pa radigm, techniques, tools and metrics that are critical for pro cess improvement success. This course will include demonstra tion and use of Lean and Six Sigma tools.

ETI 1644
Production and Inventory Control
3 Credits
A survey course in production planning and inventory control, including the topics of scheduling, MRP and capacity plan ning.

ETI 1701
Industrial Safety
3 Credits
Covers practical and operational health and safety procedures and practices as defined by OSHA regulations that are applica ble to advanced manufacturing facilities. Handling and dis posal of hazardous materials will also be emphasized.

ETI 1802
Introduction to Process Technology
3 Credits
This course covers an introduction to chemical plant opera tions. Topics include process technician duties, responsibilities and expectations, plant organizations, plant process and utility systems, and the physical and mental requirements of the pro cess technician.
Prerequisites: College level reading, writing, and math skills required.

ETI 1810C
Introduction to Electricity and Electronics
3 Credits
This course covers basic safety practices for electrical systems and knowledge of voltage, current and power in AC and DC circuits, circuit analysis of series and parallel loads, and basic understanding of resistors, capacitors, inductors, and trans formers. This basic knowledge of industrial electricity would be expected of an entry level electrician working in facilities maintenance or assisting in the assembly, test, startup, trouble shooting, maintenance, repair or upgrade of electrical and elec tronic equipment.
Prerequisites: College level reading, writing, and math skills are required.

ETI 1843
Motors and Controls
3 Credits
This course explores the theory and application of AC and DC motors. It covers how different types of motors operate and how electronic motor control systems are designed and can be used to improve efficiency in a wide range of applications.

ETI 1931
Special Topics in Modern Manufacturing
3 Credits
This course is designed to allow flexibility for presenting a va riety of topics related to high performance manufacturing prin ciples and applications.

ETI 1949
Manufacturing Internship
2 Credits
This course is a structured and supervised internship for stu dents in the Manufacturing Technology program of study. On the job experience will be integrated with regular biweekly class meetings to review and compare experiences with respect to workplace skills and technical expectations.

ETI 2950
Engineering Technology Capstone
3 Credits
The capstone course is designed for the student to demonstrate knowledge and skills applicable to the degree core compe tencies and outcomes. The course is designed as a project based experience. The student's project requirements will be designed in concert with the area of curriculum emphasis.

ETI 2941
Industrial Management Practicum
3 Credits
This course is a structured and supervised internship for stu dents. On-the-job experience will be integrated with weekly class meetings to review and compare work experiences with respect to workplace skills and technical expectations.

ETM 1010C
Mechanical Measurement and Instrumentation
3 Credits
This course provides a basic foundation for mechanical meas urement techniques used in manufacturing environments. The course will integrate the concepts, principles and techniques of mechanical measurement with the use of various types of in struments, including micrometers, calipers, height gauges and other types of measuring equipment.

ETM 2315
Hydraulic and Pneumatic Systems
3 Credits
Introduces the students to the basic hydraulic and pneumatic systems and devices commonly found in advanced manufac turing facilities. The underlying scientific principles will be covered and their practical applications. Completion of PHY 1025 is strongly recommended. Taking ETM 2315L concur rently is strongly recommended.

ETM 2315L
Hydraulic and Pneumatic Laboratory
1 Credit
Provides hands-on experiences to reinforce the basic principles of hydraulic and pneumatic systems and the operation of pumps and flow monitoring devices for simple but fundamen tal systems. Completion of PHY 1025 is strongly recom mended. Taking ETM 2315 concurrently is strongly recommended.

ETS 1520
Process Measurement Fundamentals
3 Credits
Provides the students with a basic knowledge of instrumenta tion and how sensors are used in the manufacturing field. Topics included are principles of temperature, pressure, flow and level, and the relationship of devices used to measure these for control.
Prerequisites: College level reading, writing and math skills are required.

ETS 1535
Automated Process Control
3 Credits
Introduces modern control theory and the use of sensors, actu ators and controllers. The student will be introduced to state- of- the-art control systems used in industry and the elements that comprise a closed loop network.

ETS 1539
Instrumentation Systems Safety
3 Credits
This course focuses on the engineering requirements for the specification, design, analysis, and justification of safety instru mented systems for the process industries. Students use prac tical examples to determine safety integrity levels and evaluate whether proposed or existing systems meet the performance requirements. College level reading, writing, and math skills are required.
Prerequisites: ETS 1520 or instructor approval.

ETS 1540
Industrial Applications Using Programmable Logic Control lers and Robotics
3 Credits
Provides basic operational concepts common for the control of multi station industrial robotic systems. Topics include the role of programmable controllers, interface of analog and digital components in robotic systems and writing ladder diagram programs.

ETS 1542
Introduction to Programmable Logic Controllers
3 Credits
Provides basic operational concepts common to programmable controllers, focusing on PLC principles, programming and the fundamentals needed for simple process control.

ETS 1603C
Fundamentals of Robotics and Simulation
3 Credits
An introductory course designed to familiarize students with the basic principles of robotics and simulation. This course in cludes basic robotics concepts, operation, classification and ap plications. The course provides a framework for the discussion of artificial intelligence. This course also includes basic princi ples of modeling and simulation as applied in different envi ronments and systems. Students will become familiar with simulation and robotic systems.
Prerequisites: College level reading, writing and math skills re quired. CET 1123C and EET 1141C

ETS 2210C
Introduction to Photonics
3 Credits
This is an introductory course exploring the fundamentals of photonics theory, concepts, and applications. Contents include the nature and properties of light, light sources, human vision, lasers, and laser safety; basics of geometric and physical optics, and basic principles and applications of fiber optics. Labora tory experimentation will complement the theoretical concepts of the course.
Prerequisites: College level reading, writing, and math skills required.

ETS 2230C
Introduction to Lasers
3 Credits
This course introduces students to the basic principles of laser operations, safety, and applications. Topics include elements and operation of a laser, laser safety, emission and absorption of light, lasing action, optical cavities and modes of oscillation, temporal and spatial characteristics of lasers, and laser classifi cations and characteristics. Laboratory experimentation will complement and reinforce the theoretical concepts of lecture material.
Prerequisites: College level reading, writing, and math skills required. EET 1036C and ETS 2210C

ETS 2527
Electromechanical Components and Mechanisms
3 Credits
This course covers gears and gearboxes, belts and pulleys, chains and sprockets, alignments and measures found in the industrial environment. College level reading, writing, and math skills are required.

ETS 2604
Robotics Application

This course is designed to introduce students to the basic prin ciples of robots, including classification, operation, mainte nance, troubleshooting and applications in the robotics industry. Students use hands-on practices to become familiar with sections of a robotic system. College level reading, writ ing, and math skills are required.

EUH 2000
Western World: Origins to Early Modern Europe
3 Credits
Presents a study of cultural, economic and political develop ments of Western civilization from prehistoric times through the Reformation and the European Renaissance, with an em phasis on geographic references.
Prerequisites: College level reading and writing skills required.

EUH 2000H
Honors Western World: Origins to Early Modern Europe
3 Credits
Same as EUH 2000 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills required.

EUH 2001
Western World: Modern Europe
3 Credits
Presents a study of the economic, social and political develop ment of the world from 1648 to the present, with an emphasis on geographic references.
Prerequisites: College level reading and writing skills required.

EUH 2001H
Honors Western World: Modern Europe
3 Credits
Same as EUH 2001 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills required.

EVR 1001C
Introduction to Environmental Science
3 Credits
This course is a survey of basic chemical, biological, and physi cal principles of environmental science and their applications to environmental issues. This course is appropriate for stu dents in a wide range of disciplines or programs.
Prerequisites: College level reading, writing and math skills are required.

EVR 1001H
Honors Introduction to Environmental Science
3 Credits
Same as EVR 1001C with honors content. Honors Program permission required.
Prerequisites: College level reading, writing, and math skills are required.

EVR 1041
Natural Resource Management with Applications in Geographic Information Systems (GIS)
4 Credits
An introduction to the appropriate use and potential applica tions of geographic information systems (GIS) in natural re source management with emphasis on forest management and operations planning. Students will be presented with lectures and exercises that cover a wide range of GIS and GIS related topics and issues.

EVR 1328
Natural Resource Conservation and Ecology
3 Credits
An introduction to the ecology and conservation of natural re sources of native lands, concentrating on Florida ecosystems.

Emphasis will be given toward interactive networks and eco systems on which species depend, techniques for insuring bio logical diversity and human conservation interactions. Topics include: ecosystems, diversity, threats to habitat, the value of natural resources, conservation practices and conservation and human society.
Prerequisite: College level reading and math skills required, and BSC 1005, BSC 1005L, EVS 1001

EVR 2040
Advanced Geographic Information Systems (GIS) with Environmental Applications
4 Credits
This course provides advanced instruction using GIS software. Special emphasis will be given to environmental applications. Designed for students who have taken GEO 2150 or who have had previous experience with GIS software.
Prerequisite: GIS 2040

EVR 2858
Environmental Law
4 Credits
This course will introduce the basic legal concepts and statu tory principles of environmental law with a focus on pollution control. It will also provide an opportunity for applying these concepts and principles through a service project.

EVS 1001
Introduction to Environmental Sustainability
3 Credits
Provides the student with an overview of current environmen tal concerns and their management. Emphasis is on the appli cation of biological, physical and chemical methods to the understanding of and solutions to environmental problems. The student will gain insight into the natural interactions among living things and physical aspects of the environment.
Prerequisites: College level reading and math skills required.

EVS 1026
Chemistry and Biology of Natural Waters
4 Credits
Provides an introduction to the chemistry of water treatment systems of natural water. Emphasizes the unit operations and analysis of water treatment. Attention is also given on as sessing local bodies of water with regard to water quality and appropriate assessment techniques.
Prerequisite: CHM 1025

EVS 1042
Water Resources with Applications in Geographic Infor mation Systems (GIS)
4 Credits
This course is an introduction to water resources with applica tions in geographic information systems software. Prior GIS experience is not required, but familiarity with Windows is. In this course students will learn the basics of water resource sci ence and management as well as the basics of GIS software. Topics to be studied include the basics of: GIS software; hydro-logic science; and global, regional, and local water resource management issues. Special emphasis will be placed on the water resources of Florida.

EVS 1893
Comparative and Sampling Analysis Methods
3 Credits
Provides an overview of sampling and analysis techniques which are commonly used in the environmental and materials testing fields. The course deals with the skills and knowledge necessary to understand sampling and analysis concepts and to conduct basic sampling procedures.

EVS 2005C
Treatment of Water and Wastewater
4 Credits
Examines the chemical, physical and biological treatment of water and wastewater. Emphasizes unit operations analysis of water treatment systems, and field evaluation of their opera tion.
Prerequisites: CHM 1025, CHM 1025L

EVS 2793
Sources and Effects of Air Pollution
4 Credits
Examines the common sources of air pollution and the effect of this pollution on human and ecosystem health, with an empha sis on how pollutants are produced and transported. The engi neering aspects of combustion and transportation related emissions and the basic principles of air pollution meteorology will also be examined.
Prerequisite: EVS 1001

EVS 2891
Hydrology and Quality Water Resources
4 Credits
A comprehensive survey of water resources considering both quantity and quality. Emphasis is on the standard techniques of sampling and monitoring especially for ground water. The hydraulic characteristics of water are also discussed. Analytical procedures used in field investigations and modeling studies are covered. A separate laboratory time is provided for on campus and field activities.

EVS 2893C
Soil Sampling and Analysis
5 Credits
This course investigates the physical and chemical properties of soils and the dynamics that lead to soil formation. Standard procedures and methods will be examined and applied toward the collection and analysis of samples. The characteristics of soil types will be compared to land use, plant communities, and assessed in the field. In addition, hydric soils and general techniques of wetland delineation will be introduced and ap plied in the field. Lab and field work are a significant compo nent of this class.
Prerequisite: College level reading and writing.

EVS 2894C
Water Sampling and Analysis I
5 Credits
This course introduces major water quality parameters and in organic chemicals found in water bodies. Standard procedures and methods will be examined and applied toward the collec tion and analysis of samples. Techniques for using sampling equipment and meters will be taught and applied in the lab and field, including proper calibration. Field and lab activities are a significant part of this class and will emphasize prepara tion and organization.
Prerequisite: College level reading and writing.

EVS 2895C
Water Sampling and Analysis II
5 Credits
This class explores the implications of pollution on the ecology of aquatic systems. Concepts including trophic states, organic loading and biological contamination will be explored. Gen eral concepts of biological assessments and indexes will be in troduced to define the implications of land use and pollution on organisms. Standards procedures and methods will be ex amined and applied toward the collection and analysis of sam ples. Emphasis will be on field exercises, data analysis, and quality control.
Prerequisite: EVS 2894C, College level reading and writing.

EVS 2942L
Environmental Technology Practicum
3 Credits
Focuses on hands-on experience in environmental sampling and analysis methods by assigning students to agencies or businesses for 150 hours per semester. Emphasis will be to gain practical experience in protocols, methods and use of equip ment in an applied setting; includes the possibility of outdoor work and mildly strenuous skills such as carrying and lifting.
Prerequisite: EVS 2893C

FAS 1012C
Aquacultural Organisms
3 Credits
The field of aquaculture uses a variety of organisms to culture from fresh water fish, to marine fish, plants, shrimp, lobster, and many others. In this course, the students will learn about the variety of organisms that can be cultured and the methods learned to do so.
Prerequisites: College level reading and writing skills are re quired.

FAS 1401L
Aquacultural Laboratory Techniques
3 Credits
The field of aquaculture uses a number of laboratory tech niques to assist the technician in the treatment of fish, identifi cation of fish, breeding techniques, raising of fish, feeding, and a whole host of controls on the artificial environment of the aquarium. This laboratory teaches the techniques used in the field. A special fee will be charged for this course.
Prerequisites: College level reading and writing skills are re quired.

FAS 1404C
Aquacultural Field Techniques
3 Credits
Focuses on the practical aspects of establishing a fish farm, set ting up the ponds, maintaining environmental conditions, and harvesting the fish. College level reading and writing skills are required. A special fee will be charged for this course.
Prerequisites: College level reading and writing skills are re quired.

FAS 2240C
Aquacultural Nutritional Techniques
3 Credits
Focuses on the nutritional aspects of fish. Fish digestive anat omy, nutrition requirements, metabolic rates, diets, and availa ble food sources will be covered.
Prerequisites: College level reading and writing skills are re quired.

FAS 2253
Aquacultural Disease Processes
3 Credits
Studies the disease processes that affect fish that includes bac terial diseases, infections, viruses, fungi, parasites, immune diseases, nutritional diseases and environmental diseases.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: FAS 2253L

FAS 2253L
Aquacultural Disease Process Laboratory
1 Credit
Designed to teach laboratory techniques to identify disease causing organisms and to use some of the treatment methodol ogies. A special fee will be charged for this course.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: FAS 2253

FAS 2263C
Aquacultural Reproductive Techniques
3 Credits
Focuses on the principles of reproductive biology for the aqua culture industry. The primary emphasis will be on freshwater fish reproduction, however, other aquaculture organisms will be discussed.
Prerequisites: College level reading and writing skills are re quired.

FAS 2353C
Aquacultural Management Practices
3 Credits
Aquaculture operations are businesses. This course teaches the basic operations of the business side, showing profit and loss statements, marketing, how to manage people, and the general principles of how to manage an aquaculture establishment. In

addition, decision making tools for the manager will be pre sented that include the use of computers and records manage ment. Prerequisites: College level reading and writing skills required.

FAS 2941L
Aquaculture Field Experience I
3 Credits
Focuses on the hands-on experience that can be gained from being in the field at aquaculture facilities in Hillsborough County. Students rotate through a variety of aquaculture oper ations to gain a broad spectrum of experiences that can only be gained from actual field work. This is the first of the four field experience courses.
Prerequisites: College level reading and writing skills required.

FAS 2942L
Aquaculture Field Experience II
3 Credits
Focuses on the hands-on experience that can be gained from being in the field at aquaculture facilities in Hillsborough County. Students rotate through a variety of aquaculture oper ations to gain a broad spectrum of experiences that can only be gained from actual field work. This is the second of the four field experience courses.
Prerequisite: FAS 2941L

FAS 2943L
Aquaculture Field Experience III
3 Credits
Focuses on the hands-on experience that can be gained from being in the field at aquaculture facilities in Hillsborough County. Students rotate through a variety of aquaculture oper ations to gain a broad spectrum of experiences that can only be gained from actual field work. This is the third of the four field experience courses.
Prerequisite: FAS 2942L

FFP 1000
Introduction to Fire Science
3 Credits
Provides an overview of the fire protection field, with an em phasis on fire protection agencies, equipment, building design and construction and fire-fighting tactics. Topics include fire suppression and equipment, characteristics and behavior of fire, fire hazard properties of ordinary materials, extinguishing agents and public relations.

FFP 1304
Aerial Operators Course
3 Credits
Covers driving laws and techniques, construction and opera tion of ladder trucks, aerial platforms and apparatus mainte nance.

FFP 1506
Fire Prevention and Investigation
3 Credits
Deals with the principles of prevention and investigation, a study of the fire hazards of various occupancies, a review of fire prevention codes, OSHA requirements, surveying and mapping procedures. Topics include recognition of hazards, engineering and enforcement of solutions, public relations and presentation of arson evidence.

FFP 1710
Company Officer
3 Credits
Designed to assist officers in solving problems and situations encountered in today's changing fire service. The curriculum includes a review of fire department organization and admin istration, management theory, leadership, communication, mo tivation and group dynamics.

FFP 1810
Fire Fighting Tactics and Strategy I
3 Credits
Involves a review of fire chemistry, equipment, manpower, strategies, methods of attack and pre planning fire problems.

FFP 2120
Fire Service Building Construction
3 Credits
Building construction topics include identifying hazards from assault by fire and gravity, how building construction can in fluence fire spread, fire confinement or structural collapse, and many other life safety issues

FFP 2303
Fire Service Hydraulics
3 Credits
This course will cover the principles of fire service hydraulic formulas and calculations to determine pump pressures.

FFP 2305
Apparatus Operations
3 Credits
This course covers emergency vehicle driving fire ground pump operations including the use of master stream devices, pump construction and pump operational applications.
Prerequisite: FFP 2303

FFP 2401
Hazardous Materials I
3 Credits
On site operational practices for hazardous materials in com pliance with CFR 1910.120 standards.

FFP 2402
Hazardous Materials II
3 Credits
On site operational practices for hazardous materials in com pliance with CFR 1910.120 standards.

FFP 2490C
Chemistry of Hazardous Materials
3 Credits

This course focuses on the chemistry knowledge required to evaluate the potential hazards and behaviors of materials con sidered hazardous. It examines the reasons for the chemical be havior of hazardous materials and is designed to improve decision making, safety operations, and handling. The course will meet the requirements set forth by OSHA 1910.120 and 40 CFR 1910.120.

FFP 2510
Codes and Standards
3 Credits
This course is designed to familiarize inspectors with the basic units of NFPA 101. This course includes statewide fire preven tion code NFPA 1.

FFP 2521
Construction Documents and Plan Review
3 Credits
This curriculum is designed to have the student assimilate in formation contained in working drawings and specifications as they relate to the fire inspector. Topics include the interpreta tion of conventional graphic communication, symbols, abbrevi ations, principles of technical projection as well as a review of construction arithmetic and geometry.

FFP 2540
Private Fire Protection Systems
3 Credits
The study of private fire protection and detection systems, such as sprinkler and standpipe systems, chemical extinguish ing systems, detection systems and devices. Each system is dis cussed as to its construction, preventive maintenance and individual uses.

FFP 2604
Cause and Origin
3 Credits
This course is designed to enhance the fire investigator's ability to detect and determine the origin and cause of a fire. Specific topics include fire behavior review, investigation ethics, con struction, ignition sources, reading fire patterns and scene re construction. Special topics on electrical fire investigation, woodland fires, vehicle fires, mobile home fires, RV and boat fires and scene documentation.

FFP 2740
Fire Service Course Delivery
3 Credits
Draws from many recognized authorities in exploring the methods and mechanics of imparting information, with an em phasis on techniques and multi-media materials for communi cation of ideas and strengthening the retention of skills obtained in the learning process.

FFP 2741
Fire Service Course Development
3 Credits
Emphasis on instructional design, course development and training manuals. Students develop their own course by estab lishing goals, objectives and evaluation criteria. Students may repeat this course up to 20 times for renewal of their Fire Certi fication.

FFP 2811
Fire Fighting Tactics and Strategy II
3 Credits
Covers advanced fire-fighting techniques, with an emphasis on incident command systems.

FIL 1000
Introduction to Motion Media: Film, Cinema and the Envi ronment
3 Credits
This course will provide an introduction to the basic terminol ogy, techniques, and contributions of filmmaking and will ex plore major issues in the history of the moving image, from its invention at the end of the 19th century to the present day. Prerequisites: College level reading and writing skills are re quired.

FIL 1420C
Motion Media I – Recording and Interpreting Reality
3 Credits
Provides a basic understanding of motion media production technology, equipment operation, terminology, and tech niques. This will include an introduction to the camera, and to "mis en scene" for documentaries. Students apply the essentials of creative filmmaking in both studio and location settings. Prerequisites: CGS 1000, FIL 1000

FIL 2010
Films of Fantasy and the Imagination
3 Credits
This course focuses on the art of the created motion picture im age, which springs from the imagination with the help of tools such as animation, optical printing and digital construction and manipulation. This approach contrasts with the more tra ditional production of moving images, which focuses on and photographs aspects of real and existing objects, whether these are actors and sets or the world of nature. This course concerns films which spring from the imagination, literally from the mental pastures of human dreams, from the subconscious ra ther than the conscious mind.
Prerequisites: College level reading and writing skills required.

FIL 2905
Directed Independent Study: Film
3 Credits
This course is designed to establish a framework for further self-learning in various areas of motion media for the ad vanced student. The student will shape the course to fit their needs by planning activities and preparing a contract coordi nated with a member of the motion media faculty. The contract will outline a specific project, or a particular set of goals and requirements that the student wishes to achieve. The contract

must be satisfactorily completed and reviewed by the assigned faculty member.
Prerequisite: FIL 1000

FIL 2931
Careers in Film and Video
1 Credit
Students are exposed to the full range of careers in film, video and broadcasting in addition to learning about resumes, in ternships, interviews and portfolios.

FIN 1100
Personal Finance
3 Credits
Focuses on charting financial objectives, with an emphasis on budgeting, savings, credit, loans, insurance, estate planning, taxes, investments and real estate.

FIN 2001
Principles of Finance
3 Credits
This course is an introduction to the fundamentals of corporate finance. It will cover corporate financial structures, monetary systems, financial instruments, financial statement analysis, in terest, and the time-value of money.
Prerequisites: ACG 2021. College level reading, writing and math skills required.

FIN 2051
International Financial Management
3 Credits
This course explores the management of international banking, financial services, financial risk, foreign exchange, corporate fi nancing from a global perspective, direct foreign investment decisions, and the management of on-going operations.
Prerequisite: FIN 2001. College level reading and writing skills required.

FIT 2000
Introduction to Financial Technology
3 Credits
This course introduces the fundamentals of Financial Technol ogy. It explores what new financial technologies are emerging and how the technological advances in data analytics are ena bling innovation in the financial industry. It also examines new services and business models in various areas of banking, in surance and financial asset management.
Prerequisite: College level reading, writing, and math skills are required.

FIT 2100
Financial Technology Capstone
3 Credits
This comprehensive capstone course marks the culmination of the Financial Technology program, challenging students to ap ply their acquired knowledge and skills in practical, real-world scenarios. Through project-based learning, case studies, and di rect engagement with financial technology tools and methodol ogies, students will collaborate with peers and faculty to develop innovative solutions to contemporary challenges. Per-mission from the instructor required.
Prerequisite: FIN 2060 or FIT 2000. College level reading, writ ing, and math skills are required.

FIT 2200
Advanced Financial Technology
3 Credits
This course assesses Financial Technology solutions impact on financial transactions, management and oversight of institu tions in the global economy. In this course, students will learn about the principles and practices of payment processing, management, regulation, and the tradeoffs between risk and return. Students will evaluate challenges presented by the Fi nancial Technology evolution, including traditional and emer gent competitors, as well as demographic, social, and technology forces driving change in the industry.
Prerequisite: FIN 2060 or FIT 2000. College level reading, writ ing, and math skills are required.

FIT 2300
Financial Technology Analysis
3 Credits
This course introduces core statistical skills and data analytics techniques used to manipulate and analyze financial datasets. Students will learn how to interpret outcomes from data analy sis for efficient and effective decision-making, consumer/busi ness intelligence, problem identification, and forecasting.
Prerequisite: FIN 2060 or FIT 2000. College level reading, writ ing, and math skills are required.

FIT 2400
Financial Technology Payment Systems
3 Credits
This course examines the information and communications tools, technologies, and standards integral to consumer, mer chant, and enterprise services in the payments and financial service sectors. Explores technology's role in reshaping finan cial technology businesses. Technologies span messaging, com munication networks and gateways, core processing, mobile and online software, and application program interfaces (APIs). Includes the challenges, standards, and techniques as sociated with securing systems and data.
Prerequisite: FIN 2060 or FIT 2000. College level reading, writ ing, and math skills are required.

FIT 2500
Financial Technology Governance and Regulation
3 Credits
This course is designed to develop knowledge and skills for se curity of information and information systems within Financial Technology organizations. It focuses on concepts and methods associated with security across several systems platforms, in cluding internal and internet-facing systems. Examines critical infrastructure concepts and techniques for governance of risk associated with breaches of security in a Financial Technology network.
Prerequisite: BRC 1301. FIN 2060 or FIT 2000. College level reading, writing, and math skills are required.

FIT 2600
Coding for Financial Technology
3 Credits
This course covers the design and development of dynamic, data-driven financial applications using client and server-side architecture. It focuses on various application development techniques for user and mobile-friendly design. It also intro duces how to develop financial applications conforming to in dustry standards.
Prerequisite: FIN 2060 or FIT 2000. College level reading, writ ing, and math skills are required.

FIT 2700
Cybersecurity for Financial Technology
3 Credits
This course covers cybersecurity principles of financial tech nologies. Students will learn about threats, vulnerabilities, risks, and the controls to handle them. The course will intro duce legal, ethical, and compliance issues that arise when working with financial infrastructure in a global economy.
Prerequisite: FIN 2060 or FIT 2000. College level reading, writ ing, and math skills are required.

FNR 1001
Natural Resource Management
3 Credits
An introduction to the ecology and conservation of natural re sources of native lands, concentrating on Florida ecosystems. Emphasis will be given toward management techniques for the conservation of interactive networks and ecosystems on which species depend. Topics include: land use, ecosystems manage ment, conservation and restoration practices, wildlife and forest management, and prescribed fire management.
Prerequisite: EVR 1328. College level reading and math skills required.

FOS 1201
Sanitation and Safety Management.
2 Credits
This course explores the scientific rationales of sanitation and safety practices which are enforced for group protection in in stitutions and food service facilities. Students will recognize the importance of preparing, serving, storing, and holding foods so that they are free of contamination. This course also includes a study of the micro-world, food allergies, food borne illness, safe food handling, cleaning, sanitizing, pest manage ment, and state, local, and national regulation governing sani tary food handling practices.
Prerequisites: College level reading, writing, and math skills are required.

FRE 1120
Elementary French I
4 Credits
Covers the fundamentals of listening, reading and writing the language while developing an understanding of the French culture.
Prerequisites: College level reading and writing skills are re quired.

FRE 1121
Elementary French II
4 Credits
Enhances the skills learned in FRE 1120. College level reading and writing skills required.
Prerequisite: FRE 1120 with a minimum grade of "C" or in structor's permission. College level reading and writing skills are required.

FSS 1063C
Food Specialties I (Baking)
3 Credits
This course covers the fundamentals of baking as it applies to the industry. The student gains hands-on experience in practi cal applications, weights, measures and formula procedures. Emphasis is placed on the proper use of care of equipment, food safety and sanitation.
Prerequisites: FOS 1201, FSS 1223C. Student must pass ServSafe Certification Exam. College level reading, writing and math skills required.

FSS 1223C
Food Preparation for Managers
4 Credits
Students are introduced to various food preparation and kitchen management techniques. It specifically examines the chemical and physical changes that take place as food is pro cessed and prepared for consumption. The knowledge in this course is acquired through theoretical lectures and hands-on service in the HCC kitchen laboratory ensuring the students' understanding of back-of-the-house procedures and the appli cation of food safety and sanitation principles.
Prerequisites: College level reading, writing and math skills re quired.
Co-requisite: FOS 1201

FSS 1248C
Food Specialties II (Garde Manger I)
3 Credits
The purpose of this course is to introduce basic information, procedures, and techniques identifiable to contemporary chefs, in understanding and applying garde manger terminology, and the principles of cold food preparation. The proper care and use of tools and the correct preparation, handling, and use of mousses, cold dressings, and charcuterie are explained. Tra ditional plate presentations and techniques will also be dis cussed, as well as changes and interpretations of classical preparations to contemporary cooking standards.
Prerequisites: FOS 1201, FSS 1063C, Student must pass the ServSafe Certification Exam. College level reading, writing and math skills required.

FSS 1500
Food and Beverage Control
3 Credits

This course is designed to provide students with a solid intro duction to the planning and controlling elements of a food and beverage operation. It focuses on proven control principles and practical applications essential to operating an effective control system.
Prerequisites: College level reading, writing and math skills re quired.

FSS 1941
Food Practicum I
2 Credits
A coordinated work-study course involving class work and field experience. Objectives determined by the student and teacher-coordinator will be used to evaluate the student.
Prerequisites: FOS 1201, FSS 1223C. Student must pass ServSafe Certification Examination. College level reading, writing and math skills required.

FSS 1942
Food Practicum II
2 Credits
A coordinated work-study course involving class work and field experience. Objectives determined by the student and teacher coordinator will be used to evaluate the student.
Prerequisites: FOS 1201, FSS 1223C. Student must pass ServSafe Certification Examination. College level reading, writing and math skills required.

FSS 1943
Food Practicum III
2 Credits
A coordinated work-study course involving class work and field experience. Objectives determined by the student and teacher coordinator will be used to evaluate the student.
Prerequisites: FOS 1201, FSS 1223C. Student must pass ServSafe Certification Examination. College level reading, writing and math skills required.

FSS 1944
Food Practicum IV
2 Credits
A coordinated work-study course involving class work and field experience. Objectives determined by the student and teacher coordinator will be used to evaluate the student.
Prerequisites: FOS 1201, FSS 1223C. Student must pass ServSafe Certification Examination. College level reading, writing and math skills required.

FSS 1945
Food Practicum V
2 Credits
A coordinated work-study course involving job-related objec tives and field experience. Students participate in a study abroad program that includes international lectures and hands-on instruction. This course differentiates regional cook ing techniques and explains the cultural influences their im pact has on regional cuisine.
Prerequisite: College level reading, writing and math skills re quired. FOS 1201, and FSS 1223C

FSS 2100
Menu Development and Marketing
3 Credits
Emphasizes the preparation of a nutritionally balanced cycle menu, portion control, use of leftovers and waste control. The course also provides students with a solid background in hos pitality sales and marketing.
Prerequisites: College level reading, writing and math skills re quired.

FSS 2120
Food Purchase and Storage
3 Credits
Focuses on volume food purchasing, with an emphasis on the legal obligations of vendors and vendees, receiving controls, and storing and dispersal.
Prerequisites: College level reading, writing and math skills are required.

GEB 1011
Introduction to Business
3 Credits
Presents an overview of the practices and procedures of the business world. Topics include the main functions of business, management, marketing, accounting, and finance. College level reading and writing skills required.

GEB 1949
Business Internship
3 Credits
A coordinated work-study course involving class work and field experience. Objectives determined by the student and teacher coordinator will be used to evaluate the student. This course may be repeated six times for credit.

GEB 2214
Business Communications and Technology
3 Credits
This course is designed to equip students with a comprehen sive understanding of communication, its scope and im portance in business. Students will learn to apply fundamental communication theory. The various types of business commu nication genre are developed and used including written and oral forms. Emphasis is placed on planning, preparing, draft ing, analyzing, performing the different communications re quired in the normal course of business activities. The course provides opportunities to recognize complex issues, organize ideas and thoughts in a consistently logical format, and then to communicate these ideas in succinct and concise manner. Col lege level reading, writing, and math skills are required.
Prerequisite: ENC 1101

GEB 2350
Introduction to International Business Essentials
3 Credits
Focuses on the fundamentals of international business through an analysis of the cultural, economic, legal, and political factors that influence international operations in the global economy.

Prerequisite: College level reading and writing skills required.

