Imaging the Future

Students in the radiography program receive an exceptional education that combines rigorous classroom and laboratory study with clinical experiences. Radiographers are healthcare professionals who take x-rays. A radiography degree equips students with practical knowledge using the latest technologies to provide quality patient care.

If you’re interested in anatomy and radiologic sciences, this is a great choice. Graduates are prepared to take the national certification exam offered by the American Registry of Radiologic Technologists (ARRT).

Graduates are employed by hospitals, imaging centers, urgent care facilities, physicians’ offices and orthopedic centers. The last seven weeks of the program allow the graduating students the choice of clinical experience – CT, MRI, emergency room, surgery and portables. Excellent attendance and punctuality coupled with good interpersonal skills are important for students, and for obtaining future employment.
Admissions

Health sciences careers are in demand, with great salaries and opportunities to make a difference. Planning is the key to academic success. First, apply online at hccfl.edu/registernow.

As program prerequisites are completed, submit a separate health sciences application through hccfl.edu/healthsciences and carefully note the application deadline. Additional application fees may be required.

For in-depth information, visit hccfl.edu/healthsciences and click on the Health Sciences Handbook.

The radiography program requires prerequisite courses that must be successfully completed prior to applying. The program is 22 months and is a limited access program with one class per year starting in the fall term. Approximately 20 students are selected each year by the highest GPA in the prerequisite courses. The students will rotate through the major hospitals in the Tampa Bay area for a top-quality, well-rounded clinical experience. A background check and drug screen are also required.

Planning Beyond Coursework

Radiography classes vary between 8:30 a.m. to 4:00 p.m. on non-clinical days.

On days when students are assigned to clinical training, hours range from 7:30 a.m. to 3:30 p.m. These days vary by term.
