Log Out
Once you finish your MAPP, come by our office to receive your MAPP Results
Executive Summary

For

Sample For

We are pleased to present you with the highlights of top six motivators! These were automatically generated when you completed the 71-question MAPP assessment based on your specific answers. This report is as unique as you are!

Your report has six bullets – one bullet for each of your top six motivators. Each motivator is explained followed by advice on how to apply this to your career.

- You naturally generate lots of new ideas and ways of doing things. You like to be included in brainstorming sessions, or whenever new and different solutions must be found. You are also highly intuitive, and likely to suddenly “just know” the solution.
- You have a creative imagination and are gifted at using words (verbally and/or in writing) to express new ideas, concepts or plots. You can be called on when a fresh, new way to communicate important information is needed.
- You will automatically see the big picture first before seeing the details. You can be a big help with strategic planning, and identifying possibilities.
- You have a talent for recognizing colors, patterns, shapes, and their relationship to each other, as well as their interaction with their environment.
TOP TEN VOCATIONAL AREAS

In this section MAPP presents those ten occupational titles with the highest motivation and greatest potential for the individual's success. When people are searching for careers or being considered for jobs, this list of the ten top occupations should be given serious consideration.

<table>
<thead>
<tr>
<th>Occupation</th>
<th>Rank</th>
</tr>
</thead>
<tbody>
<tr>
<td>Creative Writing: author; imagination, vocabulary</td>
<td>1</td>
</tr>
<tr>

PERSONAL ANALYSIS

The Personal Analysis indicates the basis for every rating, percentage, code, and narrative paragraph produced by MAPP. This report is directly based on the responses of an individual to the 71-triad, forced-choice preference survey. The source information comes from the person’s indicated preferences in the assessment - and nowhere else. Therefore, the appraisal only reports what the individual was saying about “self” through those responses to the most/least choices. Responses create a record of the level of motivation for each of twenty-three traits (see section 3.2). By complex “construct” analysis, the computer identifies what happens as the result of the combined motivational interaction of all of those twenty-three traits. This complex interaction of all traits produces the rating and percentage for each of the factors in MAPP. Please keep in mind how many different trait combinations can produce the same ratings for a factor in MAPP. Every number presented in MAPP output is the result of these complex trait interactions, and it is statistically unlikely that any two individual’s appraisals would ever be the same!
### Match a Person to O*NET Jobs