GEB 2370
Introduction to International Business Policy Issues
3 Credits
Examines the challenges associated with planning and imple menting international policy within business enterprises whose operations span across national boundaries. Students will be able to obtain a fundamental understanding of the stra tegic, operational and behavioral aspects of managing across cultures.
Prerequisites: GEB 1011, GEB 2350, and FIN 2051. College level reading and writing skills are required.

GEY 1000
Issues of Aging
3 Credits
Explores the issues related to the aging process and the later-stages of life including: retirement, psychosocial concerns and community services for the elderly.
Prerequisites: College level reading and writing skills are re quired.

GIS 1041
Survey of Geographic Information Systems and Global Po sitioning Systems (GPS).
1 Credit
Designed to acquaint students with the uses and applications of Geographic Information Systems (GIS) and Global Position ing Systems (GPS). Methods and techniques used in GIS and GPS will also be reviewed.

GIS 2040
Fundamentals of Geographic Information Systems
3 Credits
Designed to acquaint students with the history, operation and applications of geographic information systems (GIS). This course will cover all aspects of geographic information systems including data collection, preprocessing, data management and data analysis as well as the application of these systems.

GLY 2010
Physical Geology
3 Credits
Using the scientific method, critical thinking skills, data analy sis, this course will examine the fundamental processes of the earth system, composed of an atmosphere, hydrosphere, cry osphere, lithosphere, biosphere, and exosphere through time. The course will also explore interactions between these spheres, including critical analysis of scientific theories and emphasize lithospheric connections with humanity.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: GLY 2010L

GLY 2010L
Physical Geology Laboratory
1 Credit
This course accompanies GLY 2010. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills are required.
Co-requisites: GLY 2010

GRA 2111C
Graphic Design
3 Credits
This course is an introductory class which will introduce stu dents to the design applications relevant to graphic design. Students with little or no experience on a MAC or PC will be come familiar with the operating systems and will be able to use the computer to bring their images into the computer and be able to function with proficiency in file management, input and output, design applications, and creating backups of their work.
Prerequisite: ART 1201C, PGY 2401C
Co-requisite: PGY 2801C

GRA 2156C
Digital Illustration
3 Credits
This course will build upon the student's understanding of digital design within the larger context of visual literacy and communication by expanding upon basic digital design pro cesses and practices, particularly the differences between working in raster and vector-based media. The course will ex plore visual and technical understanding of digital illustration in a vector based environment using software applications that are considered to be the industry standard.
Prerequisites: GRA 2111C or ART 2600C

GRA 2206C
Introduction to Typography
3 Credits
This course provides an introduction to the study of letter-forms and typography as fundamental elements of design. It focuses on how typography can be used as a visual communi cations device as well as a graphic, compositional and expres sive element. The course will provide a groundwork for effective typographic design upon which other design ele ments can be built.
Prerequisites: ART 2600C or GRA 2111C

HFT 1000
Introduction to Hospitality Industry Management
3 Credits
The purpose of this course is to provide students with a basic understanding of facilities management within the hospitality industry. Emphasis is placed on the organization, structure, and functional areas in food service and lodging operations.
Prerequisites: College level reading, writing, and math skills are required.

HFT 1410
Front Desk Procedure
3 Credits

This course presents a systematic approach to front office procedures by detailing the flow of business through a hotel from the reservation process to check-out and settlement. It also examines the various elements of effective front office procedures within the context of the overall operation. Students also utilize various accounting machines to process guest accounts through the hotel night audit.
Prerequisites: College level reading, writing and math skills are required.

HFT 1790
The Event Industry
3 Credits
This course examines the full event planning process; beginning with the anatomy of an event to establish the different layers of an event experience and the step-by-step process needed to plan, design and execute events that will meet the needs of both customers and their audiences.
Prerequisites: College level reading and writing skills are required.

HFT 2210
Supervisory Development
3 Credits
This course introduces students to the process of managing personnel in the hospitality industry. Lectures will highlight the supervisory skills, techniques, and procedures needed to become successful business leaders in today's dynamic and diverse workplace.
Prerequisites: College level reading, writing and math skills are required.

HFT 2600
Hospitality Industry Law
3 Credits
Presents a study of the laws, codes and regulations applicable to the hospitality industry.
Prerequisites: College level reading and writing skills are required.

HFT 2750
Meeting, Convention and Exposition Industry
3 Credits
The purpose of this course is to provide students with a basic understanding of convention sales and service. It identifies the various segments of the convention market and explores the methods and techniques utilized in exceeding guest expectations.
Prerequisites: College level reading, writing, and math skills are required.

HFT 2840
Maitre D' and Dining Room Service
3 Credits
Students are introduced to various service techniques and customer interaction skills. The knowledge in this course is acquired through theoretical lectures and practical hands-on service in the HCC Gourmet Dining Room. In this way, students become knowledgeable about front-of-the-house procedures and apply the principles of food safety and team leadership skills.
Prerequisites: College level reading, writing and math skills are required.

HFT 2941
Hospitality Management Internship
3 Credits
The student intern will experience the opportunity to apply the theory learned in the program within a hospitality setting. Grading is based on academic projects related to the position and site evaluations. The student must also provide authorized documentation confirming 250 hours of internship experience.
Prerequisite: Student must complete 50 program credit hours prior to being placed in a hospitality internship. College level reading, writing, and math skills are required.

HIM 1000
Introduction to Health Information Management
3 Credits
This course provides an introduction to health information management and how it fits into the healthcare delivery system. Students will explore ethical and legal principles with regard to health informatics and information management, medical records, and privacy issues. Students will learn essential employability skills and work habits with the health information management field.
Prerequisite: College level reading, writing and math skills are required.

HIM 1112C
Electronic Health Records
2 Credit
Covers the basics of electronic health records, both content and usage. Provides an understanding of patient record requirements, access and confidentiality. Includes analysis of the medical record, emphasizing legal ramifications, ethics, proper use and confidentiality issues.

HIM 1433
Principles of Disease
4 Credits
This course addresses the etiology, pathophysiology, treatment, and complications of human diseases. A systems approach to the disease process is used, which will incorporate basic medical terminology, anatomy and physiology. Common laboratory and diagnostic tests are included.
Prerequisite: HSC 1531

HIM 1442
Pharmacology
2 Credits
Course is designed for students who will not be administering medications but require a general knowledge of classifications, common usage, and therapeutic indications of commonly prescribed medications.

Prerequisites: HSC 1531

HIM 1453
Anatomy and Physiology for Medical Coding
4 Credits
This course is designed for students with limited background in sciences pursuing careers in the allied health fields. The stu dents will gain an understanding of how the human body op erates on a daily basis from birth to death and the fascinating working systems in our bodies, intended for medical coding students. Focuses on the structure and function of the various body systems. Includes the medical terminology and abbrevia tions related to each body system.

HIM 2252
Introduction to CPT Coding
3 Credits
Introduces basic coding principles, characteristics, and conven tions of coding, using the Physicians' Current Procedural Ter minology (CPT). Focuses on evaluation and management coding, unbundling, starred procedures, separate procedures, the global period, and modifiers.
Prerequisites: HSC 1531, HIM 1453, college-level reading, writ ing, and math skills are required.

HIM 2253
Intermediate CPT Coding
3 Credits
Building upon the fundamentals covered in the introductory course, Intermediate CPT Coding will provide students addi tional instruction and application into the complexities of Cur rent Procedural Terminology (CPT) coding and Healthcare Common Procedure Coding System (HCPCS). Students will expand their knowledge and skills in accurately assigning CPT/HCPCS codes to a wide range of medical procedures and services. Topics covered include advanced coding scenarios, compliance considerations, and navigating coding challenges and selection focusing on code specific guidelines. Through case studies and practical exercises, students will develop pro ficiency in handling more complex coding scenarios commonly encountered in healthcare settings. This course is designed for preparation for the AAPC CPC exam.
Prerequisites: HIM 1000, HIM 1112C, HIM 1433, HIM 1442, HIM 1453, and HSC 1531, all with a grade of C or better.

HIM 2272C
Medical Billing and Insurance II
3 Credits
Emphasis on billing regulations for the State of Florida. Course content includes LMRPs, Workers' Compensation Laws, Flori da Medicare and claims for automobile accident injuries.
Prerequisites: HIM 2275C

HIM 2275C
Medical Billing and Insurance I
3 Credits
Introduction to health insurance claims processing, carrier re quirements, and state and federal regulations. Billing for phy sician's offices, hospital and ambulatory surgery services. Topics that are covered include, electronic billing, confidential ity, managed care systems, Workers' Compensation, Medicare and Medicaid. Will include hands-on laboratory component.
Prerequisites: HIM 1112C, HSC 1531, OST 2854C

HIM 2283
Advanced Coding
3 Credits
Includes the study of complex medical and surgical diagnoses and procedures in the inpatient and outpatient settings using CPT and ICD-10-CM codes to ensure accurate coding and re-porting. Addresses current concepts and changes related to coding practice. Reimbursement by prospective payment sys tems will be reviewed. The 3M encoder will be used to provide hands-on practice.
Prerequisites: HIM 2253, HIM 2724

HIM 2723
Introduction to ICD 10-CM/PCS
3 Credits
An introduction to basic coding principles, characteristics and conventions using the ICD-10-CM/PCS coding system. Stu dents will learn to use the Alphabetic Index to select correct codes from the Tabular listing to numerically identify diseases and procedures.
Prerequisites: HSC 1531, HIM 1453, college-level reading, writ ing, and math skills are required.

HIM 2724
Intermediate CD-10 Coding
3 Credits
Building upon the knowledge gained in the introductory course, Intermediate ICD-10-CM Coding will provide students additional instruction and application to expand their profi ciency in assigning ICD-10-CM codes to a diverse range of clin ical scenarios and patient encounters. Advanced topics covered include in-depth exploration of complex coding guidelines, coding for chronic conditions, complications, and comorbidi ties, as well as navigating coding challenges in specialized healthcare areas. Through case studies and hands-on exercises, participants will refine their coding skills and enhance their ability to accurately document and report diagnoses using the ICD-10-CM code set. This course is designed for preparation for the AAPC CPC exam.
Prerequisite: HIM 1000, HIM 1112C, HIM 1433, HIM 1442, HIM 1453, HSC 1531, all with a grade of C or better.
Corequisite: HIM 2253

HIM 2941
Clinical Coding Practicum
3 Credits
Course is planned work-based experience that provides stu dents with an opportunity to enhance their skills through a

supervised practical experience related to their career objec tives. Coding guidelines will be used and the student will ad dress billing and reimbursement issues. Medical records will be used by the student to perform coding procedures.
Prerequisites: HIM 1000, HIM 1112C, HIM 1433, HIM 1442, HIM 1453, HIM 2275C, HIM 2724, HSC 1531, OST 2854C and permission of instructor or department head.
Corequisite: HIM 2283.

HIM 2960
Credentialing Exam Review
1 Credit
This course offers students the opportunity to prepare for their national credentialing exams. Through weekly assignments and instructor-led discussions, students will receive support in their test preparations. The course aims to reinforce their un derstanding of course content and related concepts, provide study strategies, and guide them in identifying additional re sources for successful certification preparation.
Prerequisites: HIM 2283 or HIM 2272C, college-level reading, writing and math skills are required.

HIS 2206H
Honors Selected Topics in History
3 Credits
An in depth study of the economic, intellectual, cultural, social and political developments in Western Civilization and their impact on today's world. Honors Program permission re quired. May be taken two times for credit.

HLP 1081
Health Analysis and Improvement
3 Credits
Examines the role, wellness and fitness, disease, nutrition, stress and physical activity, and their implications for total well-being. Includes a self-evaluation of the student's current health status through their body composition and target heart rate. The development of a personal fitness program through complimentary and integrative modalities and a wide variety of choices is designed to improve total body fitness.

HSA 2010
Issues and Trends in Public Health
3 Credits
This course will serve as an introduction to current events in the field of public health (e.g., Zika virus, marijuana legislation in Hillsborough County and how STI risks relate to geo-loca tion dating applications). Content will vary from semester to semester in order to reflect up-to-date events within the field.
Prerequisites: College level reading and writing skills are re quired.

HSA 2117
Health Care Delivery
3 Credits
This course provides an introduction to health care services, of fering students an overview of the US health care delivery sys tem, health policy, funding sources, and comparison with other nations.

HSA 2322
Health Insurance
3 Credits
This course will serve as an introduction to basic health insur ance, and health care financing principles and terminology. It is designed to serve as an overview of how the insured, unin sured, and underinsured interact with the United States health care system.
Prerequisites: College level reading and writing skills are re quired.

HSC 1220
Introduction to the Health Sciences
1 Credit
Introduces students to health care and patient care delivery systems. Includes discussion of infectious diseases and their transmission, including HIV/AIDS and hepatitis, blood borne pathogens, legal/ethical issues regarding violence/abuse cog nition and reporting. Also includes CPR certification for health care providers.
Prerequisites: MAT 0018, REA 0007 and ENC 0015 or equiva lent HCC placement test scores.

HSC 2006
Orientation to Perioperative Services
3 Credits
This course is an overview of the profession including basic skills and terminology related to historical development, cur rent profession trends, professionalism, and professional code of ethics, professional organizations, patient confidentiality, in fection control, asepsis, and basic surgical patient assessment using aseptic technique, clinical laboratory tests, and vital signs.
Prerequisite: Admission to Surgical Technology Program
Corequisite: HSC 2006L

HSC 2006L
Orientation to Perioperative Services Laboratory
1 Credit
This course is an overview of the profession including basic skills and terminology related to historical development, cur rent profession trends, professionalism, and professional code of ethics, professional organizations, patient confidentiality, in fection control, asepsis, and basic surgical patient assessment using aseptic technique, clinical laboratory tests, and vital signs.
Prerequisite: Admission to Surgical Technology Program
Corequisite: HSC 2006

HSC 1531
Medical Terminology
3 Credits
Focuses on medical terminology, with an emphasis on ana tomic names of bones and organs of the body, anatomic de scriptive terms, radiographic laboratory terms and their common abbreviations and commonly used medical terms and their proper usage.

HSC 1641
Legal and Ethical Aspects in Health Care
1 Credit
An introduction to health care delivery systems, their roles and responsibilities, and the patient's legal rights within the sys tem. The student will also evaluate ethical issues as they relate to the health care field.

HSC 2017
Careers in Public Health
3 Credits
This course description will provide students with an over view of careers in the field of public health and actively engage them in the process of exploring occupations in public health. Students will complete self-assessments on their interests, skills, personality and work values. This information will be applied to occupation and career goals.
Prerequisites: College level reading and writing skills re quired.

HSC 2100
Health Education
3 Credits
Provides a survey of the principles of health with an emphasis on physical fitness, mental health, nutrition, the use of tobacco, alcohol, drugs and family living.

HSC 2130
Sex, Health, and Decision Making
3 Credits
This course explores the fundamental relationship between sexuality, decision making and health outcomes from a public health perspective. Students explore sexuality issues and learn tools that promote sexual health and healthy relationships.

HSC 2400
First Aid
3 Credits
To provide the citizen responder with the knowledge and skills necessary in an emergency to help sustain life, reduce pain, and minimize the consequences of injury or sudden ill ness until professional medical help arrives. Meets American Red Cross requirements for First Aid Responding to Emergen cies Certification. A special fee will be charged for this course.

HSC 2520
Microbiology for Perioperative Services
3 Credits
This course is an overview of the profession including basic skills and terminology related to medical asepsis and the role bacteria has on the operating room environment and the surgi cal patient. It examines the relation with the growth of patho genic micro-organisms and methods used to destroy harmful organisms in the operation room environment. It covers pro fession trends, patient confidentiality, infection control, asep sis, and surgical assessment using scenario-based procedures used in the operation room.
Prerequisite: Admission to Surgical Technology Program

HSC 2561
Care for an Aging Population
3 Credits
This course will serve as an introduction to public health issues related to providing care for an aging population. This course is designed to define and describe long-term care and types of residents, long-term care services, continuum of care, different LTC facilities (SNF, AL, IL, home health, hospice, respite care, adult day care, CCRC) and advance medical directives.
Prerequisites: College level reading and writing skills are re quired.

HSC 2660
Health Communications
3 Credits
This course will serve as an introduction to key principles used in health communications. This course will provide an over view of health communication; how it is used at the individual group, and community levels to promote consumption of goods and products and its impact on health outcomes.
Prerequisites: College level reading and writing skills are re quired.

HSC 2669
Prevention and Community Health
3 Credits
This course will serve as an introduction to prevention meth ods in public health. This course is designed to provide an overview of the three primary levels of prevention: primary, secondary, and tertiary prevention.
Prerequisites: College level reading and writing skills are re quired.

HSC 2721
Accessing and Analyzing Health Information
3 Credits
This course will serve as an introduction to the use of evidence to draw conclusions about disease etiology, benefits and the use of evidenced based recommendations. It is designed to provide an overview of health information concepts such as health literacy and health information types.
Prerequisites: College level reading and writing skills are re quired

HSC 2732
Fundamentals of Clinical Research I
3 Credit
This course will provide an overview of the research process including: consent, screening, phases of clinical trials, product development and adverse events and safety.

HSC 2733
Fundamentals of Clinical Research II
3 Credit
This course will provide an overview of guidelines and regula tions governing clinical trials.
Prerequisite: HSC 2732

HSC 2734
Regulatory Affairs in Clinical Research
3 Credit
This course will provide an overview of Institutional Review Board functions and operations including purpose, review types and composition. In addition, ethical issues within clini cal research will be introduced.

HSC 2738
Quality Assurance in Clinical Research
3 Credit
This course will provide an overview of compliance and moni toring issues in clinical research.

HSC 2739
Business of Clinical Research
3 Credit
This course will provide an overview of funding and site spon sorship related to clinical research including: public/private grants and contracts and lifecycles of clinical trials.

HSC 2810
Health Navigator Practicum
4 Credits
This course will serve as the culminating experience for stu dents enrolled in the Health Navigator program. It is designed to prepare students for employment as patient navigators or community health workers by providing an experiential field experience that provides students with descriptions of primary duties, annual salary, and interaction with professional organi zations.
Prerequisites: College level reading and writing skills are re quired.

HSC 2819
Clinical Research Practicum
3 Credit
This course will serve as the culminating experience for stu dents enrolled in the Clinical Research programs. It will in clude experience working directly at a clinical research facility.

HUM 1020
Introduction to the Humanities
3 Credits
In this course, students will learn about the creative ideas and accomplishments of various cultures in various fields of hu manities that may include art, architecture, drama, history, music, literature, philosophy, and religion. The course will in clude cultural expressions from the western canon and may also include expressions from around the globe.
Prerequisites: College level reading and writing skills re quired.

HUM 1020H
Honors Introduction to the Humanities
3 Credits
Same as HUM 1020 with honors content. Honors Program permission required.
Prerequisites: College level reading and writing skills required.

HUM 1520
Music in Culture
3 Credits
Links music to the visual arts and the composer's cultures, fo cusing on western music from the Medieval Period to the pre sent.

HUM 2210
World Humanities: Prehistory to the Early Modern Era
3 Credits
Provides an overview of the arts and ideas of major world civi lizations of Europe, Asia, the Middle East, Africa and the Americas from the Prehistoric Era to the Renaissance. History is discovered through a study of art, music, literature, religion and philosophy as students learn what others valued and be lieved.
Prerequisites: College level reading and writing skills are re quired.

HUM 2210H
Honors World Humanities: Pre-history to the Early Modern Era
3 Credits
Same as HUM 2210 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

HUM 2230
World Humanities: Early Modern to the Contemporary
3 Credits
Provides an overview of the arts and ideas of major world civi lizations of Europe, Asia, the Middle East, Africa and the Americas from the Renaissance to the present day. History is discovered through a study of art, music, literature, religion and philosophy as students learn what others valued and be lieved.
Prerequisites: College level reading and writing skills are re quired.

HUM 2230H
Honors World Humanities: Early Modern to the Contemporary
3 Credits
Same as HUM 2230 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

HUM 2410
Asian Humanities
3 Credits
A historical survey of the humanities in India, China, Japan: the visual arts, music, dance, theater, religion, and philosophy from the Prehistoric Era to modern times. Emphasis will be on the cultural values revealed in works of art and literature.

Prerequisites: College level reading and writing skills are re quired.

HUM 2410H
Honors Asian Humanities
3 Credits
Same as HUM 2410 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

HUM 2420
African Humanities
3 Credits
A historical survey of African humanities: the visual arts, mu sic, dance, literature, theater, religion, and philosophy from the prehistoric era to the present day. Emphasis will be on the cul tural values revealed in works of art and artifact.
Prerequisites: College level reading and writing skills are re quired.

HUM 2420H
Honors African Humanities
3 Credits
Same as HUM 2420 with honors content. Honors Program permission required.
Prerequisites: College level reading and writing skills are re quired.

HUM 2461
Latin American Humanities
3 Credits
A historical survey of the humanities of Latin America: the vis ual arts, music, dance, theater, religion and philosophy from the pre-Columbian era to modern times. Emphasis will be on the cultural values revealed in works of art, artifact, and litera ture.
Prerequisites: College level reading and writing skills are re quired.

HUM 2700
Travel Study
3 Credits
This course offers students a study/travel program centered around trips to specified countries and cities. This course will provide lectures and discussions in the humanities area before the trip and field experiences in the humanities area during the trip. This course may be repeated twice for credit.

HUM 2930
Special Topics in Humanities
3 Credits
This course introduces an area of humanities studies that is not given in-depth coverage in other courses. This course provides an interdisciplinary exposure to various aspects of the humani ties through readings, discussion, lecture, guided research and/or field trips. Topics vary from semester to semester. Course may be repeated up to 6 credit hours.

HUM 2930H
Honors Special Topics in Humanities
3 Credits
Same as HUM 2930 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

HUN 2201
Fundamentals of Human Nutrition
3 Credits
Presents a fundamental understanding of basic human nutri tion. Topics include carbohydrates, protein, fat, vitamins, min erals, water, nutrition throughout the lifecycle, fiber, fast foods, the food guide pyramid, and popular facts and fallacies. In cludes the interpretation of current nutrition information.
Prerequisites: College level reading, writing, and math skills are required.

HUN 2203
Culinary Nutrition
3 Credits
This course relates nutrition to the food service industry by way of menu planning, studying nutrient deficiencies and nu-trition-related diseases, and retention of nutrients through basic principles of health-conscious cooking.
Prerequisite: College level reading, writing, and math skills re quired.

HUS 1001
Introduction to Human Services
3 Credits
Focuses on the history of the field of Human Services. In addi tion, models of service delivery, ethics, and professionalism in the practice of human service skills are investigated. College level reading and writing skills are required.

HUS 1024
Abnormal Behavior: Etiology and Treatment
3 Credits
Focuses on the basic concepts of mental health and therapeutic intervention with an emphasis on normal and abnormal be haviors. Topics include concepts of normalcy, models of abnor mal designations (medical v. non-medical) and identification and classification of abnormal behavior.

HUS 1111
Interpersonal Skills in Human Services
3 Credits
Focuses on the learning and proactive basic communication and interpersonal skills that are necessary in providing compe tent mental health and social services.

HUS 1200
Introduction Group Process
3 Credits
Provides an introduction to the principles of group interaction, with an emphasis on observation and participation in the group environment.

HUS 1320
Crisis Intervention
3 Credits
Focuses on the theoretical and practical aspects of human cri ses, with an emphasis on handling simulated crisis situations. Prerequisites: College level reading and writing skills are re quired.

HUS 1406
Etiology and Treatment of Substance Use Disorders
3 Credits
This course is a comprehensive analysis of the causes, diagno sis, treatment, and prevention of substance abuse and depend ence. Symptoms and the progression of substance use disorders are discussed. Types of abusers and different concep tualizations of the nature of substance disorders are reviewed. Strategies and skills are required for working with substance abusing clients are explored.

HUS 1540
Principles for Understanding and Working with Families
3 Credits
This course presents family theories most often used by human service workers as the framework for working with families. Three of these theories the ecological model of human devel opment, family systems theory and empowerment theory will be used to help students understand the complexity of family development and adaptation and the impact of stress on the family system. The student will learn how these theories can be used in the development of family professional collabora tion and application of family centered practice. Students will learn and practice skills for empowering families to assess their strengths, concerns and priorities and to plan for how to meet their needs.
Prerequisite: HUS 1001

HUS 1550
Multicultural Perspective in Human Services
3 Credits
Addresses cultural diversity and its implications for counsel ing and human services practice. It considers the psychological impact of factors such as sex, race, ethnicity and culture, reli gious preference, socioeconomic status, sexual orientation, and physical disability. Common stereotypes and prejudices to ward various groups and cultures are investigated. Strategies for overcoming prejudice are studied. Interventions and strate gies for working effectively in a helping capacity with diverse clients are discussed.

HUS 1820
Human Services Practicum I
2 Credits
Provides an opportunity to apply theory in community health agencies for 16 hours per week. The emphasis is on direct cli ent contact and on using correct interviewing techniques. A special fee will be charged for this course. College level read ing and writing skills are required.

HUS 2008
Psychotherapy: Theory and Practice
3 Credits
This course surveys the field of counseling theory and practice. The major theories that guide the practice of mental health counseling are investigated, including the personality theories which are the underpinnings of many theoretical approaches. Further, this course reviews issues related to the counselor as a person and a professional and considers ethical issues in coun seling practice. College level reading and writing skills are re quired.

HUS 2311
Strategies of Behavior Modification
3 Credits
Focuses on the tenet of learning and motivation, with an intro duction to behavior theory. College level reading and writing skills are required.

HUS 2821
Counseling and Human Services Practicum II
3 Credits
HUS 2821 builds on the training achieved in HUS 1820. Em phasis is on developing increased skill in working therapeuti cally with clients and in treatment planning. The elements of ethical practice are emphasized. The course requires 200 hours over the duration of the semester and attendance at a bi weekly, two hour practicum seminar. The seminar hours are not included in the required 200 practicum hours. A special fee will be charged for this course.
Prerequisite: HUS 1820.

HUS 2822
Counseling and Human Services Practicum III
3 Credits
HUS 2822 builds on the training achieved in HUS 1821. Em phasis is on providing effective and professional clinical ser vices to clients and on achieving a sense of professional identity. This course requires 200 hours over the duration of the semester and attendance at a bi weekly, 2 hour practicum seminar. The seminar hours are not included in the required 200 practicum hours. A special fee will be charged for this course.
Prerequisite: HUS 2821

IDH 2931H
Honors Leadership
3 Credits
An honors course in leadership and career theory that empha sizes understanding of oneself as an unique individual and that will serve as the basis for developing effective leadership abilities. The major topics include personal assessment, values and expectations, motivation, decision making, and leadership and career theory. Honors Program permission required.
Prerequisites: College level writing and reading skills are re quired.

IDH 2955H
Honors Global Leadership
3 Credits
Students will examine international leadership through an in terdisciplinary approach which combines stateside classroom activities, scholarly research, foreign travel, and service learning. Course content will explore the historical, so cial, economic, religious, and artistic perspectives of another culture. The course promotes communication skills and team work; students should expect rigorous travel and service work. A special fee will be charged for this course for travel ex penses. Please contact your instructor for more information.
Prerequisite: IDH 2931H

IDS 2159
Environmental Issues in Tropical Ecosystems
3 Credits
Environmental Issues in Tropical Ecosystems is a three-credit hour course that provides an interdisciplinary study of issues in tropical environments. The natural ecology of a terrestrial rain forest ecosystem, a coastal mangrove swamp ecosystem, and an offshore barrier reef ecosystem will be studied. The al terations of these ecosystems by human activities will be exam ined. Further, the social, political and economic reasons surrounding both the exploitation and the conservation of these systems will be investigated. Sustainable resource extrac tion from these ecosystems will be explored and compared to the consequences of biodiversity loss, societal issues, and eco logical foot printing. A significant portion of this class will occur in the water. Therefore all students must be proficient swimmers and be able to swim unassisted for at least 100 yards and tread water for 10 minutes.

IDS 2891
Connections
1 Credit
A selected topics capstone interdisciplinary experience course for the AA degree curriculum. Summarizes major points in the bodies of knowledge acquired while participating in the gen eral education experience in an applied manner. Involves re search, application of theoretical models, and utilization of learned skills. The student will be awarded a satisfactory (S) or unsatisfactory (U) grade.
Prerequisite: Completion of at least 45 credit hours including 24 credit hours of general education coursework with a mini mum grade of C.

IDS 2891H
Honors Connections
1 Credit
Same as IDS 2891 with honors content. Honors Program per mission required.
Prerequisite: Completion of at least 45 credit hours including 24 credit hours of general education coursework with a mini mum grade of C.

IDS 2912L
Undergraduate Research Experience in Natural Science
2 Credit
This course introduces natural science majors to interdiscipli nary direct research in biological, physical, geological, ocean and/or environmental sciences and provides an opportunity for students to gain experience with the scientific process through the development of an independent or group (up to 3 students) research project under the direction of a faculty member(s). Student propose, design, conduct, analyze and present scientific research in the course. This course may be repeated once for additional credit for longer term research projects. Projects must be agreed upon with faculty member and must be interdisciplinary in nature. College level reading, writing and math skills are required.
Prerequisites: Approval of instructor and BSC 2010, BSC 2011 or OCB 2000; or PHY 2053 and PHY 2054; or two of the follow ing: ZOO 1010C, OCE 2001C, EVR 1001C, GLY 2101.

IHS 2110C
Introduction to Global Health: Focus on Selected Countries
3 Credit
This study abroad course introduces students to global health issues with emphasis on a selected country. The course will examine various issues which influence health outcomes and compare health care delivery systems. Students will analyze personal professional development as they examine various health care disciplines. This course is offered in a hybrid for mat combining on-line instruction with an in-country content and clinical component. Students are required to complete on-line theoretical content before leaving for their in-country ex perience and again upon their return. Students will travel to supervised sites in a selected country for direct exposure to theoretical concepts as well as “hands-on” clinical experiences for application and service learning.
Prerequisites: College level reading and writing skills are re quired.

IND 1020C
Introduction to Interior Design
3 Credits
The content of this studio course includes an in-depth study of the elements and principles of design. Students will develop proficiency in the understanding and use of these design prin ciples including: proportion, contrast, hierarchy, emphasis, pattern, balance, and unity. Coursework will include exercises expounding those design principles and utilizing the specific elements of color, line, texture, ornament, shape, and spatial concepts, including scale and proportion, in the design of inte rior spaces. The course will also explore employment opportu nities.
Prerequisites: College level reading, writing and math skills are required.

IND 1420
Materials and Methods
3 Credits

The focus of this course is the materials of interior design. Top ics include textiles, floor and wall- coverings, furniture, ceil ings, window treatments and accessories. The particular sources of these materials will be covered. The course will also include topics surrounding estimation and installation of mate rials, specification guidelines, and residential and commercial applications.
Prerequisites: College level reading, writing and math skills are required.

IND 1606C
Functions and Psychology of Space
3 Credits
This studio course analyzes social, interactive environments, private and workspaces for residential environments. The psy chological use of space, efficiency of traffic patterns, and effec tiveness of design layouts explored. Students will read, evaluate, modify, and execute floor plans based upon the re quirements for the spatial zones. The course will explore the multitude of visual-impact concepts for the total design of an interior space. Students will learn basic drafting skills.
Prerequisites: IND 1020C and IND 1420. College level reading, writing and math skills are required.

INR 2002
Introduction to International Relations
3 Credits
International Relations introduces students to the key con cepts, theories, and issues shaping global politics today. The course covers the fundamental theories of international rela tions, including realism, liberalism, and constructivism, as well as the role of states, international organizations, and non-state actors. Students will explore critical topics such as interna tional security, economic development, human rights, and en vironmental sustainability. Case studies based on global challenges, both real and fictional, will be used to illustrate the complexities of diplomacy, conflict resolution, and global gov ernance. Through discussions and applied analysis, students will learn to critically assess the impact of globalization and the shifting balance of power in the 21st century. By the end of the course, students will be equipped to understand and engage with major international issues in an increasingly intercon nected world.
Prerequisites: College level reading and writing skills are re quired.

ISM 2110
Business Intelligence I
3 Credit
Business Intelligence I provides the students with an introduc tory overview of Business Intelligence, data analytics, and data science theory. It is a course that discusses business intelli gence (overview of), descriptive analytics, predictive analytics, prescriptive analytics, big data concepts, and privacy and man agerial considerations in analytics. Through these topics stu dents will be introduced to the nature of data, statistics modeling, data visualization, data mining, methods and algo rithms.
Prerequisites: College level reading, writing and math skills are required.

ISM 2111
Business Intelligence II
3 Credit
Business Intelligence II provides the student with the funda mental concepts to understand modern business analytics in organizations, the use of business tools such as spreadsheet and software, how to interpret business analytics data, and how to communicate the finding from the analysis through the use of visualization, tables, and reports.
Prerequisites: College level reading, writing and math skills are required. CGS 1000, ISM 2110, COP 2050, STA 2023

JOU 1400L
Journalism Laboratory
1 Credit
Provides practical experience through work on college publica tions under faculty supervision. This course may be repeated six times for credit.
Prerequisites: College level reading and writing required.

JOU 1949
Journalism Internship
3 Credits
A coordinated work study course involving class work and field experience. Objectives determined by the student and the teacher coordinator will be used to evaluate the student. This course may be repeated six times for credit.
Prerequisite: ENC 1101

JOU 2100C
Journalistic Writing and Reporting
3 Credits
Introductory course providing instruction and practice in jour nalistic writing and news reporting. Course includes writing leads, defining news and writing news with specific emphasis on features, editorials, and specific content. Additional course emphasis is placed on the principles of identification, selection, and evaluation of news stories for print and online publication. Course also includes instruction in professional ethics.
Prerequisite: College level reading and writing skills required.

LAH 2020
Survey of Latin American History
3 Credits
To examine the major events in the history of Latin American countries from the colonial period to the present with special emphasis on social, cultural, political, and economic develop ment.

LAH 2020H
Honors Survey of Latin American History
3 Credits
This course is intended to provide an introductory examina tion of the colonization and evolution of Latin America from

1492 to the present. The course pays particular attention to the social, political, economic, and cultural impact of the interac tions between Europe, Africa and the Americas, which shaped Latin America and the Caribbean throughout the colonial pe riod. It will then explore the ways in which the consequences of colonialism influenced Latin American independence and national identity in the nineteenth and twentieth century. The course critically examines Latin America's relationship to the US and world history in recent decades. Honors Program permission required. College level reading and writing skills are required.

LIN 1670
English Grammar and Usage
3 Credits
Provides an intensive study of traditional grammar usage and mechanics for those students who desire to improve both their understanding and use of English. Provides an in-depth re view of grammar to returning students. Complements English composition courses.

LIN 1670H
Honors English Grammar and Usage
3 Credits
Same as LIN 1670 with honors content. Honors Program per mission required.

LIN 1672
Foundations in English Grammar
3 Credits
This 3-credit college-level course will provide a study of tradi tional grammar, usage, and mechanics for students desiring to improve their understanding and use of English. It will exam ine English from a structural level, focusing on the construc tion of a sentence.

LIT 2000
Introduction to Literature
3 Credits
In this course, students will be assigned readings representa tive of a broad range of literary genres and cultures. These readings will cover a variety of literary movements and histori cal eras. The readings will include selections from the western canon. Written analysis of literary works may be required. Stu dents will be provided with opportunities to practice critical interpretation.
Prerequisite: College level reading and writing skills are re quired.

LIT 2000H
Honors Introduction to Literature
3 Credits
Same as LIT 2000 with honors content. Honors Program per mission required.

LIT 2110
World Literature to 1650
3 Credits
Focuses on the major periods and forms in literature from Greek and Roman Classicism through the Renaissance, exclud ing British and American literature. Topics will include the cul tural background of each period and the distinctive characteristics of each style and genre.
Prerequisites: College level reading and writing skills required.

LIT 2120
World Literature: 1650 to Present
3 Credits
Focuses on literature from the Renaissance to now.
Prerequisites: College level reading and writing skills are re quired.

MAC 1105
College Algebra
3 Credits
In this course, students will develop problem solving skills, critical thinking, computational proficiency, and contextual fluency through the study of equations, functions, and their graphs. Emphasis will be placed on quadratic, exponential, and logarithmic functions. Topics will include solving equa tions and inequalities, definition and properties of a function, domain and range, transformations of graphs, operations on functions, composite and inverse functions, basic polynomial and rational functions, exponential and logarithmic functions, and applications. Previous credit for MAC 1106 precludes credit for MAC 1105.
Prerequisite: MAT 1033 with a minimum grade of C or appro priate score on placement test.

MAC 1105C
College Algebra with Integrated Review
3 Credits
MAC 1105C meets the needs of students with myriad levels of mathematical experience by providing support for learning prerequisite skills. This course is delivered as a combination of lecture along with structured activities to give students the ex perience of doing mathematics on their own or in groups with instructor guidance. In this course, students will develop prob lem solving skills, critical thinking, computational proficiency, and contextual fluency through the study of equations, func tions, and their graphs. Emphasis will be placed on quadratic, exponential, and logarithmic functions. Topics will include solving equations and inequalities, definition and properties of a function, domain and range, transformations of graphs, oper ations on functions, composite and inverse functions, basic pol ynomial and rational functions, exponential and logarithmic functions, and applications.
Prerequisite: College-level math skills are required or appro priate score on placement test.

MAC 1105H
Honors College Algebra
3 Credits
Same as MAC 1105 with honors content. Honors Program per mission required.
Prerequisite: MAT 1033 with a minimum grade of C or appro priate score on placement test.

MAC 1106
Combined College Algebra/Pre-Calculus
5 Credits
This course covers the topics of both MAC 1105 and MAC 1140 and is intended for students preparing for MAC 2311. Major topics include the study of linear, quadratic, polynomial, ra tional, exponential, logarithmic, inverse, composite, radical, and absolute value functions; conic sections; systems of equa tions and inequalities; matrices and determinants; sequence and series; the binomial theorem; and applications such as curve fitting, modeling, optimization, and exponential growth and decay. Previous credit for MAC 1105, MAC 1140, or MAC 1147 precludes credit for MAC 1106.
Prerequisite: MAT 1033 with a minimum grade of B or appro priate score on placement test.

MAC 1114
Trigonometry
3 Credits
Major topics include trigonometric functions, their properties and graphs; inverse trigonometric functions, their properties and graphs; trigonometric identities; trigonometric equations; solutions of triangles; polar coordinates; trigonometric forms of complex numbers; vectors; applications. For students taking MAC 1140 and MAC 1114 in preparation for MAC 2311, it is recommended that MAC 1140 be taken before MAC 1114. Pre vious credit for MAC 1147 precludes credit for MAC 1114.
Prerequisite: MAC 1105 or MAC 1106 with a minimum grade of C or appropriate score on placement test.

MAC 1114H
Honors Trigonometry
3 Credits
Same as MAC 1114 with Honors content. Major topics include trigonometric functions, their properties and graphs; inverse trigonometric functions, their properties and graphs; trigono metric identities; trigonometric equations; solutions of trian gles; polar coordinates; trigonometric forms of complex numbers; vectors; applications. Honors Program permission required.
Prerequisite: MAC 1105 or MAC 1106 with a minimum grade of C.

MAC 1140
Pre-Calculus Algebra
3 Credits
Major topics include polynomial, rational and other algebraic functions, their properties and graphs; polynomial and rational inequalities; exponential and logarithmic functions, their prop erties and graphs; conic sections; systems of equations; matri ces and determinants; sequences and series; binomial theorem; applications. For students taking MAC 1140 and MAC 1114 in preparation for MAC 2311, it is recommended that MAC 1140 be taken before MAC 1114. Previous credit for MAC 1106 or MAC 1147 precludes credit for MAC 1140.
Prerequisites: MAC 1105 with a minimum grade of C or appro priate score on placement test.

MAC 1140H
Honors Pre-Calculus Algebra
3 Credits
Same as MAC 1140 with Honors content. Major topics include polynomial, rational and other algebraic functions, their prop erties and graphs; polynomial and rational inequalities; expo nential and logarithmic functions, their properties and graphs; conic sections; systems of equations; matrices and determi nants; sequences and series; binomial theorem; applications. Honors Program permission required.
Prerequisite: MAC 1105 with a minimum grade of C.

MAC 1147
Pre-Calculus Algebra and Trigonometry
5 Credits
This is an accelerated course covering the topics of both MAC 1140 and MAC 1114. Students should already have some prior knowledge of trigonometry. Major topics include polynomial, rational, and other algebraic functions, their properties and graphs; polynomial and rational inequalities; exponential and logarithmic functions, their properties and graphs; trigonomet ric equations; solutions of triangles; polar coordinates; trigono metric forms of complex numbers; vectors; conic sections; systems of equations; matrices and determinants; sequences and series; binomial theorem; applications. Previous credit for MAC 1106, MAC 1114 or MAC 1140, precludes credit for MAC 1147.
Prerequisite: MAC 1105 with a minimum grade of B or appro priate score on placement test.

MAC 2233C
Calculus for Business and Social Sciences
3 Credits
An introduction to calculus with applications to business, eco nomic, social and behavioral sciences. Topics includes the study of limits, continuity, rates of change, differentiation and integration of algebraic, exponential and logarithmic functions, and curve sketching with embedded review of algebraic pre liminaries: expressions, equations, functions, and graphs in cluding piecewise functions. Previous credit for MAC 2311 precludes credit for MAC 2233C.
Prerequisite: MAC 1105, or MAC 1106, or MAC 1140, or appro priate score on placement test.

MAC 2311
Calculus and Analytic Geometry I
5 Credits
In this course, students will develop problem solving skills, critical thinking, computational proficiency, and contextual fluency through the study of limits, derivatives, and definite

and indefinite integrals of functions of one variable, including algebraic, exponential, logarithmic, and trigonometric func tions, and applications. Topics will include limits, continuity, differentiation and rates of change, optimization, curve sketch ing, and introduction to integration and area. Students must pass both pre-calculus algebra and trigonometry with a mini mum grade of C in order to take MAC 2311. This can be ac complished through any one of the following routes: (1) MAC 1106 and MAC 1114, (2) MAC 1140 and MAC 1114, (3) MAC 1147
Prerequisites: MAC 1106 and MAC 1114 with a minimum grade of C, or MAC 1140 and MAC 1114 with a minimum grade of C, or MAC 1147 with a minimum grade of C.

MAC 2312
Calculus and Analytic Geometry II
5 Credits
This is the second in a three-course sequence in calculus. Ma jor topics include differentiation and integration of hyperbolic functions, algebraic, trigonometric, and numerical integration techniques, applications of integrals, improper integrals, para metric equations, polar coordinates, conics, and sequences and series.
Prerequisite: MAC 2311 with a minimum grade of C.

MAC 2313
Calculus and Analytic Geometry III
5 Credits
A continuation of MAC 2312. Focuses on arc length and sur face area, vectors in two and three dimensional space, planes, lines and surfaces in three-dimensional space, functions of more than one variable, partial derivatives, double and triple integrals and their applications, cylindrical and spherical coor dinates, vector fields, line integrals, Green's theorem and Stoke's theorem.
Prerequisites: MAC 2312 with a minimum grade of C.

MAD 2104
Discrete Mathematics
3 Credits
This course presents and demonstrates some aspects of dis crete mathematics that are fundamental to digital computing. Topics include mathematical logic, set theory, graph theory, functions, relations, computer arithmetic, and elementary com binatorics.
Prerequisites: MAC 1105 with a minimum grade of C.

MAN 2021
Principles of Management
3 Credits
This course presents an overview of the management functions including planning, organizing, controlling, leading, and prob lem-solving in organizations; reviews foundations of manage ment thought and managerial processes that lead to organizational effectiveness in today's global business environ ment.
Prerequisites: College level reading and writing skills are re quired.

MAN 2300
Introduction to Human Resource Management
3 Credits
This course serves as an overview of the field of Human Re sources Management. Theories and practices relating to the management of human resources will be explored. The role of the human resources department will be emphasized with par ticular attention being focuses on supervision, training, and customer service. Topics will include hiring and termination decisions, understanding of applicable federal and state em ployment legislation, labor relations, employee discipline, per formance appraisals, wages and benefits.
Prerequisite: College level reading and writing skills are re quired.

MAN 2500
Operations Management
3 Credits
This course introduces you to operations management tech niques including application to functional areas of the business enterprise and operations control. Topics include design and management of productions operations, including productiv ity, strategy, capacity planning, location, layout, resources management, Just-in-time systems, materials requirement planning, and project management.
Prerequisite: College level reading, writing and math skills are required.

MAN 2604
Intercultural Relations in Business
3 Credits
Examines the influence of individual differences and ethnic and national culture on behaviors within organizations and across national borders. Addresses the questions of how and when to be sensitive to these issues, and develops skills re quired to effectively manage in diverse environment.
Prerequisites: College level reading and writing skills are re quired.

MAN 2652
Global Management
3 Credits
This course involves a comparative study of global manage ment practices. This course also addresses the questions of how and when to be sensitive to cultural issues and to develop the skills needed to effectively manage in diverse global envi ronments.
Prerequisite: College level reading, writing and math skills are required.

MAN 2930
Special Topics in Supply Chain Management
3 Credits
This course provides an in-depth analysis of current issues, problems, and systems in logistics and supply chain manage ment, with an emphasis on new theoretical and methodologi cal developments. Specific topics vary depending upon current

industry developments. This course, in different content areas, may be repeated for credit.
Prerequisite: SCM 1010, Introduction to Supply Chain Man agement. College level reading, writing and math skills are re quired.

MAN 2942
Supply Chain Management Internship
3 Credits
This course is a selected and planned, work-based experience that provides students with an opportunity to enhance work place skills through supervised practical experiences related to their career objectives. Work site, supervision, and objectives are to be approved by the Program Manager. A minimum of 75-clock ours of work-site training and supervision are re quired to complete the internship. The Program Manager (and/or instructor) evaluates student performance based upon completion of the course objectives and feedback provided by the work-site supervisor.
Prerequisite: College level reading, writing and math skills are required.

MAP 2302
Differential Equations
3 Credits
Covers first order differential equations including those with separable variables, homogeneous and exact equations and equations made by an integrating factor. Topics include linear differential equations of higher order and their solutions in cluding both homogeneous and non-homogeneous equations, differential operators, Laplace transforms, and series solutions and applications. Designed for engineering and mathematics majors.
Prerequisite: MAC 2312 with a minimum grade of C.

MAR 2011
Principles of Marketing
3 Credits
An introduction to contemporary marketing strategies and practices and the decisions marketing managers make to help organizations find, get, and keep customers in today's global business environment.
Prerequisites: College level reading and writing skills are re quired.

MAR 2150
International Marketing
3 Credits
Introduces students to the international marketing environ ment by examining the marketing implications of cultural and environmental differences, international marketing research, and the adaptation of product, price, promotion, and distribu tion.
Prerequisite: MAR 2011

MAT 0018
Pre-Algebra
3 Credits
Focuses on manipulative skills of whole numbers, integers, fractions, and decimals. Topics include prime factorization, square roots, and absolute values, order of operations, use of percent, formulas, measurement, geometry, and introduction to algebra. This course does not satisfy general education re quirements in mathematics and is awarded compensatory credit only.

MAT 0022
Integrated Arithmetic and Algebra
5 Credits
This course combines the arithmetic and algebra skills of MAT 0018 and MAT 0028. This course includes all mathematics skills necessary for entry into college level mathematics. Arith metic topics include operations with real numbers, fractions, decimals, exponents, geometry measurement systems, percent and ratios. Algebra topics include polynomial operation, fac toring, solving and graphing linear equations and inequalities, operations with quadratic equations, and applications of all concepts. This course does not satisfy general education re quirements and generates compensatory credit only.

MAT 0028
Beginning Algebra
3 Credits
Provides an introduction to algebra. Topics include basic linear equations and inequalities, properties of real numbers, opera tions, involving exponents and polynomials, factoring, quad ratic equations, applications, graphing of linear equations, and an introduction to radical simplification. This course does not satisfy general education requirements in mathematics and is awarded compensatory credit only.
Prerequisite: MAT 0018 or appropriate score on placement test.

MAT 0029
Developmental Mathematics for Statistics and Liberal Arts
3 Credits
This course provides instruction in developmental mathemati cal concepts that serve as a foundation for liberal arts and sta tistics. These mathematics concepts are presented in a context that is relevant and meaningful. This course emphasizes both written and verbal communication of mathematical concepts, and helps prepare the student for college-level statistics and liberal arts math courses. This course is not designed for stu dents who are required to take MAC 1105. Students who com plete this course will be prepared to enter STA 2023 or MGF 1130/1131 only.

MAT 1033
Intermediate Algebra
4 Credits
Topics include sets, relations, functions, polynomial opera tions, factoring, rational expressions, equations (linear, quad ratic, radical, rational), systems of equations, inequalities, exponents, radicals, graphs of linear equations, and inequali ties in two variables, complex numbers, and applications. Elective credit only.

Prerequisites: MAT 0022, or MAT 0028 with an 'S' grade, or ap propriate score on placement test.

MCB 1060
Food Microbiology
3 Credits
This course offers detailed examination of the principles of food microbiology and their application to current food tech nology. Additional topics covered will be food and enzymes produced by micro-organisms, food in relation to disease, food sanitation control and inspection and the Food Additives Amendment of the Federal Food, Drug and Cosmetic Act.
Co-requisite: MCB 1060L

MCB 1060L
Food Microbiology Laboratory
1 Credit
This course is designed to accompany MCB 1060. Aseptic tech niques and the culturing of microorganisms are presented. Various techniques for culturing foods, performing food counts, preparing food using micro-organisms, and sampling the environment for microorganisms are presented. A special fee will be charged for this course.
Co-requisite: MCB 1060

MCB 2000
Microbiology and Human Disease
3 Credits
Intended for Biology and Allied Health majors. Focuses on dis ease states, bacteria, viruses, fungi, rickettsiae and other patho genic organisms. Topics will include problems of sterilization, resistance, diagnostic testing and immunization.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: MCB 2000L

MCB 2000L
Microbiology and Human Disease Laboratory
1 Credit
A special fee will be charged for this course.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: MCB 2000

MCB 2910L
Guided Undergraduate Research
1 Credit
This course is intended for biological science majors who de sire to gain experience with research techniques, methods and procedures. It is intended to create supervised study through field and laboratory projects, guided readings, and achieve ment in specific research skills. Students will develop inde pendence in the laboratory regarding their research project and will learn how to write a scientific abstract. May be repeated up to 3 times for credit.
Prerequisites: College level reading, writing and math skills are required.

MET 2010C
Meteorology
3 Credits
A one semester course for non-science majors that focuses on the physical properties and dynamics of the atmosphere. Top ics include the origin and evolution of the atmosphere, storms and severe weather, weather forecasting and analysis, and the impact of weather and climate on humankind. A special fee will be charged for this course.
Prerequisites: College level reading, writing and math skills are required.

MGF 1130
Mathematical Thinking
3 Credits
In this course, students will utilize multiple means of problem solving through student-centered mathematical exploration. The course is designed to teach students to think more effec tively and increase their problem-solving ability through prac tical application and divergent thinking. This course is appropriate for students in a wide range of disciplines/pro grams.
Prerequisites: MAT 0022 or MAT 0028 or MAT 0029, or appro priate score on placement test.

MGF 1131
Mathematics in Context
3 Credits
Through this course, students will experience the practicality of mathematics in a global society. Students will engage in the applications of tools and techniques of mathematics in a vari ety of contextual situations from everyday life. This course is appropriate for students in a wide range of disciplines/pro grams.
Prerequisites: MAT 0022 or MAT 0028 or MAT 0029, or appro priate score on placement test.

MLS 2001L
Laboratory Techniques I
3 Credits
This is a foundational course which covers clinical laboratory techniques. Students will learn how to draw blood using uni versal precautions and following OSHA regulations. Labora tory practicums will include macroscopic and microscopic analysis of the urine specimen, immunology and immunohe matology techniques with blood specimens. Basic hematologi cal techniques will be introduced to conduct whole blood analysis and differentials. Initial microbiological techniques will be introduced in the laboratory.
Prerequisite: Admission to the Medical Laboratory Science program.
Corequisite: MLS 2304, MLS 2460

MLS 2002L
Laboratory Techniques II
4 Credits

This is a continuation of MLS 2001L. Students will continue to practice drawing blood using universal precautions and fol lowing OSHA regulations. Laboratory practicums will include clinical chemistry, hematology, molecular, microbiology and parasitology techniques.
Prerequisite: MLS 2001L
Corequisite: MLS 2307, MLS 2465, MLS 2624

MLS 2003L
Laboratory Techniques III
2 Credits
This a continuation of MLS 2002L. Students will continue to practice drawing blood using universal precautions and fol lowing OSHA regulations. Laboratory practicums will include clinical chemistry and serology.
Prerequisite: MLS 2002L
Corequisite: MLS 2625

MLS 2192
Molecular Diagnosis
2 Credits
This course provides an overview of the nucleic acid structure, gene expression and genetic diseases. Fundamentals of DNA and RNA isolation, amplification, hybridization analysis will also be discussed.
Prerequisite: MLS 2624
Corequisite: MLS 2003L

MLS 2304
Hematology I and Body Fluids
3 Credits
This course will provide the student with a foundational over view of the hematopoietic system, cell differentiation, and blood cell structure. Features and characteristics of anemias, thalassemia's and hemoglobinopathies will be covered in this course. Students will explore the components of a quality specimen for the hematology laboratory. The course will cover hematological laboratory techniques including staining tech niques and identification of normal blood cells. Students will also cover the study of the body fluids and their characteristics in normal and diseased states. Characteristics of deviation from normal cells will be emphasized.
Prerequisite: Admission to the Medical Laboratory Science program.
Corequisite: MLS 2001L

MLS 2307
Hematology II and Hemostasis
3 Credits
This is a continuation of MLS 2304. Students will continue to work with blood cell differentiation and hematology instru mentation. An emphasis will be placed on abnormal cell iden tification, and white blood cell abnormalities in leukemia, myeloproliferative, lymphoproliferative, and myelodysplastic disorders. This course will cover theory of hematological la boratory techniques including staining techniques and the identity of normal and abnormal blood cells. In addition, co agulation and hemostasis concepts, and instrumentation will be taught along with coagulopathies and platelet disorders.
Prerequisite: MLS 2304
Corequisite: MLS 2002L

MLS 2460
Medical Microbiology I
3 Credits
This course will cover the foundational overview of the diag nostic microbiological system, isolation and identification of clinically significant microorganisms. There will be an empha sis on the growth characteristics and methodology for identifi cation. Clinical laboratory diagnosis of infectious disease by serological test methods will be studied. Lectures will cover quality specimen collection, and the quality control procedures in the microbiology and serology laboratories.
Prerequisite: Admission to the Medical Laboratory Science program.
Corequisite: MLS 2001L

MLS 2465
Medical Microbiology II
3 Credits
This course is a continuation of MLS 2460. Emphasis will be placed on the correlation between pathogens, types of infec tion, and specimen source. Study of parasites and fungi of im portance will be explored. The identification of the diagnostic stages, and knowledge of specimen collection, handling, and processing will be discussed. Lectures will continue the dis cussion of quality control procedures in the microbiology la boratory.
Prerequisite: MLS 2460
Corequisite: MLS 2002L

MLS 2551
Immunohematology and Immunology
4 Credits
This course will cover the theoretical aspects of the immunohe matology section of the laboratory. Students will cover the study of blood group antigens, antibodies and basic immunol ogy. The theory of blood genetics, blood group systems and pre-transfusion practices, and quality control concepts in the immunohematology laboratory will be discussed. In addition to the immunology concepts covered hemolytic disease of the fetus, neonatal and obstetric transfusion medicine testing, ad verse effects of transfusion, donor screening, and blood com ponent preparation usage will also be discussed.
Prerequisite: Admission to the Medical Laboratory Science program.
Corequisite: MLS 2001L

MLS 2624
Clinical Chemistry I and Urinalysis
3 Credits
This course will provide the introduction to the chemistry tests that monitor the processes in the human body. Quality of specimen collected and its effect on the chemistry laboratory results will be examined. The course will cover the theory of the chemistry laboratory procedures conducted. Quality as surance concepts and quality control procedures will be intro duced. Point-of-care procedures will be discussed in relation

to the current practice for patient care. The course also covers the study and formation of urine, chemical, and microscopic examination. This course also includes an overview of the non-urine analyzed in the clinical laboratory.
Prerequisite: Admission to the Medical Laboratory Science program.
Corequisite: MLS 2002L

MLS 2625
Advanced Clinical Chemistry
3 Credits
This course is a continuation of Clinical Chemistry I and Uri nalysis. Discussion of the chemistry tests performed on serum and plasma specimens will continue. Material covered in MLS 2624 on quality control principles will be reviewed. Enzyme kinetics, endocrinology, therapeutic drug monitoring and toxi cology, liver and cardiac function will be discussed, as well as, principles of instrumentation and techniques in clinical chem istry related to standardization of procedures, and use of standards and controls.
Prerequisite: MLS 2624
Corequisite: MLS 2003L

MLS 2701
Principles of Laboratory Operations
2 Credits
This course will provide students with knowledge of the role regulatory agencies and laws in the practices of the medical la boratory sciences. Students will be given information on es sentials of management and quality assurance in the practices in the clinical laboratory. Emphasis will be placed on safe practices in the laboratory and elements required, and training laboratory personnel.

MLS 2834
Medical Laboratory Clinical I
2 Credits
Students will spend required time at a clinical affiliate and practice under the supervision of a MLS. Theory and labora tory skills attained in the student laboratory will be required in the area of urinalysis, serology, immunology and body fluids. The skills demonstrated must include critical thinking skills, ability to correlate the findings in the specimen, and patient clinical condition and disease state.
Prerequisite: MLS 2624

MLS 2835
Medical Laboratory Clinical II
5 Credits
Students will spend required time at a clinical affiliate and practice under the supervision of a MLS. Theory and labora tory skills attained in student laboratory are required in the area of the laboratory. The skills demonstrated must include critical thinking skills, the ability to correlate the findings in the specimen, and patient clinical condition and disease state.
Prerequisite: MLS 2834
Corequisite: MLS 2930

MLS 2930
Medical Laboratory Seminar
2 Credits
This courses stresses the importance of evidence based practice in the medical laboratory sciences field. Students will be pre senting case studies to the faculty and peers in the program. Instruction will emphasize professional, legal and ethics issues affecting the medical laboratory science field. Students will re view the material covered in the program to prepare for the comprehensive examination. This will be used in preparation for the Board of Certification examination by the American So ciety for Clinical Pathology.

MMC 2000
Introduction to Mass Communications
3 Credits
Provides an overview of the background, role, and responsibil ities of the mass media; focuses on analyzing and evaluating techniques. Topics include print and electronic media and film.

MMC 2100C
Writing for Mass Communication
3 Credits
Covers the basic techniques used in preparing copy for mass media including the fundamental journalistic skills used in writing for newspapers, magazines, radio, television, public re lations and advertising.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: JOU 1400L

MNA 1320
HR Recruitment Interviewing and Selection
3 Credits
Provides a detailed overview of staffing activities crucial to or ganization performance. Within the context of current law and regulations, the focus will be on the assessment of staffing needs, recruitment strategies, interviewing techniques, selec tion tools and methods, planning and implementation of staff ing policies.

MNA 1325
HR Compensation and Benefits
3 Credits
This course discusses various compensation and benefit plans, addressing legal considerations and the effective administra tion of such plans. The focus is on developing a foundational understanding of the human resource management concepts integral to the compensation and benefits domain. Completion of introductory courses in MAN 2300 is recommended.
Prerequisites: College-level reading and writing skills are re quired.

MSL 1001C
Leadership and Personal Development
2 Credits
Introduces personal challenges and competencies critical to ef fective leadership; teaches personal development life skills rel ative to leadership, officership, and the Army profession;

focuses on gaining understanding of the ROTC program and its purpose in the Army. Enrollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

MSL 1002C
Introduction to Tactical Leadership
2 Credits
Presents leadership basics (e.g.: setting direction, problem-solving, listening, briefs, giving feedback and use of effective writing skills); explores dimensions of leadership values, at tributes, skills and actions in context of practical hands-on ex ercises. Enrollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transi ent student and complete the Florida Shines application to en roll in this course.

MSL 2101C
Innovative Team Leadership
2 Credits
Explores creative and innovative tactical leadership strategies and styles. Develops knowledge of leadership values and at tributes by understanding Army rank, structure, and duties. Broadens knowledge of land navigation and squad tactics. En rollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

MSL 2102C
Foundations of Tactical Leadership
2 Credits
Examines challenges of leading tactical teams in complex cur rent operating environment; highlights dimensions of terrain analysis, patrolling and operation orders; develops greater self-awareness, communication and team building skills. Enroll ment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

MSL 2900C
Army Physical Readiness
1 Credit
This course will train students in the unique role of Army physical readiness in sustaining military operations. It will also prepare students to plan, prepare, and conduct military fitness training. Student can receive one credit per semester for up to four semesters. Enrollment is limited to students who are also enrolled in the USF ROTC program. You must apply to USF as a transient student and complete the Florida Shines application to enroll in this course.

MUL 1010
Introduction to Music
3 Credits
In this course, students will survey the history of classical mu sic from antiquity to the modern period, focusing on western music. The curriculum may also integrate a variety of popular and global styles where appropriate.
Prerequisites: College level reading and writing skills are re quired.

MUN 1120
Concert Band I
1 Credit
Provides for participation in a concert band which performs traditional and contemporary music. This course may be re peated four times for credit.

MUN 1310
Chorus
1 Credit
Provides for participation in a chorus which performs a variety of music at college and public functions. This course may be repeated four times for credit.

MUN 1340
Vocal Ensemble
1 Credit
Provides for participation in small performing groups and in cludes the study of traditional and contemporary music. This course may be repeated four times for credit.

MUN 1410
String Ensemble
1 Credit
Provides for participation in small instrumental groups and in cludes the study of traditional and contemporary music. This course may be repeated four times for credit.

MUN 1420
Woodwind Ensemble
1 Credit
Provides for participation in small instrumental groups and in cludes the study of traditional and contemporary music. This course may be repeated four times for credit.

MUN 1430
Brass Ensemble
1 Credit
Provides for participation in small instrumental groups and in cludes the study of traditional and contemporary music. This course may be repeated four times for credit.

MUN 1440
Percussion Ensemble, Small Ensemble
1 Credit
Provides for participation in small instrumental groups and in cludes the study of traditional and contemporary music. This course may be repeated four times for credit.

MUN 1480
Classical Guitar Ensemble
1 Credit

Open to all students, faculty and members of the community who play guitar. Enrollment is determined by the director through audition. Participants will study and perform music from all periods in preparation for public performance. May be taken six times for credit.

MUN 1710
Stage Band I, Major Ensemble
1 Credit
Provides for participation with a select group of musicians who perform contemporary jazz and stage band music. This course may be repeated four times for credit.

MUS 1010
Recital Attendance
Students in this course are required to attend recitals and con certs approved by the Hillsborough Community College, Ybor City Campus School of Visual and Performing Arts Music De partment. This course is required of all students enrolled in Applied Music, principal instrument (or voice) courses. It is a non-credit S/U (Satisfactory/Unsatisfactory) course.

MUT 1001
Fundamentals of Music
3 Credits
Focuses on music fundamentals for non-music majors, with an emphasis on reading music, keys, scales, simple chords and their practical application.

MUT 1111
Music Theory I
3 Credit
Covers the rudiments of music, with an emphasis on major and minor scales, rhythmic and melodic notation, triads, inter vals, cadences, chords and inversions and four part music writ ing. Topics include the development of aural and visual skills in music reading, rhythmic, melodic and harmonic dictation and the practical application of basic harmonic principles.
Co-requisite: MUT 1241L

MUT 1112
Music Theory II
3 Credit
A continuation of MUT 1111
Co-requisite: MUT 1242L

MUT 1241L
Sight Singing and Ear Training I
1 Credit
Trains students to visually and aurally recognize the melodic, rhythmic and harmonic patterns studied in Theory I, translate patterns from aural stimulus to notation and visual/cognitive stimulus to performance in real time.
Co-requisite: MUT 1111

MUT 1242L
Sight Singing and Ear Training II
1 Credit
Trains students to visually and aurally recognize the melodic, rhythmic and harmonic patterns studied in Theory II, translate patterns from aural stimulus to notation and visual/cognitive stimulus to performance in real time.
Co-requisite: MUT 1112

MUT 2116
Music Theory III
3 Credits
Focuses on the development of music from Beethoven through the 20th century, with an emphasis on the techniques of four-part harmonization, including triads and chords, with an intro duction to counterpoint.
Co-requisite: MUT 2246L

MUT 2117
Music Theory IV
3 Credits
A continuation of MUT 2116.
Co-requisite: MUT 2247L

MUT 2246L
Sight Singing/Ear Training III
1 Credit
Trains students to visually and aurally recognize the melodic, rhythmic and harmonic patterns studied in Theory III, trans late patterns from aural stimulus to notation and visual/cogni tive stimulus to performance in real time.
Co-requisite: MUT 2116

MUT 2247L
Sight Singing/Ear Training IV
1 Credit
Trains students to visually and aurally recognize the melodic, rhythmic and harmonic patterns studied in Theory IV, trans late patterns from aural stimulus to notation and visual/cogni tive stimulus to performance in real time.
Co-requisite: MUT 2117

MVB 1011
Pre-Principal Freshman Trumpet (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010, MUT 1001

MVB 1011
Pre-Principal Freshman Trumpet (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per

formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVB 1012
Pre-Principal Freshman Horn (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010, MUT 1001

MVB 1012
Pre-Principal Freshman Horn (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVB 1013
Pre-Principal Freshman Trombone (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010, MUT 1001

MVB 1013
Pre-Principal Freshman Trombone (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVB 1014
Pre-Principal Freshman Baritone (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010, MUT 1001

MVB 1014
Pre-Principal Freshman Baritone (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVB 1015
Pre-Principal Freshman Tuba (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010, MUT 1001

MVB 1015
Pre-Principal Freshman Tuba (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space

availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVB 1211
Secondary Freshman Trumpet
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 1212
Secondary Freshman Horn
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 1213
Secondary Freshman Trombone
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 1214
Secondary Freshman Baritone
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 1215
Secondary Freshman Tuba
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 1311
Principal Freshman Trumpet
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 1312
Principal Freshman Horn
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 1313
Principal Freshman Trombone
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 1314
Principal Freshman Baritone Horn
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 1315
Principal Freshman Tuba
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 2221
Secondary Sophomore Trumpet
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 2222
Secondary Sophomore Horn
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 2223
Secondary Sophomore Trombone
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 2224
Secondary Sophomore Baritone
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVB 2225
Secondary Sophomore Tuba
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVB 2321
Principal Sophomore Trumpet
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVB 1311
Co-requisite: MUS 1010

MVB 2322
Principal Sophomore Horn
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisites: MVB 1312
Co-requisite: MUS 1010

MVB 2323
Principal Sophomore Trombone
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVB 1313
Co-requisite: MUS 1010

MVB 2324
Principal Sophomore Baritone Horn
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVB 1314
Co-requisite: MUS 1010

MVB 2325
Principal Sophomore Tuba
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVB 1315
Co-requisite: MUS 1010

MVK 1011
Pre-Principal Freshman Piano (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010, MUT 1001

MVK 1011
Pre-Principal Freshman Piano (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVK 1111 (A & B)
Freshman Class Piano
1 Credit
Covers beginning piano skills for non-keyboard music majors by combining lecture and outside practice. Students may take two semesters, designated 'A' and 'B.'

MVK 1211
Secondary Freshman Piano
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com

pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVK 1311
Principal Freshman Piano
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVK 1811
Class Piano/Non Music Majors
1 Credit
Beginning piano for the non-music major. This course may be repeated four times for credit.

MVK 2221
Secondary Sophomore Piano
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVK 2321
Principal Sophomore Piano
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVK 1311
Co-requisite: MUS 1010

MVP 1011
Pre-Principal Freshman Percussion (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. MVS 1014
Pre-Principal Freshman String Bass (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish

mesters, designated 'A' and 'B.'
Co-requisites: MUS 1010, MUT 1001

MVS 1014
Pre-Principal Freshman String Bass (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVS 1015
Pre-Principal Freshman Harp
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUT 1001 (“A” semester only), MUS 1010

MVS 1016
Pre-Principal Freshman Guitar (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per

formance experience proficiencies expected of a student wishing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on have college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two semesters, designated 'A' and 'B.'
Co-requisites: MUS 1010, MUT 1001

MVS 1016
Pre-Principal Freshman Guitar (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or performance experience proficiencies expected of a student wishing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two semesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVS 1116
Class Guitar
1 Credit
Guitar class: group instruction in beginning classical guitar techniques. May be repeated four times for credit.

MVS 1211
Secondary Freshman Violin
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1212
Secondary Freshman Viola
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1213
Secondary Freshman Cello
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1214
Secondary Freshman String Bass
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1215
Secondary Freshman Harp
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 101_ level but still does not meet the requirements for entry to the MV_ 131_ level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1216
Secondary Freshman Guitar
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1311
Principal Freshman Violin
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1312
Principal Freshman Viola
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1313
Principal Freshman Cello
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVS 1314
Principal Freshman String Bass
2 Credits

Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisites: MUS 1010

MVS 1315
Principal Freshman Harp
2 Credits
This course is designed for the music major to improve tech nical skills, musicianship and to study appropriate repertoire with emphasis on stylistically accurate performance practices. Students must either audition successfully for placement in this course or have successfully completed the MV_101_ courses. May be repeated once for credit.
Co-requisite: MUS 1010

Pre-Principal Freshman Clarinet (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisites: MUS 1010, MUT 1001

MVW 1013
Pre-Principal Freshman Clarinet (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVW 1014
Pre-Principal Freshman Bassoon (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisites: MUS 1010, MUT 1001

MVW 1014
Pre-Principal Freshman Bassoon (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVW 1015
Pre-Principal Freshman Saxophone (A)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se mesters, designated 'A' and 'B.'
Co-requisites: MUS 1010, MUT 1001

MVW 1015
Pre-Principal Freshman Saxophone (B)
2 Credits
This course is for the student who intends to be a music major, but who lacks the technique, music reading skills and/or per formance experience proficiencies expected of a student wish- ing to register for the first semester college freshman level of applied music instruction. The course also serves those who are not music majors, but who wish to study an instrument on the college level. In such cases, enrollment is subject to space availability and instructor approval. Students may take two se- mesters, designated 'A' and 'B.'
Co-requisite: MUS 1010

MVW 1211
Secondary Freshman Flute
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com-

pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1212
Secondary Freshman Oboe
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1213
Secondary Freshman Clarinet
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1214
Secondary Freshman Bassoon
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 1215
Secondary Freshman Saxophone
1 Credit
This course is designed for the music major who wishes to study a secondary instrument, or for a student who has com pleted the MV_ 10XX level but still does not meet the require ments for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 1311
Principal Freshman Flute
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1312
Principal Freshman Oboe
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1313
Principal Freshman Clarinet
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1314
Principal Freshman Bassoon
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 1315
Principal Freshman Saxophone
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Co-requisite: MUS 1010

MVW 2221
Secondary Sophomore Flute
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 2222
Secondary Sophomore Oboe
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 2223
Secondary Sophomore Clarinet
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 2224
Secondary Sophomore Bassoon
1 Credit

This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 2225
Secondary Sophomore Saxophone
1 Credit
This course is a continuation of MV_ 222X and is designed for the music major who wishes to study a secondary instrument, or for a student who has completed the MV_ 10XX level but still does not meet the requirements for entry to the MV_ 13XX level course. This course may be repeated 1 time for credit.
Co-requisite: MUS 1010

MVW 2321
Principal Sophomore Flute
2 Credits
Students must audition for placement in this course and will receive private instruction on one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVW 1311
Co-requisite: MUS 1010

MVW 2322
Principal Sophomore Oboe
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVW 1312
Co-requisite: MUS 1010

MVW 2323
Principal Sophomore Clarinet
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVW 1313
Co-requisite: MUS 1010

MVW 2324
Principal Sophomore Bassoon
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once for credit.
Prerequisite: MVW 1314
Co-requisite: MUS 1010

MVW 2325
Principal Sophomore Saxophone
2 Credits
Students must audition for placement in this course and will receive private instruction of one contact hour weekly. This course may be repeated once.
Prerequisite: MVW 1315
Co-requisite: MUS 1010

NMT 1002
Introduction to Nuclear Medicine Technology
2 Credits
Provides an overview of the field of nuclear medicine. Focuses on medical terminology, the history of nuclear medicine, basic concepts of radiochemistry, the production of radionuclides, medical law, and hospital administration, Field trips to nu clear medicine training facilities are includes.
Prerequisite: NMT 1705L (Nuclear Medicine Tech I Lab)
Co-requisite: NMT 1705L

NMT 1103
Patient Care
2 Credits
Covers concepts of patient care with an overview of proper pa tient management. Addresses issues of ethics as they relate to patient care, healthcare, and the profession of nuclear medi cine.
Prerequisite: NMT 1002
Co-requisite: NMT 1706L (Nuclear Medicine Tech Lab II)

NMT 1312
Radiation Safety and Health Physics
3 Credits
Covers proper techniques in the safe handling of radioactive materials, with an emphasis on proper receipt, usage, storage and disposal of radioactive materials. Topics include rules, standards, regulations and biological effects of radiation.
Prerequisite: NMT 1613

NMT 1534
Instrumentation, Quality Control and Quality Assurance
3 Credits
Covers the operation and design principles of radiation detec tion and imaging instruments used in nuclear medicine, com puted tomography scanners, magnetic resonance, imaging scanners, medical informatics and computers used in imaging. Also includes quality control of instruments and quality assur ance programs.
Prerequisite: NMT 1613
Co-requisite: NMT 1706L

NMT 1613
Nuclear Physics and Instrumental Applications
3 Credits
Covers the basic concepts of quantum theory and radiation physics with an emphasis on radioactive decay and the interac tion of radiation with matter. Basic radiation safety, the phys ics of nuclear medicine instruments health physics, and dosimetry.
Prerequisite: Admission to Nuclear Medicine Technology pro gram.
Co-requisite: NMT 1705L, NMT 1714

NMT 1705L
Nuclear Medicine Laboratory I
1 Credit
Introduces student to radio-pharmacy and nuclear medicine department settings. Laboratory exercises include proper identification of equipment and use, radiation detection, radia tion safety and shielding, instrument calibration, and proper instrumentation technique. Students will be required to pass practical competencies.
Prerequisite: Admission to Nuclear Medicine Technology pro gram.
Co-requisites: NMT 1002, NMT 1613, NMT 1713

NMT 1706L
Nuclear Medicine Laboratory II
1 Credit
Prepares students for practicum courses and clinical applica tions in nuclear medicine by practicing patient transport and transfer, patient positioning, patient care skills, venipuncture, image processing and analysis, principles of radiation safety, and daily applications in the field of nuclear medicine technol ogy. Laboratory exercises also include radiation detection, in strument calibration, detector resolution, instrument quality control, trouble-shooting, and proper technique. Students will be required to pass practical competencies. Completion of practical competencies is required.
Prerequisite: NMT 1705L
Co-requisites: NMT 1103, NMT 1534, NMT 1723, NMT 2430

NMT 1713
Nuclear Medicine Methodology I
3 Credits
Comprehensive study of nuclear medicine procedures with special emphasis on radiochemistry, radio-pharmacy, prepara tion and properties of radiopharmaceuticals and routine imag ing techniques. Imaging topics include skeletal, pulmonary, and endocrine systems. Includes case studies and image re view.
Prerequisite: Admission to Nuclear Medicine Technology pro gram.
Co-requisite: NMT 1705L, NMT 1714

NMT 1714
Pathology and Immunology for the NMT
3 Credits
Introduces the student to human immunology and pathologi cal conditions with an emphasis on those commonly seen in the field of nuclear medicine. Basic anatomy is reviewed in correlation to the pathophysiology of disease. Descriptions of how diseases are classified, diagnosed and treated, as well as the natural course/prognosis of these diseases are presented.
Prerequisite: Admission to the Nuclear Medicine Technology program.
Co-requisite: NMT 1713

NMT 1723
Nuclear Medicine Methodology II
3 Credits
Comprehensive study of nuclear medicine procedures with special focus on cardiovascular, gastrointestinal, and genitouri nary systems. Emphasis is given to radiopharmaceuticals, rou tine imaging techniques, ancillary pharmacology, and quantitative analysis. Includes image review and case studies.
Prerequisite: NMT 1002
Co-requisite: NMT 1706L

NMT 1804
Nuclear Medicine Practicum I
3 Credits
Allows students to apply knowledge gained in lectures and la boratories to clinical situations. Consists of up to 32 hours per week of clinical training in affiliate nuclear medicine depart ments. Under the guidance of registered technologists and physicians, students experience in the clinical setting. Compe tencies required.
Prerequisites: NMT 1706L, NMT 1723

NMT 1814
Nuclear Medicine Practicum II
4 Credits
Continuation of NMT 1804L. Consists of up to 32 hours per week of clinical training in affiliate nuclear medicine depart ments. Under the guidance of registered technologists and physicians, students gain experience in the clinical setting. Competencies on imaging and non-imaging procedures are re quired.
Prerequisite: NMT 1804

NMT 2051L
Nuclear Medicine Data Analysis
1 Credit
Correlated review and comprehensive testing of mathematics and data analysis associated with nuclear medicine.
Prerequisite: NMT 2733
Co-requisite: NMT 2061C

NMT 2061C
Nuclear Medicine Seminar
2 Credits
Correlated review and comprehensive testing in preparation for professional certification examinations. Students are re quired to complete oral presentations, and participate in pro fessional activities.
Prerequisites: NMT 2733, NMT 2910

NMT 2430
Radiation Safety and Biology
3 Credits
Focuses on the interaction of ionizing radiation with physio logical systems, genetics, radiation injury, and radiation do simetry with an emphasis on the principles of radiation safety. Includes proper techniques in the safe handling of radioactive materials, proper receipt, usage, storage and disposal of radio active materials. Topics include rules, standards, and regula tions.
Prerequisites: NMT 1002, NMT 1613
Co-requisite: NMT 1534

NMT 2733
Nuclear Medicine Methodology III
4 Credits
Continues the comprehensive study of nuclear medicine proce dures with special emphasis on infection, the central nervous system, oncology, hematopoietic, radioimmunoassay, and therapies. Includes radiopharmaceuticals, pharmacology, im age analysis, case studies and image review.
Prerequisite: NMT 1723

NMT 2775C
PET/CT and Cross Sectional Anatomy
3 Credits
Comprehensive study of positron emission, computed tomog raphy and fusion imaging procedures. Emphasis is given to radiotracer methodology, preparation and properties of posi tron emission radiopharmaceuticals, routine imaging tech niques, ancillary pharmacology including contrast agents, and quantitative analysis. Includes anatomy and pathology in cross-sectional planes for SPECT, PET, CT, and MRI using case studies and image review. Laboratory assignments and com petencies also included.
Prerequisites: NMT 1103, NMT 2714, NMT 2430
Co-requisite: NMT 1814

NMT 2824
Nuclear Medicine Practicum III
4 Credits
Continuation of NMT 1814L. Consists of up to 32 hours per week of clinical training in affiliate nuclear medicine depart ments. Under the guidance of registered technologists and physicians, students gain experience in the clinical setting. Competencies on imaging and non-imaging procedures are re quired.
Prerequisite: NMT 1814

NMT 2910
Advanced Topics and Research Methods
2 Credits
Covers research methods and ethics as it relates to medical re search and scientific writing techniques. Includes review of current research as it relates to the field of nuclear medicine and molecular imaging. Students are required to complete a research paper and present research in written and oral for.
Prerequisites: NMT 1103, NMT 1714, NMT 2430
Co-requisite: NMT 1814

NSP 4695
Forensic Nursing
3 Credits
This course further expands on the concepts of nursing This course is an introduction to the forensic health sciences, foren sic nursing and the nursing role in the scientific investigation of violence. The different roles and responsibilities of forensic nurses will be explored and best-practices for evidence collec tion and preservation will be reviewed. Holistic care of victims and families will be emphasized. Students will review victim ology and explore forensic nursing interventions.
Prerequisites: College-level reading, writing and math skills re quired.

NUR 1003
Transition Nursing Specialty
4 Credits
This course provides credits to meet the State of Florida affilia tion agreement for transition students who have completed an LPN program and have received licensure to be a Licensed Practical Nurse. The content reflects their knowledge in the ar eas of pediatric nursing, maternal child health nursing, and mental health nursing.
Prerequisites: NUR 1022C, NUR 1024, NUR 1522C, NUR 1440C
Co-requisites: NUR 2210, NUR 2210L, NUR 2205, NUR 2211, NUR 2211L, NUR 2811C

NUR 1010
Introduction to Nursing
1 Credit
The course introduces the student to the role of nursing as a profession. The student will explore the changing role of the nurse throughout history and why the profession of nursing is viewed as both an art and a science. The course will build a foundation of understanding how to be successful throughout the nursing program.
Prerequisites: Acceptance into the Nursing program. College level reading, writing, and math skills are required.
Co-requisites: NUR 1025C, NUR 1511

NUR 1020
Fundamental Concepts of Nursing Practice
3 Credits
This course provides for the acquisition and application of fun damental concepts important to the practice of nursing includ ing those related to patient-centered care, the healthcare environment, and professional nursing practice. Includes care of the stable, acute, and chronically ill adults and elderly pa tients with a focus on the promotion of wellness, maintenance of health, and prevention of illness. Application of knowledge and skills occurs in nursing laboratories and clinical setting.
Prerequisite: Acceptance into the Nursing program.
Co-requisites: NUR 1020L, NUR 1023C, NUR 1024

NUR 1020L
Fundamental Concepts of Nursing Practice Clinical
2 Credits
This course provides for the acquisition and application of fun damental concepts important to the practice of nursing includ ing those related to patient-centered care, the healthcare environment, and professional nursing practice. Includes care of the stable, acute, and chronically ill adults and elderly pa tients with a focus on the promotion of wellness, maintenance of health, and prevention of illness. Application of knowledge and skills occurs in nursing laboratories and clinical setting.
Prerequisite: Acceptance into the Nursing program.
Corequisites: NUR 1020, NUR 1023C, NUR 1024

NUR 1022C
Essential Concepts of Patient Care Management
2 Credits
This course presents the theoretical basis for assessing the health status of individuals across the lifespan and the basis for planning safe, quality patient-centered care that reflects under standing of pharmacology and nutrition. The course intro duces how the professional nurse uses this theory to plan developmental, cultural and lifestyle appropriate approaches to nursing care. Includes the role of the nurse in identifying an communicating normal findings and common deviations of normal. Focuses on safety and quality improvement related to pharmacological interventions. Physical assessment tech niques are taught in the nursing laboratory.
Prerequisite: Acceptance into the Nursing program.
Corequisites: NUR 1024, NUR 1440C, NUR 1522C

NUR 1023C
Essential Concepts of Patient Management
4 Credits
This course presents the theoretical basis for assessing the health status of individuals across the lifespan and the basis for planning safe, quality, patient-centered care that reflects un derstanding of pharmacology and nutrition. The course intro duces how the professional nurse uses this theory to plan developmentally, culturally, and lifestyle appropriate ap proaches to nursing care. Includes the role of the nurse in identifying and communicating normal findings and common deviations of normal. Focuses on safety and quality improve ment related to pharmacological and nutritional interventions, and health assessment techniques are taught in the nursing la boratory and simulation suite.
Prerequisite: Acceptance into the Nursing program.
Corequisites: NUR 1020, NUR 1020L NUR 1024

NUR 1024
Critical Thinking in Nursing Practice
2 Credits
This course introduces the learner to critical thinking used in nursing. In this course the student learns to use critical skills and strategies that underscore the clinical reasoning repre sented in the nursing process as well as dealing with aspects of the healthcare system for safe practice in the current healthcare environment. This course forms the basis for critical thinking processes applied throughout all nursing courses.
Prerequisite: Acceptance into the Nursing program.
Corequisites: NUR 1020, NUR 1020L, NUR 1023C

NUR 1025C
Essential Concepts of Patient Management
3 Credits
The course introduces the role of the nurse generalist by ex ploring beginning cognitive, technical, and interpersonal skills necessary for practice. Emphasis is placed on beginning con cepts essential for nursing practice. Students develop the skills necessary for the delivery of safe and effective nursing care through supervised lab and simulation experiences. This ap proach is designed to develop clinical reasoning skills and pro vide hands-on experience in the care of adult clients.
Prerequisites: Acceptance into the Nursing program. College level reading, writing, and math skills are required.
Co-requisites: NUR 1010, NUR 1511

NUR 1030C
Fundamental Concepts of Nursing Practice
3 Credits
In this course, students will begin to use the nursing process to assess, plan, implement, and begin to evaluate evidence-based care of an adult client in a variety of care settings. Students use professional standards of nursing and begin to develop their individual practice as student nurses. The core concepts of safety, caring, teamwork, and collaboration are emphasized throughout the course. Clinical experiences include a variety of care settings where students begin to apply conceptual knowledge and skills utilizing the nursing process and clinical judgment model.
Prerequisites: NUR 1010, NUR 1025C, NUR 1511. College level reading, writing, and math skills are required.
Co-requisites: NUR 1060C, NUR 1092C

NUR 1060C
Health Assessment
2 Credits
The course will provide instruction in health assessment using an organized and systematic approach. The health assessment will enable students to utilize interviewing techniques to ob tain and record a comprehensive health history and apply clin ical skills. Opportunities to practice physical assessment will be provided in lab and simulation experiences.
Prerequisites: Acceptance into the Nursing program. NUR 1010, NUR 1025C, NUR 1511. College level reading, writing, and math skills are required.
Co-requisites: NUR 1030C, NUR 1092C

NUR 1092C
Introduction to Medication Administration and Dosage Cal culation
1 Credit
This course introduces the student to the principles of pharma cology. The course focuses on the pharmacodynamics, dosage calculation, and safe medication administration.
Prerequisites: NUR 1010, NUR 1025C, NUR 1511. College level reading, writing, and math skills are required.
Co-requisites: NUR 1030C, NUR 1060C

NUR 1101L
Clinical Simulation I
1 Credit
This simulation course assimilates the knowledge, skills, and attitudes to provide safe patient care in a simulation patient environment.
Prerequisites: NUR 1030C, NUR 1060C, NUR 1092C. College level reading, writing, and math skills are required.
Co-requisites: NUR 1110C, NUR 1130

NUR 1110C
Concepts of Medical-Surgical Nursing I
3.5 Credits
Building upon learned knowledge, this course introduces the concepts of nursing practice to the care of adult patients with stable conditions. The course focuses on a variety of adult pa tient populations in the classroom and clinical area. Applica tion of knowledge and skills occurs in the nursing laboratory and in a variety of clinical settings.
Prerequisites: NUR 1030C, NUR 1060C, NUR 1092C. College level reading, writing, and math skills are required.
Co-requisites: NUR 1101L, NUR 1130

NUR 1130
Pathopharmacology for Nursing Practice I
2 Credits
This course will build on learned knowledge from the Anat omy and Physiology prerequisite course and is designed to im prove the understanding of the underlying pathophysiologic changes occurring in simple/common conditions. This course further explores the effects of medications on the conditions, as well as diagnostic changes that occur.
Prerequisites: NUR 1030C, NUR 1060C, NUR 1092C. College level reading, writing, and math skills are required.
Co-requisites: NUR 1101L, NUR 1110C

NUR 1310C
Concepts of Pediatric Nursing
3 Credits
This course builds on all previous nursing courses to further refine and apply the concepts of nursing practice to the care of children. Application of knowledge and skills occurs in the nursing laboratories and a variety of clinical settings.
Prerequisites: NUR 1020, NUR 1020L, NUR 1023C, NUR 1024
Corequisites: NUR 1421C, NUR 1520C

***NUR 1421C**
Concepts of Nursing Care for Woman and Infants
3 Credits Fall 2025 / 3.5 Credits Spring 2026 onward
This course builds on previous nursing courses to provide for the acquisition and application of concepts of nursing applied to the care of woman and infants. Application of knowledge and skills occurs in the nursing laboratories and a variety of clinical settings.
*Students taking NUR 1421C in Spring 2026 or later will regis ter for the course as a 3.5 credit hour class. Students accepted for Fall 2025 admission will be required to have the following prerequisites and corequisites.
Fall 2025
Prerequisites: NUR 1020, NUR 1020L, NUR 1023C, NUR 1024
Corequisites: NUR 1310C, NUR 1520C
Spring 2026 onward
Prerequisites: NUR 1030C, NUR 1060C, NUR 1092C. College level reading, writing, and math skills are required.
Co-requisites: NUR 1515C

NUR 1440C
Concepts of Family Nursing
4 Credits
This course builds on all previous nursing courses to further refine and apply the concepts of nursing practice to the care of women, infants, and children through adolescence. Applica tion of knowledge and skills occurs in the nursing laboratories and a variety of clinical settings.
Prerequisite: Acceptance into the Nursing Program
Corequisites: NUR 1022C, NUR 1024, NUR 1522C

NUR 1511
Introduction to Psychosocial Nursing
2 Credits
This course provides the student with the fundamental con cepts needed for psychiatric mental health nursing practice.
Prerequisites: Acceptance into the Nursing program. College level reading, writing, and math skills are required.
Co-requisites: NUR 1010, NUR 1025C

NUR 1515C
Concepts of Mental Health Nursing
2 Credits
This course examines psychiatric mental health and biological processes for specific psychopathologic diseases and disorders across the lifespan. Included are the associated psychopharma cology and psychotherapeutic modalities and specific nursing care for those patients.
Prerequisites: NUR 1030C, NUR 1060C, NUR 1092C. College level reading, writing, and math skills are required.
Co-requisites: NUR 1421C

NUR 1520C
Concepts of Mental Health Nursing
4 Credits
This course builds on the fundamental concepts providing for the acquisition of additional concepts and application of con cepts of nursing applied to the care of patients with mental health conditions. Application of knowledge and skills occurs in a variety of clinical settings.
Prerequisites: NUR 1020, NUR 1020L, NUR 1023C, NUR 1024
Corequisites: NUR 1310C, NUR 1421C

NUR 1522C
Concepts of Mental Health Nursing - Transition
3 Credits
This course builds on fundamental concepts providing for the acquisition of additional concepts and application of concepts of nursing applied to the care patients with mental health con ditions. Application of knowledge and skills occurs in a vari ety of clinical settings.
Corequisites: NUR 1022C, NUR 1024, NUR 1440C

NUR 2033
Transition to Professional Nursing Practice Practicum
1 Credit

This course provides the student with the opportunity to prac tice under the direction of a registered nurse preceptor to tran sition to the role of professional nurse. Focus is on providing competent, safe, evidence-based care for patients.
Prerequisites: NUR 2103L, NUR 2112C, NUR 2132. College level reading, writing, and math skills are required.
Co-requisites: NUR 2950

NUR 2102L
Clinical Simulation II
1 Credit
This simulation course assimilates the knowledge, skills, and attitudes to provide safe patient care in a simulation patient environment.
Prerequisites: NUR 1101L, NUR 1110C, NUR 1130, NUR 1515C, NUR 1421C. College level reading, writing, and math skills are required.
Co-requisites: NUR 2300C

NUR 2103L
Clinical Simulation III
1 Credit
This simulation course assimilates the knowledge, skills, and attitudes to provide safe patient care to a client with acute or life-threatening medical-surgical concerns in a simulation pa tient environment.
Prerequisites: NUR 2102L, NUR 2111C, NUR 2131, NUR 2300C. College level reading, writing, and math skills are re quired.
Co-requisites: NUR 2132, 2112C

NUR 2111C
Concepts of Medical-Surgical Nursing II
Credits
This course builds on knowledge learned in previous courses. The course focuses on complex medical-surgical conditions that occur in the adult population. Application of knowledge and skills occurs in the clinical setting.
Prerequisites: NUR 1101L, NUR 1110C, NUR 1130, NUR 1515C, NUR 1421C. College level reading, writing, and math skills are required.
Co-requisites: NUR 2131

NUR 2112C
Concepts of Medical-Surgical Nursing III
3.5 Credits
This course builds on knowledge learned in previous courses as one of the final courses in the nursing program. The course focuses on acute and life-threatening medical-surgical condi tions that occur in the adult population. Application of knowledge and skills occurs in the clinical setting.
Prerequisites: NUR 2102L, NUR 2111C, NUR 2131, NUR 2300C. College level reading, writing, and math skills are re quired.
Co-requisites: NUR 2103L, NUR 2132

NUR 2131
Pathopharmacology for Nursing Practice II
3.5 Credits
This course builds on knowledge from Concepts of Pathophys iology and Pharmacology I. It is designed to provide the stu dent with a deeper understanding of the underlying pathophysiologic changes for complex medical conditions. This course explores the role of medications on the conditions, as well as diagnostic changes that occur.
Prerequisites: NUR 1101L, NUR 1110C, NUR 1130, NUR 1515C, NUR 1421C. College level reading, writing, and math skills are required.
Co-requisites: NUR 2211C

NUR 2132
Pathopharmacology for Nursing Practice III
2 Credits
This course builds on knowledge from Concepts of Pathophys iology and Pharmacology II. It is designed to provide the stu dent with a deeper understanding of the underlying pathophysiologic changes for acute medical conditions. This course explores the role of medications on the conditions, as well as diagnostic changes that occur.
Prerequisites: NUR 2102L, NUR 2111C, NUR 2131, NUR 2300C. College level reading, writing, and math skills are re quired.
Co-requisites: NUR 2103L, 2112C

NUR 2205C
Complex Simulation
2 Credits
This course utilizes simulation to further expand on the con cepts of nursing practice with application to the care of adult and pediatric patients with stable and unstable conditions. Pa tient care experiences are provided in the simulation suite.
Prerequisites: NUR 1310C, NUR 1421C, NUR 1520C,
Corequisites: NUR 2210, NUR 2210L

NUR 2210
Concepts of Adult Health I
5 Credits
This course further expands on the concepts of nursing prac tice with application to the care of adult patients with stable and unstable conditions. The course focuses on a variety of adult patient populations in the classroom and simulation to provide the necessary patient care experiences. Application of knowledge and skills occurs in the nursing laboratories and in a variety of clinical settings.
Prerequisites: NUR 1310C, NUR 1421C, NUR 1520C
Corequisites: NUR 2205C, NUR 2210L

NUR 2210L
Concepts of Adult Health I Clinical
3 Credits
This course further expands on the concepts of nursing prac tice with application to the care of adult patients with stable and unstable conditions. The course focuses on a variety of adult patient populations in the classroom and simulation to provide the necessary patient care experiences. Application of

knowledge and skills occurs in the nursing laboratories and in a variety of clinical settings.
Prerequisites: NUR 1310C, NUR 1421C, NUR 1520C
Corequisites: NUR 2205C, NUR 2210

NUR 2211
Concepts of Adult Health II
5 Credits
This course builds on all previous nursing courses to further refine and apply concepts of nursing practice to the care of adult patients with complicated conditions. The course fo cuses on a variety of adult patients through clinical experiences and simulation to provide the necessary patient care experi ences. Application of knowledge and skills occurs in the nurs ing laboratories and a variety of clinical settings.
Prerequisites: NUR 2205C, NUR 2210, NUR 2210L
Corequisites: NUR 2211L, NUR 2811C

NUR 2211L
Concepts of Adult Health II Clinical
3 Credits
This course builds on all previous nursing courses to further refine and apply concepts of nursing practice to the care of adult patients with complicated conditions. The course fo cuses on a variety of adult patients through clinical experiences and simulation to provide the necessary patient care experi ences. Application of knowledge and skills occurs in the nurs ing laboratories and a variety of clinical settings.
Prerequisites: NUR 2205C, NUR 2210, NUR 2210L
Co-requisites: NUR 2211, NUR 2811C

NUR 2300C
Concepts of Nursing Care of Children
3.5 Credits
This course builds on all previous nursing courses to further refine and apply the concepts of nursing practice to the care of children. This course expands on the concepts presented in the previous nursing courses and introduces the concepts of growth and development. Application of knowledge and skills occurs in the nursing laboratories and a variety of clinical set tings.
Prerequisites: NUR 1101L, NUR 1110C, NUR 1130, NUR 1515C, NUR 1421C. College level reading, writing, and math skills are required.
Co-requisites: NUR 2102L

NUR 2650C
Transcultural Nursing: Study of Healthcare in an International Setting
3 Credits
Provides the student the opportunity to experience a direct re lationship with healthcare providers and recipients from vari ous cultural backgrounds in an international setting. The students will learn transcultural healthcare concepts related to health belief systems, major health issues across the life span, epidemiological rates of health issues, nutrition and environ mental issues affecting health. Healthcare delivery systems and healthcare professions, including required education, will be examined. Students will learn and practice cross cultural communications skills. The students will travel to a super vised site for theoretical concepts as well as clinical experi ences. The students will gain valuable components of learning process relating to culturally diverse communities with em phasis on holistic care.
Prerequisites: Nursing Student or Licensed Nurse. College level reading, writing and math skills required.

NUR 2811C
Role Transformation
3 Credits
This course focuses on the student's exploration of personal and professional topics leading to the successful transfor mation from nursing education to a rapidly changing work en vironment. Effective clinical judgement, inter-professional collaboration and optimizing patient outcomes will be demon strated in both clinical and simulation settings. To ensure con sistent, quality care for complex health problems across the life span. Emphasis is also place on preparing students for the NCLEX exam by implementing NCLEX preparation plans based on various measurement tools.
Prerequisites: NUR 2205C, NUR 2210, NUR 2210L
Co-requisites: NUR 2211, NUR 2211L

NUR 2950
Nursing Capstone
1 Credit
This course focuses on the students' exploration of personal and professional topics leading to the success transformation from nursing education to a rapidly changing work environ ment. Effective clinical judgement, inter-professional collabora tion, and optimizing patient outcomes will be demonstrated in both clinical and simulation settings. Emphasis is also placed on preparing students for the NCLEX exam by implementing NCLEX preparation plans based on various measurement tools.
Prerequisites: NUR 2103L, NUR 2112C, NUR 2131. College level reading, writing, and math skills are required.
Co-requisites: NUR 2033

NUR 3065
Health Assessment and Physical Appraisal
3 Credits
This course assists registered nurses in the integration of prior knowledge into the further development of interviewing and physical assessment skills, and clinical reasoning across the lifespan. The importance of therapeutic communication skills, cultural awareness, and preventative health interventions are emphasized when working with diverse populations. The patterns of healthy individuals will be examined and used as a reference point for health promotion, health maintenance, and health education.
Prerequisites: College-level reading, writing and math skills are required. NUR 3805 and proof of active, unrestricted, unen cumbered RN license.

NUR 3125
Pathophysiology
3 Credits
In this course, learners will build upon existing understanding of the pathophysiological processes of disease as they affect patients across the lifespan. Special emphasis is on critical thinking and decision making related to these alterations in homodynamic balance, their presentation and implications for nursing practice.
Prerequisites: College-level reading, writing and math skills are required. NUR 3805 and proof of active, unrestricted, unen cumbered RN license.

NUR 3145
Pharmacology
3 Credits
Learners within this course will examine medications pre scribed to patients for a variety of illnesses and symptoms. Dis cussions will occur about factors that can influence the effectiveness of the medication within the body, the actions of drugs, therapeutic and adverse effects, and food and drug in teractions of these drugs used in the treatment of acute and chronic diseases while gaining a deeper understanding of the nurses' role as it relates to medication therapy. Learners will generate a deeper understanding of legal aspects of drug ad ministration as well as patient education in collaboration with other treatment modalities and team members needed in pa tient care.
Prerequisites: College-level reading, writing and math skills are required. NUR 3805 and proof of active, unrestricted, unen cumbered RN license.

NUR 3164
Introduction to Research and Informatics
3 Credits
This course provides an overview of nursing informatics to prepare professional nurses to apply concepts from these fields to professional nursing practice. The current and future impact of informatics in healthcare is emphasized.
Prerequisites: College level reading and writing skills are re quired.

NUR 3655
Transcultural Factors in Health Care Delivery
3 Credits
A comparative analytical approach to the study of communica tion, current problems, issues, health care beliefs, values, and practices of different systems and cultural norms as they affect health care practices which conflict with ethnic or cultural communication related to standards and value systems.
Prerequisites: College-level reading, writing and math skills are required.

NUR 3805
Professional Roles and Dimensions of Nursing Practice
3 Credits
The purpose of this course is to build upon initial nursing edu cation to enhance professional development, prepare for a broader scope of practice, and provide deeper understanding of the cultural, political, economic, and social issues that affect clients and influence care delivery. Emphasis is on the con cepts of culturally sensitive patient-centered care, evidence based practice, interprofessional teams, informatics, clinical reasoning, and health promotion across the lifespan in an ever changing and complex healthcare environment.
Prerequisites: College-level reading, writing and math skills are required.

NUR 3826
Ethical and Legal Issues in Healthcare
3 Credits
This course will examine ethical and legal matters which pro fessional nurses and other healthcare providers encounter in their practice. The content will focus on ethical dilemmas which nurses confront in their work environment, accountabil ity, conflict resolutions, as well as legal ramifications surround ing a changing health care system.
Prerequisites: College-level reading, writing and math skills are required. NUR 3805 and proof of active, unrestricted, unen cumbered RN license.

NUR 3895
Teaching in Nursing
3 Credits
This course will examine the role of teaching and learning in a variety of healthcare related settings. This course will utilize the concepts and principles of adult education and educational psychology. The nursing student will demonstrate the ability to apply learned teaching and learning strategies for teaching clients along the health care continuum in a variety of settings.
Prerequisites: College-level reading, writing and math skills are required.

NUR 3955C
Nursing in Global Health Care Systems
3 Credits
The purpose of this course is to introduce students to global health care systems and models, and their influence on health disparities and delivery of healthcare. A major focus of this course is for students to critically think about and discuss health and health care within a global environment. Nursing students will be exposed to the health disparities that exist in the United States and countries around the world, and some of the efforts by individuals, groups, organizations, and countries to deal with disparities. In addition, students will be provided with information and tools that nurses and nursing can use to confront health and health care challenges.
Prerequisites: College-level reading, writing, and math skills are required.

NUR 4169
Evidence Based Practice: Nursing Research
3 Credits
This course will examine up-to-date scientific evidence based on research findings applicable to the clinical practice of nurs ing. Students will discover methods to collect, process, and

implement research findings to improve clinical practice, the work environment, and patient outcomes.
Prerequisites: College-level reading, writing and math skills are required. STA 2023, NUR 3805 and proof of active, unre stricted, unencumbered RN license.

NUR 4257
Introduction to Critical Care
3 Credits
This theoretical course focuses on synthesizing nursing knowledge and skills in caring for adult clients and their fami lies impacted by critical illness. The emphasis is on pathophys iology and clinical management.
Prerequisites: College-level reading, writing and math skills are required.

NUR 4284
Dynamics of Aging
3 Credits
An introduction to the dynamics of aging. This course will cover assessment of normal physical, sound, psychological, and environmental changes of aging, wellness, sexuality, and communication. The course includes discussion of common health problems and the most common pharmacologic interventions associated with each.
Prerequisites: College-level reading, writing and math skills are required.

NUR 4636C
Community and Public Health Nursing
3 Credits
This course introduces learners to community and public health nursing care. The roles and responsibilities of the com munity and public health nurse will be explored while devel oping a deeper understanding of individual, family, community, and vulnerable population health factors. Topics investigated within this course include epidemiology, disaster management, emergency preparedness, community health prevention and promotion, and social advocacy within diverse community settings. This course includes an instructor ap proved indirect clinical experience. This course is comprised of 2.5 didactic and 0.5 clinical credit hours.
Prerequisites: College-level reading, writing and math skills are required. NUR 3805 and proof of active, unrestricted, unen cumbered RN license.

NUR 4835C
Leadership and Management in Professional Nursing Capstone
3 Credits
The capstone in the BSN program concentrates on strategic planning concepts as they apply to professional nursing prac tice. The course will prepare the nurse leader on the integra tion of knowledge, skills, and abilities learned from taking the courses in the bachelors of science in the nursing program. This course will be taken in the last semester. This course in cludes an instructor approved indirect clinical experience. This course is comprised of 2 didactic and 1 clinical credit hours.
Prerequisites: NUR 3065, NUR 3125, NUR 3145, NUR 3805, NUR 3826, NUR 4169, NUR 4636C

OCB 2000
Marine Biology
3 Credits
An introductory course covering the complexities of the ma rine environment. Topics include an introduction to marine habitats, marine organisms, ecological interactions and meth ods used by oceanographers and marine biologists.
Prerequisites: College level reading, writing and math skills re quired.
Co-requisite: OCB 2000L

OCB 2000H
Honors Marine Biology
3 Credits
Same as OCB 2000 with honors content. Honors Program per mission required.
Co-requisite: OCB 2000L

OCB 2000L
Honors Marine Biology Laboratory
1 Credit
Accompanies OCB 2000H; same as OCB 2000L with honors content. Honors Program permission required.
Co-requisite: OCB 2000H

OCB 2000L
Marine Biology Laboratory
1 Credit
Accompanies OCB 2000; the emphasis is on experiments and field trips. A special fee will be charged for this course.
Co-requisite: OCB 2000

OCE 2001C
Introduction to Oceanography
3 Credits
Using the scientific method, critical thinking skills, and data analysis, this course will examine the fundamental processes of the ocean system, composed of an atmosphere, hydrosphere, lithosphere, and biosphere, through time. The course will also explore interactions between these spheres, including critical analysis of scientific theories and emphasize oceanic connec tions with humanity.
Prerequisites: College level reading, writing and math skills are required.

OCE 2001C
Honors Introduction to Oceanography
3 Credits
Same as OCE 2001C with honors content. Honors Program permission required.

OPT 1000
Ophthalmic Orientation
1 Credit

Presents an introduction to the field of vision care, including opticianry, optometry, ophthalmology and optical manufactur ing. Topics include ophthalmic history, legal and ethical princi ples, patient history, terminology and abbreviations.

OPT 1155
Ophthalmic Lens I
3 Credits
Provides a brief history of the development of glass and plastic lenses, the various sphere, cylinder and prism powers, the use of optical cross, flat and toric transposition, and the aberrations of lenses.
Corequisite: OPT 1000

OPT 1156
Ophthalmic Lens II
3 Credits
This course continues the study of optical theory. Topics in clude: prism notation; vertical imbalance and methods of cor recting for it; vertex power; luminance; reflection and absorption; diffraction; third order lens aberrations, and lens tilt; anisometropia, and spectacle magnification.
Prerequisite: OPT 1155

OPT 1225
Low Vision
3 Credits
Provides a definition of visual impairment and methods used to measure its severity. A description of the most common causes of visual impairment will be presented. Treatment plans including optical and non-optical aids will be reviewed.

OPT 1400L
Ophthalmic Laboratory I
3 Credits
Introduces the student to terms, instruments, lenses, frames, and materials to be used in the surfacing and finishing of oph thalmic prescription eyewear.
Prerequisite: OPT 1460L

OPT 1430L
Ophthalmic Laboratory II
3 Credits
Introduces the student to terms, instruments, lenses, frames and materials to be used in the finishing process and hand work of ophthalmic prescription eyewear. This course is a con tinuation of Ophthalmic Laboratory I.
Prerequisite: OPT 1400L

OPT 1460
Ophthalmic Dispensing I
3 Credits
This course introduces the student to the skills necessary for becoming a dispensing optician. Included are the history of the profession, patient/client measurements, frame and lens mate rials, frame and lens selection, prescription, prescription analy sis, and adjustment techniques.
Corequisite: OPT 1000

OPT 1460L
Ophthalmic Dispensing Laboratory I
3 Credits
Designed to introduce the students to the practical dispensing of optical products. The students will perform competencies related to the neutralization of single vision lenses and multi focal lenses for duplication, measurement of frames and mountings, and the measurement of PD's.
Corequisite: OPT 1000

OPT 1666
Safety and Sports Vision
3 Credits
Opticians are constantly requested to provide eyewear that will better protect, improve and enhance vision for occupa tional and recreational activities. This course will present the visual requirements for common occupations and sports. It will also discuss spectacle, contact lens, and non-optical solu tions to safety and sports vision problems.

OPT 2030
Ophthalmic Board Review
1 Credit
Provides a comprehensive review and update of opticianry dispensing in preparation for the Florida State Board of Opti cianry examination.
Corequisites: OPT 2376L, OPT 2502L

OPT 2204
Anatomy and Physiology of the Eye
3 Credits
Investigates the anatomical structure of the eye and the func tion of its parts as they pertain to the process of vision.
Corequisite: OPT 1000

OPT 2375
Refractometry
2 Credits
Designed to instruct the students in the theory of refractometry and testing for visual acuity. It will include identifying ame tropias, the etiology and distribution of refractive errors and anomalies of binocular vision. The steps in performing retinos copy, objective and subjective refraction procedures will be covered.
Prerequisite: OPT 1155, OPT 2204

OPT 2375L
Refractometry Laboratory I
2 Credits
Continuation of OPT 2375 designed to introduce the students to the procedures of an objective and subjective refraction. Stu dents will perform competencies related to retinoscopy, patient history, binocular balance and subjective testing for visual acu ity. Primarily a hands on course. The students will gain prac tice in testing VA (cc and sc), retinoscopy, subjective refraction and binocular balancing in a clinically safe environment.
Corequisite: OPT 2375

OPT 2376L
Refractometry Laboratory II
1 Credit
Continuation of OPT 2375L. Designed to fine tune the proce dures of objective and subjective refractions. Students will per form competencies related to measuring visual acuity and taking a patient history, retinoscopy (review), confrontations and EOM's, pupillary functions, balance and binoclar/ pho ria/tropia testing. Primarily a hands-on course to help the stu dents gain speed and accuracy in performing objective and subjective refractions.
Prerequisite: OPT 2375L

OPT 2461
Ophthalmic Dispensing II
3 Credits
This course presents ophthalmic instruments and devices; analysis of absorptive lenses; computing and compensation of vertical imbalance; discussion of ethics and legal issues; record keeping and communications; optical salesmanship, and visual impairment.
Prerequisite: OPT 1460L

OPT 2461L
Ophthalmic Dispensing Laboratory II
3 Credits
Designed to introduce students to the practical aspects of frame alignments and adjustments, and the insertion and re moval of lenses from various frames. Includes further instruc tion and practice on neutralization of lenses for verification and duplication of an Rx order, measure and callipering of lenses and frames, the facial measurements of orders (PD and seg heights), frame repair and the identification of various types of lenses.
Prerequisite: OPT 2461

OPT 2463L
Ophthalmic Skills Laboratory I
2 Credits
This course is designed to educate students in the technical skills of performing various procedures within the ophthalmic visual assessment area of a dispensary. The course will present the medical model to follow for healthy sight, equipment procedures, maintenance and use, calibration of equipment, low vison, and managed vision care plans.
Prerequisite: OPT 2461

OPT 2500
Contact Lens Theory I
3 Credits
This course includes a historical review as well as theory; de sign and optical principle of contact lenses; indications and contraindications for contact lens wear; patient evaluation; dis cussion of lens types and availability; fundamental techniques and fitting philosophies including the role of the biomicro scope, keratometer and radiuscope; patient education on care, cleaning, insertion and removal of contact lenses.
Prerequisite: OPT 2204

OPT 2500L
Contact Lens I Laboratory
2 Credits
Students will perform competencies related to the handling of instruments and charts used in the fitting and designing of contact lenses, and the handling and evaluation of contact lenses by the fitter and the patient.
Corequisite: OPT 2500

OPT 2501
Contact Lens Theory II
2 Credits
Emphasizes contact lens verification, dispensing, and follow up care. The fitting of astigmatic, presbyopic, and special needs patients will also be covered.
Prerequisite: OPT 2500

OPT 2501L
Contact Lens II Laboratory
2 Credits
Students will perform competencies related to the design, in spection, modification, evaluation and dispensing of spherical contact lenses. The fitting of astigmatic, presbyopia, and other special contact lens patients will also be covered.
Prerequisite: OPT 2500L
Corequisite: OPT 2501

OPT 2502L
Contact Lens III Laboratory
1 Credit
Advanced hands-on experience in fitting contact lenses.
Prerequisite: OPT 2501L.

OPT 2800L
Vision Care Clinical I
2 Credits
This course is designed to allow students to apply knowledge gained in lectures and laboratories to clinical situations. De pending on the placement, the student may utilize skills re lated to management, fabrication, dispensing, contact lenses or visual assessment.
Prerequisite: OPT 1460L

OPT 2801L
Vision Care Clinical II
2 Credits
This course is designed to allow students to apply knowledge gained in lectures and laboratories to clinical situations. De pending on the placement, the student may utilize skills re lated to management, fabrication, dispensing, contact lenses or visual assessment.
Prerequisite: OPT 1460L

OPT 2802L
Vision Care Clinical III
2 Credits
This course is designed to allow students to apply knowledge gained in lectures and laboratories to clinical situations. De

pending on the placement, the student may utilize skills re lated to management, fabrication, dispensing, contact lenses or visual assessment.
Prerequisites: OPT 2800L, OPT 2801L

OPT 2803L
Vision Care Clinical IV
2 Credits
This course is designed to allow students to apply knowledge gained in lectures and laboratories to clinical situations. De pending on the placement, the student may utilize skills re lated to management, fabrication, dispensing, contact lenses or visual assessment.
Prerequisites: OPT 2800L, OPT 2801L

OPT 2910
Directed Research
3 Credits
Covers the research, planning and development of an optical dispensary. Topics include the type, size, location and design, as well as financing, business structure, taxes, licenses and equipment.
Prerequisite: OPT 2461L

ORH 1523
Native Upland Plants
2 Credits
This course includes the identification of approximately 100 plants and plant groups native or naturalized in the higher ground habitats of South Florida. The application of these plants as in situ, mitigation or landscape materials in the eco logical and esthetic situations of this area will be an additional objective. Most instruction will be done in the field utilizing lo cal passive and active-use parks.

ORH 1524
Native Wetland Plants
2 Credits
A continuation of ORH 1523, Native Upland Plants, and in cludes the identification of approximately 100 plants and plant groups native or naturalized in the fresh and salt water wet lands of South Florida. The application of these plants as in situ and mitigation species in ecological, landscape and es thetic situations will also be discussed. Most instruction will be done in the field.

OST 1100C
Keyboarding and Document Processing
3 Credits
Introduces proper keyboarding technique that develops touch control of the keyboard and builds speed and accuracy. Em phasis of using basic touch key skills will be continued while using word processing software features for the production and merging of business correspondence, tables, reports, mail, meeting, and travel documents. A minimum of one hour per week in the lab is required.
Prerequisite: College level reading and writing skills are re quired.

OST 1142
Keyboarding I
1 Credit
Provides instruction in the touch system of typing on the per sonal computer.

OST 1143
Keyboarding II
1 Credit
Provides instruction in the touch system of keyboarding with an emphasis on speed and accuracy.
Prerequisite: OST 1142

OST 1335
Business Communications
3 Credits
Presents an overview of business communications, including international considerations, and focuses on constructing proper business letters, with an emphasis on various styles, such as sales, claims, credit reference, collection, requests, or der and refusal. Preparation for and formatting of proposals and business reports is also included.

OST 1741
Word Processing I
1 Credit
Provides hands-on experience in a specific word processing software. Students may select more than one software by re peating the course three times for credit. However, only one credit hour will apply toward meeting program graduation re quirements.
Prerequisite: OST 1100

OST 1813
Desktop Publishing
3 Credits
Uses a page layout software program to cover the basic skills required for the preparation of flyers, brochures, and newslet ters in camera ready form, with an emphasis on composition, type styles, and layout. Students must take noted prerequisite or obtain permission of instructor.
Prerequisite: CGS 1000 or OST 2854C

OST 1831
Introduction to Windows I
1 Credit
Covers basic commands of Windows software.

OST 1941
OST Internship
3 Credits
On-the-job training related to the coursework completed at HCC in the Office Systems Technology Department. Involves a "learning by doing" educational approach. Internships will be provided at HCC and Tampa area businesses.

OST 2135
Medical Office Procedures
3 Credits

Uses a medical software program to input patient information, schedule appointments, and process insurance claims and bill ing. A minimum of one hour per week in the laboratory is re quired. College level reading, writing and math skills required.

OST 2357
Electronic Records Management
3 Credits
Develops managerial and decision-making techniques for the records manager. Involves the study of systems analysis, forms development, archival administration, personnel development, and the establishment of a records management program.

OST 2501
Office Administration
3 Credits
Focuses on organizing, planning and controlling office opera tions with an emphasis on motivation and productivity. Topics include human resources, work environment and information systems.

OST 2742
Word Processing II
1 Credit
Focuses on more complex technical procedures on the software studied in Word Processing I. Students may select more than one software application by repeating the course three times for credit. However, only one credit hour will apply toward meeting program graduation requirements.
Prerequisite: OST 1741

OST 2797
Social Media for Business
3 Credit
This course will examine the history, development and best practices of social media as they relate to business. Students will analyze which social media tools and platforms are being used to develop audiences for promoting business and provid ing customer service. Students will develop a clear under standing of the function of social media and generate an original perspective about the relevance of social media and its appropriate use in different platforms.
Prerequisite: College reading, writing and math skills required.

OST 2854C
Office Applications for Business
3 Credit
This a beginning to intermediate office application course. Stu dents will learn how to employ current productivity software in a Windows Operating System environment to solve busi ness problems. Students will learn to create and edit docu ments using work processing, spreadsheet, database, presentation and personal information management software. Video conferencing software common in business environ ments will be applied. College reading and writing skills re quired.

OST 2858
Excel Spreadsheets for Business
3 Credit
Students will learn to create, format, modify, print worksheets, draw objects, and use spreadsheet data in ranges, functions, and charts. In addition, they will learn to apply special or cus tom formatting, sort and query data from lists; audit work sheets, use macros, templates, multiple workbooks; and import/export data. They will use data base features to extract and filter data, use data analysis, pivot tables, data validation, data map, conditioning formatting and other features. This is a Microsoft Office Specialist (MOUS) Certification preparation course.
Prerequisite: College-level reading, writing, and math skills are required.

OST 2943
Internship in Medical Office
1 Credit
This course is a planned work-based experience that provides students with supervised career exploration activities and/or practical experiences. Each earned credit demands a minimum commitment of 80 clock hours of hands-on work. The course provides flexibility, allowing repetition for credit to enhance experiential learning. May be repeated up to 4 times for credit, but grade forgiveness cannot be applied.
Prerequisite: College-level reading, writing, and math skills are required. HIM 1000, HIM 1112C, HIM 1453, and HSC 1531

PCB 1730C
Human Reproduction and Inheritance
3 Credits
Intended for those not majoring in the biological sciences or in allied health. Focuses on the various aspects of human repro duction. Topics include the male and female reproductive sys tems, embryology, birth control, sexually transmitted infections and heredity. Combined and integrated with a hands-on laboratory component. A special fee will be charged for this course.
Prerequisites: College reading, writing and math skills are re quired.

PEL 1321
Volleyball
2 Credits
Teaches the skills and strategies of recreational volleyball.

PEL 1341
Beginning Tennis
2 Credits
Teaches the skills of recreational tennis on the elementary level. This course may be repeated two times for credit.

PEL 1621
Basketball
2 Credits
Teaches the skills and strategies of recreational basketball.

PEM 1101
Fitness and Conditioning
2 Credits
Focuses on applying the basic principles of movement, figure and fitness control, exercise and diet.

PEM 1121
Beginning Yoga
2 Credits
This course will focus on the forms of yoga training emphasiz ing flexibility and stress relief. Emphasis will be given to flexi bility, breathing and relaxation techniques.

PEM 1122
Intermediate Yoga
2 Credits
This course is designed to be an extension of PEM 1121. The fo cus will be on the appreciation of yoga in everyday life. Em phasis will be on performing postures that are more challenging and remaining in the postures for longer. This course may be repeated twice for credit.

PEM 1131
Weight Training
2 Credits
Presents an overview of weight training, with an emphasis on procedures, safety and theory. Men will focus on high re sistance strength producing exercise and women will focus on high repetition, endurance and toning. This course may be re peated twice for credit.

PEM 1954
Intercollegiate Athletics
1 Credit
Limited to students on HCC varsity teams. This course may be repeated four times for credit.

PEM 2956
Intercollegiate Athletics II
1 Credit
The course is limited to student varsity athletes. The course in volves participating in practice sessions, collegiate games and/or matches and study hall hours in accordance with the NJCAA, FCSAA/Suncoast Conference and HCC Athletic De partment. Student athletes will gain and improve skills by competing against competition at the collegiate level.

PEN 1136C
Open Water Diver
2 Credits
This is an extensive course for training persons in open water recreational diving. Satisfactory completion of this course leads to internationally recognized scuba certification. Students must demonstrate satisfactory swimming ability, physical stamina and emotional stability to instructor at the first lab.
Medical certificate may be required.

PGY 2401C
Photography I
3 Credits
Provides a basic understanding of the technical aspects of black and white photography involving camera operation, ex posure control, film processing, print enlarging and finishing. The students will become familiar with photographic materi als, as well as artistic composition and design.

PGY 2404C
Photography II
3 Credits
Presents advanced technical problems introducing the stu dents to various manipulative techniques both in the camera and in the darkroom. The students will deal with refinement of the silver print, toning, hand coloring, collaging, and the pro duction of a cohesive exhibition quality body of work.
Prerequisite: PGY 2401C

PGY 2801C
Digital Photography I
3 Credits
This course is intended to introduce students to the basic con cerns in digital photography as a fine art medium, and the computer as a darkroom. Includes digital imaging techniques of scanning, color correction, retouching, composition, content, and more. Hardware, image input and output processes, and software are also discussed. May be repeated once for credit.
Prerequisite: PGY 2401C

PGY 2905
Directed Independent Study
3 Credits
Designed to establish a framework for further self-learning in various areas of photography, for the advanced student. The students will shape the course to fit their needs by planning ac tivities and preparing a contract coordinated with an art fac ulty member. The contract will specifically outline a specific project, or a particular set of goals and requirements that the student wishes to achieve. The contract must be satisfactorily completed and reviewed by the assigned faculty member. May be taken four times for credit.

PHC 2040
Foundations in Epidemiology
3 Credits
This course explores the basic principles and methods of the epidemiological approach to understanding the distribution and determinants of health and disease and how this knowledge informs public health practice and policy.

PHC 2100
Introduction to Public Health
3 Credits
This course will serve as an introduction to the study of public health. It will provide students with an overview of various topics pertinent to the discipline. The core principles of public health will be discussed.

PHC 2321
Environmental Concepts in Public Health
3 Credits
This course introduces students to the major topic areas of en vironmental health science. It examines the sources, routes, media, and health outcomes associated with biological, chemi cal and physical agents to the environment. It will cover how these agents affect disease, water and air quality, food safety, and land resources in community and occupational settings.

PHI 1010
Introduction to Philosophy
3 Credits
In this course, students will be introduced to the nature of phi losophy, philosophical thinking, major intellectual movements in the history of philosophy, including topics from the western philosophical tradition, and various problems in philosophy. Students will strengthen their intellectual skills, become more effective learners, and develop broad foundational knowledge.
Prerequisites: College reading and writing skills are required.

PHI 1010H
Honors Introduction to Philosophy
3 Credits
Same as PHI 1010 with honors content. Honors Program per mission required.
Prerequisites: College reading and writing skills are required.

PHI 1100
Elementary Logic
3 Credits
This course will introduce students to principles of reasoning which have been fundamental to the Western tradition since antiquity and serve as a foundation for study in any field. This includes deductive and inductive logic, symbolic logic, falla cies, linguistic analysis, causality, and probability. The goal is to develop students' abilities in critical thinking, problem solv ing, and decision-making. Readings include selections from the Western canon.
Prerequisites: College reading and writing skills are required.

PHI 1600
Ethics
3 Credits
This course will introduce students to the nature of ethics, ethi cal theories, and specific ethical issues. This involves tradi tions, topics, and theories from the Western philosophical tradition. Readings include selections from the Western canon.
Prerequisites: College reading and writing skills are required.

PHI 1600H
Honors Ethics
3 Credits
This course will introduce students to the nature of ethics, ethi cal theories, and specific ethical issues. This involves tradi tions, topics, and theories from the Western philosophical tradition. Readings include selections from the Western canon. Includes honors content.
Prerequisites: College reading and writing skills are required. Honors program permission is required.

PHI 1631
Business and Ethics
3 Credits
PHI 1631 uses the tools of moral philosophy to investigate and analyze ethical issues that arise in the workplace, in commerce, in the organization and regulation of firms, and where busi ness practices intersect with matters of social concern. Topics may include: the ethics of advertising, the role of honesty and trust in the workplace, the ethics of finance and investment, the social responsibilities of firms, the ethics of whistle-blow ing, resource allocation and distributive justice, consumer rights and product liability, ethical leadership, markets and their limits, the ethics of globalization, and the role of business in promoting human flourishing.
Prerequisites: College reading and writing skills are required.

PHI 2635
Biomedical Ethics
3 Credits
A philosophical investigation and analysis of ethical issues that arise in the medical, nursing, and allied health professions, as well as in the biological and behavioral sciences. Topics may include reproductive ethics, the ethics of assisted death, re search ethics, disability ethics, scarce medical resource alloca tion, biotechnology ethics, clinical ethics, and public health ethics. College level reading and writing skills are required.

PHY 1020C
Conceptual Physics
3 Credits
This course offers a comprehensive survey of physics, covering a wide range of topics including motion, newton's laws, en ergy, sound, heat, electricity, magnetism, and optics. Empha sizing a conceptual understanding of physics, the course integrates critical thinking skills and real-world applications.
Prerequisites: College level reading, writing and math skills are required.

PHY 1025
Fundamentals of Physics
3 Credits
Emphasizes the conceptual principles of physics. Topics in clude mechanics, energy, momentum, gravitation, properties of matter, heat, waves, sound, electricity, and magnetism. De signed for students without the physics background needed for General Physics or other science courses.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: PHY 1025L, MAC 1105.

PHY 1025L
Fundamentals of Physics Laboratory
1 Credit

A physics laboratory course designed primarily for students lacking laboratory experience who need the background prior to taking PHY 2053L or other laboratory science courses. Topics include: measurement techniques, graphical analysis of data, study of bodies at rest or in motion, heat, sound, light, and electrical experiments, and introduction to computer applications. A special fee will be charged for this course. Prerequisites: College level reading, writing and math skills are required.
Co-requisite: PHY 1025

PHY 2048
General Physics with Calculus I
4 Credits
This calculus-based course serves as the first in a two-part series, covering topics like kinematics, dynamics, energy, momentum, rotational motion, fluid dynamics, oscillatory motion, and waves. Designed for science and engineering majors, the course integrates critical thinking, analytical skills, and real-world applications.
Prerequisite: MAC 2311 and either PHY 1025 or passing score on physics exemption test.
Co-requisite: PHY 2048L

PHY 2048L
General Physics with Calculus I Laboratory
1 Credit
A special fee will be charged for this course. Prerequisites: College level reading, writing and math skills are required.
Co-requisite: PHY 2048

PHY 2049
General Physics with Calculus II
4 Credits
Second semester of general physics and laboratory for physics majors and engineering students.
Prerequisites: MAC 2312, PHY 2048, PHY 2048L
Co-requisite: PHY 2049L

PHY 2049L
General Physics with Calculus II Laboratory
1 Credit
A special fee will be charged for this course. Prerequisites: MAC 2312, PHY 2048, PHY 2048L
Co-requisite: PHY 2049

PHY 2053
General Physics I
3 Credits
This course is the first in a two-part series intended for non-physics majors, offering an algebra and trigonometry approach to topics such as kinematics, dynamics, energy, momentum, rotational motion, fluid dynamics, oscillatory motion, and waves. The course fosters analytical and critical thinking skills to promote a scientific understanding of the real world.
Prerequisites: PHY 1025 or passing score on physics exemption test and either MAC 1114 or MAC 1147.
Co-requisite: PHY 2053L

PHY 2053L
General Physics I Laboratory
1 Credit
Students are provided with physical experiments to enable them to strengthen understanding developed in PHY 2053. Students will perform experiments, record data, perform assigned calculations and interpret results in terms of the principles and concepts developed in PHY 2053. A special fee will be charged for this course.
Prerequisites: PHY 1025L. College level reading, writing and math skills are required.
Co-requisite: PHY 2053

PHY 2054
General Physics II
3 Credits
Focuses on the fundamental concepts of natural physical laws as they apply to electricity, magnetism, electromagnetic radiation, optics, relativity, atomic and nuclear physics.
Prerequisites: PHY 2053, PHY 2053L
Co-requisite: PHY 2054L

PHY 2054L
General Physics II Laboratory
1 Credit
Students are provided with physical experiments to enable them to strengthen understanding developed in PHY 2054. Students will perform experiments, record data, perform assigned calculations, and interpret results in terms of the principles and concepts developed in PHY 2054. A special fee will be charged for this course.
Prerequisites: PHY 2053, PHY 2053L
Co-requisite: PHY 2054

PHY 2910L
Directed Research
1 Credit
Training in methods of research. Projects are carried out by one or more students under the supervision of an instructor. This course is intended to help students acquired skills in applying research principles and obtaining practice in rigorous data collection and reporting. Students who wish to perform research on more than one topic may enroll in the course more than once, but only once per semester.
Prerequisites: PHY 2053, 2053L *or* PHY 2048, 2048L

PLA 1003
Introduction to the Paralegal Profession
3 Credits
Provides an overview of the training and purpose of paralegals. Examines the role of the lawyer and legal assistant in modern society and ethical and professional practice standards.
Prerequisite: College level reading and writing skills are required.

PLA 1104
Writing and Research I
3 Credits

Provides an in-depth exploration of the law library, legal re search and writing legal memoranda.

PLA 1203
Litigation Procedures I
3 Credits
Covers the Florida Rules of Civil Procedures, Criminal and Appellate Procedures and related matters.

PLA 1271
Tort Law
3 Credits
This course provides a general perspective of areas of law re lating to persons and property through civil law. Topics that may be included are Intentional Torts, Negligence, Product Li ability, Defamation and other relevant civil law areas.

PLA 1433
Business Organizations
3 Credits
Covers procedural information and basic law as it applies to corporations, partnerships and other business vehicles.

PLA 1600
Administration of Wills, Trusts and Probate
3 Credits
Presents a survey of estate planning and administration in cluding the preparation of wills, trusts, probate forms and guardianship procedures.

PLA 1611
Real Estate Law and Property Transactions I
3 Credits
Covers common real estate transactions and drafting docu ments such as deeds, leases and contracts.

PLA 1700
Legal Ethics and Professional Responsibility
3 Credits
Introduces the student to the types of ethical situations and di lemmas they may encounter in the legal workforce. Students will learn applicable disciplinary rules for both the lawyer and the paralegal, in order to understand how to function responsi bly as a legal professional. The content and course work is geared not only to the paralegal student, but also to the prac ticing paralegal and other legal professionals.

PLA 1949
Paralegal Internship
3 Credits
The internship program augments the paralegal curriculum by placing the student in a legal work environment under the su pervision of an attorney. It provides the student with the op portunity to gain practical experience as a paralegal in a private law firm, governmental agency or corporation.
Prerequisite: Program manager permission required.

PLA 2114
Writing and Research II
3 Credits
An advanced course in legal writing and research.
Prerequisite: PLA 1104

PLA 2223
Litigation Procedures II
3 Credits
Covers advanced litigation procedures law to including inter viewing techniques, preparing and organizing courtroom ma terials, compiling documentary evidence, applying investiga tive procedures and taking effective courtroom notes.
Prerequisite: PLA 1203

PLA 2303
Criminal Litigation
3 Credits
This course provides students with a survey of the criminal justice system. Substantive and procedural aspects of criminal law are studied. Course content includes the nature of different crimes, and the penalties involved. Also covered are the pre trial procedures, the discovery process, the plea-bargaining process, and the problems involved in the conduct of trial pro ceedings.

PLA 2421
Contract Law
3 Credits
Covers the basic principles of contract law including both com mon law contract concepts and uniform commercial code con cepts when applicable.

PLA 2460
Bankruptcy Law
3 Credits
Examines the principles and procedures for filing bankruptcy and reorganizations, including the preparation of forms.

PLA 2531
Elder Law
3 Credits
Covers the various aspects of law that have particular applica tions to the elderly client. The course is designed to familiarize the student with the practical and theoretical aspects of elder law.
Prerequisites: College level reading and writing skills are re quired.

PLA 2612
Real Estate Law and Property Transactions II
3 Credits
Advanced training in common real estate transactions and the preparation of documents such as deeds and leases.
Prerequisite: PLA 1611

PLA 2732
Law Office Computer Applications
3 Credits

This course introduces the student to the law office work envi ronment and is designed to provide the student with an intro duction to the different administrative functions that are most commonly used in a law office. Using the computer and vari ous applications software, the student will learn to perform various legal related business tasks commonly used on the job. The student will prepare many of the common legal office doc uments. Methods of records management, basic computer file management, scheduling and other administrative duties will be explored. Ethical issues associated with computers and in formation systems will be explored, as will the importance of the procedures used in the legal office to protect attorney/cli ent confidentiality. Students should have basic computer ap plication skills before taking this course.
Prerequisite: CGS 1000

PLA 2763
Law Office Management
3 Credits
Covers managerial responsibility, effective planning and use of financial resources.

PLA 2800
Family Law
3 Credits
Covers such topics as marriage dissolution, separation, cus tody, legitimacy, adoption, change of name, guardianship, support, court procedures and separation agreements.

PLA 2822
Sports and Entertainment Law
3 Credits
The purpose of this course is to introduce students to a range of legal issues found in the sports and entertainment industries within the United States.

PLA 2841
Immigration Law
3 Credits
This course provides an in-depth study of immigration law. Topics covered include a historical overview of immigration law, types of immigration law practices, relevant immigration agencies, forms, and document drafting. It also covers The Im migration and Naturalization Act, and the administrative sys tem.

PLA 2932
Special Topics in Legal Assisting
1 Credit
The is a one-credit special topics course that will have different topics involving current legal issues that are relevant today. Students can take this course multiple times; however, only the first one-credit class taken counts toward the AS degree in Par alegal Studies.

PLA 2933
Seminar in Legal Assisting Studies
3 Credits
This is seminar course that will have different topics involving legal issues that are currently relevant to the paralegal profes sion.

PMT 1250C
Computer Numerical Control (CNC) I
3 Credits
This course teaches the development of CNC machine pro gramming methods, blueprint reading, gauging, statistical pro cess control (SPC), and set-up and operation of drilling, milling and turning. College level reading, writing, and math skills are required.

PMT 2254C
Computer Numerical Control (CNC) II
3 Credits
Topics covered include tool and fixture offsets, plus outside programming from CAD/CAM software. Students will oper ate CNC machines in the advanced manufacturing lab. Stu dents will perform complete part fabrication from the beginning stage, write an M & G code program, verify the tool-path and then operate the CNC machine to complete fabrica tion. College level reading, writing, and math skills are required.
Prerequisite: PMT 1250C

POS 1001
Introduction Political Science
3 Credits
Offers students a broad foundation in political systems, ideolo gies, and theories, covering Western and non-Western canon topics. Students will explore major subfields—political philos ophy, American government, comparative politics, and inter national relations—and examine the evolution of political thought from ancient to modern times. The course covers dif ferences between democracies and authoritarianism, economic systems, and key international relations theories. Students will also engage with contemporary issues and explore how di verse human experiences shape political perspectives and poli cies.
Prerequisites: College level reading and writing skills are re quired.

POS 2041
American Government
3 Credits
In this course, students will investigate how the national gov ernment is structured and how the American constitutional re public operates. It covers the philosophical and historical foundations of American government, including but not lim ited to the declaration of independence, the United States con stitution and all its amendments, and the federalist papers. The course examines the branches of government and the govern ment's laws, policies, and programs. It also examines the ways in which citizens participate in their government and ways their government responds to citizens.
Prerequisites: College level reading and writing skills are re quired.

POS 2041H
Honors American Government
3 Credits
Same as POS 2041 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

POS 2112
State and Local Government
3 Credits
Covers the mechanics of state and local governments, public participation and current political issues. Topics include the role of the governor, cabinet, legislature, courts, interest groups, voters and political parties.

PSC 1515
Energy and the Environment
3 Credits
Focuses on the basic scientific principles related to energy and their application to society. Topics include fossil fuel resources, environmental impact of energy usage, energy conversions, electricity, resource depletion, alternative forms of energy and energy conservation; intended for non-science majors.
Prerequisites: College level reading, writing and math skills are required.
Co-requisite: PSC 1515L

PSC 1515L
Energy and the Environment Laboratory
1 Credit
Accompanies PSC 1515. Topics include an understanding of solar energy, nuclear energy, fossil fuels and electricity, through exercises and experiments. Addresses computer appli cations to energy problems. A special fee will be charged for this course. Prerequisites: College level reading, writing and math skills are required.
Co-requisite: PSC 1515

PSY 2012
General Psychology
3 Credits
In this course, students will gain an introduction to the scien tific study of human behavior and mental processes. Topics may be drawn from historical and current perspectives in psy chology.
Prerequisites: College level reading and writing skills are re quired.

PSY 2012H
Honors General Psychology
3 Credits
Same as PSY 2012 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

PSY 2933
Selected Topics in Psychology
3 Credits
Focuses on an in-depth coverage of specialized aspects of psy chology not covered in introductory courses. The course con tent varies according to the interests of the students and faculty. This course may be repeated once for credit. College level reading and writing skills are required.
Prerequisite: PSY 2012.

PUR 2003
Introduction to Public Relations
3 Credits
The underlying theory and professional practice of public rela tions within corporate and institutional structures and its vital role in society; ethical standards of practice; relationships of the practice to the public media; and public relations problem-solving process.
Prerequisite: MMC 2000

RAT 1610
Radiation Therapy Medical Imaging
2 Credits
This course focuses on the production and recording of radio graphic images for patient simulation, treatment planning and treatment verification, with an emphasis on radiation oncology imaging equipment and related devices. Students will identify normal anatomical structures via a variety of imaging formats. Students begin identifying anatomy on cross-sectional images.
Prerequisites: Admission to the Radiation Therapy Program. College-level reading and writing skills required.

RAT 1614
Radiation Therapy and Physics I
2 Credits
Provides the students with the fundamentals of physics and its importance to the field of Radiography in general and Radia tion Therapy specifically. A review of mathematics as applied to radiology and radiation therapy is completed. Fundamen tals principles, concepts and terminology are discussed.

RAT 1618
Radiation Therapy and Physics II
2 Credits
Provides the students with the fundamentals of physics and its importance to the field of radiography in general and radiation therapy specifically. A review of mathematics as applied to ra diology and radiation therapy is completed. Fundamentals principles, concepts and terminology are discussed.
Prerequisite: RAT 1614

RAT 1691L
Introduction to Clinical Concepts Lab
2 Credits
This course content is designed to provide students with an overview of clinical skills and concepts necessary to be success

ful in a radiation therapy clinical setting. Labs will give stu dents the ability to practice clinical skills in an academically challenging atmosphere where critical thinking and problem solving are vital. Radiation and MR safety procedures are in corporated into the lab. A study of radiographic human anat omy, as it pertains to identifying organs at risk, is included. Cross-sectional anatomy and its importance to radiation thera pists is presented. An introduction to the CT scanner and its use in simulation is included.
Prerequisites: Admission to the Radiation Therapy program. College level reading, writing, and math skills are required.

RAT 1810
Radiation Therapy Clinic I
2 Credits
The clinical experience is designed to give the student the abil ity to apply the knowledge gained in the classroom and lab in the practical experience. Students will work directly with radi ation therapists and patients applying radiation therapy treat ments. Students demonstrate patient leveling skills and beginning basic treatment competencies. Students complete a short rotation in the nursing area. Students' responsibilities in crease as they progress through the clinical courses. Some stu dents, especially those in small free-standing clinics, may also be introduced to beginning basic simulation in this course.
Prerequisite: Admission to the Therapy Radiation Program. College-level reading, writing, and math skills are required.

RAT 2001C
Introduction to Radiation Therapy
2 Credits
This course is designed to introduce students to the radiation therapy department and profession. Topics include communi cation, patient safety, patient transfer, patient immobilization, infection control, standard and transmission-based precau tions, oxygen administration, vital signs, and safe practices with radiation and MR equipment. Practical application of the theory taught is also included. An introduction to medical eth ics and law is also included. This course also includes a self-di rected medical terminology section.
Prerequisite: Admission to the Radiation Therapy program.

RAT 2021
Dosimetry and Treatment Planning
4 Credits
Factors involved in the development of a treatment plan are explained, including the determination of the volume to be treated, the dose to give, the fractionation schedule, and the field arrangement to use. Internal and external patient factors that influence a beam's distribution will be discussed. Dose volume histograms and dose distributions are analyzed to de termine the need for beam modifiers. Isodose curves for pho ton beams are compared. Students will also perform dose calculations.
Prerequisites: Admission to the Radiation Therapy Program. College-level reading, writing and math skills are required.

RAT 2023
Principles and Practice of Radiation Therapy I
3 Credits
Content designed to provide an overview of cancer and the specialty of radiation therapy. The medical, biological and pathological aspect as well as the fundamentals of oncology in cluding the terminology, behaviors of malignant disease, and review of the cell and the cell cycle.

RAT 2061
Radiation Therapy Seminar
3 Credits
This course helps prepare students for the national board exam. It provides the students the opportunity to evaluate their cumulative knowledge of all aspects of radiation therapy through comprehensive testing. Areas are identified that re quire more study and reinforcement. An oral review is in cluded in the course.
Prerequisite: College level reading, writing and math skills are required.

RAT 2241
Radiation Biology
3 Credits
This course presents basic concepts and principles of radiobiol ogy including interactions of radiation with cells, tissues and the body as a whole, and resultant health effects. The theories and principles of tolerance dose, time-dose relationships, frac tionation schemes and the relationship of these principles to the clinical practice of radiation therapy are discussed.
Prerequisites: Admission to the Radiation Therapy Program. College-level reading, writing, and math skills are required.

RAT 2242
Principles and Practice of Radiation Therapy II
3 Credits
Provides the students with content designed to examine and evaluate the management of malignant conditions, etiology, epi demiology, diagnosis, staging/grading, regional spread, lym phatic involvement and the treatment methods utilized in the management and treatment of the disease. The radiation thera pist responsibility in patient care, prognosis, treatment results and the effect of using combined modalities will be presented. Various treatment methods and technical components or treat ment will be integrated with the histological types of disease and the area of the body in which they occur will be linked to the skills required to analyze complex issues.
Prerequisite: Admission to the Radiation Therapy Program

RAT 2303
Psychosocial Aspects in Oncology
2 Credits
Describes the effects of cancer and its treatments on patients, family and medical staff. It will examine the behavioral and psychological components of cancer, including its effects on psychological, social and physical functions. Participants will explore their own responses to cancer and their patients. Par

ticipants will learn how their role as medical professional inter acts with other health care professionals as part of a multi- dis ciplinary team member. Coping strategies and typical crisis points for patients and families will be discussed. Included in this will be managing the consequences of treatment and re ceiving a terminal prognosis.
Prerequisite: ENC 1101

RAT 2619L
Computer Applications in Treatment Planning
1 Credits
Provides students the opportunity to develop treatment plans utilizing radiation therapy treatment planning computers and software. All parameters of the plan are explained including isocenter, utilization of multiple fields, and tumor normaliza tion minimization methods.
Prerequisites: RAT 2021, college level reading, writing and math skills are required.

RAT 2620
Radiation Therapy Physics III
2 Credits
Provides the student with the fundamentals of the physics in volved with radiation protection, practical applications of dose calculations, the physics involved in generating isodose distri butions and factors that influence dose distributions, the struc ture of matter, nuclear transformations, production of X-rays and clinical radiation generators. A review of mathematics as applied to radiology and radiation therapy will be included.
Prerequisite: RAT 1618 and college level reading, writing, and math skills are required.

RAT 2621C
Radiation Therapy Physics IV
2 Credits
Provides the students with the fundamentals of the physics in volved with radiation protection, nuclear transformation and the interaction of radiation with matter. The measurement of ionizing radiation, the quality of radiation, measurement and calculations of absorbed doses will be covered. Integration of individual practical experiences in radiation therapy measure ments and calculation of radiation doses. Students will per form data collection and analysis using radiation detection devices. Beam data collection, quality assurance and radiation safety labs will be integrated with didactic portion of the class.
Prerequisites: RAT 2620 and college level reading, writing, and math skills are required.

RAT 2804
Radiation Therapy Clinic II
3 Credits
The clinical experience is designed to allow the students to ap ply the knowledge gained in the classroom and laboratory to ward developing the skills necessary to accurately treat the patient. Students' responsibilities increase as they progress through the clinical courses. Additional competencies are per form in simulation. Students must successfully complete the required competencies to obtain proficiency.
Prerequisite: RAT 1810. College level reading, writing, and math skills are required.

RAT 2814
Radiation Therapy Clinic III
4 Credits
The clinical experience is designed to allow the students to ap ply the knowledge gained in the classroom and labs towards developing the skills and understanding necessary to accu rately apply ionizing radiations for the treatment of malignant neoplasms. Additional competencies are performed in the treatment and simulation areas. Students are introduced to the physics/dosimetry departments of clinic.
Prerequisite: RAT 2804

RAT 2824
Radiation Therapy Clinic IV
3 Credits
The clinical experience is designed to allow the students to continue to apply the knowledge gained in the classroom to ward developing the skills and understanding necessary to perform the tasks of an entry level radiation therapist. The stu dent will demonstrate competency in patient treatment, simu lation, dosimetry, and treatment planning. Students must complete all ARRT mandated competencies by the end of this clinical course in order to pass the course and demonstrate they are competent upon graduation to assume all responsibili ties required of an entry level Registered Radiation Therapy Technologist
Prerequisite: RAT 2814. College level reading, writing, and math skills are required.

RAT 2901
Simulation Lecture I
1 Credit
Provides the student with the knowledge of simulation in preparation for the practical application in the simulation lab. All parameters of simulation and CT simulation of the virtual patient from simple to intermediate complexity will be dis cussed. Simulation parameters such as TAD/TSD, field size, custom shielding, tumor dose, critical structure and field ar rangement will be discussed. Content in sectional anatomy and CT will be discussed.
Co-requisite: RAT 2901L

RAT 2901L
Simulation Lab I
1 Credit
The simulation lab is designed to give the students individual hands on experience with a radiation therapy simulator and a general knowledge of the typical treatment methods for the types of cancers treated with external beam radiation therapy. Each student will use the simulator to perform simulated treat ment areas on an anthropomorphic phantom, "Pixie." Each treatment area is reviewed in the simulation lecture to include the treatment technique, field arrangement, treatment parame ters, dose prescription, and adjacent critical normal tissues with their tolerance doses and side effects.
Prerequisite: Admission to the Radiation Therapy Program. College level reading, writing, and math skills are required.
Co-requisite: RAT 2901.

RAT 2902
Simulation Lecture II
1 Credit
Content is designed to provide the student with the knowledge of simulation in preparation for the practical appli cation in the simulation lab. All parameters of simulation in cluding CT simulation of the virtual patient utilizing complex situations which required advanced thinking skills. Co-requi site: RAT 2902L

RAT 2902L
Simulation Lab II
1 Credit
The simulation laboratory is designed to give the students in dividual hands on experience with a radiation therapy simula tor. Each student will use the simulator to perform simulated treatment areas on a phantom. Each treatment area is reviewed to include the techniques, treatment borders, dose prescription, adjacent normal structures and their tolerance doses and treat ment side effects.
Prerequisite: RAT 2901 and RAT 2901L. College level reading, writing, and math skills are required.
Co-requisite: RAT 2902

REA 0019
Developmental Reading
4 Credits
This course is a preparatory course meant to prepare students for college level reading and to enhance skills that are taught in writing courses. This course does not satisfy general educa tion requirements and generates compensatory credit only.

REA 1605
College Study Skills
2 Credits
This course prepares students for successful college careers through the development of efficient study skills, critical read ing and thinking skills, effective test taking and effective man agement of test anxiety. It introduces students to college culture and the college environment and provides students with the opportunity to explore academic and career goals.

REA 2505
Vocabulary Improvement
3 Credits
Focuses on improving vocabulary through contextual practice and word usage. Topics include word analysis, context clues, affixes, specialized vocabularies, connotation/denotation and analogies.

REL 1210
Biblical Literature: Jewish History, Law, Prophets, and Writings
3 Credits
Through an examination of the Hebrew Scriptures/Old Testa ment and supplemental readings, this course explores the an cient history and writings of the Jewish people through an examination of the Ancient Near East and the beliefs, practices, rituals, major events, and major figures found therein.
Prerequisites: College level reading and writing skills are re quired.

REL 1240
Biblical Literature: The Life of Jesus, Origins of the Church, and Early Christian Writings
3 Credits
Through an examination of the New Testament and supple mental readings, this course explores the history and writings of early Christianity through a review of the life of Jesus, the origin of the church, and the beliefs, practices, rituals, major events, and major figures discussed therein.
Prerequisites: College level reading and writing skills are re quired.

REL 2183
Religious Ethics
3 Credits
This course explores how religious traditions approach and formulate their views on ethical issues by focusing on religious traditions' origins, historical developments, foundational nar ratives, authoritative sources, beliefs, and practices. The course also analyses and compares the diverse ways religious tradi tions interact and justify their views through an examination of various applied ethical issues.
Prerequisites: College level reading and writing skills are re quired.

REL 2300
Introduction to Religion
3 Credits
This course explores Eastern and Western religious traditions such as Judaism, Christianity, Islam, Hinduism, and Bud dhism, etc. In terms of their foundational narratives, historical origin, development, important thinkers, leaders, sacred writ ings, beliefs, rituals, and holidays. Students will further culti vate knowledge of these religious traditions by reading selections from their respective sacred texts.
Prerequisites: College level reading and writing skills are re quired.

RET 1024
Introduction to Respiratory Care
4 Credits
This course provides an introduction to the Respiratory Care profession. The course work includes basic cardiopulmonary anatomy and physiology, patient assessment skills, infection control and basic respiratory therapy procedures.
Prerequisite: Admission into Respiratory Care Programs.
Corequisite: RET 1024L, RET 1350, RET 1485.

RET 1024L
Introduction to Respiratory Care Laboratory
1 Credit
Laboratory component for RET 1024. Hands-on learning with associated respiratory devices: nasal cannulas, oxygen masks,

flowmeters, oxygen tanks, cough assist, CPT vest, IPV, SVN, IPPB, medications, professionalism, and safety procedures at hospitals.
Corequisite: RET 1024

RET 1274C
Basic Respiratory Care
6 Credits
Provides instruction of advanced cardiopulmonary anatomy and physiology. Course work includes basic theory of respira tory care procedures including airway care and arterial blood gas puncture and analysis. The lab portion of the course allows for hands on instruction in a controlled setting to acquire skills prior to performance in a clinical setting.

RET 1350
Pharmacology for Respiratory Care
3 Credits
Provides a comprehensive understanding of the pharmaco logic agents used in the practice of respiratory care and pro vides a fundamental understanding of other drugs used in anesthesia and critical care which involve the cardiopulmo nary system.

RET 1485
Cardiopulmonary Anatomy and Physiology
3 Credits
This is a course covering all aspects of normal cardiopulmo nary physiology, and the effects of related systems. Topics in clude respiratory anatomy, mechanics of breathing, arterial blood gases, pulmonary ventilation/perfusion relationships, gas transport mechanisms of blood, neurologic control of ven tilation, cardiac and renal function, and respiratory adjust ments in health and disease.
Prequisite: Admission into Respiratory Care Program.
Co-requisites: RET 1024, RET 1024L, RET 1350.

RET 1503
Cardiopulmonary Pathophysiology
3 Credits
Provides a study of the causes, characteristics and treatments of the most commonly encountered cardiopulmonary diseases.
Prerequisites: College level reading writing and math skills are required.

RET 1832
Respiratory Care Clinic I
2 Credits
Provides the student with an opportunity to perform basic res piratory care procedures in the clinical setting.
Prerequisites: College level reading writing and math skills are required.

RET 1833
Respiratory Care Clinic II
1 Credit
Provides an introduction to the practice of respiratory care in the intensive care environment. Advanced patient care skills are emphasized. The skills included are life support, physio logic monitoring, mechanical ventilation and communication skills.
Prerequisites: College level reading writing and math skills are required.

RET 2264C
Principles Mechanical Ventilation
5 Credits
Instruction of the basic theory of mechanical ventilation in cluding indications for artificial ventilation, classification of ventilators and monitoring patients on a ventilator. Provides hands-on laboratory experience with different ventilators to prepare the student for clinical practice.

RET 2283
Respiratory Intensive Care
3 Credits
Focuses on theory and application of respiratory care in the critical care unit. Coursework includes ventilator management, ECG interpretation and advanced assessment techniques.

RET 2413C
Pulmonary Diagnostics
2 Credits
A focus on respiratory care theory and application in pulmo nary function testing and interpretation. The course includes testing for volumes and ventilation, pulmonary distribution and diffusion, exercise physiology, cardiovascular stress test ing and equipment maintenance. Lab will include performing pulmonary functions and interpretation of results.

RET 2533C
Advanced Respiratory Care
8 Credits
The coursework focuses on areas to prepare students for the last term prior to graduation. Areas will include new areas as well as content areas that are important and/or have been de termined to be weak in the present cohort's understanding. This includes but is not limited to: New Areas - Medical reim bursement, ethics and administration, home care and rehabili tation of the cardiopulmonary patient, chest tubes, and clinical laboratory tests (homological). Review Areas – Cardiac and hemodynamic monitoring, renal physiology, sleep apnea, ABG's & patient management, mechanical ventilation. Stu dents will be certified in AHA Advanced Cardiac Life Support during the lab portion of this course.

RET 2714C
Pediatric and Neonatal Respiratory Care
3 Credits
Focuses on fetal development, neonatal and pediatric patient; assessment, treatment of cardiopulmonary disorders, mechani cal ventilation, and homecare. Lab will be included for skills practice prior to clinical practice.

RET 2834
Respiratory Care Clinic III
2 Credits

Continuation of advanced respiratory care practice in the in tensive care environment. Advanced patient care skills are em phasized. The skills included are life support, physiologic monitoring, mechanical ventilation and communications skills. Rotations through specialty areas such as pediatrics, neonatal, pulmonary function, management and arterial blood gas lab will also be included.

RET 2835
Respiratory Care Clinic IV
2 Credits
Continuation of advanced respiratory care practice in the in tensive care environment. Advanced patient care skills are em phasized. The skills included are life support, physiologic monitoring mechanical ventilation and communication skills. Rotations through specialty areas such as pediatrics, neonatal, pulmonary function, management and arterial blood gas lab will also be included.
Prerequisites: College level reading writing and math skills are required.

RET 2836
Respiratory Care Clinic V
1 Credit
Continuation of advanced respiratory care practice in the in tensive care environment. Advanced patient care skills are em phasized. The skills included are life support, physiologic monitoring, mechanical ventilation and communication skills. Rotation will include a complete evaluation of afferent, cog- native, and motor skills.
Prerequisites: RET 1832, RET 1833, RET 2834, RET 2835

RET 2930
Respiratory Care Seminar
3 Credits
Includes an overview of advance respiratory care skills and preparation for the NBRC exams. Self-assessment exams will be taken. A case study presentation will be required.
Prerequisites: College level reading, writing and math skills are required.

RTE 1000
Introduction to Radiography
1.5 Credits
Covers all aspects of radiographic image production from the x- ray tube to the image receptor with emphasis on basic radia tion protection practices. Radiographic formulae are intro duced and fundamental concepts of radiation interactions are addressed.
Co-requisite: HSC 1220

RTE 1111
Introduction to Radiography Patient Care
1.5 Credits
Designed to introduce the first year Radiography students to basic medical terminology/medical abbreviations, patient care procedures and general body mechanics needed for effective patient transfers (wheelchair/stretcher). Emphasis is placed on the importance of obtaining accurate patient information and the necessary required confidentiality as expressed in the Pa tient's Bill of Rights.
Co-requisites: RTE 1000, HSC 1220

RTE 1157
Medical Imaging of the Human Structure
3 Credits
Focuses on examining the body through medical imaging, with an emphasis on nuclear medicine, sonography, radiography, thermography and the applications of radiation therapy.
Prerequisites: RAT 1614, RAT 2001C.

RTE 1308
Radiation Protection and Safety
2 Credits
Focuses on radiation safety/protection practices for both pa tients and personnel. Laboratory exercises are included in this course.
Prerequisite: Admission to the Radiography program, RTE 1000.

RTE 1418
Principles of Radiographic Exposure I
3 Credits
Covers the principles of radiographic exposure to include prime factors, radiographic quality, latent image formation, in tensifying screens, tube rating charts and radiographic ac cessory devices. Admission to Radiography program required
Prerequisites: RTE 1000, RTE 1607
Co-requisite: RTE 1418L

RTE 1418L
Principles of Radiographic Exposure I Laboratory
1 Credit
Provides the students the opportunity to radiographically demonstrate Viz lab exercises exposure concepts as delivered in lectures. Admission to the Radiography program required.
Prerequisites: RTE 1000, RTE 1607
Co-requisite: RTE 1418

RTE 1457
Principles of Radiographic Exposure II
1 Credit
Focuses on darkroom chemistry, processor design and sensi tometry used to monitor processor conditions.
Prerequisites: RTE 1418, RTE 1418L

RTE 1503
Radiographic Positioning I
3 Credits
Focuses on proper positioning for various projections of the chest, abdomen and skeletal system.
Prerequisite: Admission to the Radiography program.
Co-requisite: RTE 1503L

RTE 1503L
Radiographic Positioning I Laboratory
1 Credit

Designed to give the students the opportunity to practice posi tioning skills introduced in the lectures dealing with radiog raphy of the chest, abdomen and skeletal system.
Prerequisite: Admission to the Radiography program.
Co-requisite: RTE 1503

RTE 1513
Radiographic Positioning II
3 Credits
Focuses on radiographic procedures and anatomical identifica tion, with an emphasis on the urinary, biliary and gastrointes tinal systems, as well as the vertebral column. Topics include the use, composition and effects of contrast media on the hu man body.
Prerequisite: RTE 1503
Co-requisite: RTE 1513L

RTE 1513L
Radiographic Positioning II Laboratory
1 Credit
Designed to coincide with the lecture material of RTE 1513. This will give the student an opportunity to practice position ing techniques, which have been covered in RTE 1513. It also enables the student to become more familiar with image evalu ation and identification.
Prerequisites: RTE 1503, RTE 1503L
Co-requisite: RTE 1513

RTE 1523
Radiographic Positioning III
3 Credits
Focuses on radiographic procedures and anatomical identifica tion, with an emphasis on the skull and facial bones.
Prerequisites: RTE 1513, RTE 1513L
Co-requisite: RTE 1523L

RTE 1523L
Radiographic Positioning III Laboratory
1 Credit
Provides experience in positioning the skull phantom to demonstrate various projections of the skull and facial bones.
Prerequisites: Admission to the Radiography program, RTE 1513, RTE 1513L.
Co-requisite: RTE 1523

RTE 1597C
Principles of Computed Tomography I
4 Credits
Introduction to the methodology of computed tomography. Topics include but are not limited to computed tomography physics and instrumentation, quality control, patient care, con trast agents, radiation safety and dosimetry, cross-section anat omy and pathology, and CT procedures.
Prerequisites: Current certification in ARRT (R), (T), (N), or CNMT and FL licensure.
Co-requisite: RTE 1805

RTE 1607
Radiographic Science Principles
1 Credit
Focuses on the basic natural laws, metric conversions, atomic structure and mathematical formulae.
Prerequisite: Admission to the Radiography Program.

RTE 1613
Radiographic Physics I
3 Credits
Includes the fundamentals of electrical and radiation physics and basic principles underlying the operation of x-ray equip ment and auxiliary devices.

RTE 1782
Pathology of Medical and Surgical Diseases
3 Credits
Focuses on terminology, the nature of diseases and their effect on tissues and organs. Prerequisite: Admission to the Diagnos tic Medical Sonography, Nuclear Medicine Technology, Occu pational Therapy Assistant, Radiation Therapy, or Radiog raphy programs.

RTE 1800
Introduction to Radiography Practicum
2 Credits
Designed to introduce the entering first year radiography stu dents to the clinical education settings and associated patient care methodologies.
Prerequisite: Admission to the Radiography program.

RTE 1804
Radiography Practicum I
3 Credits
See the description for RTE 2844.
Prerequisites: Admission to the Radiography program, HSC 1220, RTE 1800

RTE 1805
CT Clinical Education I
3 Credits
Hands-on experience in the clinical setting performing com puted tomography procedures under the direct supervision of a CT technologist. Requires completion of a minimum of 50 competencies to be applied towards American Registry of Ra diologic Technologists computed tomography eligibility re quirements.
Prerequisite: Admission the AS degree Radiography Program

RTE 1814
Radiography Practicum II
3 Credits
See course description for RTE 2844.
Prerequisite: Admission to the Radiography program, RTE 1804.

RTE 1824
Radiography Practicum III
3 Credits

See the description for RTE 2844.
Prerequisite: Admission to the Radiography program, RTE 1814.

RTE 1949
Radiography Internship
3 Credits
A coordinated work study course involving class work and field experience. Objectives determined by the students and teacher coordinator will be used to evaluate the students. Ad ditional prerequisite: Successful completion of one half of all clinical competencies to include all contrast studies and must have earned a grade of "C" on all previous radiology intern ship sections. Co-op/Independent Study. This course may be taken four times for credit.

RTE 2061
Radiographic Seminar
2 Credits
Provides the students a comprehensive review of all aspects of the Radiography Program.
Prerequisites: Admission to Radiography program, RTE 1613, RTE 2385

RTE 2385
Radiation Biology
3 Credits
Focuses on the interaction of radiation with physiological sys tems, genetics, radiation injury, and radiation dosimetry with emphasis on the principles of radiation safety.
Prerequisite: Admission to the Nuclear Medicine Technology, Radiation Therapy, Radiation Therapy Specialist, or Radiog raphy programs.

RTE 2473L
Quality Assurance
1 Credit
Covers all aspects of quality assurance. Laboratory exercises are included.
Prerequisite: Admission to the Radiation Therapy, Radiation Therapy Specialist, or Radiography programs

RTE 2563
Special Radiographic Processes
Credits
Focuses on special radiographic and angiographic procedures with an emphasis on procedural tasks and anatomical struc tures.
Prerequisites: Admission to the Radiography program, RTE 1523, RTE 1523L.

RTE 2575
MRI Imaging I
3 Credits
This course should provide information on the essential com ponents for MRI (MR) safety concepts, equipment and organi zations. To prevent MR incidents, patients and personnel must be properly educated. Also the following sections are covered: MR Safety, Fundamentals of Imaging Science and HealthCare, MR Instrumentation and Imaging, Physical Principles of MRI, MR Parameters, Imaging Options and Quality Assurance, Pharmacology and Drug Administration, Clinical Practice and Patient Management, Computers in Imaging and Medical In formatics.
Prerequisites: College-level reading, writing and math skills re quired.
Co-requisites: RTE 2760 and RTE 2940

RTE 2576
MRI Imaging II
3 Credits
This course should provide information on the essential com ponents for MRI (MR) safety concepts and equipment. The fol lowing is also covered: Fundamentals of Imaging Science and Healthcare, MR Pulse sequences, Image Formation and Image contrast, MR Imaging Procedures, MR Pathology, Ethics and Law in the Imaging Sciences.
Prerequisites: RTE 2575, RTE 2760, and RTE 2940
Co-requisites: RTE 2941

RTE 2596C
Principles of Computed Tomography II
4 Credits
Advanced methodology of computed tomography. Topics in clude but are not limited to computed tomography instrumen tation, quality control and assurance, advanced patient care specific to CT, applied radiation safety and dosimetry, cross-sectional anatomy and pathology, CT procedures, data acquisi tion, image processing and reconstruction, image quality, and medical informatics.
Prerequisites: RTE 1597C, RTE 1805, with a minimum grade of C.
Co-requisites: RTE 2815.F

RTE 2760
MRI Anatomy
3 Credits
This course should serve as a guide to identify and compre hend cross-sectional anatomy in various formats for the imag ing professional. The Magnetic Resonance Imaging (MRI) technologist is a vital member in the health care environment. The MRI technologist must recognize anatomy to perform and construct diagnostic imaging examinations to facilitate a diag nosis. Emphasis is placed on the following anatomy: Head and Brain, Neck, Spine, Chest and Mediastinum, Abdomen, Pelvis, and Musculoskeletal-upper and lower extremities.
Prerequisites: College-level reading, writing and math skills re quired.
Co-requisites: RTE 2575, RTE 2940

RTE 2806
CT Practicum II
3 Credits
A coordinated work-study course involving individual job-re lated objectives and field experience. Objectives determined by the student and faculty/preceptor will be used to evaluate the student.
Prerequisite: RTE 1597C

Co-requisite: RTE 2596C

RTE 2815
CT Clinical Education II
3 Credits
Hands-on experience in the clinical setting performing com puted tomography procedures under the direct supervision of a CT technologist. Required completion of remaining compe tencies totaling 125 in accordance with American Registry of Radiologic Technologists computed tomography eligibility re quirements.
Prerequisite: RTE 1597C, RTE 1805
Co-requisite: RTE 2596C

RTE 2834
Radiography Practicum IV
3 Credits
See the description for RTE 2844.
Prerequisites: Admission to the Radiography program, RTE 1824.

RTE 2844
Radiography Practicum V
1.5 Credits
Focuses on hands on experience in radiographic procedures through clinical rotations designed for radiography students only. Practicums require 24 hours per week. Designed to meet the requirements of the American Registry of Radiologic Tech nologists. Includes potentially strenuous skills such as lifting and carrying.
Prerequisite: Admission to the Radiography program, RTE 2834.

RTE 2940
MRI Clinical I
1 Credits
This first clinical course provides hands on experience in the clinical setting performing MRI procedures under the direct supervision of an MRI technologist. Requires a minimum of 25 competencies to be applied toward American Registry of Radi ologic Technologists MRI eligibility requirements. This one credit clinical course has a total of 105 clock hours and should meet 7 hours per week based on a 15-week semester.
Prerequisites: College-level reading, writing and math skills re quired.
Co-requisites: RTE 2760 and RTE 2575

RTE 2941
MRI Clinical II
2 Credits
This second clinical course provides hands on experience in the clinical setting performing MRI procedures under the di rect supervision of an MRI technologist. This two-credit clini cal course has a total of 210 clock hours and should meet 14 hours per week based on a 15-week semester.
Prerequisite: RTE 2760, RTE 2575, and RTE 2940
Co-requisites: RTE 2576

RTE 2942
MRI Clinical III
3 Credits
This third clinical course provides hands on experience in the clinical setting performing MRI procedures under the direct supervision of an MRI technologist. This three-credit clinical course has a total of 315 clock hours and should meet 21 hours per week based on a 15-week semester.
Prerequisite: RTE 2760, RTE 2575, RTE 2576, RTE 2940, and RTE 2941

RTE 2943
CT Practicum I
3 Credits
A coordinated work-study course involving individual job-re lated objectives and field experience. Objectives determined by the student and faculty/preceptor will be used to evaluate the student.
Prerequisite: Admission to the program
Co-requisite: RTE 1597C

RTV 1530
Electronic Field Production
3 Credits
The course will provide an opportunity for students to create a variety of video productions, allowing them to express per sonal creativity while developing the ability to conceptualize story ideas and effectively translate them into video produc tions.

RTV 1941
Radio and TV Internship I
3 Credits
An opportunity to study and gain experience by working on-the-job with a broadcast film, or multimedia organization. De signed for students enrolled in the Digital Television and Me dia Production program.

RTV 2000
Introduction to Broadcasting
3 Credits
This is an introductory course in principles, tools, and skills in volved in the broadcasting field today.

RTV 2460
Broadcasting Practicum
3 Credits
A course that allows the student to get hands-on experience in producing actual programming for radio, television or the In ternet.
Prerequisites: RTV 2510, RTV 2000, RTV 2560, RTV 2630, RTV 1530

RTV 2510
Broadcasting Techniques
3 Credits
An introduction to multi-camera television studio production with an emphasis on directing. Students will learn to direct a

"live" three-camera studio production as well as assume studio crew positions. Students will learn about and act as a technical director, assistant director, lighting director, audio director, floor director, and camera operator.
Prerequisite: RTV 2000

RTV 2512
Advanced TV Studio Production
3 Credits
This course is designed to provide students with more practi cal experience in producing live and live-to-tape three-camera television studio productions from pre to postproduction.
Prerequisite: RTV 2510

RTV 2532
Advanced Electronic Field Production
3 Credits
This course builds on what the student has learned in the be ginning electronic field production class. It a very practical ap proach toward learning the techniques of how to write, produce, direct and edit short form field productions such as the corporate demonstration, short documentary and fictional short.
Prerequisite: RTV 1530

RTV 2560
Radio Production and Programming
3 Credits
This course covers the development of announcing and audio production skills for radio and other media. Students will learn to operate a professional audio console and use professional multi-track audio software to produce content for the college radio station. Students will also study radio formats, learn how to analyze radio ratings, program a station, and build a station promotions campaign.

RTV 2630
Broadcast News
3 Credits
Designed to increase student employment potential and to maintain job performance in news and documentaries for ra dio, television, or closed circuit through basic and practical fa miliarization with the mechanics and procedures of the news room. Adaptation of local and wire copy for audio and film, placement of commercials, approaches to information sources, methods of applying for work are discussed.

RTV 2942
Radio and TV Internship II
3 Credits
The second Radio/TV internship allows the student an oppor tunity to work at another broadcast film, or media production company to gain more on the job practical experience and ex tend their professional network. Designed for students en rolled in the Digital Television and Media Production program.
Prerequisite: RTV 1941

RTV 2944
Radio and TV Internship III
3 Credits
The final Radio/TV internship experience is designed to pro vide the Digital Television and Media Production student with an opportunity to develop entry level competence in the prac tical skills required for employment as a broadcast director.

SBM 2000
Small Business Management
3 Credits
Introduces the fundamentals of small business management, including planning, choosing the types and forms of business, raising capital, using business information, managing employ ees, and marketing products and services. The course is ori ented toward principles needed to operate a small business and is designed for those who may eventually have their own businesses or for those who desire to upgrade their skills in their present businesses. Students will prepare a feasibility study and present a comprehensive small business startup plan. Completion of ENT 1000 strongly recommended.
Prerequisite: GEB 2214

SCC 1000
Introduction to Security
3 Credits
This course will examine the origins and development of secu rity from medieval England to current times. The concept of security will be covered as a response to and a reflection of so ciety's structure. This course will cover the various aspects of security to include community, retail, corporate, business, and industrial problems and concerns as well as the governmental and legal aspects of security. The use of security equipment and loss prevention will also be covered.

SCC 1001
Introduction to Private Investigation
3 Credits
This course will provide students with an overview of the pri vate investigation field. The course will focus on employment opportunities, history, evolution, methods, and management of private investigation, sources of information, investigative technology, and ethical, public policy, and legal considerations related to investigations in the private sector.

SCM 1010
Introduction to Supply Chain Management
3 Credits
This course provides a general overview of Supply Chain Man agement (SCM) and the associated functions necessary for de livery of goods and services to customers. The course focuses on effective techniques of employees and managers that ensure that an effective supply chain exists in an organization. Stu dents study an overview of SCM functions such as order pro cessing, transportation, warehousing, purchasing and inventory, E-Commerce, information flow, and customer ser vice.
Prerequisite: College level reading, writing and math skills are required.

SCM 2150
Purchasing and Inventory Management
3 Credits
This course provides a comprehensive introduction to the pur chasing and supply chain management field. Cases cover pur chasing and supply chain issues in a variety of settings, from process industries to high-tech manufacturing and services, and public institutions. The curriculum emphasizes the pur chasing process as it relates to such topics as inventory control procedures, price versus cost analyses, laws and ethics, vendor selection, and the development of vendor relationships.
Prerequisite: SCM 1010, College level reading, writing and math skills are required.

SCM 2230
Warehouse Management
3 Credits
This course provides an introduction to practical concepts of warehousing including the types of equipment, storage pro cesses, and systems; the technologies used to identify and track units in a warehouse; and the regulations designed to ensure safety in warehouse operations.
Prerequisite: SCM 1010, College level reading, writing and math skills are required.

SCM 2270
Transportation and Distribution
3 Credits
This course explores the role and importance of transportation in the distribution of goods. The course focuses on the infra structure of the freight transportation system, modes of trans portation, transportation regulations, and public policies. Students study carrier cost structures, operating characteristics, and policy regulations regarding each of the transportation modes.
Prerequisite: College level reading, writing and math skills are required.

SLS 1101
Orientation
1 Credit
An introduction to the campus facilities, student services and college policies and procedures. Provides assistance in plan ning a two-year program of study and offers guidance in trans ferring to other educational institutions.

SLS 1106
First Year Experience Orientation
3 Credit
This course emphasizes early academic planning that aligns students' aptitudes, career interests, and life goals. In addition to the early development of a comprehensive academic life plan, first-time-in-college students will learn about HCC's sup port services and how to navigate toward successful comple tion of courses and programs. Moreover, students will engage with the College community in meaningful ways to help pre pare them to realize their academic and career goals. Pedagog ical approaches include lecture, faculty-advisor partnership, peer group collaboration, library research, self-exploration, written reflection, oral presentation, experiential learning, and other modalities.

SLS 1261
Personal Skills for Business
3 Credits
Prepares students, business managers, and supervisors to meet the challenges of today's rapidly changing, technological world by helping them examine and perfect the personal skills re quired for an understanding of self and others on the job. Pro vides students with the skills necessary to recognize and cope with life's challenges. Emphasis is placed on making good business decisions goal setting, problem solving, time and stress management, and coping and leadership skills.

SLS 1301
Career Decision Making
3 Credits
Emphasizes the development of decision-making skills needed to make realistic career choices in terms of values, interests, and educational goals, using the facilities of the Career Lab.

SLS 1501
College Success
3 Credits
This interdisciplinary course empowers students by preparing them for a successful college experience and providing them with additional opportunities to develop intellectual potential and life skills. It enhances student understanding of library re sources, student services, and other areas of academic support. Topics include goal assessment, time management, power reading, creative and critical thinking, test taking, memory, note taking, and communication skills.

SON 1000
Basic Sonography
3 Credits
Designed to present the fundamental principles of sonography to the entry level sonography student. The focus of the course will be the role of the sonographer in the health care environ ment, professionalism and the legal issues facing the health care provider. Students will be introduced to the relevance of sonography in abdominal, obstetrical and gynecologic imaging and basic sonographic physics and instrumentation.
Prerequisite: BSC 2085
Co-requisite: SON 1804C

SON 1053
Sonographic Imaging of Medical and Surgical Diseases
1 Credit
Students shall review their knowledge base of gross anatomy, scan planes, patient positions and the proper terminology as related to sonographic imaging. This course prepares students for clinical practicum courses by reviewing disease processes as they appear on sonographic images. Students will review videotapes, paper printer images and transparency films, and correlated studies from other imaging modalities demonstrat ing medical and/or surgical diseases. In addition, students

shall review clinical signs and symptoms and related lab tests associated with the disease processes.
Prerequisite: SON 1000
Co-requisites: RTE 1782, SON 1311

SON 1100
Sonographic Scanning Protocol I
1 Credit
Students shall review their knowledge base of gross anatomy, scan planes, patient positions and the proper terminology as related to sonographic imaging. Designed to prepare students for the proper utilization of abdominal sonographic practicum courses. Quality images and techniques shall be discussed. Stu dents shall be guided in how to adapt protocols to anatomical variations or in the demonstration of pathology. In addition, patient preparation, the application of appropriate measure ments and equipment utilization will be discussed.
Prerequisites: SON 1000, SON 1804C.
Co-requisite: SON 1840

SON 1101
Sonographic Scanning Protocol II
1 Credit
Students shall review their knowledge base of gross anatomy, scan planes, patient positions and the proper terminology as related to sonographic imaging. This course is designed to pre pare students for the proper utilization of small parts, obstetri cal, gynecology and vascular sonographic protocols during clinical practicum courses. Quality images and techniques shall be discussed. Students shall be guided in how to adapt proto cols to anatomical variations or in the demonstration of pathol ogy. In addition, patient preparation, the application of appropriate measurements and equipment utilization will be discussed.
Prerequisite: SON 1100
Co-requisites: SON 1850

SON 1171C
Introduction to Vascular Technology
2 Credits
This course will provide a thorough understanding of the cere brovascular anatomy, physiology, and pathology. The clinical assessment of patients for cerebrovascular disease will be dis cussed to include normal and abnormal anatomy. This course will discuss non-invasive and invasive tests for cerebrovascu lar procedures. Patient factors and patient histories will be de scribed. In addition, this course will provide a thorough understanding of the anatomy, physiology and pathology of the lower extremity venous procedures. The clinical assess ment of patients with acute and chronic venous disease will be discussed. A description of non-invasive tests used to evaluate extremity venous vascular examinations will be discussed.
Prerequisite: SON 1210
Co-requisite: SON 1850

SON 1210
Introduction to Sonographic Physics and Instrumentation
3 Credits
Designed to expand upon the basic physics and instrumenta tion concepts that were presented in Basic Sonography. Discus sion will include how each component is interrelated and how all components contribute to the production of a sonographic image. Basic sonographic physics will be introduced. Introduc tion to computers hardware and software. An introductory computer literacy course for the Diagnostic Medical Sonogra phy student with emphasis on current technology and the im plications for and the effects on our society. Topics will include cyberspace; communications, including the impact of the Inter net and World Wide Web; ethical, privacy, environmental, and health related issues. Software applications will include a brief introduction to Windows, word processing, spreadsheets, and graphics.
Prerequisites: SON 1000 or CVT 1000
Co-requisite: SON 1840 or CVT 2320

SON 1311
Introduction to Cross Sectional Anatomy I
1 Credit
Provides an introduction to sonographic representation of the abdominal/pelvic areas and developing fetus. Topics include scanning planes, patient positions and terminology.

SON 1312
Introduction to Cross Sectional Anatomy II
1 Credit
Designed to introduce the student to the sonographic represen tation of the female pelvis and the developing fetus. Students shall review their knowledge base of gross anatomy and em bryological development. Students will then be introduced to scan planes, patient positions and the proper terminology asso ciated with these concepts. Anatomical and sonographic rela tionships female pelvis and the developing fetus will be discussed extensively. From this basis, the course is then de signed to assist the student in visualizing gross anatomy as it is represented sonographically.
Prerequisite: SON 1311
Co-requisite: SON 1840

SON 1313
Introduction to Cross Sectional Anatomy III
1 Credit
Students shall review their knowledge base of these structures. Students will then be introduced to scan planes, patient posi tions and the proper terminology associated with these con cepts. This course is designed to introduce the student to the sonographic representation when imaging small parts, neona tal brains and vascular structures. Anatomical and sonographic relationships of these structures, vessels and organs will be dis cussed extensively. From this basis, the course is then designed to assist the student in visualizing gross anatomy as it is repre sented sonographically.
Prerequisites: SON 1312
Co-requisites: SON 2814

SON 1804C
Introduction to Practicum I
2 Credits
Introduction to the patient/sonographic role in a simulated en vironment. Designed to ease the student into the hospital situ ation by becoming familiar with the role and responsibilities of a sonographer and the basic fundamentals of a career such as darkroom chemistry, medical terminology and machine opera tions. Students will spend a minimum of 50 minutes per week in lecture and eight clock hours in simulated hospital/ clinical experience each week in the on campus laboratory.
Prerequisite: BSC 2085.
Co-requisite: SON 1000

SON 1840
Introduction to Practicum II
1 Credit
Continues to explore the role of the sonographer in a simulated as well as an actual clinical environment. This course is de signed to expose the student to the role and responsibilities of a clinical sonographer in the hospital situation by allowing ob servation of the sonographer in daily hospital routine. The stu dent will begin the initial phase of instruction in scanning protocols. The student will spend eight clock hours a week in the clinical and/or laboratory setting.
Prerequisites: SON 1804C, SON 1000.
Co-requisite: RTE 1782

SON 1850
Introduction to Practicum III
1 Credit
Provides 8 hours per week of clinical sonographic experience in various health care settings. Topics include scanning proto cols, sonographic equipment, terminology and patient care.
Prerequisite: SON 1840
Co-requisite: SON 1101

SON 2061
Seminar in Sonography
3 Credits
Provides a comprehensive review of all aspects of the sonogra phy program to include abdominal, obstetrics, gynecology, physics and instrumentation, and miscellaneous small parts. Topics include quality assurance in sonography labs, bio-effects related to sonography, sonographic artifacts, an intro duction to Doppler, an introduction to neurosonography, pedi atric sonography and resume preparation and job hunting.
Prerequisites: SON 2122, SON 2211, SON 2112
Co-requisite: SON 2834

SON 2111
Abdominal Sonography I
3 Credits
Designed to give the student an understanding of the anatomy, physiology and pathology of the abdominal aorta, pancreas, biliary system and liver. Emphasis will be placed on so nographic features and characteristics of normal anatomy as well as the various disease processes that affect each organ. Remaining course content will integrate clinical procedures, diag nostic procedures, etc., common to all and specific to each or gan.
Prerequisite: SON 1312
Co-requisite: SON 2814

SON 2112
Abdominal Sonography II
3 Credits
Designed to give the student an understanding of the anatomy, physiology and pathology of the liver urogenital system as well as the adrenal glands, spleen, neonatal brain, thyroid and breast.
Prerequisite: SON 2111
Co-requisites: SON 2211, SON 2211L

SON 2121
Obstetrics and Gynecology Sonography I
4 Credits
Designed to give the student an understanding of the anatomy, physiology and pathology of the female pelvis as well as its normal and abnormal sonographic appearance. Also intro duces the student to the first trimester of pregnancy and its re lated anatomy, physiology and possible pathology and/or complications. Embryology, early fetal development, so nographic identification and imaging of the embryo and fetus, trans-abdominal and trans-vaginal scanning techniques will be covered.
Prerequisite: SON 1311 (waiver by permission of instructor).

SON 2122
Obstetrics and Gynecology Sonography II
3 Credits
Designed to give the student detailed instruction in the role of sonography in the second and third trimesters of pregnancy. Fetal development, physiology, all major fetal anomalies, and maternal complications directly related to the second and third trimesters of pregnancy will be covered in detail.
Prerequisite: SON 2121
Co-requisites: SON 2211, SON 2211L

SON 2175C
Vascular Technology
3 Credits
This course is a review of physiology and fluid dynamics, and is designated to give the student an understanding of the anat omy, physiology, and pathology of the arterial and the venous circulatory systems. This course will provide a thorough un derstanding of the lower and upper extremity arterial anat omy, physiology, and pathology. The clinical assessment of patients for peripheral vascular disease will be discussed. This course will discuss Doppler waveform analysis in the lower and upper extremities. Patient factors and patient histories will be described. This course will also provide a thorough un derstanding of Doppler segmental pressures in the lower and upper extremities, duplex scanning and color Doppler flow im aging of abdominal vessels, description of preoperative map ping procedures, Transcranial Doppler (TCD), and statistical profile and test correlation.

Prerequisite: SON 2211

SON 2211
Sonographic Physics and Instrumentation
3 Credits
Designed to present to the student a detailed explanation of ul trasound physics and instrumentation. The theory of physics principles and their practical applications, basic principles of instrumentation, and practical applications are presented.
Prerequisite: SON 1210
Co-requisite SON 2211L

SON 2211L
Sonographic Physics and Instrumentation Laboratory
1 Credit
Designed to parallel the sonographic physics and instrumenta tion lecture course. The student will apply the concepts and mathematical calculations in clinical projects and various exer cises.
Prerequisite: SON 1210
Co-requisite: SON 2211

SON 2814
Sonographic Clinical Practicum I
3 Credits
Provides on campus instruction in scanning protocols of the abdominal aorta, pancreas and gallbladder. Patient care, the role and duties of the sonographer in the health care environ ment and instruction in the use of various types of ultrasound equipment will be discussed. Students receive instruction and guidance in producing quality sonographic images and the pa rameters used to evaluate the images. Affiliate: Student rota tion through clinical affiliates provides experience in the performance of ultrasound procedures in dynamic health care environments.
Prerequisites: SON 1850
Co-requisites: SON 2111, SON 2121

SON 2824
Sonographic Clinical Practicum II
3 Credits
Provides on campus instruction in scanning protocols of the abdominal aorta, pancreas and gallbladder. Patient care, the role and duties of the sonographer in the health care environ ment and instruction in the use of various types of ultrasound equipment will be discussed. Students receive instruction and guidance in producing quality sonographic images and the pa rameters used to evaluate the images. Affiliate: Student rota tion through clinical affiliates provides experience in the performance of ultrasound procedures in dynamic health care environments.
Prerequisite: SON 2814
Co-requisites: SON 2122, SON 2112

SON 2834
Sonographic Clinical Practicum III
3 Credits
Provides on campus instruction in scanning protocols of the thyroid, female pelvis and the total abdomen. This course fur ther expands upon the sonographer's role and responsibilities, and use of ultrasound equipment. The student receives addi tional instruction in film evaluation and image quality. Off campus: Student rotates through clinical affiliates gaining con tinued experience and knowledge in the performance of ultra sound procedures.
Prerequisite: SON 2824
Co-requisite: SON 2061

SOP 1740
Feminine Psychology
3 Credits
Focuses on theories of feminine personality using a social psy chological approach, with an emphasis on gender differences and roles, family, work and the socialization process.

SPC 1006
Speech Improvement
1 Credit
Focuses on the basic methods of speech presentation and criti cal listening. For those students that began prior to the fall term 2002 and have had continuous enrollment, this meets the speech component of the general education communication re quirements.

SPC 1608
Public Speaking
3 Credits
Public Speaking explores the practical and ethical practice of human communication. In this course, students will learn the theory behind effective human communication and develop their skills by planning and presenting speeches that inform, influence, and entertain the audience using the extemporane ous mode of delivery. To accomplish this, students will engage in critical thinking, rhetorical criticism, and delivering speeches in front of a live audience.
Prerequisites: College level reading and writing skills are re quired.

SPC 1608H
Honors Public Speaking
3 Credits
Honors Public Speaking explores the practical and ethical prac tice of human communication with honors content. In this course, students will learn the theory behind effective human communication and develop their skills by planning and pre senting speeches that inform, influence, and entertain the audi ence using the extemporaneous mode of delivery. To accomplish this, students will engage in critical thinking, rhe torical criticism, and delivering speeches in front of a live audi ence. Honors program permission is required.
Prerequisites: College level reading and writing skills are re quired.

SPC 2300
Interpersonal Communication
3 Credits
Provides students with working definitions, conceptual knowledge and practical examples regarding the development and improving of interpersonal communication skills in per sonal and professional settings. Topics such as self-disclosure, verbal and non-verbal message sending and receiving, inter personal and family relationships and conflict are addressed. While not designed to be therapeutic, the course offers practi cal, real world examples of interpersonal interactions.
Prerequisites: College level reading and writing skills are re quired.

SPN 1120
Elementary Spanish I
4 Credits
Covers the fundamental of reading, writing, listening and speaking the Spanish language while developing an under standing of the Spanish and Hispanic cultures.
Prerequisites: College level reading and writing skills are re-quired.

SPN 1121
Elementary Spanish II
4 Credits
Enhances skills learned in SPN 1120.
Prerequisites: SPN 1120 with a minimum grade of "C" or in structor's permission. College level reading and writing skills are required.

SPN 2220
Intermediate Spanish I
4 Credits
Designed to help students reach fluency in understanding, speaking, reading, writing, and cross-cultural awareness. Em phasis on written composition and oral presentation as well as values and ideas of the Spanish and Hispanic cultures.
Prerequisite: SPN 1121 with a minimum grade of "C" or in structor's permission. College level reading and writing skills are required.

STA 2023
Elementary Statistics
3 Credits
In this course, students will utilize descriptive and inferential statistical methods in contextual situations, using technology as appropriate. Topics include data organization and analysis, probability, discrete and continuous probability distributions, confidence intervals, hypothesis testing, correlation, and sim ple linear regression. The course is designed to increase prob lem-solving abilities and data interpretation through practical applications of statistical concepts. This course is appropriate for students in a wide range of disciplines and programs.
Prerequisite: MAT 0022, or MAT 0028, or MAT 0029. or appro priate score on placement test.

STA 2023H
Honors Elementary Statistics
3 Credits
Same as STA 2023 with honors content. Honors Program per mission required.
Prerequisite: MAT 0022, or MAT 0028, or MAT 0029, or appro priate score on placement test.

STS 1300
Surgical Anatomy and Pathophysiology
4 Credits
This course has been designed to provide general knowledge about the healthy functions of the human body and the struc tures related to these functions. It is divided into six units of study. Each unit will be taught separately, correlating each system's contributions to the total function of the body, as a synergistic and unified whole. Instruction will also include an atomical positions, planes of the body, systems of the body and their inter-relationships, body chemistry, and introduction to physics.
Prerequisite: Admission to the Surgical Technology Program

STS 1310
Surgical Techniques and Procedures
6 Credits
This course is an overview of the profession including surgical skills and terminology related to surgical procedures per formed in the operating room. Infection control techniques, aseptic technique and surgical instrumentation are covered in this course. Surgical procedures, patient positioning and sur gical hazards are also covered.
Prerequisite: HSC 2006
Corequisite: STS 1310L

STS 1310L
Surgical Techniques and Procedures Simulation Labora tory
2 Credits
This course is designed to utilize simulation as related to surgi cal procedures. The simulators are designed to review anat omy and teach surgical procedures while evaluating the student's ability in reaction times and accuracy as related to anatomy and patient positioning. The simulators also evaluate the accuracy in stabilization of surgical instrumentation.
Prerequisite: HSC 2006
Corequisite: STS 1310

STS 1340
Pharmacology and Anesthesia
3 Credits
This course is an overview of the basic skills and terminology related to anesthesia and pharmacology. The course details the safety when working with medications in the perioperative setting and the understanding of current clinical laboratory tests, and vital signs. The anesthesia selection required for each surgical procedure and patient safety are all discussed in the course.
Prerequisite: Admission to the Surgical Technology Program

STS 1940
Introduction to Surgery Clinical
2 Credits
This course is an overview of the profession including basic clinical skills and terminology related to the surgical setting. The professionalism, profession organizations, patient confi dentiality, infection control, asepsis, and demonstrating aseptic technique are covered in this course.
Prerequisite: HSC 2006L
Corequisite: STA 1310L

STS 2323
Surgical Procedures I
4 Credits
This course is an overview of surgical procedures covering a wide variety of surgical specialties. This course covers some surgical simulation use and mock surgeries. Surgical simula tion focuses on instant performance feedback. Anatomy, asep tic technique and surgical instrumentation are covered in the course. Surgical procedures, patient positioning and surgical hazards are also covered.
Prerequisite: STS 1310
Corequisite: STS 2323L

STS 2323L
Surgical Procedures Simulation Laboratory I
1 Credit
This course is an overview of surgical procedures utilizing simulation equipment and laboratory skills. Focusing on the relationship of surgical simulation use (camera management) in a realistic surgical environment. Surgical simulation focuses on instant performance feedback. Anatomy, aseptic technique and surgical instrumentation are covered in this course. Medi cal terminology, asepsis, and surgical sterile technique are all covered in the disciplinary of this course.
Prerequisite: STS 1310
Corequisite: STS 2323

STS 2324
Surgical Procedures II
4 Credits
This course presents an overview into the surgical environ ment. Instrumentation and sterilization key components of this course. Demonstrate the use of sterilization process moni tors, including temperature and frequency of appropriate chemical indicators and bacterial spore tests for all sterilizers. Demonstrate the ability to identify and select appropriate in strumentation and equipment that meets the needs of the spe cialty.
Prerequisite: STS 2323
Corequisite: STS 2324L

STS 2324L
Surgical Procedures Simulation Laboratory II
1 Credit
This course is an overview into the surgical setting using simu lated surgeries and simulation equipment. By providing in stant performance feedback through surgical anatomy simulation the learner gains hands-on experience instantly. This course requires clinical hours and surgical suite experi ence. General surgery, plastics/burns, E.N.T., genito-urinary, cardiothoracic, gynecological, orthopedic, neuro and ophthal mic surgery are all areas of experience.
Prerequisite: STS 2323L
Corequisite: STS 2324

STS 2365
Professional Skills for the OR Team
1 Credit
This course is an overview of the medical professionalism and the mastery of skills, interpersonal skills and communication as related to surgical technology. Present information both for mally and informally and the ability to draft, revise, and edit medical presentations. Conducting technical research and gathering formation to make professional presentations based on clinical experience is captured in the disciplinary of this course.

STS 2936
Surgical Certification Symposium
2 Credits
This course presents an overview into the surgical technolo gists certification exam. Preparation and understanding of the basic sciences as related to surgical technology. Correlate the preoperative diagnosis interventions, common complications, and operative pathophysiology relative to specific surgical procedures. Describe the principles of problem solving, ethical decision making and risk management as related to the surgi cal patient. Provide health care within the ethical/legal frame work of the surgical technologists role.
Prerequisite: STS 2944

STS 2944
Surgical Clinical I
3 Credits
This course is an overview of clinical skills as applied to real time surgery. Students perform in the clinical setting basic sur gical skills. Surgical procedural documentation is required. Medical asepsis and aseptic technique are required to be ob served and mastered.
Prerequisite: HSC 2006L
Corequisite: STS 2323L

STS 2945
Surgical Clinical II
3 Credits
This course presents an overview into the clinical experience focusing on aseptic technique and patient safety. Interpersonal skills as related to surgical technology and working within a medical team as needed for patient safety. This course con tains all required surgical rotations and hours needed to sit for the National Exam. This course is performed in the clinical set ting.
Prerequisite: STS 2944

STS 2954
Surgical Technologist Portfolio
1 Credits

This course is an overview of the clinical experience. The crea tion of a professional portfolio is utilized in employability skills. The course captures the required documentation needed to sit for the National Certification exam. Professional ism, documentation and medical experience is captured in this course.
Corequisite: STS 2936

SUR 2000C
Surveying I
3 Credits
This course introduces students to the basic methods of plane surveying, use of field-measurement instruments, field-notes recording, and the development of a site plan for use in build ing and construction projects.

SYG 2000
Introduction to Sociology
3 Credits
In this course, students will gain an understanding of the basic sociological concepts and vocabulary, including the methodo logical tools, sociological perspectives, and scientific proce dures used by social scientists to collect data and conduct research. Topics generally include: society and culture, institu tions, socialization, influences, crime, change, groups, sex, race and ethnicity, family, class, and population.
Prerequisites: College level reading and writing skills are re quired.

SYG 2000H
Honors Introduction to Sociology
3 Credits
Same as SYG 2000 with honors content. Honors Program per mission required.
Prerequisites: College level reading and writing skills are re quired.

SYG 2010
Social Problems
3 Credits
Focuses on the description and analysis of current social prob lems, with an emphasis on cause and effect and possible solu tions. Topics include racism, sexism, poverty, pollution, over population, crime, drugs, and other social issues.

SYG 2010H
Honors Social Problems
3 Credits
Same as SYG 2010 with honors content. Honors Program per mission required.

SYG 2012
Introduction to Globalization
3 Credits
Globalization is an umbrella term that encompasses changes in economies, politics, cultures, technologies and societies. The course will help students understand globalization and adopt a global perspective. Converging global institutions and cul tures, and the consequences of global interdependence will be studied. Issues of poverty, food, energy, development and de mocratization will be assessed. Protests against western corpo rations and the challenges posed to small businesses and local cultures will be evaluated. The relationship between globaliza tion and inequity, the fate of cultural diversity in a globalizing world, immigration trends, integration and xenophobia will be investigated. Challenges to environment and issues of social justice will also be identified. Finally, resistance movements to globalization that have helped steer it, but not retard it will be analyzed.
Prerequisite: SYG 2000

SYG 2340
Human Sexuality
3 Credits
Examines physical intrapsychic, and interpersonal aspects of sexuality; also anatomical, physiological and emotional aspects of sexuality, love and attraction, sexual communication, adult sexual behavior, childhood sexual behavior, sexual dysfunc tion and treatments, sexually transmitted diseases, sex and ag ing, legal aspects of sexual behavior, sexual exploitation, and eroticism in American culture. Presentations will be frank and explicit.

SYG 2430
Marriage and Family
3 Credits
Utilizes an applied approach to marriage and the family, with an emphasis on the changing contemporary family with re spect to social and economic status, values, and structures. Topics include sex roles, love relationships, including conflict, sexuality, dating, singlehood, parenthood, cohabitation, di vorce and remarriage.

SYG 2930
Selected Topics in Sociology
3 Credits
Provides an in-depth study of topics in Sociology not covered in other courses. May be repeated once for credit.
Prerequisite: SYG 2000

SYG 2930H
Honors Selected Topics in Sociology
3 Credits
Same as SYG 2930 with honors content. Honors Program per mission required. This course may be repeated once for credit under a different topic.
Prerequisite: SYG 2000

TAR 1170C
B.I.M. I Revit Residential
3 Credits
An introduction to standard architectural drawing types and techniques using Autodesk Revit software. Students will cre ate plans, elevations, sections, and detail drawings while ex ploring the 3-D and BIM capabilities of Autodesk Revit software on residential-scale projects.

Prerequisite: BCN 1250C

TAR 1171C
B.I.M. II Revit Commercial
3 Credits
A second-level course exploring the 3-D and BIM capabilities of Revit software on commercial-scale projects. Topics include content creation, commercial structural systems and architectural visualization.
Prerequisite: TAR 1170C

TAR 1172C
B.I.M. III Revit M.E.P.
3 Credits
An introduction to standard MEP (mechanical, electrical and plumbing) systems using Revit computer software. Course work focuses on the collaborative efforts of architects and engineers in the design of building systems. Software capabilities[are explored for analyzing and selecting building system components.
Prerequisite: TAR 1170C

TAR 2053C
Introduction to Computer-Aided Design and Drafting
3 Credits
A first term course in the use of industry standard CADD software (latest version of CAD) for the development of design and construction documents. Topics covered include advanced editing techniques, dimensioning, multi-view drawings and isometric drawings. Completion of BCN 1250C or prior drafting experience strongly recommended.

TAR 2054C
Intermediate Computer Aided Design and Drafting
3 Credits
A second level course in the use of industry standard CADD software (latest version of CAD) for the development or design and construction documents. Topics covered include advanced editing techniques, dimensioning, multi-view drawings and isometric drawings. Completion of TAR 2053C or prior CADD experience strongly recommended.
Prerequisite: TAR 2053C

TAX 2000
Federal Tax Accounting I
3 Credits
This course covers practice in the application of the Internal Revenue Code to determine individual income tax.
Prerequisite: ACG 2021 or APA 1111

TAX 2010
Federal Tax Accounting II
3 Credits
This course covers practice in the application of the Internal Revenue Code to determine partnership and corporate income taxes.
Prerequisite: TAX 2000

THE 1000
Introduction to Theatre Arts
3 Credits
In this course, students will explore dramatic structure, techniques, and various organizational elements. The course provides an introduction to theatre as a collaborative art form through the critical analysis of its historical context, production, theory, and connections to theatrical literature, including the western canon.
Prerequisites: College level reading and writing skills are required.

THE 1000H
Honors Introduction to Theatre Arts
3 Credits
Same as THE 1000 with honors content. Honors Program permission required.
Prerequisites: College level reading and writing skills are required.

THE 1304
Script Analysis
3 Credits
Teaches the techniques of closing reading of dramatic texts for the purpose of acting, directing and designing for the stage.
Prerequisite: THE 1000

TPA 1200
Stagecraft
3 Credits
An introductory course in technical production including scenic construction, sound and properties, state lighting, and theatre organization.

TPA 1248
Makeup for the Stage
3 Credits
The study of principles, materials, and applications of theatrical makeup.

TPA 1290
Performance Workshop
3 Credits
Provides the opportunity for participation in a major theatrical production as an actor. This course may be repeated two times for credit.

TPP 1110
Acting I
3 Credits
Emphasizes the basic techniques of acting, with an emphasis on the Stanislavsky system.

TPP 1111
Acting II
3 Credits
Emphasizes the use of the Stanislavsky system in more advanced scenes. Additional prerequisite: consent of instructor.

Prerequisite: TPP 1110

TPP 1160
Voice and Movement Techniques for the Stage
3 Credits
An exploration of basic vocal skills. Exercises for self-aware ness, physical strength, flexibility, and versatility for the actor. Required for all theatre majors. (Also open for non-majors.)

ZOO 1010C
General Zoology
3 Credits
Basic course pertaining to the development, anatomy, physiol ogy, genetics, ecology, and natural relationships of the animal kingdom combined and integrated with a hands-on laboratory component. A special fee will be charged for this course.
Prerequisites: College level reading, writing, and math skills are required.

ZOO 1450
Ichthyology
3 Credits
Designed to provide an introduction to the study of fish. Top ics introduced include fish anatomy, reproduction, physiology, nutrition, classification and differences among the families of fish.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: ZOO 1450L

ZOO 1450L
Ichthyology Lab
1 Credit
Focuses on fish identification.
Prerequisites: College level reading and writing skills are re quired.
Co-requisite: ZOO 1450

PSAV Course Descriptions

AER 0014
Automotive Services Assistor
Vocational Credits 10
Clock Hours 300
A general introduction to the procedures related to automotive shop safety, tool and equipment orientation, hazardous waste handling and disposal, the use of service information, mathe matical computations commonly used in the automotive in dustry, preventive maintenance services, employability, and communication skills.

AER 0110
Engine Repair Technician
Vocational Credits 5
Clock Hours 150
An in-depth study of engine operations, engine components, construction and materials, engine problem diagnosis to in clude engine removal and replacement, engine disassembly, inspection and reassembly to manufacturer's specifications.

AER 0172
Automotive Heating and Air Conditioning Technician
Vocational Credits 5
Clock Hours 150
Provides the student with an in depth examination of air con ditioning and heating system operation including Title IV of the Clean Air Act. Students will receive hands-on instruction in industry accepted practices for recovery and recycling of re frigerants, service, repair, testing, and diagnosis of automotive air conditioning systems using state-of-the-art tools and equip ment.

AER 0257
Automatic Transmission and Transaxles Technician
Vocational Credits 5
Clock Hours 150
Student technicians will learn the theory of operation, inspec tion, testing, diagnosis, in-vehicle services, and overhaul of au tomatic transmissions and transaxles. Component analysis includes: planetary gears, multiple disc clutches, bands, hy draulic systems and controls, torque converters, electrical, and electronic controls.

AER 0274C
Manual Drivetrain and Axel Technician
Vocational Credits 5
Clock Hours 150
A theoretical and practical application course of study that in cludes the diagnosis, service and repair of four and five speed manual transmissions and transaxles, mechanical and hydrau lic clutch systems, front and rear wheel drive axles, all-wheel drive systems (AWD) and 4X4 transfer cases and drive sys tems.

AER 0360
Automobile Electrical/Electronic System Technician
Vocational Credits 10
Clock Hours 300
This course provides an in-depth study of automotive electri cal systems including interpreting wiring diagrams and using testing and diagnostic equipment. Specific component analy sis includes batteries, starting systems, charging systems, light ing systems, gauges, and power accessories (windows, door locks, windshield wipers, etc.).

AER 0418
Automotive Brake Systems Technician
Vocational Credits 5
Clock Hours 150
Students will learn the theory of operation, testing, diagnosis, and service of brake systems. Specific component analysis will include drum and disc brakes, hydraulic controls, power assist units, parking brakes, braking electrical circuits, and antilock braking systems.

AER 0453
Automobile Suspension and Steering Technician
Vocational Credits 5
Clock Hours 150
Students will learn the design, components, theory of opera tion, inspection, diagnosis, and service of suspension and steering systems. Component analysis will include front and rear suspensions, steering linkages, steering gears, steering col umns, wheels, tires, and alignment angle measurement and adjustment.

AER 0503
Automotive Engine Performance Technician
Vocational Credits 10
Clock Hours 300
Provides an in-depth study of the fuel, ignition, and emission control systems of an automobile. Major topics include engine operation, solid state ignition, electronic fuel injection and the use of comprehensive engine systems tests to isolate and repair common engine performance and emission system malfunc tions.

AER 0871
Automotive Compressed Natural Gas Technician
Vocational Credits 5
Clock Hours 150
Prepares students for entry into the automotive service indus try. Students explore career opportunities and requirements of a professional auto mechanic. Students study the diagnosis, service, maintenance, installation, and repair of automotive compressed natural gas systems.

AER 0872
Automotive Liquid Propane Gas Technician
Vocational Credits 5
Clock Hours 150

This course prepares students for entry into the automotive service industry. Students explore career opportunities and re quirements of a professional auto mechanic. Students study diagnostics, maintenance, installation, and repair of automo tive liquid propane gas systems.

AER 0875
Alternative Fuels Maintenance Technician
Vocational Credits 10
Clock Hours 300
This course prepares students for entry into the Alternative Fuels Service industry. Content emphasizes beginning skills and concepts as a recommended requisite. Students study fa cility and personal safety, engine operation, types of alterna tive fuels, hybrid, and electric vehicles. Alternative fuel and electric vehicle maintenance and customer service are in cluded.

AER 0876
Advanced Alternative Fuels Technician
Vocational Credits 10
Clock Hours 300
The Alternative Fuels Technician course includes the diagno sis, service, and repair of hybrid, electric vehicle system com ponents, battery, charging systems, and general alternative fuel vehicles. Methods of using natural gas fuel systems and alternative fuel conversions are included.

AER 0877
CNG Fuel System Inspector
Vocational Credits 5
Clock Hours 150
The CNG Fuel System Inspector course includes methods for inspecting CNG storage containers, and CNG components. Students study safety inspection methods for compressed nat ural gas storage containers, system installations, vehicle instal lations, vehicle components, fuel delivery systems and types of potential damage.

ARR 0022
Damage Analysis and Estimating
Vocational Credits 2.5
Clock Hours 75
The Damage Analysis and Estimating course prepares students for entry into the Automotive Collision and Repair industry. Students study damage analysis; estimating; vehicle construc tion and parts identification; and customer relations and sales skills.

ARR 0112
Automotive Collision Welding, Cutting and Joining
Vocational Credits 2.5
Clock Hours 75
The Automotive Collision Welding, Cutting and Joining course prepares students for entry into the Automotive Collision and Repair industry. Students study basic welding skills specifi cally related lo automotive collision and repair; safety precau tions; metal welding, cutting, and joining.

ARR 0140
Automotive Collision Repair Helper/Assistant
Vocational Credits 5
Clock Hours 150
The Auto Body Helper/Assistant course prepares students for entry into the Auto Collision industry. Content emphasizes be ginning skills and concepts as a recommended requisite. Stu dents study shop and personal safety skills, basic automotive components, tools and equipment, occupational safety, engine operation, and workplace employment skills.

ARR 0141
Automotive Collision Refinish Technician
Vocational Credits 15
Clock Hours 450
The Automotive Collision Refinishing Technician course pre pares students for entry into the Automotive Collision and Re pair industry. Students study safety precautions; surface preparation; spray gun and related equipment operation; paint mixing, matching and applying; paint defects (causes and cures); and final detailing.

ARR 0295
Structural Repair Technician
Vocational Credits 11.6
Clock Hours 350
The Structural Damage Repair Technician course prepares stu dents for entry into the Automotive Collision and Repair in dustry. Students study frame inspection and repair; unibody and unitized structure inspection, measurement, and repair; fixed glass; steering and suspension; heating and air condition ing; cooling systems; drive train; fuel, intake and exhaust sys tems; and restraint systems.

ARR 0312
Non-Structural Damage Repair Technician
Vocational Credits 10
Clock Hours 300
The Non-Structural Damage Repair Technician course pre pares students for entry into the Automotive Collision and Re pair industry. Students study safety the preparation; outer body panel repairs, replacements, and adjustments; metal fin ishing and body filling; movable glass and hardware; plastics and adhesives; electrical; and brakes.

CJK 0002
Introduction to Law Enforcement
Vocational Credits .40
Clock Hours 12
This course provides an overview of the law enforcement basic recruit training program and the requirements to become a sworn officer. It describes basic criminal justice ethics and com mand structure. The course also provides a basic introduction to the criminal justice system.

CJK 0006
Introduction to Law Enforcement 1-6
Vocational Credits 2.2
Clock Hours 67
This module includes units of instruction in the following top ics: The Florida Criminal Justice System, Constitutional Law and Florida Statutes, Criminal Justice Values and Ethics, Com munication and Interpersonal Skills, and Human Interaction.

CJK 0016
Communication
Vocational Credits 0.80
Clock Hours 24
This course focuses on aspects of professional communication officers should use on the job. It explains challenges to effective communication and concepts such as procedural justice, empa thy, and professionalism.

CJK 0018
Legal
Vocational Credits 2.13
Clock Hours 64
He course provides foundational knowledge of the law and how officers apply the law to specific situations. The course de scribes the basics of enforcing laws without infringing on indi vidual rights.

CJK 0019
Interviewing and Repot Writing
Vocational Credits 1.86
Clock Hours 56
This course provides an introduction to lawful and effective in terviews as part of the investigative process as well as the fun damentals of note-taking and report writing.

CJK 0020
Law Enforcement Vehicle Operations
Vocational Credits 1.6
Clock Hours 48
This module includes instruction in the following topics: phys iological and psychological factors which impact vehicle oper ation and control; legal considerations involved in the operation of emergency vehicles; civil and criminal liability; routine maintenance and inspection of police vehicles; vehicle dynamics; types of skids and their causes; and basic driving skills.

CJK 0021
Serving Your Community
Vocational Credits 1.13
Clock Hours 34
This course provides an introduction to some of the diverse communities officers serve and provides an overview of how to respond with professionalism while keeping everyone on the scene safe.

CJK 0023
Introduction to Law Enforcement
Vocational Credits 0.13
Clock Hours 4
At the end of this course, the student will understand the importance of the Criminal Justice Standards and Training Commission and the requirements for certification as a law enforcement auxiliary officer in the state of Florida.

CJK 0024
Legal Concepts
Vocational Credits 0.66
Clock Hours 20
At the end of this course, the student will have a foundational understanding of the United States legal system and the vari ous sources of laws.

CJK 0025
Patrol and Professional Communication
Vocational Credits 0.4
Clock Hours 12
At the end of this course, the student will know the elements of effective communication.

CJK 0026
Interactions in a Diverse Community
Vocational Credits 0.4
Clock Hours 12
At the end of this course, the student will recognize a disability as defined by the Americans with Disabilities Act (ADA) and use the guidelines to maintain the rights of a disabled person. The student will also know the criminal elements of abuse, ne glect, or exploitation of an elderly or disabled adult. The stu dent will identify the characteristics of a crisis and determine an appropriate crisis management intervention resolution.

CJK 0027
Calls for Service and Arrest Procedures
Vocational Credits .8
Clock Hours 24
At the end of this course, the student will understand how to respond to calls for service, assess a situation upon arrival, and contact complainants and witnesses at the scene.

CJK 0028
Traffic Stops and Crash Investigations
Vocational Credits .93
Clock Hours 28
At the end of this course, the student will identify common traffic violations and direct pedestrian traffic by identifying safe and efficient actions in planned or emergency situations.

CJK 0029
Crime Scene and Courtroom Procedures
Vocational Credits .26
Clock Hours 8

At the end of this course, the student will understand how to secure and protect a crime scene. The student will understand possible responses the defense may raise in a criminal case and understand the different types of court proceedings.

CJK 0031
First Aid for Criminal Justice Officers
Vocational Credits 1.3
Clock Hours 40
This module includes instruction in the following topics: re sponding to medical emergencies; musculoskeletal and soft tis sue injuries; medical related issues.

CJK 0040
Criminal Justice Firearms
Vocational Credits 2.7
Clock Hours 80
This module includes instruction in the following topics: fire arm familiarization; types of ammunition, fundamentals of marksmanship; drawing and holstering a weapon; loading and unloading a weapon; use of cover; weapon malfunctions; live fire exercises; weapon cleaning; qualification; and survival shooting.

CJK 0051
Criminal Justice Defensive Tactics
Vocational Credits 2.7
Clock Hours 80
This course teaches prospective officers how to control subjects and defend themselves using appropriate defensive tactics in accordance with the recommended response to resistance ma trix.

CJK 0063
Fundamentals of Patrol
Vocational Credits 1.33
Clock Hours 40
This course provides an overview of the law enforcement tech niques and tactics that officers use while on patrol. This course is an introduction to the use of communications equipment, community-oriented policing, and officer safety and survival skills. It also explains how to respond to non-criminal calls and conduct structure and area searches and provides resources that officers use while on patrol.

CJK 0072
Crimes against Persons
Vocational Credits 1.60
Clock Hours 48
This course provides an introduction to the basics of conduct ing investigations and describes a variety of crimes involving people such as assault and battery, domestic violence, child abuse, sexual offenses, and human trafficking. It provides the foundational knowledge for initial response and investigation of these crimes.

CJK 0073
Crimes Involving Property and Society
Vocational Credits 0.40
Clock Hours 12
This course provides an introduction to a variety of crimes in volving property and society, such as retail theft, fraud, and animal cruelty. It provides the foundational knowledge for ini tial response and investigation of these crimes.

CJK 0079
Crimes Scenes Follow-Up Investigations
Vocational Credits 1.13
Clock Hours 34
This course is an introduction to methods for securing, protect ing, and preserving a crime scene to avoid contaminating any evidence. The course also explains the importance of collect ing, documenting, and maintaining the physical evidence.

CJK 0093
Critical Incidents
Vocational Credits 1.46
Clock Hours 44
This course provides an overview of law enforcement tech niques and tactics used when confronting large-scale or critical incidents, including natural disasters, active shooters, exposure to hazardous materials, and explosive devices.

CJK 0096
Criminal Justice Officer Physical Fitness Training
Vocational Credits 2.0
Clock Hours 60
This course provides the student with the physical condition ing necessary to perform the essential functions of a police of ficer.

CJK 0300
Introduction to Corrections
Vocational Credits 1.1
Clock Hours 32
This course provides the student with an overview of the cor rectional officer training program to include inmate rights.

CJK 0305
Communications
Vocational Credits 1.3
Clock Hours 40
This course provides the student with practical skills for inter personal communication, interviewing, note taking and report writing.

CJK 0310
Officer Safety
Vocational Credits 0.5
Clock Hours 16
This course provides the student with practical skills to iden tify inmate threats, manipulations, deception and contraband.

CJK 0315
Facility and Equipment
Vocational Credits 0.3
Clock Hours 8
This course provides the student with practical skills to issue, receive and inventory equipment used within a correctional fa cility.

CJK 0320
Intake and Release
Vocational Credits 0.6
Clock Hours 18
This course provides the student with an overview of inmate intake, classification ad release procedures.

CJK 0325
Supervising in a Correctional Facility
Vocational Credits 1.3
Clock Hours 40
This course provides the student with practical skills to ob serve and supervise inmates conducting a variety of activities.

CJK 0330
Supervising Special Populations
Vocational Credits 0.7
Clock Hours 20
This course provides the student with awareness of special in mate populations.

CJK 0335
Responding to Incidents and Emergencies
Vocational Credits 0.5
Clock Hours 16
This course prepares the student to use equipment, crime scene control and chain of custody procedures for responding to emergencies.

CJK 0340
Officer Wellness and Physical Abilities
Vocational Credits 1.0
Clock Hours 30
This course prepares the student for the physical demands of being a correctional officer through a wellness and fitness training program.

CJK 0393
Cross-Over Program Updates
Vocational Credits 0.27
Clock Hours 8
This course is designed for instructors to deliver expanded or updated instruction on curriculum topics contained in this cross-over program. The eight hours do not have to be taught in one block but may be distributed as needed throughout the program with the approval of the training center director. For example, additional time may be used to integrate updated techniques or instruction from the high liability textbook, ap ply relevant case law, or review topics from the curriculum textbook not specifically designated for classroom instruction in this cross-over program. Because these hours may be distrib uted to other courses in the cross-over program, a written end of-course exam is not required for the cross-over program up dates course.

CJK 0394
Cross-Over Program Updates
Vocational Credits 0.33
Clock Hours 10
This course is designed for instructors to deliver expanded or updated instruction on curriculum topics contained in this cross-over program, e.g., new techniques in a high liability area or application of relevant case law. The ten hours do not have to be taught in one block but may be distributed as needed throughout the program.

CJK 0400
Traffic Incidents
Vocational Credits 0.40
Clock Hours 12
This course is an introduction to the basics of traffic incidents other than traffic stops and includes lessons on legal terms and the fundamentals of directing traffic, addressing parking viola tions and conducting vehicle searches.

CJK 0401
Traffic Stops
Vocational Credits 0.80
Clock Hours 24
This course is an introduction to the fundamentals of conduc ing traffic stops with professionalism while maintaining the safety of all involved. The course covers the basics of unknown and high-risk traffic stops.

CJK 0402
Traffic Crash Investigations
Vocational Credits 1.00
Clock Hours 30
This course provides an overview of conducting traffic crash investigations using a systematic approach. The course de scribes how to respond to, assess, and protect the scene as well as documentation and returning the scene to normal condi tions.

CJK 0403
DUI Traffic Stops
Vocational Credits 0.80
Clock Hours 24
This course provides an overview of detecting impaired driv ing, administering field sobriety tests, making arrests, and re cording the evidence of a dui offense.

CJK 0421
Dart Firing Stun Gun
Vocational Credits 0.13

Clock Hours 4
This course provides foundational knowledge of the operation of conducted electrical weapons (CEW), particularly dart-firing stun guns, as well as the effect on the human body.

DIM 0101
Diesel Engine Mechanic/Technician Helper
Vocational Credits 5
Clock Hours 150
The Diesel Engine Mechanic/Technician Helper course pre pares students for entry into the Diesel Engine Service Indus try. Content emphasizes beginning skills and concepts as a recommended requisite. Students study shop and personal safety skills, basic diesel components, tools and equipment, oc cupational safely, engine operation, and workplace employ ment skills.

DIM 0102
Diesel Electrical & Electronics Technician
Vocational Credits 10
Clock Hours 300
The Diesel Electrical and Electronics Technician course pre pares students for entry Into the Diesel Engine Service Indus try. Content emphasizes beginning skills and concepts as a recommended requisite. Students study general electrical sys tems, batteries starting, charging, lighting, gauges, warning de vices, and related electrical system diagnostics, service, and repair.

DIM 0103
Diesel Engine Preventive Maintenance Technician
Vocational Credits 5
Clock Hours 150
The Diesel Engine Preventative Maintenance Technician course prepares students for entry into the Diesel Engine Ser vice industry. Content emphasizes beginning skills and con cepts as a recommended requisite. Students study engine system, cab and hood systems, electrical/electronic systems, frame and chassis systems diagnostics, service, and repair.

DIM 0104
Diesel Engine Technician
Vocational Credits 10
Clock Hours 300
The Diesel Engine Technician course prepares students for en try into the Diesel Engine Service Industry. Content empha sizes beginning skills and concepts as a recommended requisite. Students study engine, cylinder head, valve train, en gine block, lubrication, cooling, air induction, exhaust, fuel, and engine brakes diagnostics, service, and repair.

DIM 0105
Diesel Brakes Technician
Vocational Credits 10
Clock Hours 300
The Diesel Brakes Technician course prepares students for en try into the Diesel Engine Service industry. Content empha sizes beginning skills and concepts as a recommended requisite. Students study diagnostic, service, and repair of air, and hydraulic brakes.

DIM 0106
Diesel Heating & A/C Technician
Vocational Credits 5
Clock Hours 150
The Diesel Heating and Air Conditioning Technician course prepares students for entry into the Diesel Engine Service in dustry. Content emphasizes beginning skills and concepts as a recommended requisite. Students study diagnostic, service, and repair of HVAC, and *NC* systems.

DIM 0107
Diesel Steering & Suspension Technician
Vocational Credits 5
Clock Hours 150
The Diesel Steering and Suspension Technician course pre pares students for entry into the Diesel Engine Service indus try. Content emphasizes beginning skills and concepts as a recommended requisite. Students study diagnostic, service, and repair of steering, suspension, wheel alignment, wheels, tires, and frame systems.

DIM 0108
Diesel Drivetrain Technician
Vocational Credits 5
Clock Hours 150
The Diesel Drivetrain Technician course prepares students for entry into the Diesel Engine Service industry. Content empha sizes beginning skills and concepts as a recommended requi site. Students study diagnostic, service, and repair of clutch, transmission, driveshaft, universal joint, and drive axle sys tems.

DIM 0109
Diesel Hydraulics Technician
Vocational Credits 5
Clock Hours 150
The Diesel Hydraulics Technician course prepares students for entry into the Diesel Engine Service industry. Content empha sizes beginning skills and concepts as a recommended requi site. Students study diagnostic, service, and repair of hydraulic, pumps, filtration/reservoir, hoses, fittings, connect ors, control valves, and actuator systems.

DIM 0110
Diesel Power Train Technician
Vocational Credits 5
Clock Hours 150
The Diesel Power Train Technician course is designed to build on the skills and knowledge students learned in the Diesel

Drivetrain Technician course for entry into the Heavy Equip ment industry. Content emphasizes beginning skills. Students study shop safety procedures, track systems, power trains, components, and qualifications for employment.

DIM 0130
Diesel Brakes/Fluids Technician
Vocational Credits 10
Clock Hours 300
The Diesel Brakes/Fluids Technician course is designed to build on the skills and knowledge students learned for entry into the Heavy Equipment industry. Content emphasizes be ginning skills and concepts. Students study air and hydraulic brakes/fluid systems.

EMS 0110
Emergency Medical Technician
Vocational Credits 10
Clock Hours 300
This course prepares students for employment as state certified Emergency Technicians in accordance with Chapter 401, Flor ida Statute and Rule Chapter 64J, Florida Administrative Code. This course is required for firefighter students seeking to be come state certified as either a Fire Fighter I/II in accordance with Chapter 633, Florida Statutes and Rule Chapter 69A-37, F.A.C. The course content includes but is not limited to patent assessment, airway management, cardiac arrest, external and internal bleeding and shock, traumatic injuries, poisoning, stroke, communicable diseases, alcohol and drug abuse, trans portation of patient.

FFP 0030
Fire Fighter I
Vocational Credits 6.4
Clock Hours 191
The Firefighter program content includes, but is not limited to, orientation to the fire service, fire alarms and communication, vehicles, apparatus and equipment, fire behavior, portable ex tinguishers, fire streams, fundamentals of extinguishment, lad ders, hoses, tools and equipment, forcible entry, salvage, overhaul, ventilation, rescue, protective breathing equipment, first responder emergency medical techniques, water supplies, principles of in-service inspections, safety, controlled burning (Live Fire Training), and employability skills. This course also includes Wild Land firefighting and Hazardous Materials.

FFP 0031
Fire Fighter II
Vocational Credits 10.0
Clock Hours 301
The Firefighter program content includes, but is not limited to, orientation to the fire service, fire alarms and communication, vehicles, apparatus and equipment, fire behavior, portable ex tinguishers, fire streams, fundamentals of extinguishment, lad ders, hoses, tools and equipment, forcible entry, salvage, overhaul, ventilation, rescue, protective breathing equipment, first responder emergency medical techniques, water supplies, principles of in-service inspections, safety, controlled burning (Live Fire Training), and employability skills. This course also includes Hazardous Materials Operations Level training. Prerequisite: FFP 0030

FFP 0141
Emergency Services First Responder
Vocational Credits 1.8
Clock Hours 53
Trains individuals to accept and recognize medical standards in emergency first aid procedures to include medical, environ mental, and trauma related emergencies.

HSC 0003
Fundamentals Allied Health Occupations
Vocational Credits 0.5
Clock Hours 16
This course introduces the student to skills and procedures common to allied health occupations, including basic first aid and emergency care, safety, security, proper body mechanics, vital signs, wellness, disease control, blood borne pathogens and AIDS.

PMT 0070
Welder Assistant I
Vocational Credits 5
Clock Hours 150
This course prepares students for entry into the welding indus try. Students explore career opportunities and requirements of a professional welder. Content emphasizes beginning skills key to the success of working in the industry. Students study workplace safety and organization, basic manufacturing pro cesses, metals identification, basic interpretation of welding symbols, and oxyfuel gas cutting practices.

PMT 0071
Welder Assistant II
Vocational Credits 5
Clock Hours 150
This course is designed to build on the skills and knowledge students learned in Welder Assistant I for entry into the weld ing industry. Students explore career opportunities and re quirements of a professional welder. Content emphasizes beginning skills key to success of working in the welding in dustry. Students study drawings and welding symbols, inter mediate oxyfuel gas cutting practices, plasma arc cutting principles, and basic shielded metal arc welding (SMAW).

PMT 0072
Welder, SMAW I
Vocational Credits 5
Clock Hours 150
This course prepares students for entry into the welding indus try as a basic shielded metal arc welder (SMAW). Students ex plore career opportunities and requirements of a professional welder. Content emphasizes beginning skills key to the suc cess of working in the welding industry. Students study basic shielded metal arc welding (SMAW), carbon arc gouging (CAG) principles and visual examination skills.

PMT 0073
Welder: SMAW 2
Vocational Credits 5
Clock Hours 150
This course is designed to build on the skills and knowledge students learned in Welder SMAW I for entry into the welding industry as a basic shielded metal arc welder (SMAW). Stu dents explore career opportunities and requirements of a pro fessional welder. Content emphasizes beginning skills key to the success of working in the welding industry. Students study employability and welding careers, and intermediate shielded metal arc welding (SMAW).

PMT 0074
Welder: Welder
Vocational Credits 15.0
Clock Hours 450
This welder course builds on the skills and knowledge stu dents earned in Welder Assistant and SMAW courses. Stu dents explore career opportunities and requirements of a professional welder. Content emphasizes skills key to the suc cess of working in the welding industry. Students study basic and intermediate Gas Metal Arc Welding (GMAW), and basic and intermediate Flux-Core Arc Welding (FCAW), basic and intermediate Gas Tungsten Arc Welding (GTAW), and a basic understanding of pipe welding.

PMT 0075
Advanced Welder I
Vocational Credits 20.0
Clock Hours 600
The Advanced Welder I course prepares students for entry into the welding industry. Students explore career opportunities and requirements of a professional welder. Content empha sizes advanced skills key to the success of working in the weld ing industry. Students study intermediate and advanced Shielded Metal Arc Welding (SMAW) Class-B Pipe Welder, pipe fitting fabrication techniques, and advanced Gas Tung sten Arc Welding (GTAW) skills.
Prerequisite: Passed secondary/post-secondary welding tech nology course.

PMT 0076
Advanced Welder II
Vocational Credits 5.0
Clock Hours 150
The Advanced Welder II course is designed to prepares ad vanced welders for entry into emerging welding industries. Students explore career opportunities and requirements of a professional welder. Content emphasizes advanced skills key to the success of working in the welding industry. Students study emerging technologies directly related to geographically relevant welding needs of business and industry.
Prerequisite: Passed secondary/post-secondary welding tech-

SCY 0010
Bail Bonds
Vocational Credits 4.0
Clock Hours 120
In this course the student will learn how to apprehend and de tain defendants, surrender defendants to the proper authori ties, execute and sign bonds, handle collateral receipts, and deliver bonds to the proper authorities.

SCY 0051
Private Investigation I
Vocational Credits 0.8
Clock Hours 24
Prepares students for the unarmed Private Investigation, Class "CC" License.

SCY 0052
Private Investigation II
Vocational Credits 0.5
Clock Hours 16
Completes the training for a Private Investigator Intern to ob tain a Class "CC" license.
